J7, DOMINICA. Five members of the Florida DXPedition Group, Bill/W4WX (J75WX), Clarence/W9AAZ (J79AA), Larry/W1LR (J79LR), Cory/N1WON (J79CM*) and Vance/N5VL (J79VL*) will be on Dominica October 26th-November 2nd (* callsigns requested). They will operate from the Picard Beach Resort Cottages using only vertical antennas. Look for them during the CQWW DX SSB Contest as J75J. They will be on all bands and modes prior to and after the contest. QSL J75J via their manager KR4DA and all others via their home callsigns.

JW, SVALBARD. Harald/LA6LHA and Roger/LA4GHA are doing a mini DXpedition to Svalbard JW. They will operate from August 13-15th. Their callsigns will be JW6LHA (Harald) and JW4GHA (Roger). Activity will be on HF and 6 meters. QSL via bureau or direct to their home callsign as per the callbook address.

KEWEENAW PENINSULA ON THE AIR! Matt/KB8KNM and Dan/KB8UYZ will activate the rare Grid EN67, from Michigan's Keweenaw Peninsula, September 5th. And for the county hunters, that's Keweenaw County. Listen for K8C on 80-2 meters SSB. Dan informs OPDX that this is just a one day operation. He states, "It's about an 8 hour drive from our QTH, and the spot we have chosen is about another 1 hour out in the woods (taking Jeeps to get back in there). We'll be operating from a cliff overlooking Lake Superior. Nice spot. This will be our first trip to EN67, and if all goes well, we do plan additional (operations), longer ones in the future. QSL direct via Dan, KB8UYZ. All QSLs will be answered. A S.A.S.E. is appreciated, but not required.

KG4, GUANTANAMO BAY. Bill/W4WX (KG4DX), a member of the Florida DXPedition Group, will be at Guantanamo Bay, Cuba, August 10-14th. Bill will operate from the GTMO club station. Look for him on SSB, RTTY, and PSK-31 on most bands. QSL with SASE via his home callsign.

KH7K, KURE ATOLL. The Pacific DX Group is planning a DXpedition to Kure Atoll starting in mid-October for a 10 to 11 day operation. The team leaders are Kimo/KH7U and Patrick/NH6UY. They will be joined by an experienced international team of operators. The team consisting of about 15 operators will be active on 160-6 meters on SSB, CW, RTTY and with some PSK31. Operators mentioned so far are: KH7U, NH6UY, N4XP, WB4JTT, KO4RR, AA7A, N6MZ, DJ9ZB, I8NHJ, AH9B, N0AX, RZ3AA and JH7OHF. Kure is number 29 in North America and number 17 overall in the DX Magazine's "Most Wanted" for 2003. There has not been activity from here since 1997 and that operation resulted in a limited number of QSOs. Currently it is a wild life refuge normally closed to entry, and they are very lucky to be able to gain permission to land there. They want to give KH7K to as many North American DXers as they can on as many bands as possible. However, their primary target will be Europe. They also hope to provide a daily

report and pictures while the DXpedition is in progress via the team's Web site. The Web page is currently under construction and can be found at: http://www.dxpedition.info
The cost to make Kure available is very high even though the team members are absorbing a large portion of the expenses. They must first fly to Midway Island and then sail to Kure, so they are experiencing both plane and boat expenses. The trip will take a total of one month with an estimated 11 days on the Atoll for operating. Elliott, K7ER, is their NA point of contact for funds. His E-mail address is: funds-NA-SA-kure@inix.com
It was mentioned that there will be no online logs. More information will be forthcoming.

LIGHTHOUSE ACTIVITY.....
International Lighthousre/Lightship Weekend 2004 - Mike, GM4SUC, Organizer and Coordinator, reminds us that the ILLW is August 21-22nd. They have 250 stations in 37 countries confirmed. A full list can be found at: http://illw.net/2004_list.htm
If you have not registered your lighthouse or lightship station with Kevin, VK2CE, could you please fill in the entry form at: http://illw.net/2004.htm
All they need is some good propogation for the weekend. Enjoy the weekend and have fun working all the lighthouses and lightships.

Francis, F6HKS, will be active in the ILLW from the Port Leucate Lighthouse (Languedoc-Roussillon, Province in South France - PB 147 and FRA230) as F6HKS/P between the evening of August 20th until 1000z on August 22nd. Activity will be on 80/40/30/20/15 meters mainly CW, but SSB upon request. QSL direct to home callsign (SAE+Postage) or via the French Bureau.

The F6KUM ARS team will be active in the ILLW from the Cap d'Ailly Lighthouse (PB 009 and FRA 012).

Jean, F5IRC, will be active in the ILLW from the Antifer Lighthouse (PB 050 and FRA 220). This activation on HF is the first time.

The "Grupo Titan", LT7W (http://www.lt7w.tk) will operate during the ILLW from Faro "Golfo Nuevo" ("Golfo Nuevo" Lighthouse) ARG-038. Their Web page is under construction, and in few days it will put the info in English. QSL information is: P.O.Box 4, 9120-Puerto Madryn, CHUBUT, ARGENTINA. DX station send S.A.S.E. (w/2 IRC - NO GREEN STAMPS). PLEASE DON'T SEND QSLs VIA BUREAU. Also, they we will confirm the QSOs via the system "e-qsl.cc " (e-QSL).

Jakob, OZ7AEI, will be active between August 13-15th from Sjaelland Island (IOTA EU-029, DIA SJ-001, WLH LH-1867) as OZ7AEI/p. He will also activate 3 lighthouses in the area of Stevns, namely Stevns GL P (ARLHS DEN-042), Stevns NY (ARLHS DEN-123) and Rodvig East Mole (ARLHS DEN-175). QSL via his home callsign, direct or by the bureau.

Operators RW6CT, RA6AU, RA6AX, UA6LGR and UA6MF will try to be active (third attempt) from the "Centre Caviar Mafia " on Tyuleniy Island (last activity 1992) in the Caspian Sea, Republic Dagestan, August 13-16th. This activity is valid for RRA RR18-01 and RDA DA-30. Also, the Lighthouse "Tyuleniy" is a NEW ONE for the ARLHS, RLHA and WLHA. The callsigns will be UE6WTI/p and the operator's homecalls/6. Activity will be on 40-10 meters, CW and SSB. QSL UE6WTI/p via UA6MF: Ivan A. Gudima, P.O. Box 4102, Zip 344103 RUSSIA.

Jurek, SP2BIK, informs OPDX that the radio station SN2NP located at the Old Lighthouse at Gdansk-Nowy Port will be operating during the period of August 20-22nd.

PJ4, NETHERLAND ANTILLES. Look for Bill/N2WB, Bob/K9MDO and John/W9ILY to be active as PJ4/homecall from Bonaire (SA-006), September 22-29th. Activity will be on 80-10 meters CW/SSB/RTTY. Also, look for PJ4/W9ILY to be an entry in the CQ/RJ DX RTTY Contest. QSL PJ4/K9MDO via W9NJB (direct) or via his home callsign by the bureau. QSL PJ4/N2WB via N2OO. QSL PJ4/W9ILY via his home callsign. More details are available via Bob's Web page at: http://n2wb.tripod.com

QSL INFO AND NEWS.....
QSL 6L0NJ/4 via DS4AEN. A group of Gwangju Dx Club (6L0NJ) members activated Oenaro Island (IOTA, AS-060) over the past week and weekend. Operators were HL4SF, HL4UV, HL4XM, HL4CBI, HL4CEL, HL4CFN, HL4CFU, HL4CGB, HL4CJG, HL4CRO, HL4RBR, DS4BGR, DS4CMY, DS4DBF, DS4DEV, DS4DJC, DS4DLK, DS4DRE, DS4EOI and DS4FMG. Logs will be available at: http://www.dx.or.kr/

CS7T LOG AND VIDEO. The Web page for the Berlenga Island DXpedition (to IOTA EU-040) is now complete with online logs, photos, AVI videos and stories (even the story of a survey trip to the famous Estelas Islets). Have a look at: http://www.qsl.net/ct1eeb/cs7t
They are producing a DVD Documentary. The team's professional Film Director Jose Alberto, EA1OS, will make it available to the public in October. It will document all details of this HAM Radio operation as well as the beauty of this Islands (a candidate to become Patrimony of Humanity by UNESCO).

QSL EM0U/p via UT3UZ (P.O. Box 240 , Kiev-232, 02232, Ukraine). This activity was by the EM0U team (Club station of Ukrainian State Centre of Radio Frequencies and ITU Centre of Exellence). Operators were UT3UZ, UT4UO, UT2UB, UY2UA, UY2UZ, UT7UW, UX3UN, UT5UOC, UT4UAA, UT4UAY and UT4UBJ. Operations were from CHERNOBYL (URDA award: KO-26 and QTH-Loc: KO51CG), district's of Kiev region.

Benny, K5KV, reports that he is NOT the QSL Manager for: FS5UQ or any FS station except FS/K3LP and FS/N3KS.

Chris, KG6AR, reports that he is no longer the QSL Manager for the following stations: UU2JZ, EM3J, EO58JM, EO57JM, EO56JM, EO55JM and EO10J.

Hugo, LA5YJ, informs OPDX that all cards for XU7ACW, 9N7YJ and his homecalls (LA5YJ & MI0YJR) have been answered. This includes all Bureau cards as well. ADDED NOTE: Hugo informed OPDX that he will be in South-East Asia again. He does not know for how long, but he will keep us informed as soon as he obtains a license.

Press release by the Radio Club Ushuaia, LU8XW, states: "To clear up any confusion, the QSL Manager for LU8XW is Patrick, WD9EWK. We thank Jose "Pepe" (EA5KB) for handling QSL cards received by Jose Manuel (EA5BD), our previous QSL Manager who passed away last year, ensuring those stations received their LU8XW QSL cards. We thank EA5BD for his fine work as our QSL manager in the past, and EA5KB for his efforts after the death of EA5BD."

Toni, EA5RM, announced that the S05X and TZ6RD logs were uploaded to the LoTW around July 29th.

Dennis, PA7FM, informs OPDX that he received the ST2DX QSLs from the printer on August 5th. Look for all direct QSL requests to be answered in the upcoming week. The online log is still available at: http://www.pa7fm.nl

Chris, ZL1CT (GM3WOJ), reports that he has uploaded a total of 159600 QSO records to the "Logbook of the World", generating 10000 QSL matches, for the following personal, club and contest callsigns: GM3WOJ, GM3WOJ/MM, GM4DMZ, GM2MP, GS2MP, 2S2MP, GM6V, GM7V, 2S7V, GM8V, GZ7V, ZL1CT/MM, ZL1CT/4, ZL1CT and ZL1V. Another 10000 QSO records will be uploaded soon.

SPECIAL EVENT. Look for special callsign HE5IBC to be active on the HF bands during the month of August to honor the "10 GHZ ATV World Record of 1564KM" made on July 1st, 2004, between I8/HE5IBC (JM89AD) and EA7/F4CXQ (IM97CP). Activity this past week was on 20 meters CW/SSB on or around 14020 or 14215 kHz. QSL via HB9MM.

SPECIAL EVENT. Operators F5ASD, F8KFK and members of the F6KQA ARS will air the special callsign TM5BDM, September 4-5th, to commemorate the 90th anniversary of the First Battle of River Marne during WWI. Activity will be on HF, VHF and UHF. QSL via F5ASD, either direct or via the Bureau.

SRM 2004. The Scottish-Russian ARS introduces Scottish-Russian Marathon to encourage activity by all radio amateurs worldwide to contact areas of Scotland and Russia. This is purely an activity week and will enable participants to pursue the CAOSA Award Scheme, WAB Scotland Award Scheme, IOSA and SCOTIA Award Scheme, SOTA Award Scheme, ARLHS Award Scheme, RDA Award Scheme, RRA Award Scheme, RIIA Award Scheme, RMA Award Scheme, RFFA Award Scheme, RLHA Award Scheme, RABA Award Scheme, and provide an interest in contacting different areas of Scotland and Russia. The event is to be held on the full second week in August each year. The 2004 Marathon will start at 0000z on Monday, August 9th, and last until 2400z on Sunday, August 15th. Activity is encouraged on all HF bands by individual licensees and club stations or the use of a special event call sign from radio amateurs in Scotland and Russia. For more info:

http://www.srars.org/srmee.html
http://www.scotham.net

ST2, SUDAN. QSL Manager Dennis, PA7FM, informs OPDX that Paul, ST2PN, is now active. Paul is also in Khartoum for his work for the "World Food Program" (WFP) of the UN and will be active now and then in his spare time. He will be out in the field, in Darfur (the problem area in Sudan), most of the time where radio operations are not allowed. ST2PN was heard this past week on 18122-18130 kHz between 1230-1500z. QSL direct to PA7FM (bureau not possible for now). For more information, please visit the Web page at: http://www.pa7fm.nl

TK, CORSICA. Christophe, F4DZY, will be active as TK/F4DZY, between August 8-22nd. His activity will be mainly on HF and SSB. Christophe is in Corsica (EU-014) for his job, so his activity will be limited to only his spare time. A special QSL card will be printed for this activity. QSL either direct (SAE+Postage or IRC) or via the French REF Bureau.

TWLHF CORRECTION. Charles, M3ZYZ, a "The World Lighthouse Foundation" (TWLHF) member and one of the executive comittee members of TWLHF, informs OPDX that he would like to clarify that he is not the President of this Foundation and that role belongs to Kresimir Juratovic, 9A7K, and no one else.

UB40, ASIATIC RUSSIA (Special Activity). Vlad, UA0FZ, is currently active as UB40FSU to celebrate his 40th anniversary of his first amateur radio activity. The callsign UB5FSU was his first license given to him in 1964 in the Ukraine. His activity has been mostly on CW on 40/30/20/17 meters. QSL via UAOFZ "ONLY" (NOT W3HNK).

V47, NEVIS ISLAND. Larry, KJ4UY, will be active as V47UY from August 20-28th. Activity will be on all bands and modes, including 6 meters. QSL via KJ4UY, direct or by the bureau.

VP5, TURKS AND CAICOS ISLAND. Dennis Motschenbacher, K7BV, will operate from here as VP5/K7BV, August 9-16th. He will be at the "Rent-A-QTH" (visit at: http://www.vp5jm.com/). The trip will be focused on 6 and 2 meter WSJT work during the Perseid Meteor shower that peaks around August 12th. HF will, of course, get plenty of attention as well. QSL to K7BV.

VP5, TURKS AND CAICOS ISLAND (Expense paid trip to VP5X for CQWW Phone!). Kelly, N0VD, team member of VP5X, announced the following: "Once again David, KY1V (the 2004 Radio Amateur of the Year), is putting together the team of operators for the 2004 CQWW Phone Contest operating from VP5X. As a member of the VP5X team, we have started soliciting essays from young hams around the world under the age of 21 to apply to join us for an expenses paid DXpedition to North Caicos Island. The Young Ham Contest Program was developed by KY1V in 2003 to encourage teen and pre-teen hams to tell their friends about the fascinating possibilities associated with Amateur Radio with regards to contesting and DX-peditions. Young hams worldwide can apply for the Young Ham Contest Program by sending a 500+

word essay describing how he/she got started in ham radio, naming his/her elmer (mentor), and telling why he/she should be selected this year's CQWW Phone Contest operation. One winner will be selected from the many world-wide entries to join us as VP5X. With the contest just about 90 days away, we would like to begin the selection process soon. If you are a young ham that would enjoy an expense paid trip to VP5, please submit your essay soon. We are trying to spread the word as much as possible, so if you could pass this along to any clubs/associations/reflectors that you may be part of, that would be great. The more the word is out, the more of a chance some young ham could be enjoying a 'dream come true DXpedition'." For more information on VP5X and how to submit your essay, please visit the VP5X Web site at: http://www.vp5x.com

VP9, BERMUDA. Operators K4UU, K6CT, K9VV, KI4CCO, W4OV, WD4R and W4OV will be active during the CQWW SSB Contest this year as a Multi/? entry. Callsign and QSL route will be announced later.

YI9, IRAQ. Marek, SP2OVN, informs OPDX that Ryszard, SP8HKT, is operating as YI9KT (as of July 25th) and will be there for 5 months. He uses 100 watts into a vertical antenna and is expected to be active on 40-10 meters plus the WARC bands, mostly CW but also SSB if you ask. Marel states that you can search for him between 0730-930z and 1630-2030z, usually on the first 15 kHz of each band. Over the past week, OPDX spotted Ryszard on 40m around 1753z, 30m around 1731z, 20m around 1948z, 17m between 1300-1430z and again between 1845-2030z, and on 10m after 0930z. QSL via the bureau or direct to his home callsign.

YU6, SERBIA AND MONTENEGRO (Special Prefix and Award). Montenegrins radio amateur stations have been using a special prefix which started July 1st and will end August 31st. They are adding the number "100" after their regular prefix (ex. YT6A - YT6100A and YU6RKB - YU6100RKB etc.). Activity is for celebrating 100th anniversary of Marconi's first commercial radio relay on the MF band between Montenegro (City of Bar) and Italy (City of Bari). QSL information for all special prefixes is via YT6A. Also, a special "MARCONI MONTENEGRO 100 Award" is available to all amateurs worldwide who submit three QSL cards as confirmation of having contacted three Montenegrins radio amateur stations with the special prefixes during the activity period, or one QSL card as confirmation of having contacted the memorial radio station 4O6100BB. In addition, endorsement stickers are available as listed below:
Endorsement stickers for the basic mixed mode/band award are available for SSB, CW any single band . The GOLD endorsement is available for the applicant who has worked 10 stations with special prefixes, including memorial station 4O6100BB. QRP is defined as 10 watts input (or 5 watts output) of the applicant only and is affirmed by signature of the applicant on the application.
Applications with QSL cards and 10 IRCs or 10E have to be sent to the Award Manager YT6A: Ranko Boca, Nikole Ljubibratica 78, Herceg Novi 85340, Montenegro, Serbia and Montenegro. For each endorsement sticker you have to send 3 IRCs or 3E. A list of all applicants will be updated daily on the We page at: http://www.yt6a.com

YV0D DXPEDITION QRT. Yes QRT! This is a big disappointment for DXers as well as the YV0D team. This rare one (in the top 10 most wanted DXCC entities) had to go QRT a few days early due to bad weather heading toward Aves Island. YV0D went silent August 4th at 1045z. Despite the short operation, YV0D logged some 18,500 QSOs -- including a number of 6-meter QSOs during an opening -- in around 59 hours of operation, according to The Daily DX <http://www.dailydx.com>. The QSL Manager for this DXpedition is KB6NAN: Dianna Killeen, POB 911, Pescadero, CA 94060-0911. Please include a SASE (U.S. stations) or a SAE and the appropriate return postage (non-US stations) with QSLs. They will also accept cards via the bureau. The YV0D team expects to upload its logs to ARRL's "Logbook of the World" (LoTW) at: http://www.arrl.org/lotw

Hi,

A few years back, I had a 386 computer and some how happened on an Intermod program for it. It was called Intermod.bas or something and maybe had a number 6 or 60 mixed in it. Not sure now. That program was great so far as I could tell.... Punch in a couple freqs and it gave you a list of freqs which may have caused intermod....

I now have a couple computers.... an older with 95 and 98 and one with XP. Anyone know of a program to work on either of these? My 386 died and with it, the Intermod program. If I could get a new program to work on either of the above, it would be nice. The first two I use for shop use. Not much kept on them but programs of use in the business.

Any help appreciated.

L.

This is pretty simple math. A spreadsheet'll do it all. For two freq.,
third order, two of the formulas are IM = 2*A - B and 2* B - A. For three
freq, third order I think there are three formulas: A + B - C and just move
the minus sign around for the other two.

How many frequencies did you enter in to this program? How many did it spit
out?

2 or 3 if memory serves me correct and I'll guess about 20 or more. Can do a spreadsheet. Just never thought of it. I thought maybe some one had that program stashed or knew where to find it or of a newer version.

898. Schematic DX-440

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-09 21:19:59 UTC
From: Kjell <kjb@telia.com>
Message-ID: <3URRc.159$d5.1267@newsb.telia.net>
Source record: 56760

Hello
I am doing some mods on my Sangean ATS-803A but there are some difference between the my old ATS-803 schematic from 1986 and the radio. I m intrested in the part of the PCB with AM-MF and the BFO.
The receiver i also sold as Radio Shack DX-440, Siemens RK-651 and ESKA DX-33.
I doing sync AM and DRM-mod on the radio and hope someone can help me with a copy of that part of the radio.

Regards

Kjell Bjornfors

Nothing wrong with that.... I just figured if there was one already
available, why reinvent it? Oh well!

Why. You have to run the thing to catch it. I have the defaults
turned off, I use Agent as a news reader, and Firefox as a Browser..

You should see the code in some of these. They are adding Netscape as
well as Explorer.

Hi,

I need to addapt an existing headset that was woring with regular Yaessu connectors to Vertex VXA-700. The VXA is aviation and has a diferent connector. It has one jacket and I has also the CT-96 that split it.

Can someone plaase tell me what is the schema. Where on the jacket terminals connect the PTT, MIC and SPKR?

Aw shucks OM!

Don't go knockin Pete Petrers and others of similar ilk
that brosdcast on shortwave radio! Even those gomers, retards,
social misfits, and other inbred, single-toothed, worthless
portions of the population need a place/home on the shortwave
bands dial to tune to! For example, have you heard 'Elizabeth Border'
on WWRB yet? She's more kooky than Jackie Petru and more kooky
than James Lloyd! A real NUTCASE and box of prunes with pits.

from www.xrayer.com

" A Divided Reality . . . . Just when I thought I had heard everything
that Christian-patriot shortwave radio has to offer... "

Frequency: 5.085 MHz. Station: WWRB. Day: Wednesday.
Hour: 11 PM Eastern Time. Program: The Divided
Kingdom, hosted by Elizabeth Border.

Border sounds like all the other ultra-right-wingers out
There, rambling on about the New World Order, the
Communist conspiracy, the abortionists -- until she
illustrates her points by mutating her program into
a weird children's show.

After speaking a while on a certain topic, her program
shifts gears and a radio play is presented, featuring
Border using a high-pitched voice to portray
Barbie, a simple country girl trying to keep up with the
plans of the Great Conspiracy. In one episode she
confronted Fatherland Security, the personification
of the Patriot Act (a character also voiced by
Border, using a deep tone and a strangely
inflected rising-and-falling speech pattern).

Barbie is walking along when she hears some
terrifying sounds coming from an open manhole.
Fatherland Security suddenly appears. Barbie
asks him to close the manhole cover so she
can't hear those horrifying screams and moans.
After complying with her wishes, Fatherland
Security talks a while with Barbie, both characters
serving as mouthpieces for Elizabeth Border's
conspiracy theories. (Author intrusion to the max.)
At one point Fatherland Security reads a news
article to Barbie related to the plans of the Evil Ones.

Barbie knows Fatherland Security is part of the
grand evil plot -- but being a good-natured
soul, she's trying to convert F.S. to the good

side. Except the manhole cover keeps opening
up and those tortured souls below keep interrupting her.

After getting the manhole to hell closed again, Barbie
squeaks on about how Fatherland Security is dressed
differently this time. Before he wore a black uniform
and boots, looking like Darth Vader; now he wears
a suit and tie. F.S. points out that his neckwear is
red, white and blue. Barbie asks him if he's going
to celebrate the Fourth of July, American
independence, or is he going to celebrate Adam
Weishaupt who founded the Order of the Illuminati
in 1776? She wonders what side is he is really on.
Fatherland Security laughs, keeps Barbie guessing
as he returns to his cavernous manhole of
damnation, the agonizing screams heard one more
time. Barbie tells him to repent, repent...

I could tell you more, but after recalling all of this
stuff, I have to drop some MKULTRA acid and
see what condition my condition is in.................

SPECIAL NOTE: RX XR also has a VERY FUNNY take on
the *75 Meter Liberty Net* in one of his Blogs at the URL above!
Be sure to check it out! Nearly peed myself laughing at his commentary on
the same.

The 1st Amendment guarantees only that the Government won't imprison, torture, or otherwise go after you for voicing your opinions. It makes no guarantee that
someone ELSE might not kick your ass for it. I hear all this whinning all the time regarding the 1st Amendment. Linda Ronstadt found out about the 1st Amendment when she got kicked out of a venue in Las Vegas a few weeks ago for voicing her opinion. Whoopi Goldberg (is she a Jewess ? Is her name really Whoopteesha ?)learned about it, too, as did Mike Moore. Sure , you can say whatever you want, but be prepared to pay the consequences.

You made my day!
Not long ago
Overheard one Guy on 2m trying to dump a set of Isoloads on another, very
comical exchange indeed. After he was done with
his pitch I Q'ed on the merchandise. I wanted to know how they
worked for him. " I don't know, I don't have HF priviledges, but
the website say's "XXXXXXXX" " Then I told him I use a 1WL 160m HOHP loop fed
with 450^ window line into a balanced tuner.
He then told me that the Isoload would really bring my signals
up since I wouldn't have all the loss from the feedline and the resistance ot
the 500ft+ of Wire. Something about Ohms Law, Hi
Congrats on the Vanity Call Alan
Just happens George Pharr, NV8A / SK was my Elmer!

for a multi band multimode rig, take a look at Icom IC706, Yaesu FT 857/897
they do up to 70cm, but don't do 220 AFAIK. I have the FT 857 in my car.
as for FM / AM handies. the Yaesu VX7 is fun .. 50,144,220,440. (My wife
has one)

The VX7 and the 857 can do AM airband etc etc.

Yeah, yeah Hans... That's what the president of Mexico says as he ships his discontented over the northern border of Mexico into the US, while putting his troops on the southern border with orders to shoot to kill.

Moving everybody to the U.S. is not the solution to the world's problems, OM.

Just as Mexico's problems would resolve much more rapidly if they could not unload those "huddled masses" on the US, the problems in the middle east will come to their conclusion much more rapidly if admirers of the west stay right where they are, and try to bring a little bit of the west to the middle east instead of emigrating here.

Besides Hans, the discussion was about illegal immigrants, not the legitimate kind.

August 12, 2004 06:11 PM EDT

Gettysburg, Pa (API)

In a surprise announcement today, FCC Chairman Michael Powell released preliminary news of a new "user fee" based revenue system for amateur radio operators. "This exciting initiative, suggested by a leading amateur operator and jumpsuit model (photo at http://tinyurl.com/48krd), is designed to raise funds to subsidize the deployment of BPL service throughout America, but especially in disadvantaged places like Franklin County, Tennessee."

Details of the plan are not complete, but the fee structure will be based on actual on-the-air use of amateur radio, and will be sensitive to the value of the communications in progress, according to the Chariman. "As an example, emergency communications during a hurricane would be billed at a higher rate than less valuable usage like the North Carolina Lumbago Net." Powell remarked. "Contesters would get special high volume discounts, since their communications simply repeat the same old stuff over and over all weekend long" he stated.

Fees will also vary based on the particular mode in use, with CW being charged a premium rate because "it get's through when nothing else can". Video modes like SSTV, however, would command super-premium rates "because a picture is worth a thousand words" the Chairman said.

In a related family announcement, Chairman Powell's father, Secretary of State Colin Powell, stated that the IARU would be contacted to ensure that foreign DX operators communicating with US stations would be assessed fees based on their 'rarity' on the DXCC "Most Wanted" listing. Secretary Powell cited an alleged operation from "T5" which he expected would owe "several tens of thousands of dollars" retroactively based on claims on an internet newsgroup by an operator with the screen name "Billy Beeper".

Stay tuned for further details. Movie at 10.

Did you see the One Page Add by Icom in QST?

Please visit the Icom Website and download the videos.
http://www.icomamerica.com/amateur/video/

The first two videos gave a great overview of Dayton from an Icom Marketing perspective.

The third video was an great production demonstrated by two teenage amateurs Trevor and Sara.
I would like to suggest you put this video on a CD and send your kids to school with it and let them play it for there friends.
Play it at your next amateur radio event for others to see.

I would like to thank John Webb - W7NWH and Icom for producing these videos to help promote the hobby.
Wouldn't be great to get something like this on TechTV or get a corporate sponsor to use this to market our hobby as well as there product.

I think Hans is, as usual, being very funny. This scenario reminds me
of the Japanese ham who wrote to Hugh Cassidy, editor of the West Coast
DX Bulletin years back, saying that he had been told that there were
jokes in the Bulletin. He wondered if Cass could possibly point out
some of the jokes.

I'm looking to buy 3-5 wireless headphone units and be able to use
them at the same time with one base station. Sony says that I need a
seperate unit for each headset model MDR-RF960R. I'm thinking that one
base station will be fine for a transmitter and the headphones will
all be receivers? You guys think i'm nuts or should I buy a low power
FM transmitter and give everyone a cheap walkman with headphones to
rock out with? The second idea is quite a bit cheaper. Hmmmmm.
Thanks,
James

Hi James,

I by the choice of Mr. Lightening have two headsets and only one transmitter. Before Mr. Lightening I only had one set of each. The headphones are tunable via an external control. These are RCA 900 MHZ cordless headphones. They work very well. For better distance I put the transmitter in the attic and ran shielded cable up for the audio connections.
I guess you need to decide how far you want to receive a signal. You also have to remember these are stereo so you will probably need a pretty good signal. I just run the audio into both inputs.
Good luck on your project.
Larry

932. Fitting of TS-450 into 93 Landcrusier - Help

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-13 23:40:52 UTC
From: Kevin & Natalia <sparc_man@hotmail.com>
Message-ID: <411d4f66$1@news.iconz.co.nz>

Hello All,

I am in the process of fitting my TS-450 into the family Landcrusier.
The problem I have found is, that even though the Landcrusier is a big
vehicle, it still lacks the space to fit a large size rig. Even having
problems fitting a TM-742 VHF/UHF rig.

Before I go through a lot of pulling out hear, which there is not much of it
left, I would like to know if anyone else has fitting a rig of this size
into a Landcrusier. I would think a few Ozzies might of.
I want to make the install safe, easy to access, use the controls on the
rig, and be able to see the display.
Any help would be grateful.

Regards

Kevin, ZL1KFM

<snip for brevity>

Amazing how an obvious piece of satire has resulted in so much pontification.

Or maybe not so amazing...

But do you know what the REALLY SAD part of this story is...?

There are likely to be alot of hams that will believe it to be true.

Only way better to stir up the hams beside's the
issue of CW is the topic of money.

(rotflmao - sheesh!)

Hi Kevin, wishing you luck as you will need it.
A mate managed to fit a Yaesu 757 into his 60 series cruiser, but with an 80 series, you will be very lucky to find anywhere that will be safe and not in the way of other people. There are two areas that I can think of - firstly on the transmission hump on the passengers side - but it is a reasonable sized radio and will take up a fair bit of room for the front seat passenger. Not sure if she who must be obeyed would approve of that.
Second spot is between the front seats (assuming that you don't have a bench seat or the arm rest unit between the seats). It is a bit of an ambuggerance and does require you to take your eyes off the road, but you have very little option with a radio that size. You will have to ensure that you do not kill off the ventilation for the radio though.
I have a 94 cruiser and have gone for an Alinco DX70TH with a remote head that is mounted on the bottom of the dash. The remote head for my Codan is sitting on the transmission hump - but there is a bit of a size difference between the remote head and the 450 though I guess.
Unfortunately with modern vehicles, there is not a lot of room to play, so mayve you can use this as an excuse to upgrade your HF gear, get ready to go on your hands and knees in front of SWMBO.

Matt

Hi Matt,

My Cruiser has the factory cooler and arm rests. So this area is out of the question. Did look at the passenger side transmission hub, however when I put the radio in as a trial, it restricted the leg room (not by too much), and it also does not permit the glove-box from being open.

If you still want to stick with the TS-450, about the only other possible option would be an overhead console, but I personally would not go down that path - from experience it is a right royal pain in the proverbial to use a radio in the console when mobile. I now have all the freqs I use programmed into the radio, but still need to have the occaisional glimpse up there if I travel out of my normal area and need a different freq. Suspect it may be time to get a new and smaller one - maybe the 706 IIG??

940. Icom 730 zero-beat question

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-14 06:11:52 UTC
From: "Michael A. Brown" <mabrown@qx.net>
Message-ID: <wIGdnfxMY-6FMIDcRVn-vw@telcove.net>
Source record: 56702

I have an Icom 730 that I purchased several months ago and I have recently stated to get interested in making more CW contacts and improving my code skills. I have made a few contacts already, but I haven't answered any CQ's yet. I was wondering if anyone can tell me the correct way to zero-beat a CW signal with the Icom 730? I didn't see anything in the 730 manual, but the offset for the Icom 730 is 800 Hz. Can anyone that has had or currently owns a 730 tell me how to properly zero-beat a CW signal with this radio? Thanks for the help.

73,

I don't have that radio, but I would imagine that you'd match the signal to the side tone, then use the RIT/Clarifier to the tone you prefer.

You can't be serious. Sell the damn thing and get a smaller radio like a
70611G or a FT100D.
I know they cost more money, but then you have more bands to play with.
Most blokes could save that much by not smoking or drinking for a month.

iss qso on echolink monday 2004-8-16

on monday 2004-8-16 at 18:05 UTC the iss will have a 10min two way qso
with the Challenger Learning Center at Prairie Aviation Museum,
Bloomington, IL

questions will be asked by a group of students

the plan is to stream the international space station audio in the
echolink amsat conference room

room number 101377

you are welcome to drop in and listen to the qso

if you would be willing to help and stream an iss school/college
contact then please let me know

that way the contact could be heard around the world

hams could then transmit the audio locally so any school/college with
a scanner could also listen to it

for up coming iss events visit

I just tune the other station for a pleasing (to me) received CW note, and like jw, if necessary use the RIT/Clarifier to do a final adjust to the receiver frequency if the other staion does the same. I could be mistaken, but as I recall, the IC-730 will tune to the nearest 100 Hz due to it's PLL. That could require you to use the RIT/Clarifier to get the most pleasing CW note on receive. Just make sure to turn it off after the contact is finished, otherwise with the next contact, you could wind up chasing each other across the band.

I liked his story about little Billy Beeper the best. It's a classic
that should be published in QST.

Been there, done that. The only real solution is to swap the radio for
something smaller, preferably with a remote head. Or operate without SWMBO.

Cheers
Jim

the 146.640 update of HURRICANE CHARLEY and the callsigns and the
events of the day..

overall the 640 group was prepared, jamming was kept to a minimum,
wich is always helpful

we were running a skywarn net part of the day, wich jim WA8JSC ran
very well
we were in condition red most of the afternoon and evening, but around
7:30 we went to yellow, and at 8PM KG4COQ ran the tgif net allowing
first priority traffic for weather related transmissions, the tgif net
helped get peoples mids at ease, as well as the fact that the
hurricane turned south of tampa bay.

some of the skywarn checkins were
KC8NPA PAS159
WA8JSC PIN104
KF4UJS POL176 also on 14.325
KE4CEI robert in pinellas friend and criminal buddy of michael

I have 2 Saber III UHF Securenet radios with DES-XL installed in them
and working currently, the radios are 8/10. I also have the T3011 BX KVL

Keyloader for the DES-XL so you can change your Securenet "key". I have
2 smart chargers for the radios and a charger for the KVL. The KVL has a

new battery bought last year I think and the radios have several
batteries bought over the past several years. I also have the
instruction book
for the KVL (something hard to find now days). The radios also have
antennas
with them. I will gladly program 10 channels in them for you for
nothing. I am
still currently using these but will be upgrading them soon to an APCO
25
SmartZone Astro XTS5000 III 800MHz so I am looking to sell these as
a unit only and will not break the set. Please contact me off line for
more
information. Located in zip 35080. $2000.00 for the entire setup.
Shipped
only in the USA since there are DES-XL boards installed.

Amateur Radio Newsline™ Report 1409 August 13, 2004

Note: Ladies and gentlemen This weeks newscast is dedicated to the memory of the late Roy Neal, K6DUE who passed away a year ago on August 15, 2003, following heart surgery. Roy was our friend, teacher and served as the first elected vice-president of Amateur Radio Newsline after it became a 501(c)(3) nor-for-profit corportation. We miss him very much. "So Roy old buddy: This one is for you."

de WA6ITF

Amateur Radio Newsline report number 1409 with a release date of Friday, August 13th, 2004 to follow in 5-4-3-2-1.

The following is a QST. Australian hams ask for a new ham band at 500 kilohertz, lots of news world wide on the B-P-L front, and the FCC talks about license processing. Find out the details on Amateur Radio Newsline report number 1409 coming your way right now.

RESTRUCTURING: AUSTRALIA TO SEEK NEW 500 KHZ HAM BAND

The old 500 kHz the international maritime distress frequency could become part of a new ham band down-under. This if the Wireless Institute of Australia has its way. W-I-A News anchor Graham Kemp, VK4BB, joins us from Brisbane with the details:

--

The WIA will shortly be writing to the ACA to request the establishment of an experimental amateur allocation at 500 kHz. Thats the 600 meter band.

WIA Director Glenn Dunstan VK4DU said "500 kHz was the international maritime Morse code distress frequency for most of the 20th century."

"It was the frequency used by the RMS Titanic to send her plaintive cries for help that April night in 1912. It was the frequency used by thousands of merchant ships to signal their plight in times of peace

and war."

"More often than not, 500 kHz was witness to a ship's Radio Officer's last moments. Many Radio Officers literally died at the key as their ship fell victim to enemy action or was overwhelmed by the forces of nature".

Glenn, himself an ex ship's Radio Officer, said. 500 kHz was replaced in 1999 by the Global Maritime Distress and Safety System (GMDSS), which uses a combination of automated terrestrial and satellite communications.

"Since the introduction of the GMDSS in 1999, 500 kHz use has declined rapidly. The last official users of the frequency, China, plan to discontinue operation in 2005. The frequency is no longer used in Australia, New Zealand, the Pacific or the US."

500 kHz has been instrumental in saving tens of thousands of lives in the last 100-odd years. It is thus fitting that the frequency be preserved as a 'spectrum national park' to commemorate those who paid the supreme sacrifice in its use.

"The best way to do this is to establish a small slice of spectrum around 500 kHz - probably 495 to 510 kHz - as an amateur radio band. The band would also provide a unique opportunity for experimentation with antennas, propagation, advanced narrow band modulation techniques and receiver digital signal processing." Glenn said.

--

It should be noted that 500 kHz is still allocated to the maritime service so any permanent amateur access in Australia or elsewhere is some way off. It is worthy of note that the I-A-R-U Region 1 and various United States Amateur long wave groups are actively pursuing an experimental allocation at 500 kHz as well. (WIA News)

**

HAM RADIO IN SPACE: ECHO ON THE AIR

AMSAT has announced that the F-M voice repeater on the Oscar-51 Echo satellite is on for a trial period. The transponder was turned on the 30th July for about three weeks during which command stations will be watching the power budget and adjusting the transmitter power for good management of the battery.

For those wanting to give Echo a try, its uplink is on 145.920 MHz F-M, with 67 Hz CTCSS tone. The downlink is on 435.300 MHz.

A reminder that this is a trial of the F-M voice repeater only. Please do not send any data through it. AMSAT says that the digital portion of Echo is not yet ready for use. (ANS)

**

THE BPL FIGHT: ZS AMATEURS SHOULD REPORT BPL TESTING TO THE SARL

Turning to news on the B-P-L front, South Africa AMSAT President Hans van de Groenendaal, ZS6AKV, has now spoken out. He is urging amateurs and short-wave listeners in that nation to report any unusual but consistent interference to the South African Radio League. This as the rollout of Broadband over Powerline continues in that country.

ZS6AKV says that South African hams must continue to be vigilant about any B-P-L testing taking place in their neighborhoods. Hans says that following Pretoria's example several other metropolitan areas have shown an interest and may soon be starting trials. (SARL)

**

THE BPL FIGHT: FOLLOW-UP ON SAN DIEGO GAS AND ELECTRIC

Back here in the USA, San Diego Gas & Electric has confirmed that it is considering entering the Broadband Over Powerline business, but for now that's about all the utility will say.

As reported last week, San Diego Gas & Electric planners are reported to be seriously considering endorsing and sponsoring Broadband Over Powerline data transmissions on the company's power distribution system. The story went on to state that San Diego Gas & Electric is also considering entertaining proposals to partner with vendors for one or more field demonstrations of BPL. This, this despite being advised that B-P-L will cause considerable interference.

Bob Gonsett, W6VR, whose CGC Communicator newsletter was first to break the story put in a call to the utility to try and get a bit more information. San Diego Gas & Electric response was brief and far from insightful. All that the utility would tell Bob is -- and we quote: "Like many utilities, San Diego Gas & Electric is assessing B-P-L technologies."

W6VR says that while we are all temporarily left in the dark as to San Diego Gas & Electric plans, those plans will eventually surface. As soon as they do, we will let you know. (CGC)

**

THE BPL FIGHT: NORTH CAROLINA UTILITY ENDING BPL FIELD TRIAL

Meantime, North Carolina's Progress Energy Corporation says it's completed Phase II of its B-P-L field trial in the Raleigh, and will be closing down the experiment. In an August 4th internal memorandum reported by the ARRL Letter, the company said its program to test the viability of providing broadband service to communities it serves will wrap up by the end of August. The company reportedly will shut down the system once it's able to move its BPL customers to other broadband providers. Progress Energy's decision comes on the heels of announced shutdowns of B-P-L field trials in Penn Yan, New York, and Cedar Rapids, Iowa. (ARRL)

**

RADIO LAW: HAM RADIO EXEMPT FROM CONTROVERSIAL SAN DIEGO WIRELESS SITING ORDINANCE

Wireless communication antennas would be allowed in San Diego, California's residential areas only as a last resort under a new policy recently approved by the City Council. By a vote of 7 to 1, the council has approved a new policy governing the design and placement of wireless antennas, making it more difficult for cellular carriers and others to erect towers in or near residential areas.

Under the new regulations, the process will differ according to location. Some approvals would be made at the staff level, while others would require an okay from a planning group, a hearing officer or the full Planning Commission.

In the past 20 years San Diego has processed over 1,400 applications for cellular telephone towers but the the city has not tracked how many were actually built but there is some good news for hams on this one. ARRL Southwestern Division Vice Director Tuck Miller, NZ6T, reports that amateur radio is specifically exempted from the terms of this new ordinance

More about the ordinance itself is on-line at http://www.signonsandiego.com/uniontrib/20040728/news_1m28wireless.html (CGC with further information from NZ6T)

**

RESCUE RADIO: COMMISSION SEEKS COMMENTS ON RULE CHANGES FOR EAS

The FCC has issued a Notice of Proposed Rulemaking concerning possible revisions to the Emergency Alert System or E-A-S system. The agency is seeking comment on how E-A-S can become a more effective tool for warning the American public of an emergency. It is also a chance for radio amateurs to suggest new ways that the E-A-S might be interfaced with our hobby to better serve the public in time of need. More information is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250534A1.doc (CGC)

**

WITH THE FCC: MANAGING THE DATA PROCESSING OF LICENSES

The FCC has a lot to say about the Universal Licensing System and some of the problems it faces in administering it. Especially those dealing with paper filings from the ham radio community.

Donna Scott, a Program Analyst with the Wireless Telecommunications Bureau in Gettysburg, Pennsylvania. And in a recent interview with Rain, he outlined just one of the most common situations that her office runs into. This one dealing with applicants who faili to provide their FCC Identification Number better known as an F-R-N:

--

Scott: "I believe that one of the biggest problems that we encounter are paper filings coming here to Gettysburg with no F-R-N on the application. The F-R-N is mandatory. This is the registration number that you obtain through the CORES database and without that number wee really can't accept that application. And we do have a high volume of paper applications that still come in without that number."

--

Probably the second highest volume of amateur applications that need to be returned are those from hams who do not read what's right in front of them. These are hams who insist on sending form 605 V-E-C to the agency. This even though the form 605 V-E-C is only for use by those who give the tests and not for the ham in the street filing paperwork with the agency:

--

Scott: "It clearly states that it is a 605 VEC form. It says do not send to the FCC on the top and on the bottom. Yet amateurs continue to send them here to Gettysburg and we cannot accept them."

--

According to Scott, the only version of Form 605 the FCC will accept from the ham community is the one that contains the approval statement from the governments Office of Management and Budget and that carries a current issue date.

This is only a fraction of the information that Donna Scott described about managing the nuts and bolts of the FCC's licensing system. There's lots more with her on this weeks RAIN Report. Its on line right now at www.rainreport.com or on the phone at 847-827-7246. (RAIN)

**

ENFORCEMENT: ELECTRIC UTILITY WARNED AGAIN ABOUT INTERFERENCE TO HAM RADIO

A Tennessee power company has been told that its response to an earlier RFI complaint is inadequate. The FCC's Daryl Duckworth,

NN0W, explains:

--

Audio report only. Download the MP3 newscast audio file at
www.arnewsline.org

--

The FCC told the utility that the it knows of no powerline noise problem associated in any way with guy wires. (FCC, RAIN)

**

ENFORCEMENT: $3000 FINE FOR UNLICENSED OPERATION

The FCC has issued Donald Donovan Jackson of St. Petersburg, Florida a monetary forfeiture in the amount of $3,000. This, for operating an FM broadcast station on the frequency 102.1 MHz without Commission authorization.

On November 23, 2002, agents from the Tampa Office observed a broadcast station operating on the frequency 102.1 MHz. A search of Commission records revealed no FM radio station licensed to operate on 102.1 MHz in that area. The agents then used direction-finding techniques and determined that the broadcasts originated from a commercial office building located in St. Petersburg. Field strength measurements taken near the sight of the broadcast indicated that the signal strength exceeded the permissible limits for a non-licensed station.

The agents interviewed the owner of the building who provided them with a copy of the lease for suite. He also informed them that a person named Donald Donovan Jackson operated the radio station from the premisis.

On January 15, 2003, agents from the Tampa Office interviewed Jackson and conducted an inspection of the station after again observing a radio station operating on 102.1 MHz. During the interview, Jackson admitted to leasing the property and operating the radio station from that location. He was given the usual 30 days to pay the fine or to file an appeal. (FCC)

**

RADIO LAW: DOJ WANTS MANDATED DIGITAL WIRETAP ABILITY

The Department of Justice says that technology companies should be mandated to ensure that law enforcement agencies can install taps on Internet traffic and new generations of digital communications devices. This as the D-O-J and other agencies press for a digital expansion to the Communications Assistance for Law Enforcement Act.

The Communications Assistance for Law Enforcement Act is a 1994 law that requires the telecommunications industry to build into its

products tools that U.S. investigators can use to eavesdrop on conversations with a court order. The investigatory agencys are worried that federal agents would not be able to install court ordered wiretaps against criminals who communicate using the latest digitally encrypted technologies. Lawyers for the Justice Department, FBI and Drug Enforcement Administration say that this need requires immediate attention and resolution by the Federal Communications Commission. (Published news reports)

**

RESCUE RADIO: HAM RADIO AT THE DEMOCRATIC CONVENTION

Eastern Massachusetts ARES was activated to support Public Service Agencies during the Democratic National Convention which concluded Friday, July 30th. The ARRL reports the Salvation Army, that the American Red Cross, and the Massachusetts Emergency Management Agency all helped out. ARES was ready to provide any needed support in case of catastrophic loss of the communication infrastructure that had been installed for the event. (ARRL)

**

RADIO IN SERVICE: FITTEST SEEKING ASSISTANCE

Those involved with Rescue Radio may find some appeal in this. The United Nations World Food Program's FITTEST operation is currently seeking Telecommunications Specialists for 3 to 6 month contracts.

FITTEST stands for the Fast Internet and Telecoms Emergency Support Team and it offers constant travel, constant pressure, constant challenges in a job that still allows you to combine a family life and a professional life in a two or three months on one month off duty regime.

Typically, FITTEST hires people with non-conventional career paths to provide emergency deployment of VHF and HF networks, Satellite and Telephone systems. They are looking only at people with direct hands-on experience willing to work under harsh circumstances.

To get an idea of the work they do in Iraq and Afghanistan have a look at their web sites. They are in cyberspace at http://www.hiciraq.org/mediacentre/gallery/FITTEST/ http://www.qsl.net/ya5t. Applications to mark.tell@wfp.org and martin.kristensson@wfp.org (WIA News)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio

amateur:

(5 sec pause here)

**

ON THE WEB: BIG CHANGES AT THE QRZ.COM WEBSITE

Some major changes are taking place at the very popular QRZ.com ham radio website. We have more in this report:

--

Fred Lloyd, AA7BQ, who runs the QRZ.com website has announced major changes in access to posting access site. This, for registered users whose login user name is not the same as their ham radio callsign.

Basically, Lloyd says that only contributors who have legitimate ham radio calls will be permitted to post material to most areas of the website. To accomplish this Llloyd says that he has created two levels of membership. One called Ham is for those who want to use their call sign as registration login. The other will be the Guest member for those who may not have a call or who simply prefer not to use it.

Those who have a call and use it for login purposes will have full read and write access to all public Q-R-Z forums, plus the ability to make changes and/or additions to listings in the callsign database. Guest level members will be limited to posting on the sites Help Forum, the For Sale Forums, and the Questions and Answers Forum. These people will have no access to callsign database editing functions.

QRZ.com has also instituted several rules to help keep order and decorum at the site to make it enjoyable for the majority of those signing on. Among these are the right to terminate the current and future membership status of any user who engages in the harassment of any other user, staff member, or volunteer of this system or the use of any information derived from the website that contributes in any way to unsolicited e-mail of any kind. Also banned is the posting of obscene or offensive material on the site and QRZ managers say that they reserve the sole right to determine what is either offensive or obscene.

Lloyd says that the site will shortly begin converting current members to the new system. If you are currently signed up using your call sign as your logon I-D you need do nothing. For those who are not, QRZ we will be assigning new login names to those current members who are apparently licensed amateurs. The new logon name will be the same as the callsign that is listed in the QRZ call sign database as the 'Primary Callsign' for that account. Each user who is subjected to a name change will be notified via e-mail at the address we have on file for that user. Names that cannot be

associated with a callsign will be assigned to the Guest level of membership.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Lots more about the changes are on the QRZ.com website under the title QRZ System Announcement. Lloyd and the managers at QRZ say that they hope that these hanges will improve the website for everybody. (QRZ.com)

**

HELPING HAND: THE AUDIO NETWORK

The U-K Audio Network is a website for the blind using audio web pages, controlled by standard keyboard navigation. It is the first site in the world that needs no adaptive technology to be accessible by blind and partially sighted users.

There are many resources on the Audio Network. For example, it is the only place on the Internet where you can listen to BBC Radio schedules for the forthcoming week in audio. And speaking of radio, there is a whole section of radio stations where you can change channels at the touch of a button, without having to worry about annoying pop ups or filling out a registrations.

Best of all this website is free. Its located in cyberspace at http://www.yrguk.com (RSGB)

**

THE SOCIAL SCENE: DENVER IN AUGUST

Turning to the ham radio social scene, the Denver Radio Club Hamfest is scheduled for Sunday, August 22nd at the Jefferson County Fairgrounds in Golden. Doors open at 8:30 AM with door prizes awarded throughout the fest. For more information contact Bryan Steinberg by e-mail to kc0cua@arrl.net or visit the clubs website at www.qsl.net/q0tx (KCØCUA)

**

THE SOCIAL SCENE: CFMC IN ILLINOIS IN SEPTEMBER

And the Chicago F-M Club will hold its annual Hamfest and Flea Market on the weekend of September 18th and 19th. The venue is the Lake County Fairgrounds in the city of Grasyslake, Illinois. More information is on-line at wwwchicagofmclub.org. (E-mail)

**

HAM RADIO IN SPACE: ARISS AT HAM FAIR JAPAN

Amateur Radio on the International Space Station will be represented at the upcoming Ham Fair 2004 on Saturday and Sunday, August 21st and 22nd in Tokyo, Japan. The ARISS U.S. team provided photographs of the radio equipment in the Service Module to J-J-one-L-Y-U. He will display some of them along with a modified Kenwood D 700 E transceiver which looks like the flight radio. Other photos will be used in a slide show as part of an exhibit in the Kenwood Booth. Ham Fair is sponsored by the Japan Amateur Radio League with about 28,000 people is expected at the event. (ARISS)

**

SPACE: NASA APPROVES NEW DESIGN FOR SHUTTLE EXTERNAL TANK FITTING

NASA is moving ahead with plans to redesign a part of the Space Shuttle external fuel tank that investigators believe played a critical role in the Space Shuttle Columbia accident.

The Space Shuttle program will soon begin installing an improved bipod fitting that connects the external fuel tank to the Shuttle during launch. Investigators believe that during Columbia's launch in
January 2003, insulating foam from the bipod area fell off the external tank and damaged the left wing of the Space Shuttle. (NASA)

**

WORLDBEAT - BELGIUM: GALILEO GPS SYSTEM APPROVED BY EU

Officials in Brussels, Belgium say the satellite navigation system the European Union is planning will not clash with one already in operation by the United States. This, as an agreement signed in that European nation will make sure that the proposed Galileo system will be compatible with the U-S owned Global Positioning System.

Galileo is slated to begin operation 2008. Together the two systems are expected to become a single world standard for positioning and radio navigation. (ANS)

**

DX

In D-X, keep an ear open for GB6LOG. This is a special events station on the air through August 18th to celebrate the 60th anniversary of the Liberation of Guam during World War 2. The station will operate on all modes. QSL via the RSARS QSL Bureau to receive the special QSL from this station. For further information contact G0SWY by e-mail to G0SWY@aol.com (GB2RS)

And hams on Gibraltar have been granted permission to use the special prefix ZB300 during the month of August. This to celebrate the colony's three hundred years of British sovereignty. If you work ZB300, QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: SIGHTLESS UK NEWSREADER TAKES TO THE AIR

And finally this week the story of a U-K ham who has overcome physical disability to become a news anchor for the Radio Society of Great Britains GB2RS News. Jeramy Boot, G4NJH, in Nottingham has the rest of the story:

--

Now news about a new GB2RS newsreader. Annick Morris, M0HDE, of Wigan, Lancashire, became a GB2RS newsreader two when she read the news through the GB3MR repeater. What makes this special is that 18-year old Annick has been blind from birth.

She has a specially-adapted laptop computer which accepts Word files, and which has a single-line display consisting of raiseable dots which form characters in Braille. Annick can read Braille fast enough to read out loud from this, although she can only 'see' one character at a time.

In the future Annick will be newsreading on 6 metres, 2 meters and 70 centimetres and it is hoped that she may also transmit on two bands at once.

Jeramy Boot, G4NJH.

--

This is not the volunteer first job that M0HDE has been successful in. At age 14 Annick attended the "Child of Achievement Awards" in central London after impressing organizers with her determination to overcome obstacles presented by her disability. This award recognizes the efforts of young people under the age of 16 who make special efforts to overcome personal disability or illness while also managing to help others. We at Amateur Radio Newsline welcome Annick Morris, M0HDE, to the worlds ever growing ham radio news reporting teams.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

And this note. Because our staff will be in Huntsville to present the Young Ham of ther Year Award there will be no update on the 661-

296-2407 line on Friday, August 20th. Phone users are asked to utilize another of the automated phone lines operating in other regions. Our 661-2407 line will update to the latest newscast on Monday, August 23rd.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening. Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

Well to tell the truth, I have seen this crap in dozens of newsgroups
that have nothing to do with ham radio.

Charles, N5PVL:

I'm sure very little thats politicised is ever straightforward!
I read a long story in the Raleigh newspaper that showed the local ham club working in the field with the power company to insure fcc compliance and a ham-friendly relationship. This arrl clip was from may'04. My recollection was that the news story was about the same time.

Its about time for an update.

960. Do Astronauts HAVE TO BE hams?

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-15 18:56:46 UTC
From: studionyc@earthlink.net
Message-ID: <20692295.0408151056.7d17bac2@posting.google.com>
Source record: 56722

Please don't flame me if this has been addressed before - I just couldn't find it.
Is it just a coincidence that astronauts happen to be hams or do they have to become hams as part of their training? I ask because of how it seems as though all of them are.

Thanks,

961. Ohio/Penn DX Bulletin #672

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1M, K1XN & GoList, NC1L, KE2LJ, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, W5BOS, K8YSE, N8MR, DL1EK & The DX News Letter, DL2FAG, EA8CAC, F5CWU & La Gazette du DX, F5NQL & UFT, G0IAS, GM4SUC, HA9SU, HP1AC, I1JQJ/IK1ADH & 425 DX News, IN3VZE, JA1ELY, JI6KVR & JA-IOTA Islands News, LA9VDA, LU5WW, LU9ESD, M0BBB/5B4AFM, OH2HAN, OK1MU, PS7AB, SP5XSD, VA3RJ & ICPO, VK2CE, VK2XQ, YL1ZF and ZS4BS for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/August, through Sunday, 15th/August there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JT, JW, JX, JY, K, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

7Q, MALAWI. Ely, IN3VZE, will be active once again from the west shore of Lake Malawi using the callsign 7Q7CE from September 9-23rd. Activity will be on all band 160-10 meters. QSL via his home callsign IN3VZE, direct or by the Bureau.

7Q, MALAWI. Allen, G0IAS, reports to OPDX that, "The dulcet tones of 7Q7HB, Harry, will once again be coming from Club Makokola, on the South West shores of Lake Malawi as from about the 12th August... length of stay not known at this time... but at least 6 weeks." QSL ONLY DIRECT to G0IAS (NO BUREAU cards accepted). Return stamp/postage is needed (DO NOT bother about envelopes.... G0IAS will supply). Allan also informed OPDX that he is hoping to go down to Malawi before the year's end and be active as 7Q7RM.

AT0, INDIA. Binu, VU2NGB, will be active as AT0B from Vypin Island (no IOTA number), near Kochi City in India, during the CQ WW DX CW Contest (November 27-28th) as a Single-Op/Low-Power entry. Look for him on 7009 and 14019 kHz. Please QSL direct to: GPO Box 2235, Sydney, NSW 2001, Australia.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX of the following Somalia 6O/T5 operations: "Effective immediately, the ARRL DXCC Branch will accept QSLs for operation taking place in the Somaliland (northwestern Somalia) and Puntland (northeastern Somalia) autonomous areas as well as the southern and central areas of Somalia. Operations possessing written permission from any recognized authority that is acknowledged to be in control of a particular region will be accredited. These QSLs will count for the Somali Democratic Republic (Somalia). QSLs for past operations will be accepted where proper documentation has been submitted. This is subject to change based on future developments in Somalia."

E2, THAILAND. Look for Champ, E21EIC, to be active during the CQ/RJ DX RTTY Contest (September 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via E21EIC.

FK, NEW CALEDONIA. Eleven operators/members from the Mitsubishi Electric Tokyo ARC (JM1YGG) will be active as FK/JM1YGG and FK/homecall between September 16-19th. Operators mentioned are: JA1BAB, JA1IWP, JA1RNO, JA1RTG, JR1KHM, JI1EOP, JJ1EWN, JK1EBA, JA3RAF, JR3OET, and JF3IPR. They plan to operate on 80-10 meters CW, SSB and FM. They are not sure about the digital mode at this time. QSL via JM1YGG, direct or by the bureau. The JM1YGG, Mitsubishi Electric Tokyo Amateur Radio Club's, address is: 2-1-1 Marunouchi, Tokyo, 100-8310 JAPAN.

HH4, HAITI (Update). Just a reminder that Jan, K4QD, will be here for two weeks and will be active as HH4/K4QD during his spare time (See OPDX.671). He states that he will upload his log to LoTW when he returns.

IOTA NEWS.....
EU-056. Operators Bjorn/LA5UKA and Trond/LA9VDA will be active as homecall/p from Gossen Island, August 20-25th. QSL via their home callsign per QRZ.com.

OC-155. Lanny, W5BOS, will activate Pulap (Pollap) Island, West Chuuk, Fed. States of Micronesia, October 18-23rd. His callsign will be V6O. QSL via N6AWD.

J3, GRENADA. Operators AC8G, K8LEE, KC8JAY, W8GEX, W8ILC and possibly others will be active during the CQ WW DX SSB Contest (October 30-31st) as a Multi-Multi entry. Callsign will be announced later. Look for activity on various modes and bands a day or so before and after the contest.

J42. GREECE (Also IOTA Op.) Stavros, M0BBB/5B4AFM, will be active as J42004A from Skopelos (EU-072) and Athens, between August 17th and September 1st. Activity will be on 20 meters (and possibly 30m) using 100 watts and dipole. By the way, this is a special callsign to help celebrate the Olympics in Athens. QSL via M0BBB via the Bureau or direct.

KG4, GUANTANAMO BAY (Cancelled Trip!). Bill/W4WX (aka KG4DX), member of the Florida DXPedition Group, was expected to be active here last week, but his trip was cancelled. He states, "No seats available for Space A Cat VI.. Sorry, will try again later on."

KH9, WAKE ISLAND. George, AH8H, is now active as KH9/AH8H through the end of the month. His activity has been limited due to his work. Most of his activity has been on 40 and 30 meters CW between 0800 and 1030z.

LIGHTHOUSE ACTIVITY (The ILLW is this coming weekend!).....
* Mike, GM4SUC, Organizer and Coordinator of the International Lighthouse/ Lightship Weekend, stated last week that "We now have over 314 confirmed stations in 42 countries..... All we need is some propogation to go with the fun of the weekend." A full list can be found at: http://illw.net/2004_list.htm

* The Gozo Amateur Radio Society will be active again in this year's ILLW as 9H4GRS/P on Sunday, August 22nd, from Jordan's Lighthouse (MLT03). Activity will be on 20 and 15 meters.

* Members of the Gran Canaria DX Group will be active in the ILLW as ED8FLH from Punta de Jandia Lighthouse (Fuerteventura Island - AF-004, CAI-040, D2790, S006 and DME35015). Activity will be on CW/SSB. The operators mentioned are: EA8DP, EA8CAC, EA8AJW, EA8AZM and EC8ABT. QSL via EA8AKN.

* Jurij, MM0DFV, provided a list of Scottish Lighthouses to be active in this weekend's ILLW. For pictures and detailed information on the following lighthouses, please visit the Scottish Ham Portal at: http://www.scotham.net
SCO-NEW GM3TKV/p - Kingston Beacon QSL via GM3TKV
SCO-015 GB2LBN - Barns Ness Lighthouse QSL via GM4UYZ
SCO-064 GB2DL - Dunollie Lighthouse QSL via MM1AVR
SCO-075 GB2ELH - Eshaness Lighthouse (EU-012) QSL via WA7OBH
SCO-089 GB2GNL - Girdle Ness Lighthouse QSL via GM4JLZ
SCO-103 MM0MWW - Hoxa Head Lighthouse (EU-009) QSL via MM0EAX
SCO-113 GB2MSL - Kinnaird Head Old Lighthouse QSL via GM1JNS
SCO-151 GB2NCL - North Carr Lightvessel QSL via GM3NHQ
SCO-191 GB2RRL - Rubha Reigh Rua Reidh Lighthouse QSL via GM4CHX
SCO-226 GB2SHL - Stoer Head Lighthouse QSL via GM8UPI
SCO-245 MM1HMV - Toward Point Lighthouse QSL via MM1HMV

SCO-248 GB2LT - Turnberry Lighthouse QSL via GM0JHF
SCO-317 MM3STM - Ardrossan Pier Head QSL via MM3STM

* The Panama Canal Amateur Radio Association (PCARA) will operate as HP2L from the Gamboa Lighthouse in the Panama Canal (ARLH No. PAN-027) in the International Lighthouse/Lightship Weekend, August 21-22nd. Activity will be on all modes CW, SSB and PSK31. QSL via HP1IBF or by the Bureau.

* Look for Eagle Harbor, Michigan's (Keweenaw County), Eagle Harbor Lighthouse (USA-253) to be activated in the ILLW, August 21- 22nd, using the special 1x1 callsign K8E. Modes of operation include HF/VHF, CW/SSB, FM Satellite and possible HF digital. Collectors of ARLHS numbers can get credit for three upon request: Eagle Harbor Lighthouse USA-253, Front Range Light USA-254 and Rear Range Light USA-255. QSL via the bureau or direct to N8MR with #10 SASE. The Web page is: http://www.kc8nah.com/Interests/illw04.htm

* The "Grupo Titan" (LT7W) will be active in the ILLW from Faro 'Golfo Nuevo' ('Golfo Nuevo' Lighthouse) ARG-038. QSL information is: P.O.Box 4, 9120-Puerto Madryn, CHUBUT, ARGENTINA. Send S.A.S.E. (w/ 2 IRC - NO GREEN STAMPS). Also, they will confirm the QSOs via the e-QSL system. PLEASE, DON'T SEND QSLs VIA THE BUREAU.

* Emmanuel, LU9ESD (Founding member of th BBDX), informs OPDX that members of the Bahia Blanca DX Group (http://www.grupodxbb.com.ar) will again take part in the International Lighthouse/Lightship Weekend (August 21-22nd). This year they will activate three different lighthouses at the same time. As usual, no special callsign will be used, only their personal callsigns / provincial letters (depending on the lighthouse). All three lighthouses will be active during the 48 hour event on all bands (including the WARC bands) and modes. Here are the Lighthouses with the respective reference numbers and operators:
Recalada Lighthouse: ARG-009, Lat. 39° 00° S and Long. 61° 16° W, Grid FF91ia and Buenos Aires Province "/D").
Operators/Stations are: LU6EPR/Ricardo, LU7EVP/Vernon, LU8EHQ/Carlos, LU8EBK/Marcos, LU4DRH/Dario, LU5DEM/Eduardo, LU6DRD/Diego and LU5DRV/Walter.

El Rincon Lighthouse: ARG-036, Lat. 39° 23° S and Long. 62° 01° W, Grid FF80xo and Buenos Aires Province "/D").
Operators/Stations are: LU9ESD/Emmanuel LU4ETN/Carlos, LU8EBJ/Gabriel, LW3DKC/Sebastan, LW9EVA/Hugo and LW8DMK/Marcelo.

Segunda Barranca Lighthouse: ARG-067, Lat. 40° 46° 34" S and Long. 62° 16° 27" W, Grid: FE89uf and Buenos Aires Province "/D"). Operators/Stations are: LU7DSY/Carlos, LW8EAG/Gabriel, LU1EUU/Gerardo, LU7AC/Marcelo and LU8DWR/Osmar.

QSL Manager for BBDX ILLW activity is LU7DSY: Carlos Almiron,
P.O. Box 709, 8000 Bahia Blanca, Buenos Aires, Argentina.

* The Grumman Amateur Radio Club will participate in the International Lighthouse/Lightship Weekend August 21st, from the Nantucket Lightship in Oyster Bay, NY. This is the LV112 ship built in 1936 and stationed at Nantucket Shoals from 1936 to 1942, 1945 to 1958, and 1960 to 1975. Callsign will be WA2LQO/LS. QSL to the CBA.

* Simo, OH2HAN, informs OPDX that the Finnish radio club "Kissen Kipina", OH2ET, will be active from a working sea and air Lighthouse, which is also a church at the same time! During their operation, there will be several marriage ceremonies in that church. The Lighthouse is actually situated at the top of the church - at the height of 54.2 metres from the sea level - the highest in Finland. The church is located on Suomenlinna Island in front of Helsinki City. The Lighthouse number is FIN063, and they will be using the callsign OH2ET/LH. QSL via the bureau. They are expected to be on SSB at least on 20 and 80 meters.

* Kevin, VK2CE, informs OPDX that there will be some rare Australian lighthouses in the ILLW event August 21-22nd. Look for the following:

VI7CL is a special event callsign that has been issued for activation of the Currie Lighthouse on King Island in Bass Strait. There is a team of 5 going there from mainland Australia. The callsign celebrates the centenary of the discovery and mining of Scheelite on the island.

VK9MI will be activating Macquarie Island Lighthouse, a very rare IOTA location.

* LIGHTHOUSE ACTIVITY FROM SOUTH AFRICA. Dennis, ZS4BS, provides the following list of South African lighthouses that will be activated during the International Lighthouse/Lightship weekend, August 21-22nd:

The Adventure Radio Club of Cape Town will be active as ZS1ARC from the Cape Columbine Lighthouse near Paternoster on the west coast.

The Boland Amateur Radio Club will be active as ZS1BAK from the L'Agulhas Lighthouse. L'Agulhas Lighthouse is the most southerly lighthouse on the African continent.

The Overberg Amateur Radio Club will operate from the Danger Point Lighthouse using the callsign ZS1OAR.

The Hibiscus Coast ARC will activate the Port Shepstone Lighthouse using the callsign ZS5HAC.

The Durban ARC will activate the Cooper Lighthouse with callsign ZS5D.

ADDED NOTE: There may be activity from Port Elizabeth and East London.

* Look for the PS7AA group to be active as ZV7AA in the ILLW from
a lighthouse (ARLS-BRA-161, DFB-RN-07). Activity on CW/SSB/RTTY/PSK31.
QSL via PS7AA.

MIA CONTEST. The Mediterranean Islands Contest, which is organized by
the Mediterraneo DX Club, will take place from 1200z, September 18th to
1200z, September 19th. The rules can be found on the following Web page
at: http://www.mdxc.org/contestmia/rules.htm

OH, FINLAND (IOTA and LH Op!). A group of Latvian amateurs (YL2FB, YL2CI,
YL2GQG and YL1ZF) will be active from the Etela-Suomi(Uusimaa) Province
Group (EU-097) using callsign OH/YL2FB, August 15-19th. On Friday, if
weather/wind condition are good enough, the group will move to Soderskar,
an off-shore lighthouse FIN-057, to take a part in ILLW on August 20-21st.
Operations from both locations are planned to be on all HF bands, including
the WARC bands, CW/SSB/RTTY and utilizing wire antennas and GPs for the
lower bands. They will also use multiband beams for 20 to 10 meters. They
also plan VHF/UHF operation on 6m, 2m and 70cm as well. QTH locators are
KO19JN and KP20QL, respectively. QSL via YL2FB.

QSL INFO AND NEWS...................
* Closing Pacific DX Logs. The following Pacific DX logs will be closed
on the 1st of October 2004:

3D2JH (Fiji) From June 27, 1997, to August 3, 1997
C21JH (Nauru) From August 16th to September 4th, 1998, and from
June 28, 1999, to December 17, 2000
T30JH (Western Kiribati) from February 21, 1998, to September 25, 2000
T33JH (Banaba) From July 20, 1997, to July 26, 1997.

So, if you need any cards for the above operations, now is the time
to make your move before October 1st. QSL requests may be directed to
VK2XQ (formerly VK2GJH): Mr. Jack D.Haden, PO Box 299, Ryde, NSW 1680,
Australia. As Jack is not a member of the VK QSL bureau, all requests
are to be direct only with sufficient funds for return postage.

* Pavel, OK1MU, informs OPDX that he still has about 500 full-colored
QSL cards for his previous callsigns 5N0/OK1MU and 5N35/OK1MU. If
someone still needs these QSL cards, requests can be sent via the
OK Bureau or direct to OK1MU: Pavel Prihoda, Okruzni 331,
Solnice 517 01, CZECH REPUBLIC.

* Bela, HA9SU, states that he now has his log online at:
http://www.starjan.hu/~ha9su

* YV0D LOGS. The YV0D online log search is now up and running at:
http://dx.qsl.net/cgi-bin/logform.cgi?yv0d
Also, visit the following Web page for pictures and logs at:
http://www.radioclubvenezolano.org

S7, SEYCHELLES. All arrangements have been made for Willi/DJ7RJ and
Klaus/DJ4SO to be on the air from Seychelles beginning October 3th,
for 2 or 3 weeks. They will be operating as S79RJ (DJ7RJ) and S79SO
(DJ4SO) on 40-6 meters, CW/SSB/RTTY/PSK31. Use of the 80 meter band

has not been authorized, but they will be requesting permission to operate on 80 meters during the weekends (3505 kHz +/-). QSL via their home callsigns.

SV5, DODECANESE. Wojtek, SP5MXZ, is active as SV5/SP5MXZ from Rhodes Island until August 20th. Activity will be on 20 meters CW/SSB. QSL via his home callsign. During this past weekend, he was expected to operate as SX5A (from a local club station), but as this was being typed we saw no QSNs. Also, look for him to be active later in the week as J42004/SP5MXZ. QSL via his home callsign.

T98, BOSNIA AND HERZRGOVINA. Babs/DL7AFS, Lot/DJ7ZG and Chris/Z31GX will be active as T98LBC from September 2-12th. Activity will be on CW, SSB, RTTY and PSK31, on 160-6 meters. QSL via DL7AFS, by the German Bureau or direct. More information and pictures are availabe on their Web page at: http://www.qsl.net/dl7afs

VP5, TURKS AND CAICOS ISLANDS (Update). Operators KY1V, WA2PGM, K0RAY, N0VD and possibly others will be active as VP5X during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL route is via OH3RB or W2GB. ADDED NOTE: KY1V is sponsoring another free trip for a young ham (See OPDX.671). For more details, please visit: http://www.vp5x.com

Z38, MACEDONIA. Before their T98 DXpedition (See T98 above), Babs/DL7AFS and Lot/DL7ZG will spend some holiday time in Macedonia. They are expected to be active as Z38Z for some days from there. Dates were not provided, but look for activity (soon) before September 2nd. If you had no luck to work them as Z38Z during May 2003, here is your chance to look for them again on the usual DX frequencies.

ZX35, BRAZIL (Special Callsign). Look for Orlando, PT2OP, to be active as ZX35O (Zulu, X-ray, Three, Five, Oscar), between August 16th and September 16th, to celebrate his 35th anniversary as an amateur radio operator. Activity will be on all bands CW/SSB. QSL via PT2OP (direct or by the Bureau).

Space Weather News for July 28, 2004
http://spaceweather.com

BLUE MOON: According to modern folklore, there's a Blue Moon coming on
July 31st. It's the second full moon in a calendar month. But will it
be
blue? Believe it or not, scientists say blue-colored moons are real.
They're caused by forest fires, volcanoes and dust storms. Follow the
links at Spaceweather.com to read about some genuine blue moon
sightings.

NORTHERN LIGHTS: A coronal mass ejection hit Earth's magnetic field on
July 26th and sparked a severe geomagnetic storm. At the height of the
storm, sky watchers spotted Northern Lights as far south as California
in
the United States. You can see the pictures in our growing
photo-gallery.

Solar and geomagnetic activity, which have been elevated for weeks,
should
subside in the days ahead as giant sunspot 652 disappears over the
sun's
western limb.

Amateur News from the guys in Australia...

Morse Code Test removed !!!
The ITU at the World Radiocommunications Conference removed Morse code as a mandatory requirement for amateur licences below 30MHz - effective 5 July, 2003.
Australian Morse Code Test abolished 1 Jan 04
The Australian Communications Authority took action to effectively abolish the requirement for a morse test, effective 1 January 2004. This followed a strong request for this action from the WIA and many individuals during 2003.

The WIA responded by declaring 1 January a "welcome to HF" party on all HF bands.

All licence classes previously restricted by the lack of the morse qualification, were merged into the corresponding licence class giving HF privileges for the first time to many Australian radio amateurs. These changes have not yet been reflected in the FAQ document on this site.

From the u.K

New Amateur Satellite Transponder Project Announced:

On Friday the 30th of July, the Chairman of AMSAT-UK - Professor Sir Martin Sweeting, G3YJO - announced a new amateur transponder project to be launched as part of the European Space Agency SSETI Express satellite. Speaking at the opening of the 2004 AMSAT-UK Colloquium at the University of Surrey in Guildford, he expressed his delight that AMSAT-UK had been able to work with the ESA to provide, at very short notice, an S-band - 2.4GHz - transmitter. It is intended that the transmitter will be available for use as the downlink of a single-channel FM transponder. The 437MHz receiver is being provided to ESA by DF2FQ. These frequencies will enable the many amateurs who already have Oscar 40 equipment to use it in an exciting new way.

News from the far north of the boarder Canada:

Western Canadian amateurs announce their first experimental 2200 metre QSO

Steve McDonald VE7SL and Scott Tilley, VE7TIL, have been granted special permission by Industry Canada to conduct experimental communications in the 2200 metre band (137 kHz). Steve sent in the

following story.

I am pleased to announce the first western Canadian contact on the 2200m band! The QSO was completed on 137.754 kHz. (July 10th) between myself, VE7SL (Mayne Island, BC - CN88) and Scott Tilley, VE7TIL (Vancouver, BC - CN89), a distance of approximately 50km. VE7TIL utilized slow-speed CW (QRSS3) mode while VE7SL used normal CW.

At the time of our initial two-way QSO, Scott's transmitter consisted of a homebrew DDS exciter using a Darlington-pair final running about 1W output. My transmitter was also homebrewed, using a crystal controlled exciter into a single FET amplifier at 100W out. Both of us used similar antenna systems for transmitting, a loaded three-wire flattop 'T' . On receive, both stations used small backyard loop antennas. During beacon tests the following night at 100 watts, both stations received encouraging reports from southern Oregon at a distance of 460 miles. Being the only 2200m activity west of Ontario, it is hoped that our efforts will stimulate more interest in LF on the Canadian west coast and western provinces. As well, we are both working towards improvements in antenna systems and increased power levels for the upcoming winter season.

Those wishing to learn more about 136kHz activity and equipment can visit "THE VE7SL RADIO NOTEBOOK":" http://www.imagenisp.ca/jsm and VE7TIL at: http://www.scottboxx.com/radio/

If memory serves me correct, there was a/were some program(s) which the Astronauts participated in, and gladly got their tickets..... to show the kids in school the things they can do, if they try. It was an "Educational" thing.......... But if you can get to be an Astronaut which takes much training, a ham ticket seems so little in comparison - to train for. Yes, I suppose it does show you can do anything if you set your mind to doing it, and make some goals..
NO... the ticket for Ham was/is NOT a prerequisite for being an Astronaut. There were some Hams who were astronauts, such as John Glenn. I don't know if he got his license before or after his space tour. This program started only since the Shuttle launches and Space Stations. Their ticket also helps them to stay in touch with others as well. Look at it this way, it won't clog the frequencies they need to do the business at hand - when staying in touch with family or friends who may have their tickets as well. Though they used voice, they used packet as well.... E-mail without the phone line.
Hams in Space - I believe was the title of the program.... It "may" have been a feeble attempt as well, to get a boost in Ham Radio, which wasn't as yet faltering.
I'm not sure if they're still doing the Ham stuff in space or not. I personally have not seen as much hoopla as of late about it. Like any idea, it ran it's course. I think they still have Ham equipment on the space station, but whether it is used, is anyone's guess. No hams, no use....
L.

Astronauts as hams is a relatively new thing, unless some simply wanted
to be anonymous in this area.

Yuri Gagaran was a ham, and that was known relatively early on.

In CQ, about 1965, there was an article about Owen Garriot and his hopes
to get into space. He was a ham at that point, but but really I've not
seen mention of other astronaut hams back then or for a good long time.

Keep in mind that the early astronauts came from a pilot and military
background. That does not preclude them from being hams, but it would
seem many weren't interested.

As space flight became more common, with the shuttle, there was obviously
a shift away from that pilot and military background, to a scientific
background. That likely brought many out of the woodwork. I though
Owen had that background, and at the time of that 1965 article, time before
he got into space.

In 1977 or 78, there was a construction article by a ham who wanted to
get into the astronaut program. Indeed, in the preface he said he was
hoping that the fact he had built his own computer would be a plus
toward his being selected. Right now, I can't recall his name, but he
was one of the scientific astronauts, and he did of course get into space.

When there was Skylab, AMSAT had a proposal to put a station on board,
but that never happened (I've seen varying reasons for it not happening).

It was only once the shuttle happened that there was a chance to operating
amateur radio equipment from space. So up till that time, there would
be little reason to know who had a license and who didn't.

Once ham radio in space was part of the shuttle program, obviously it
was useful for those who were hams. By then, the wider swatch of society
getting into space likely provided some already licensed. Of course,
there would be no sense in doing it unless there could be hams in space.

And by that time, getting a license was relatively easy, with a code-free technician license in the US. It was simple enough that likely many did get licenses because they might as well. Since much of the program was intended for educational purposes, there probably was incentive to get the license. For that matter, they might have learned from scientists in isolated areas (like the antarctic) that amateur radio was a way to kill some time when there wasn't much to do in your off time, so they saw a use in getting a license.

970. newbie walkie-talkie questions

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-16 05:56:27 UTC
From: zeb7k@hotmail.com
Message-ID: <90671742.0408152156.52e804bf@posting.google.com>
Source record: 56732

Hi, I'm thinking about getting a walkie-talkie pair for emergency communication between my elderly parents and me when I'm building my house nearby. It's mountainous. A local told me his cell phone works only 70% of the time. I'd rather not pay for service anyway. The site is about 1000 feet through the woods from my parents house. I can't see their house from my site but I'm guessing it's blocked more by trees than hills. Assume I get 2W GMRS/FRS motorola type units.

Will they work?

Is there a better alternative? How about CB? Shortwave?

Is getting that GMRS licence difficult --assuming I already know basic radio electronics?

If this doesn't work out I'll just get them a nice loud canned air horn!

Source record: 56734

Borrow a pair of FRS or GMRS units and try them out.
FRS can get congested if you have many nearby neighbors with kids.
External antennas are forbidden for FRS
No license fee or test is required for FRS
Some FRS radios feature subtone access and will reduce local chatter.

GMRS may work better in this regard and allows external antennas.
GMRS requires a license fee (about $70) but no test.

CB may be full of junk and obscenities but the units are cheap and external
antennas are allowed.
No license fee or test is required for CB
Best listen to the local bunch before getting into CB

See FAQ's on CB, FRS, and GMRS at URL's
http://ac6v.com/rstore.htm
There are discussions there on transmitted range, repeaters, etc.

I am submitting this post on behalf of Orkney Amateur Radio Club.

We are trying to establish which of the Orkney Islands are "most wanted" by island chasers (so that we can plan our future activations around this).

If you have ever had a QSO with someone in the Orkney Islands (IOTA EU-009) we would be very grateful if would fill out our short survey on the club website www.eu009.com This will literally take only one minute of your time, and you can remain anonymous if you wish.

Thanks in advance...

Mark Simpson

Date: 2004-08-17 03:23:02 UTC
From: Michael <paracop@bellsouth.net>
Message-ID: <41217A16.EC4A1DCE@bellsouth.net>
Source record: 56644

I have 2 Saber III UHF Securenet radios with DES-XL installed in them
and working currently, the radios are 8/10. I also have the T3011 BX KVL

Keyloader for the DES-XL so you can change your Securenet "key". I have
a smart charger for the radios and a charger for the KVL. The KVL has a
new battery bought last year I think and the radios have several
batteries bought over the past several years. I also have the
instruction book
for the KVL (something hard to find now days). The radios also have
antennas
with them. I will gladly program 10 channels in them for you for
nothing. I am
still currently using these but will be upgrading them soon to an APCO
25
SmartZone Astro XTS5000 III 800MHz so I am looking to sell these as
a unit only and will not break the set. Please contact me off line for
more
information. Located in zip 350xx. $2000.00 for the entire setup.
Shipped
only in the USA since there are DES-XL boards installed.

I guess if the jammer's radio puts out, and his xyl doesn't, I can see
why he spends an inordinate amount of time jamming a repeater instead
of his xyl.

990. wire antenna help

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-17 21:30:23 UTC
From: Tim Boyd <timboyd@tds.net>
Message-ID: <41227ad1$1_3@newspeer2.tds.net>
Source record: 56652

I have installed a inverted V wire antenna. I have it connected with a 1:1 balun at 30 feet from the ground. The center wire is 66 ft 6 in long. The end is 8 feet from ground. The other leg is 28 ft long and attached to the roof of my house (appox 20 feet). I am getting started in MARS and need to transmit around 3.350 MHZ. What can I do to this antenna to tx around that freq ? Right now the antenna works from 40 meters to 6 meters with my MFJ 945 tuner. I was thinking I could make a wire trap for it. Thanks for any ideas.

Source record: 56653

First off....why did you put up a antenna of 94 foot total length, then feed it at some off the wall spot of 28' through a 1/1 for in the first place?

And if you want to work all bands via a tuner why did you use a balun and coax for?

In order to work properly remove the coax and the balun. Stretch out 140 foot TOTAL length and hook some ladder line to it. If you don't want to/ or can't run the ll into the shack. Put a 4/1 balun outside and run a piece of coax to the tuner inside.

If you don't have enough room for a center fed, then put up as much wire as possible and feed it center or end. Again with ladder line.

Or better yet...go buy a ARRL antenna handbook and learn something about antenna's. It is a hobby in itself.

Also you might want to pose this question to the following;

rec.radio.amateur.antenna

Got some real guru's there.

Yes, I did see that. Rosin flux in orbit around the solder !

Did you also notice that they were using a Weller TCP series iron (50 year
old Magnistat design).
Quite a few good reasons for choosing this specific model for space
station - KIS - easy to repair - virtually foolproof -
needs only 24 volt (or 12 volt) bus to operate .. with no need for base unit
with electronics.

People realize one thing. The originator of this message and his
bozo's of the Sick's Four repeater in Tampa have NO lives. Donald
Roselli, KG4COQ is the ring leader of this crowd. For many reasons
his life is on the skids, and if it wasn't for the sick's four
repeater in Tampa, he'd have nothing to do, and would probably kill
himself. I had the misfortune to run into this two faced bastard
while I lived in that God awful place. Very nasty individual.
Accuses people of jamming who are not even on the air, and in some
cases were silent keys. I had opportunity to fight this individual
and put him off the air, but for what? I figured let 2m die, and let
Donald Roselli, KG4COQ kill it. By the way, the author is this string
IS Donald Roselli, his EMAIL address is KG4COQ@yahoo.com. Pitiful,
isn't he? me

Gee Don Roselli, KG4COQ, the infamous poster known as PRIVATE, I bet you were just getting a real boner when that storm approached the Tampa area. I bet you went limp when it passed you, and hit the people a bit south of you. It's people like you who crave disaster so you can play hero, running your brainless tech net on the SICK'S FOUR repeater. Well maybe next time the hurricane will hit your area.

The thing we all want to know is, what is your reason for posting this babble here on the Internet? Benefit? To who? The few moronic putz's who pay attention to you and think you're a hero? Fill up the cab and drive off the Franklin bridge, do us all a freaking favor.

Mid-'80's ICOM R71A for sale. Recently removed from sailboat as I am looking for RX/TX capability and this SSB is RX only. It works. It shows no outward signs of any abuse. It comes with owner's manual and some schematics. No AC power cord.

Since anyone interested in such a machine knows its value, I'll ask that you simply make me an offer that will satisfy both of us.

> a nonaccredited college?

My job is to interview /assess college and trade school
graduates for both entry-level and mid-skill/career experience
at a Fortune-500 Pharmaceutical Mfgr. Of the people I have
reviewed over a 4 yr period, meaning those from *both* accredited and
a nonaccredited college(s), I have found that candidates having
just a basic 2-Year Associates Degree or Evening
Trade School (DeVry, CIE etc..) and also having 3 to 6 Years
actual work experience have been far better associates and
employees. IMHO the experience people get in "real world"
situations and career experiences has consistently out-performed
people with a 4-Year Degree and even some Graduate level
applicants. (I have even hired people with 8+ years exp having
NO college degree whatsoever for positions requiring a BSEE
or BSME, and these people's experience and skills have given
our company a 1000% return in loss of downtime and productivity.

For our specific applications, I will take candidates with real life
job skills and experience over someone with a 4-year Degree
who in all likelyhood just wants a hefty salary and will
probably leave and go elsewhere in a year or two.

Continuing on the digression: NO. I have the call originally assigned randomly by the FCC--before vanity came along---go downtown, take test, wait, get paper in mail, read call sign on paper, operate---, but there was a previous owner.

If we "digress" when we go off topic, do we "gress" when we go back on?

Gress...

Besides...What does that have to do with finding out who owned the calls way back then ??

Driving from Seatlle down to the Bay area via I5 and a stop a Redding.

Is there something I can plot my repeaters available on a route ?

I know its last min, leaving in AM, just thought of this though

A history log of the Sicks Four repeater? Hey Don Roselli, KG4COQ, why don't you tell everyone how N9EE, king fiddle fart stole that frequency and illegally obtained it? And why aren't you answering ME? The truth about Don Roselli, KG4COQ aka the PRIVATE poster in this news group will come out soon. That's my way of saying thanks Don.

In article <41250761.C0F5ED4C@yahoo.com>, n7hjTHREAD@yahoo.com says...

> Driving from Seatlle down to the Bay area via I5 and a stop a Redding.

<snip>

A most worthy trip. I do it every year to go and see family,
friends, and to do a bunch of electronics scrounging.

Suggestion, in case you've not done this before: Don't follow I-5
all the way down to Altamont Pass, and then cut west on I-580. That's
the long way around. Instead, shortly after you get southwest of
Sacramento, you'll see an exit for I-505. Take it, and then pick up I-80
west around Fairfield. It'll take you straight in through Vacaville,
Vallejo, then across the Carquinez Bridge and down through San Pablo,
Richmond, Berkeley, and Oakland.

Enjoy your travels. I will be following in your tire tracks in
about two weeks.

Lloyd is drunken faggot N9PGE. Trying to netcop. What a pathetic, drunk,
pos. No wonder he is single. A male in his sixties, single all his life.
If he's not gay he missed a damn good chance.

Real quick. Answer us this.
Of the ten or twelve or fifteen posters in this group, how many are relegated to reporting to a Parole Officer?
Anybody out here been convicted of a couple felonies?
Anybody out here been convicted of Felony Stalking?
Posession of Controlled Substances?
Has anybody out here ever had a Court Order obligating them to take psychological counseling?
Gotta give the Moron credit for being stupid....one more felony and it is up the river for Habitual.
Five years in the slammer minimum. Ten on good behaviour.

Look at it...digest it. Of all these users only one such scumbag comes to mind. He hides in the shadows. He lurks behind an 80 proof fog and smokes Controlled Substances.

He walks, he talks, and he stalks like the reptile he is.

Dude gonna mess up for sure. Prison is just around the corner for him.

And he ain't bright enough to see it coming.

i am not DON KG4COQ

i have already stated why i post this info here, you are not
comprehending my reasons, for that, just let it go, its over your head
i guess.

dont you mean the skyway bridge? everybodys always off'ing themselves
on that bridge... you never hear of any jumpers on the frankinstein...

in another 3 months, this thread will have been alive for a year!

i am not a jammer of the repeater either, but the other thread
circulating about jamming XYL's... yeah thats a good idea im into that
every chance i get :)
i had to laugh when i read the comparison...

1036. WANTED:: Wire Measurer -or- Wire Meter -or- Wire Counter .

Newsgroup: rec.radio.amateur.misc

From: rfpexec@yahoo.com
Message-ID: <676011a0.0408211445.425ab99b@posting.google.com>
Source record: 56598

HI,

I am looking to buy a Used Wire Measurer (or wire meter or wire counter or what ever you call it) and maybe a take-up reel/spooler.

The measurer is for #10 wire.

The take-up reel needs to have a diameter of about 8 inches or less.

I don't need anything fancy, just something that works.

I live in the Denver, Colorado area so I can pick it up if you live within 50 miles or so of Denver. Or, I will pay to have it shipped.

I don't need the whole table...just the counter and take-up reel.

If you have either item available, please email me at:
rfimages@yahoo.com
or call me at 303-674-0510

Thanks,

Bill

My, My, My, Things haven't changed much.
I recall when I was learning basic electronics and CW to get my license (WN4ILG) in 1967 I heard the same crappy arguments about those new hams who didn't know diddly squat etc. etc., like the old experienced, and obviously superior upper class gurus who were complaining bitterly about the newbies and theory lack of whatever the subject was at the time. My license expired because I was, at the time of renewal, sitting on a ship off the coast of Spain for 11 months looking for four hydrogen bombs the U.S. Air Force lost. when I got back to the States other things like getting re-acquainted with my wife and 10 month old daughter took up my time so I never renewed. If this crap I am seeing here is the general attitude I am not so sure I, as planned, want to pursue another license.

Respectfully
Bob Glaubitz

What you see on the internet newsgroups gives a very skewed picture of ham radio. Most hams are actually very decent people who are more than willing to help new people. So if you enjoyed the hobby before, jump back in. The testing has been streamlined so that there are only three license classes. They are Technician, General, and Extra. The highest code speed required is 5wpm even for Extra. The Technicians have all VHF/UHF privileges and upon passing the 5wpm also receive the old Novice HF privileges. Note that the Novice class as such is no longer being issued even though those who currently hold a Novice license can continue to renew at that level.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. Robert, 3B9FR, has been very active on RTTY lately. Watch 15/17/20 meters between 1400-1700z and after 0230z (on 20 meters). He has NO QSL MANAGER. QSL direct to: Robert Felicite, P.O. Box 31, Citronelle, Rodrigues Island, VIA MAURITIUS ISLAND, INDIAN OCEAN.

3DA, SWAZILAND (Also C9). Look for Joe/AA4NN and Chuck/W4GMY to be active as 3DA0NN and 3DA0CG, respectively, November 17-22nd. They plan to have two separate CW stations active on 160-10 meters including the WARC bands. The duo plan to set up a contest in Mozambique (C9) beginning November 24th in preparation for a Multi-Single entry in the CQ WW CW Contest. The callsign has not yet been assigned. Also, they are interested and looking for two additional CW operators for this contest effort. If interested, please contact: aa4nn@earthlink.net or w4gmy@msn.net

5U, NIGER. You have less than a week to work Michael, PA5M (aka 9U5M/ST2DX), as 5U7DX from Niamey, Niger. He'll be leaving the country and heading for Mali (TZ) on August 27th. He will only be active in his spare time. Most of his activity has be on 17 and 30 meters CW, but there has been QSNs on 20 meters CW and 17 meters SSB. Watch these bands between 1230-1330z and 1930-0000z. His QSL Manager Dennis, PA7FM, informs OPDX that online logs and all information on Michael can be found on: http://www.pa7fm.nl
Dennis also mentions that for Michael's trip to Mali (and after that Ghana and Benin), the licence is not in hand yet, but they are working on that. QSL via PA7FM. ADDED NOTE: All direct ST2DX QSLs have been answered now, and new requests will be answered as soon as they arrive.

7Q, MALAWI (Update). Allen, G0IAS, reported to OPDX last week that he was hoping to go down to Malawi before the year's end and be active as 7Q7RM. This week Allen states that he will hopefully be going down to see Ron, 7Q7RM, and has received his Malawi callsign which is 7Q7AH. Also, he reports that Les (original callsign not provide) will be going to Malawi and be active again as 7Q7LA. Les was the first 7Q callsign to be issued with an OFFICIAL licence after 16 years of non OFFICIAL transmission between 1974 and April 19th, 1990. His length of stay is to be around 12 weeks. Allen will provide more info as he gets it.

A6, UNITED ARAB EMIRATES. Operator Abdullah, A61Q, has been quite active over the past couple of weeks on 80/20/17/15/12/10 meters CW. Activity seems to take place at various times during the day. Watch clusters for QSNs. QSL via EA7FTR.

HB0, LIECHTENSTEIN. Geza, HA4XG, will operate from Masescha (1350m ASL) as HB0/HA4XG between August 28th and September 4th. Activity will be on 40-10 meters CW/SSB, using 100 watts into a GP antenna. For the first time, he will be on 2 meters with a 8 element Yagi on WSJT and tropo (w/120 watts on VHF). His main activity time will be in the mornings and evenings because this is a family holiday (which comes first). QSL via his home callsign either direct (QRZ.com) or through the HA Bureau.

IOTA NEWS.....
AS-103. The CTARL DX group lead by Paul, BV4FH, will activate Peng Hu Island from August 27-29th. Callsign will be BV9A and activity will be on 40/20/15/10 meters CW/SSB. QSL via BV4YB.

NA-026. SPECIAL EVENT. The Kings County Repeater Association and The Metropolitan 222 ARS will co-sponsor the activity of KC2RA, a Memorial Station on Governors Island, NY, September

11th. Operations will take place between 11:00 AM and 4:00 PM
EDT (1500-2000z) on 28340 kHz, 21340 kHz, 14250 kHz and
7250 kHz (+/- QRM); also VHF/UHF if possible.

OH0, ALAND ISLAND. A group of Latvians will be active as OH0I during
the CQ WW DX SSB Contest (October 30-31st) as a Multi-Single entry. The
operators mentioned are: YL1ZF, YL2KL, YL2LY and YL3CW. QSL via OH3BHL.
Also, operator YL2KL will return to be active as OH0I in the CQ WW DX
CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry.
Also, QSL via OH3BHL.

OH0, ALAND ISLAND. Ari, OH5DX, will be active as OH0Z in both CQ WW DX
SSB Contest (October 30-31st) and CQ WW DX CW Contest (November 27-28th)
as Single-Op/All-Band/High-Power entry. QSL via OH5DX (ex-OH1EH). Also,
visit the OH0Z Web page at: http://www.qsl.net/oh0z

OHIO QSO PARTY. The OQP is next weekend August 28th between 1600-0400z.
Join the fun and work many Ohio counties (maybe your editor!). For more
details and rules, visit the Web page at: http://www.oqp.us

QSL INFO AND NEWS.....
By the time you read this, John, VK6HZ, who was active as YJ0AHZ from
Vanuatu (OC-035) this past week will be QRT. QSL via his home call,
VK6HZ.

QSL VI2MI via VK2XNF (See instructions below). The previous callsign
was to be VK9MI, but was changed. Activity was from Montague Island
during last weekend's International Lighthouse Weekend. Montague Island
is located on the south coast of New South Wales, Australia, about 12km
off the coast from the town of Narooma. The island is a nature reserve
managed by the NSW National Parks and Wildlife Service. The operators
for the weekend were: VK2XNF/Neil Fallshaw, VK2CWI/Ken Carey, VK2KEV/
Kevin Purves, and VK2HAK/Justin Rumsey. QSL instructions are:
* Direct, No card - SASE w/info including 1 IRC
* Bureau, No card - E-mail for Bureau card. E-mail address
is: vk2xnf@yahoo.com.au

R1MV, MALYJ VYSOTSKIJ ISLAND. A group of operators are planning to
activate MV Island as R1MVI next weekend betweem August 27-29th. Their
expected activity will be on 80-10 meters (160m will depend on their
opportunity to install an antenna during the short stay). Operations
are expected to be RTTY, PSK31, CW and SSB. Radio equipment mentioned
are: FT-1000, FT-990, Acom-1000 and Acom-2000A. Antennas are: ��-3MK4
and G5RV. Station's power is: Honda EM-20 generator. Operators mentioned
are: RA3CQ, RA3AMG, UA1CKC, RA1CD, RA1AR and ES4RZ. QSL Manager is RA3AMG.

UPCOMING CONVENTIONS.....
* W9DXCC CONVENTION 2004 - The Northern Illinois DX Association is pleased
to announce the 52nd annual W9DXCC Convention to be held September
17-18th. The 2004 convention will be at a new location, the Holiday Inn
in Elk Grove Village, IL, conveniently located by Chicago O'Hare
International Airport, Woodfield Mall and other suburban attractions.

Banquet speaker is: John Devoldere, ON4UN. The many forum speakers are: John Battin/K9DX, Jerry Rosalius/WB9Z, Eric Scace/K3NA, Jay Terleski/WX0B, Scott Robbins/W4PA, Lee Finkel/KY7M and Carl Luetzelschwab/K9LA. The ARRL Forum features Central Division Director Dick Isely/W9GIG, Vice Director Howie Huntington/K9KM, DX Advisory Committee Chairman Jim O'Connell/W9WU, and Membership Service Chairman and Logbook of the World Guru Wayne Mills/N7NG. For the IOTA fans, Mike McGirr/K9AJ, Jim Model/K9PPY, and Gordon Bazsali/WB9EEE will have the latest Island News. There will be prizes! For more complete details, please visit the W9DXCC Web page at: http://www.w9dxcc.com/
You can register on-line or request more info via: w9va@aol.com

* THE SEANET CONVENTION 2004 - BANGKOK, THAILAND: "This year's convention which will be held in the Arnoma Hotel, in the city-centre of Bangkok from Friday 19th to Sunday 21st November 2004. The hotel is close to most of the City's attractions, and is within short walking distance of the new Sky Train which links with most important destinations in the City. Some major shopping destinations are within walking distance, such as the World Trade Centre, Pratunam Market, Prantip Plaza, Naripan Plaza, Central Stores, Sogo etc.... All the usual popular SEANET social and sightseeing events will be arranged, plus something new, and of course the SEANET special event radio station HS72B (all bands). We will also organise a CQ WW CW Contest team entry the following weekend from HS0AC (HS72B) Club Station, and suitably licensed members are welcome to join in. More details, including a registration form are available from the Convention Web-site <http://www.seanet2004.com>, or please contact Ray Gerrard, HS0ZDZ, PO Box 69, Bangkok Airport Post Office, Bangkok 10212, Thailand, E-mail <seanet@RAST.or.th> for brochures and information. Sawadee Khrap!" -- Mayuree Chotikul, HS1YL, President of RAST (Under the Royal Patronage of His Majesty the King)

VK9L, LORD HOWE ISLAND (DXpedition Update). Longtime English DXer Laurie Margolis, G3UML, is joining the October operation on Lord Howe Island, organized by VK4FW and the Oceania DX Group. A team of Australians, Italians, and now one Englishman, will arrive on Lord Howe on October 9th for a well-equipped two week operation. Full details to follow later. G3UML has been active since 1965 and holds DXCC completed and full 5BWAZ, as well as much contest experience.

VY2, PEI, CANADA. George, K3GV, will be active between August 29th and September 12th as K3GV/VY2 from Prince Edward Island (IOTA NA-029, CIA PE-001). Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via his home callsign, direct or by the bureau.

XX9, MACAO. Hiro, JA0SC, will be going to the Island of Coloane, and will be there between August 24-31st. He will receive his callsign after his arrival there. Activity will be on the digital modes especially on SSTV. Operating bands are 20-10 meters, using 200 watts and a 2 element HB9CV antenna. QSL to his home callsign (OK at QRZ.com).

YO DX HF CONTEST (ed. And I Don't Mean YAO!). Chip, N2YO, wants to remind everyone that on August 28-29th, to please consider participating in the

YO DX HF 2004 Contest (24 hour contest) which is held on the last weekend
of August every year. Rules can be found on the following Web page at:
http://www.hamradio.ro/contests/yodx_eng.htm
Compatible YO DX HF Contest software is listed here:
http://www.hamradio.ro/contests/yodxhf-software.htm

ZK3, TOKELAU ISLANDS. Atsu, 5W1SA, must be active again as ZK3SA. Activity
was heard on Friday, August 20th, on 40 meters CW and 20 meters SSB. His
length of stay is unknown. QSL via JH7OHF.

Obviously, a voice conversation isn't going to clobber a QRP contact for the simple reason that the voice sub-band allocations are different from the CW/RTTY.. sub-bands, right? ;-)

And the vast majority of QRP contacts take place on or +/- 5 khz of a few well-known frequencies, and some commercial QRP rigs only tune 60 khz or so of the total CW band allocation on their particular band (e.g., 40m). I have built a number of QRP transceivers (cf Pixie-2...) which only tune within +/-1 khz of these crystal controlled QRP frequencies ;-)

In case you missed it, the only country still using morse code channel (500 khz) is China for coastal trade, and it is rapidly phasing that out, with pending WARC request to convert that channel into a mini-ham band ;-)

==========

While the new exams are only 5 wpm morse max (vs. 20 wpm in the past), the technical elements are more detailed and diverse than in the past, which is more needed and appropriate to the needs and operating efforts of most hams. I don't see any real (vs. imagined, as above) problems with no morse exam HF voice licenses, and many countries already have no morse requirement licenses with more going that way. And I am a former USCG ship's radio officer, First Telephone/radiotelegraph licensee, chief radio station engineer, grad degreed electrical engineer in telecom etc., as well as an amateur extra and current local amateur radio club officer ;-)

On the other hand, if we don't find a formula to interest newcomers in amateur radio, the current demographics don't look promising for the long-term ;-(So between no hams and no bands, and an HF voice band entry level license, the choice seems clear ;-)

regards bobm

I took my exam in 1946 in front of an FCC engineer.
Everyone had a coat and tie on and as with just about
everything else in those days, it was very formal. You
were very respectful toward the engineer. He almost
never spoke to anyone and was very businesslike. Life
was like that in those days. There were three classes
of licenses--Class A, B. and C. You were examined for
B if you were able to come in for an exam. You could
be examined for Class C in some manner, but as soon as
you moved or otherwise were able to come in person
were obliged to do so. Class A required additional elements,
but one had to experience a year as class B before applying.
The Class A bands as I remember them were mainly phone
75 and 20. However, you just didn't key up in the exclusive
75 meter band without a full-gallon. That was of course the
maximum legal. When one of those full-gallon double-side
band with carrier stations modulated, lights in the house and
on poles flickered, and you could hear transformers hum
and buzz 50 feet away. 2,000 volt plate supplies were the
norm and some careless ops became silent keys of course.
75 was a very exclusive band and generally you had to
more or less find a way in or no-one would answer you.
Then in the early fifties I built a SSB phased filter rig
with a 6L6 final running about 15 watts. At a ham club
meeting one night I disconnected the antenna from the full
gallon, hooked up the little 8 X 10 chassis with the 6L6
final and called New York city right in the middle of KW
corner from Memphis, Tenn. That was not possible with
a full gallon at that time. The end and beginning of an
era. The place was silent and no-body talked about it.
Tales if yesteryear. CW Commercial, First-Class General
Radiotelephone, Extra and all the BS. Several uiversities
Op on ships, aircraft, Navy base-stations etc. Much fun
had. Tales of yesteryear. W6BWY, W6FCN, W5MXG,
OA4RN, KX6---. Had a good time..Hope everyone else
does. Best 73s..

Hi:
can anyone give me any info on this rig? My student gave me two of them , his granma passed away and had them around the house.
Here are the specs. Anyone know about
1)Generally when they were built
2)Are they worth anything, other than a few bucks that a handheld CB radio with one channel would be

7-Transistor Citizen Band Transceiver
(210-0102) Specifications Faxback Doc. # 45541

Circuit:
Receiver Section: ..... Superhetrodyne with crystal controlled local oscillator
Transmitting Section: ..... Crystal controlled oscillator
Semi-Conductors: ..... 7-transistor and 1-diode
Frequency: ..... 27.085 MC (Channel 11)
Frequency Tolerance: ..... plus/minus 0.005%
Transmitting Power Input: ..... 100 mW (Maximum)
Audio Output Power: ..... 130 mW (Maximum)
I. F. Frequency: ..... 455 kC
Speaker: ..... 2 1/4" dia. PM Dynamic Type
Antenna: ..... Single Element Rod Antenna
Dimension: ..... 6" x 2 5/8" x 1 1/4"
Battery: ..... 9V standard battery

Thanks!
Tom

1053. I'm a Complete RETARD by Richard A. Clark N6UZS

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-24 05:23:07 UTC
From: "Richard Clark (N6UZS)" <richard.clark@retardsrus.com>
Message-ID: <%gAWc.11414$3O3.1819@newsread2.news.pas.earthlink.net>
Source record: 56615

Hey everyone, this is BUZZ (The real one ASSHOLE) as you know I'm a TOTAL FUCKING RETARD and telling me NOT to do something is all the reason in the world I need to go out and do it. I am now done with my self imposed thirty day time-out for Talking to Jack Gerritsen (ex-kg6iro) on the output of this repeater and the input to the 985 repeater. I really don't think that I should have had to do this punishment as I am a STUPID FUCKING RETARD and rules can not be applied to me. However I expect Reily to except my "time served" as punishment enough. I don't know if you are aware of this but as a STUPID FUCKING RETARD I get a free pass though all of the rules and regulation in life including amateur radio and particularly DVO's repeater. I get to do what ever I want when ever I want saying what ever I want to whom ever I want and their is not a fucking thing you can do about it because I am a STUPID FUCKING RETARD. An example, If I want to shit my pants for two weeks straight and force you to strip me down and sponge bath me, Then you have no choice but to do it. You don't believe me? Ask my parents, I force them to take care of me day and night catering to my every ridicules need. All I have to do is yell at my parents like a STUPID FUCKING RETARD and I get what ever I want from them. You should really see me when I'm in a restaurant with them, This RETARD thing allows me to embarrass the hell out of them. Anyway, If you try to force me to follow part 97 rules on 435, I'll just file a class action law suit against all of you for violating the American's with disabilities act of 1990 (title 3 sections 306, 307 and 308). So you see as a STUPID FUCKING RETARD I am taking possession of the frequency 147.435MHz. I call for all STUPID FUCKING RETARDS from all over the amateur radio spectrum to come to 147.435MHz repeater and call it home. We are going to force your "alternative talk" repeater systems into the ground. I want to hear only STUPID FUCKING RETARDS kind of conversation on this repeater from now on. You see I am a total FUCKING RETARD and I can not be held accountable for my actions. I hate women, children and anyone that is NOT a STUPID FUCKING RETARD like me.

Oh ya now you can go and FUCK yourself.

Richard A. Clark

Maybe of some value to a collector, depending on condition. I bought
one of those in 1967 for about $10.

Dave

1057. contestants needed for poker tv

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-25 04:51:39 UTC
From: winhugecash_2005@yahoo.com
Message-ID: <cgh5sr$je2@odbk17.prod.google.com>
Source record: 56619

Please forward this to your friends!

We are looking for contestants to star in a new reality TV show called Final Table Challenge.

The show is scheduled to run like a live Poker TV Show with our first Show at Sams Town in Las Vegas.

The lucky winner will then compete against other poker players in a chance to win some cash and become a TV celebrity.

The worst that will happen is that you get a trip to Las Vegas and you play some poker on our dime.

You should be up for a great time.
Looks etc are not important, but you must be ready for anything.

If you think that you and / or your friends have got what it takes to make it onto the show, just visit our registration and sign up.

http://www.finaltablechallenge.com/registration.php

To find out more details and how to apply to be on The Final Table Challenge TV Show please visit our web site.

http://www.finaltablechallenge.com/registration.php

The signup is free and takes less than 30 seconds. Remember, you can't win unless you're in so apply now !

Don't forget, we want to hear from your friends too, so please forward this mail to them all.

1058. Maxtrac program

1061. Farewell Amatuer Radio :-(

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-26 07:13:02 UTC
From: chuck Adkins <k8cpachuck@gmail.com>
Message-ID: <cgk2hu$u4l@odak26.prod.google.com>
Source record: 56623

Greetings all,

it is with a heavy heart that I write this message.

after the events of today. I have decided that this hobby just isn't worth it any longer.

Before it comes out in the news. I will annouce it to the amateur radio world. Yes, I did get a letter from riley hollingsworth. it was reguarding a supposed "Death Threat" made to another ham. It happened on qrz.com. I did post the message, however, I didn't intend it to sound as it was taken by alot of people. I did send a reply into riley, I have it hear if anyone wants to read it.

Before I go on, I just wanted to share something.... I got into this hobby in 1989. I'd been interested in Amateur Radio since age 8. My grandfather's sister's husband was a ham, He was from Little Rock, ark. His name was james, his call, was KA5LAB. (Now a silent key) He had a wonderful shack, even gave classes in his garage. I was so awestruck by what I saw, I vowed that one day, I would become a Amateur Radio Operator. and finally in 1989, I finally after alot of years of stuggle, I finally obtained my Novice license. I was so proud, as were my parents. about a year or so later, I upgraded to Tech, and again, my parents were very proud. I always have been proud of this hobby and I've always enjoyed this hobby.

However, In the last few years, alot has taken place in my life, I've noticed a change in this hobby as well, some for the good and quite frankly, alot for the bad. I admit, I haven't been the most popular person in this hobby, and quite frankly, there's quite a few who don't like me at all. I speak me mind, quite a bit, I'm for the little guy, the working stiff, someone who's often overlooked by the "well to do" in this world. I don't claim to be a perfect shining example of what a "amateur radio operator" should be, quite frankly, I don't think most of us could be that.

As I said before, alot has taken place, I'm not the same person who was originally introduced to this hobby, I've grown up alot, and I'm quite naive as I once was. I was very naive as Child, needless to say, in my later teenage years, say, 19-20-21... I grew up in a great big hurry. and... alot as recently taken place as well, and I've, quite frankly, been forced to take a long hard look at my life and things around me and I've noticed that things I really used to hold dear to, simply don't really hold my interest any longer. at one point in my life, I lived, breathed, and ate, slept, and walked and talked amateur radio. it was all I ever was interested in. well, quite frankly, I just don't

have the drive or desire any longer.

Now to address the situation at hand. Thanks to some very "interesting" people in this fond hobby of mine, I recieved a "bad boy" letter from our amateur radio enforcement person. Riley Hollingsworth. This "Incident" in question, did NOT take place on the air, as it was told to him. It happened on the Internet. well, mr. riley says that doesn't matter. It only matters that I am a licensed ham and that I supposedly, made a threat to someone. This is quite disturbing to me. and quite frankly, I am not so such I like being painted as some dude who goes around threatening people everyday. I do not do this and I've got people that would be more than happy to back this statement up. I've told riley this as well, in my reply.

So, Be that as it may... I have come a decision. I am getting out of Amateur Radio. This once great hobby, has degenerated down to a level of which I wish to no longer be associated with any longer. I will be selling the equipment, eventually. I need to make some repairs to some of it, and once that's done, it's outta here, the whole station, (I won't be selling K8RFP'S wattmeter, so, he doesn't have to worry) However, everything I own, that pertains to amatuer radio, will cataloged and sold as a package deal. radios, antenna tuner, 2 meter mobiles, everything is outta here. I will be annoucing this when I am ready to sell on QTH.NET.

To the local freinds I have made on ham radio and abroad. thank you for your friendship, you know who you are. To those who did attempt to railroad me off amateur radio. I hope you are happy. Especially to the staff of QRZ.COM. for using your personal friendship with riley hollingsworth, to get me a notice. it served it's purpose.

Thanks for reading this and have a good day...

Waste of time, energy, and $$. Gerritson has shown himself to be
clue-resistant, even after spending time in federal prison for the same
crimes.

Riley and his gang will make an example of the twit soon enough.
This time, I hope the confiscate all his gear and sell it to more
deserving users.

The FCC has been known to yank amateur radio licenses on the grounds of the "bad character" of the holder, as evidenced by (if I remember correctly the one case I read) a conviction of a crime.

Alan NV8A

On 08/26/04 08:35 am Lloyd put fingers to keyboard and launched the following message into cyberspace:

I believe he said "someone turned him in for having made the threat" over the air, even though he claims he didn't. However, he did also admit to the FCC that he made the threat - even if it wasn't on the air. So, they have the direct admission to the offense and reports it happened. Obviously the FCC chose to accept the word of those reporting it. Therefore, "thinking" it happened on the air, they would in a sense have jurisdiction. I'd hope they'd have asked for proof of it - being done ON THE AIR, but perhaps they erred on the side of caution.

As to the statement at the top, I believe I've heard of that being done as well.... So.............. who knows..........?

As I understand it, though, the "death threats" go towards
Chuck's character, and that is something that the EB and Riely look at
in determining whether someone can remain a licensed ham.
If Chuck handles it the right way and explains to FCC that it
was a joke and that the is no way that Chuck would carry out the
threats allegedly made, I'm hoping that the matter would blow over.
I'd hate to see one mistake chase an seemingly good person off
the air. Chuck doesn't seem to be the Jack Gerritson type who thinks
that the law and FCC rules are irrelevant.

Well, the case you're thinking about wasn't a petty theft, it
was murder and, yes, the FCC can and will yank a license for character
issues, basing their "logic" on "Well, if he's willing to commit a
crime, he won't be willing to comply with the FCC Rules and be honest
about it."
Unfortunately, unless Congress steps in and says that certain
misdemeanors shouldn't be counted against a person's character, the
FCC will be yanking licenses for that reason. And, Congress will not
be willing to listen, fearing a voter backlash for being soft on
crime, even petty crimes that would get a person 30 days in jail.
A friend of mine told me that a long term member of RACES was
forced to leave after a minor crime (no jail, just a fine), but, it
was a high enough crime that DHS said, "Dump him or else."
It's not impossible to regain the ticket, though, fortunately.
I recently read where a guy whose character was enough to yank the
ticket proved to an ALJ that he had learned his lesson and was
rehabbed. The ALJ, as mentioned, agreed that was the case and the
Commission affirmed the ALJ's decision and returned the guy's ticket.

Nobody said the FCC was taking his license????
I don't think I would take this next post as a joke!

Chuck K8CPA wrote
I remember a few years back here in The Motor City here, there was a
dude, the *supposedly* bought a "box" from a local dude here that was
building them, he would go around and start running said guy in the
ground, giving out his real name, address, ect.... trying to say he
sold him a bad unit ect.... anyways, one fine day, he got tired of it,
the guy got a friendly visit from the local chapter of the IRON
COFFINS at his house, beat him and his 21 year old punk ass kid to
bloody pulp, had thier way with his woman, and as they were leaving,
they said, "this is for running your mouth!"

My point?

Sometimes it's best not to be the loose cannon, cause you never know
who knows who, and who's friends with whom....

Amateur Radio Newsline™ Report 1410 - August 20, 2004

Amateur Radio Newsline report number 1410 with a release date of
Friday,
August 20th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is ready as Hurricane Charley
comes
ashore. Find out the details on Amateur Radio Newsline report number
1410 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND HURRICANE CHARLEY

Packing 145-mile per hour winds Hurricane Charley slammed into west-
central Florida, ravaging oceanfront homes and trailer parks, tearing
apart small planes and inundating the coast. More than a half million
customers were left without power or telephone service statewide.
Damage
was especially heavy in downtown Punta Gorda on Charlotte Harbor.
Warren Elly, W1GUD, is a Tampa based TV reporter sent to cover the
aftermath of Charley coming on shore:

--

Audio report only. Hear it in mp3 audio in the current newscast
posted
at http://www.arnewsline.org/quincy

--

Warren's report was filed early Monday the 16th. Since then
President
George Bush has declared some sections of Florida as a major disaster
area. His brother, Florida Governor Jeb Bush, projected damage from
Charley could exceed 15 billion dollars, but that estimate was
preliminary. (ARNewsline(tm))

**

RESCUE RADIO RULES: FCC CLARIFIES EMERGENCY DECLARATIONS

The FCC has issued what amounts to a white paper to clarify the
rules
hams must follow when providing communications during an emergency.

Amateur Radio Newsline's Mark Abramowicz, NT3V, is here to sort it all
out:

--

With the hurricane season upon us and wildfires and other severe weather
hitting various parts of the nation, the Federal Communications
Commission believes now is the time for a clarification on Emergency
Communications Declarations.

What is an Emergency Communications Declaration or ECD?

When a natural disaster or accident interrupts or disrupts normal
communications systems in a particular area, the FCC - at the request of
emergency management officials or an amateur radio operator acting on
behalf of emergency officials - issues an Emergency Communications
Declaration.

Essentially, the order defines special conditions and special rules to
be followed by amateur radio stations providing service during the
communications emergency in that particular area.

The FCC says occasionally, it receives requests for Emergency
Communications Declarations before a hurricane or tropical storm hits.
The FCC says such requests generally arrive anywhere from 24 to 72 hours
in advance of weather predictions citing potential damage to a
particular area.

But under Section 97.401(a), emergency communications before an event
CAN be established to meet essential needs of a community or to help
prepare relief activities. The commission acknowledges preparations to
meet a disaster may overload or damage normal communications systems so
it allows amateur stations to make emergency transmissions at any time
prior to or even during a disaster.

In essence, the FCC says there's no need for an ECD because the actual
event disrupting communications has not occurred.

So, the FCC says such declarations WILL NOT be issued until AFTER the
disaster disrupts normal communications in a geographic area subject to
FCC regulation.

Speaking of emergencies, it doesn't necessarily have to be a weather-related incident, as we found on September 11, 2001. It can also be a transportation accident such as a railroad incident or a fire or explosion.

Whatever the emergency, once communications are disrupted, the FCC says there are only two sources from which it will accept an application for an ECD. The first is an emergency management official responsible for communications in the affected area. The second is an amateur radio operator acting at the request of an emergency management official.

The FCC says such applications must contain very specific information such as:

- The date the event has taken place.
- The nature of the disaster.
- A description of the communications system disrupted and a contact person who can verify the damage.
- The geographic area affected - city, county, state or region.
- Listing of the VHF/UHF, MF or HF frequencies to be used during the emergency.
- An estimated time the disruption of normal communications is expected to last.

The FCC says an Emergency Communications Declaration will contain an expiration date. However, the commission says that date can be extended at the request of the emergency official or authorized party making the original request.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The FCC's Communications and Crisis Management Center is the place where Emergency Communications Declaration requests are sent. You can reach them by phone at 202-418-1122, that's 202-418-1122. FAX requests are handled at 202-418-2813, 202-418-2813. Or, you can make the filing by e-mail to comm(hyphen)ctr@fcc.gov. (ARNewsline (tm))

**

EMERGING TECHNOLOGY: AUTOMATING EMERGENCY ALERTS

A new technology soon to debut in 12 states will significantly extend Amber alerts, reaching cell phones, e-mail and handheld computers. It could also be used to transmit weather and terrorism alerts.

According to news reports the system uses a simple broadcast technology that takes the information from a Web portal and reconfigures it for different types of broadcast. By way of example, a state department of transportation might receive it in one format for its road signs and another for its information number.

More important, people with cell phones can sign up to receive Amber alerts with their local county or with state authorities. The text of an alert can be sent immediately to local TV news stations and Web sites.

**

RADIO RULES: INTERNET LINKING IN THE UK

Telecommunications regulators are about to make ham radio internet linking a lot easier on the other side of the Atlantic. This, as Ofcom which is the U-K equivalent of our FCC issues new and more liberalized rules. RSGB news presenter Jeramy Boot, G4NJH, has more:

--

Ofcom has announced the decisions it has taken about changes to the procedure and terms of issuing Notices of Variation (NoV) for Internet Linking Gateways.

Ofcom proposes to pass the Internet-linking NoV process to the RSGB to issue NoVs on behalf of Ofcom. The RSGB will be announcing procedures for NoV renewal shortly and queries on the renewal process should be directed to the Society.

Ofcom's decisions were made following the notification of four proposals
which gave those holding an NoV the opportunity to make representations.

Jeramy Boot, G4NJH, in Nottingham.

--

For those interested the complete set of new U K Internet linking rules
is on line at http://tinyurl.com/4LE8P (GB2RS)

**

RADIO RULES: VANITY FEE REMINDER

Back here in the USA, a reminder from the FCC that the new Amateur Radio
vanity call sign fee of $20.80 for the 10-year license term became effective on Tuesday, August 10th. Not on Friday, August 6 as we and and others had announced.

The reason for the last minute change? A management-level staffer in the FCC's Office of Managing Director explained to the ARRL that the Commission was not necessarily bound by the August 6 effective date The
Federal Register indicates. That date was 30 days after publication of
the order containing the new fee schedule. (ARRL, FCC)

**

ENFORCEMENT: NO LICENSE - STAY OFF THE AIR

Meantime the FCC has written to a pair of unlicensed operators telling
them to stay off the air. The agency's Daryl Duckworth, NNZ0W, explains:

--

Duckworth: A warning notice went to Rick Shepherd of Crescent City, California for unlicensed operation on 146.515 MHz along the Oregon/California border aboard the fishing vessel Sunset.

David Shoemaker of Sebina, Ohio, also apparently not in the FCC Licensing Database was issued a warning notice for unlicensed operation
from a vehicle with license plates registered in his name. The transmissions were on 28.085 MHz near the intersection of I-71 and U.S.
36.

--

Shepherd and Shoemaker were both told that operation of radio transmitting equipment without a license is a violation of Section 301
of the Communications Act of 1934. They were also informed that continued operation could lead to fine or imprisonment, as well as seizure of any non-certified radio transmitting equipment that they own.
Monetary forfeitures for unlicensed operation normally range from $7,500
to $10,000. (FCC, RAIN)

**

RADIO RULINGS: FCC PERMITS SAN JOSE STATION TO BUILD SAN FRANSCISCO TRANSMITTER

The San Franscisco Chronicle reports that thousands of people in and around San Francisco will be able to watch NBC television over the air
again. This, courtesy of a Federal Communications Commission ruling on
Thursday, August 12th, that will let KNTV build a new transmitter to cover the area.

According to the news story, the San Jose based station will be permitted to construct a new transmitter atop San Bruno Mountain which
overlooks San Francisco. The station claims this site will reach 400,000 people who lost service when KNTV became the Bay Area's NBC affiliate in 2001. (FCC, San Franscisco Chronicle and other published
news stories)

**

NAMES IN THE NEWS: ANOTHER OPERATION FROM IRAQ

Even as the military action in Iraq continues another ham radio stAtion
has come on the air from that war torn region. This, word that Ryszard
Nowakowski, SP8HKT has been licensed to operate as YI9KT.

Ryszard will be there for five months. He uses a 100 watt radio into a
vertical antenna on all bands from 40 to 10 meters. He operates mostly
on C-W but will come onto SSB if you make the request. (GB2RS)

**

NAMES IN THE NEWS: NEW QCWA OFFICERS ELECTED

Former FCC rules man John B. Johnston, W3BE, is the new President of the

Quarter Century Wireless Association. Also elected are Vice-
President
Bob Roske, NOUF: Secretary Alan Pickering, KJ9N and Treasurer Frank
Harris, WA4PAM

Elected to serve as QCWA Directors are Tom Atkins, VE3CDM: Harold
Chase,
W1EES: Lew Gordon, K4VX: Jerrel Jones, W5TUU; Ray Minichello, W1BC:
Len
Nathanson, W8RC: Blanche Randles, W4GXZ, and Ed Yoder W3YMB.

Both Gordon and Nathanson are former Directors of the ARRL. 2307
QCWA
members returned ballots in this years election. (QCWA)

**

EVENTS: 2004 QCWA NATIONAL CONVENTION IN OTTAWA

And speaking about the QCWA. word that the organization will hold its
2004 international convention in Canada. The dates are October 15th
through the 17th at the Lord Elgin Hotel in Ottawa.

This years gathering is hosted by the National Capital Chapter 70.
More
information is on line at www.qcwa.org/2004convention.htm (QCWA)

ON THE NET: LINUX CONTINUES TO GROW

The use of the Linux operating system especially among experimenters
including ham radio operators is quietly growing. One in five
servers
sold last year to handle Internet traffic and corporate networks ran
on
Linux.

Observers say that the economic downturn may be responsible for the
Linux move. The Linux operating system was created as the people's
software, free and open for everyone to use in an attempt to thwart
the
commercialization of all Internet technology. Amateur radio was

among
tgher first to truly embrace it and may ham radio applications are
written for Linux based operation. (Published news reports)

**

HAM RADIO IN SPACE: NASA CELEBRATES ISS AT MARINA AIR FAIRE

Scott Avery, WA6LIE, reports over the AMSAT mailing list that NASA
will
have a booth set up at the Marina Air Faire in Marina, California
on
October 16th. Scott says that the plan is to make a live I-S-S voice
contact and to also have a video of Q-S-O's made with the space
station
playing for passers by to see. Scott adds that any help in getting
video files of school contacts with the I-S-S would be appreciated.
For
more information please contact him by e-mail to wa6lie@msn.com
(WA6LIE)

**

WORLDBEAT: LIGHTHOUSES OF AUSTRALIA 2004 ANNUAL DINNER WEEKEND

Turning to news from around the world, word that this year's
Lighthouses
of Australia Dinner will be held in Launceston, Tasmania Saturday,
October 2nd. The dinner will include a tour to the National Archives
Office Exhibition on Australian Lighthouses titled "Beacons by the
Sea."
Also scheduled is a visit to the Low Head Light and the Pilot Station
Maritime Museum also at Low Head the same weekend. (WIA News)

**

WORLDBEAT: RADIO CLUB GETS GRANT TO TEACH THE HOBBY

The Thornton-Cleveleys Amateur Radio Society in the United Kingdom
has
recently received a grant of close to 5,000 British Pounds. This, to
help in the promotion of amateur radio. Over the past two and a half
years the club has held 18 examination classes with 150 passing the U-
K
Foundation class ham radio license exam. (GB2RS)

**

WORLDBEAT: GB4WTA COMMEMORATING THE UK WIRELESS TELEGRAPHY ACT

GB2RS reports that Ted Moore, G7AIR, and members of the Eddystone
Users
Group will operate as GB4WTA on Sundays and some Saturdays through
the

28th of August. The station commemorates the centenary of the United Kingdoms Wireless Telegraphy Act, which came into effect on the 15th of
August 1904. GB4WTA will operate from Wireless Hill in the Rutland area. (GB2RS)

**

DX

In D-X word that K4QD will be QRV August 16 to 27 portable HH4 from. This, from the Northwest Christian Mission in Haiti. Activity will be
on most H-F bands plus 6 meters, using CW and SSB as time permits. QSL
to his home call. (K5SW via VHF Reflector)

And GB6LOP is a special events station that will take to the air to celebrate the 60th Anniversary of the Liberation of Paris during Word War 2. The station will operate on all modes, starting August 25th and
will be on for 4 weeks. Your QSL card will be required beforehand in order to receive the special QSL from this station. Please QSL via RSARS
QSL Bureau. For further information contact G0SWY by e-mail to G0SWY@aol.com (G0SWY)

And also listen for HS7-B on from Thailand. This special event call sign has been issued to celebrate the Queen's 72nd birthday. The call sign will be in use during any SEA NET activities. QSL via operators' instructions. (RSGB)

**

THAT FINAL ITEM: THE BIG T-HUNT: HOW THE U.S. NAVY KEEPS TRACK OF EARTH
ORBITING SATELLITES

The U.S. Navy has built an exotic radar system to track earth orbiting
satellites, and the system has been in place for many years. Now, thanks to a couple of sleuths, details of the Navy's system have been posted on the web. Amateur Radio Newsline's Bruce Tennant, K6PZW, has
the details:

--

The Navy's satellite tracking system appears to consist of multiple transmit and receive sites across the U.S., and one of the receive sites
just happens to be located in San Diego County a few miles north of Brown Field. This, according to web-published coordinate data as

reported in the CGC Communicator broadcast industry newsletter.

And if think UHF moon bounce antennas have gain, wait until you see the
giant array built near Lake Kickapoo, Texas. This two mile long antenna
transmits continuously on 216.98 Mhz with an unmodulated carrier and has
a beamwidth of only 0.02 degrees in one plane. So powerful is the
transmitted signal that when the moon passes through the beam, the
return echo is said to be detectable on earth with only a dipole antenna
attached to a receiver. Talk about the ultimate E-M-E.

For the Amateur Radio Newsline, Im Bruice Tennant, K6PZW, in Los
Angeles.

--

Hello Everyone,

First I would like to say thank you to those of you that read my original post and visited my new web site. I also appreciate all the feedback and comments that I received.

Based on that feedback, and since my web site is still new, I have decided to allow members to post a free photo ad. You can use this free ad to advertise your radio gear for sale, post a want ad, or even advertise your eBay auction item.

While you're checking out my new web site, please be sure to sign up for the free door prize drawing. The first door prize drawing will be held in October and one lucky registered member will win either a new ham or CB radio.

To learn more about how to get a free photo ad and to read the rules for the free door prize drawing, please visit http://www.onlinehamfest.com .

Please also tell a friend about my new web site or add a link to your web page. I could really use everyone's help in getting my new web site off to a good start. :)

Tnx es 73
Dave, Zed Zed

1079. FM Channel Spacing vs. Carrier Bandwidth vs. Audio Response

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-28 11:21:21 UTC
From: Clueless Non-Amateur <cna@no.spam>
Message-ID: <RUZXc.2484$6o3.1896@newsread2.news.atl.earthlink.net>
Source record: 56541

I'm not an amateur radio operator, but as an SWL, I figured that this would be the perfect newsgroup for posing my question.

Every slice of the radio spectrum has a designated frequency spacing. 200 kHz on the broadcast FM band (88-108 MHz), 12.5 kHz on the UHF-T land-mobile band, 25 kHz on 2 meters, and so forth.

Is there any concrete relationship between said frequency spacing and FM carrier bandwidths? In other words, would I be correct to assume that a commercial FM radio designed for 506.5125 MHz will always send out 12.5 kHz-wide carriers, while a 2 meter amateur rig's FM carriers would always be 25 kHz wide?

The reason I'm curious is because of what I experience when scanning all these bands with my Rat Shack PRO-2006 In NFM mode, this scanner copes with ALL narrow-band FM carriers regardless of whether they're 12.5 kHz wide or 25 kHz wide. Assuming that its NFM tuning circuitry were adjusted for a median carrier bandwidth of, say, 18.75 kHz, I'd almost expect to hear some amount of overdeviation on 25 kHz carriers, while hearing some amount of underdeviation (high SNR, low audio) on 12.5 kHz carriers. But that doesn't happen.

What's the explanation, then? Are receivers like these simply capable of "coping" with carriers slightly narrower or wider than their NFM circuitry's "median" bandwidth? Or do all narrow-band FM carriers simply exist at one common bandwidth regardless of channel spacing?

My inclination is toward the former: the carriers' bandwidths vary by available channel spacing, and receivers like the PRO-2006 just "cope" given the very slight difference between 12.5 kHz and 25 kHz bandwidth.

Which is it? :-)

Finally, and assuming that my inclination above is in deed correct, is there any hard rule for figuring out the potential maximum audio frequency response of an FM carrier assuming that you know said carrier's bandwidth? While mulling over the specifications for some commercial Motorola radios, I noticed an interesting coincidence. All radios designed for operation in the VHF band (25 kHz spacing) were quoted as having 5 kHz deviation. OTOH, those that were meant for frequencies spaced 20 kHz apart had 4 kHz deviation. And those designed for operation on the UHF-T band (12.5 kHz separation) had 2.5 kHz deviation figures quoted.

There's a pattern there. Deviation = 1/5th channel spacing. But is this really how one determines the maximum deviation for FM carriers? I can't help but noticing, for example, that FM broadcast radio has a

200 kHz spacing, while the maximum deviation permitted is 75 kHz (the portion between 15 kHz and 75 kHz being used by pilot tones and stereo difference signals, etc.) Yet 1/5th of 200 kHz = 40 kHz.

The usual apologies for a long post, and thanks in advance.

"A third group which accounts for a substantial number of obsessional harassment incidents is comprised of individuals who perceive themselves to be the victims of unfair treatment. These persons typically harbor intense anger and resentment over what they perceive as unfair or inappropriate behavior on the part of others. Politicians and judges appear particularly vulnerable to this form of harassment,although employers, police officers, and other authority figures may become the victims as well.Unlike the two previous forms of harassment, these individuals are typically motivated by revenge rather than affection." (p. 532)

Obsessional stalkers may use or exhibit a number of defense mechanisms, and denial, devaluation, and projecting blame onto the victim are just some defense mechanisms discussed in the literature. They are also thought to represent the greatest threat of physical violence to their victims. Such individuals are reportedly more likely to have a personality disorder related to attachment pathology and less likely to have an antisocial personality disorder when compared to other offenders with mental disorders. They are also likely to be older, smarter, and better educated when compared to other types of offenders with mental disorders (Meloy & Gothard, 1995). Morrison (2001) reported on 100 Canadian males who had been arrested for criminal harassment (stalking). The typical profile of the "simple obsessional" stalker in their study was a middle-aged male who was separated or estranged, and who had a history of anger management or emotional problems.

Amateur Radio Newsline™ Report 1411 August 27, 2004

Amateur Radio Newsline report number 1411 with a release date of Friday, August 27th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham radio operator looses his house and tower in a fire and an urban terrorist is the suspect. Also, interference to a ham could lead to a fine for an uncooperative neighbor and lots happening on the B-P-L front. Find out the details on Amateur Radio Newsline report number 1411 coming your way right now.

ALL POINTS BULLETIN: ARSONIST BURNS DOWN HAMS HOUSE

An arsonist with a grudge against radio has burned down the home of a Vancouver, Washington ham. Amateur Radio Newslines' Mark Abramowicz,
NT3V, has the details:

--

A $10,000 reward is posted and the Clark County Fire Marshal's office is tracking any and all leads it hopes help them capture someone who has been setting fire to communications towers in the Vancouver area since the beginning of the month.

Until recently, investigators say the targets have primarily been state government, telephone company and cellular telephone towers. But it was an Aug. 20 fire at the home of John Stein AB7F that now has alarmed the ham radio community in Vancouver.

The fire marshal's office says Stein's amateur radio tower was apparently targeted. It believes the fire was set at the base and spread upward along the feed line. Flames fell from the melting cables and spread to Stein's home.

Fortunately, authorities say, Stein was awake when the fire broke out about 11:30 p.m., got out, called 9-1-1 and tried to get a start on putting the fire with a garden hose. But the fire took off quickly and, unfortunately, the home sustained extensive damage in excess of $50,000.

The fire marshal's office says Stein told them he spotted somone running away from his home and he gave them a description.

Clark County Deputy Fire Marshal John Dunaway is leading the investigation into the communication tower fires.

At this point, the fire marshal's office will confirm basic details about the fires. But the fire marshal's office says there is certain information it cannot release at this time because it doesn't want to jeopardize the case it hopes to eventually bring against the arsonist.

Stein's home was not far from the fires at the other communications towers, the most spectacular of them on a more than 200-foot tall tower in Vancouver. That's shared by the Washington State Patrol and the Washington State Department of Transportation headquarters.

Officials say while the state patrol's communications in Clark County were disrupted by the fire, 9-1-1 communications were not affected. Damage in that fire was estimated at more than $100,000.

That blaze prompted the $10,000 reward offer from a foundation. Ham operators in the Vancouver area are very concerned and fear anyone with a tower could become the next victim. They've been transmitting word about what's been happening via repeater, HF radio and the internet across the region. They're urging hams with towers to be especially vigilant and take precautions to protect their feedlines, but more importantly their homes and their lives.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

There is general agreement that this anti radio fire bug has to be stopped before someone to loose their life in one of his blazes. If any one has information regarding these fires or the person setting them please call the Crime Information Tip Line at 877 - 274 - 6311 or the Clark County Washington Fire Marshal's Office at area code 360 - 397 - 2186 and ask for extension 3396. You may remain anonymous on either line. (ARNewsline ™, CGC, others)

**

ENFORCEMENT: FCC WARNS NEIGHBOR OF HAM OVER INTERFERENCE

A neighbor of a ham radio operator who refuses to clean up interference he is causing could now face a stiff fine. The FCC'as
Daryl Duckworth, NN0W, says that the agency is giving the neighbor one last chance to comply:

--

Duckworth: "A follow-up warning letter went to a resident in Friendwood, Texas, concerning interference to William Cooper, W5ZAF, from a battery charger. The amateur had supplied ferrite beads earlier to the resident which did solve the problem. Evidently, the

resident changed his mind and tossed the ferrites back over the fence."

--

The FCC says that if the interference is not corrected by September 15th, it will have its Field Office investigate the matter and possibly issue the uncooperative neighbor a hefty fine. It also suggested that he consult an attorney regarding the FCC rules that control radiation from unlicensed devices like the battery charger that's causing the problem to the ham next door. (FCC, RAIN)

**

THE BPL FIGHT: ARRL ASKS FCC TO CLOSE DOWN AZ. BPL TEST

Some important developments on the B-P-L front. First to Arizona where the ARRL is calling on the FCC to immediately shut down a Broadband Over Powerline field trial in the Cottonwood. This, because it's causing severe interference to Amateur Radio communication in the area.

The ARRL Letter says that Electric Broadband LLC and utility A-P-S have been operating the B-P-L experiment at two sites since June under a Special Temporary Authorization the FCC granted Electric Broadband in March. Michael Kinney, KU7W, filed the first Amateur Radio complaint in June. It cited testing by the Verde Valley Amateur Radio Association in the 1.8-30 MHz range to show that B-P-L interference made attempts at ham radio communication useless. The interference on typical Amateur Radio equipment shows received undesired signal levels in excess of 60 dB over S9.

According to the ARRL, both the utility and Electric Broadband were contacted, and no response was received. The ARRL says that both companies are aware that the B-P-L field trial has been causing harmful interference and neither has taken any steps to either resolve it or terminate the test. (ARRL)

**

THE BPL FIGHT: BAD NEWS FROM DOWN UNDER

Meantime, Broadband Over Powerline and its introduction in Australia has that nations hams on the alert. This, because little has been known about what has been occurring behind the scenes as power companies prepare to adopt the B-P-L technology and the Australian Communications Agency considers rules to govern it. Now, WIA Newsman Jim Linton, V-K-3-P-C has uncovered an almost terrifying development. One that could mean the end of H-F operations down-under for many V-K hams.

--

The future introduction of Broadband Powerline Communications (BPL) in Australia could be on the condition that "less significant" HF radio users such as radio amateurs and four wheel driver clubs would not be protected from any interference it causes.

The Australian power industry has a real concern about the added expense required to address interference that could affect amateur radio stations and other recreational radio users. Its arguments include that to remove amateur radio frequencies from a BPL system will add cost and reduce the capacity and potential data rate. The power industry is requesting that the Australian Communications Authority (ACA) outweigh the concerns of recreational or "less significant" HF radio users with the higher community benefit of providing greater access to broadband-enabling technology.

The ACA, in response to the power industry concerns, is now examining the legal possibility of allowing BPL networks to cause substantial interference to "less significant" radio services, while other radio services would continue to be entitled to interference protection. Presumably if this becomes reality the Amateur Service could lose its protection against harmful powerline interference too. After all, were are in the eyes of some just a "less significant" radio service.

This has been Jim Linton VK3PC for WIA National News.

--

If this does happen it could mean a lot fewer V-K callsigns will be heard on the Hiugh Frequency and low VHF bands. (WIA News)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the repeaters of the Rocky Mountain Radio League serving Denver and Bloomfield, Colorado.

(5 sec pause here)

**

RESTRUCTURING: ARRL PROPOSES BANDWIDTH DEFINED HAM SERVICE

The ARRL has released a synopsis of its petition to the FCC aimed at restructuring the Amateur service along bandwidth defined lines. While what has been made public is highly abreviated, a drafted, the ARRL's bandwidth petition would preserve double-sideband AM and would stop short of opening the phone bands to digital and other modes of the same bandwidth.

The ARRL's petition also proposes to limit bandwidth in the CW subbands to 200 Hz, which also will accommodate data modes such as PSK31. It also suggests to limit bandwidth in the

existing "RTTY/data subbands" to either 500 Hz or 3 kHz, with phone emissions specifically prohibited in certain subbands where 3 kHz would be permitted.

Obviously this will be an ongoing story. More on this next week as reaction comers in. (ARRL)

**

HAM RADIO IN SPACE: HURRICANE CHARLEY WRECKS AMSAT LAB

Hurricane Charlie has also taken its toll on the Amateur Radio space program. This, with word that the storm destroyed the building housing the lab used to assemble the latest series of ham radio satellites.

Hurricane Charlie hit Orlando, Florida at about 8 p m Eastern on Friday, August 13th packing sustained winds estimated at close to 100 miles per hour. One of the places sustaining damage was Orlando Executive Airport. This was home of the AMSAT Laboratory. The place where ham radio satellites have been assembled and tested prior to launch.

Rick Hambly, W2GPS, reports that AMSAT members in the area survived with relatively minor damage but the building that houses that AMSAT Lab suffered severe structural damage from Charley's onslaught.
It
has now been condemned and will have to be torn down.

W2GPS says that the equipment and parts inventory at the lab are in good shape but AMSAT was given less than two weeks to move out and find temporary storage for its equipment. The Amateur Radio space agency also must begin a search for a new building to support development of the Eagle ham radio satellite and future projects.

Complicating matters is that AMSAT's insurance does not cover the costs of temporary storage or of moving to a new facility. So, they are asking the Amateur Radio community to keep ham radio space projects alive by sending a donation to AMSAT's Hurricane Fund. Hambly says that the money collected will be used to get the lab back in operation as soon as possible.

AMSAT North America is a federally charted 501(c)(3)not for profit organization. Any donation should be tax deductible in the United States. Information on the fund and how to donate is in cyberspace at www.amsat.org. (AMSAT-NA, W2GPS, W5DID)

**
RESCUE RADIO: RADIO STATIONS GET PRAISE IN CHARLEY AFTERMATH

Broadcasters in Florida have been getting involved as the clean-up following Hurricane Charley. One has taken on being the voice of the storm ravaged area.

According to the CGC Communicator, FM radio station Seaview-104.9 in Punta Gorda, Florida and four of its sister stations are all owned by Clear Channel Communications. Seaview-104.9's studios were damaged and the station was knocked off the air by Hurricane Charley, but service was restored within hours. According to a report in the St. Petersburg Times, once the storm had passed, General Manager Mike Moody returned to the building housing his station. The roof was shredded and the ceiling collapsed. But one studio, no bigger than a walk-in closet, was in working order.

Moody said that there was no power but using a generator he got the studio on the air. He also found a phone outlet reserved for a FAX machine operating so he plugged in a phone, put the receiver to the microphone and then let callers unravel their tales of storm survival.

The studio is the only one based in Charlotte County. Because of this it has become a lifeline for residents searching for information to help them cope with the storm's aftermath and listeners like Ron Hall, KP2N, have rallied around the station in support of its vital post storm activities. (CGC)

**

RESCUE RADIO: UK GROUP ACTIVATES FOR FLOODS

Meantime, over in the U-K, a ham radio emergency communications unit was activated. This, after severe rains caused flooding near the town of Boscastle. Jeramy Boot, G4NJH, is in Nottingham with more:

--

Cornwall Raynet Groups were put on standby by their Emergency Planning Unit on the evening of Monday, 16th August, following communications difficulties resulting from the massive flooding at Boscastle. Eleven volunteers were available to proceed to the emergency, but were stood down later as the communications difficulties had been resolved.

Jeramy Boot, G4NJH

--

For those not aware, RASYNET is the U-K equivalent of ARES and RACES here in the U-S-A. (GB2RS)

**

HAM RADIO ON THE NET: MORE CHANGES AT QRZ.COM

More changes have come to the QRZ.com super site. This, as its owner Fred Lloyd, AA7BQ, announces some policy changes regarding the callsigns that are listed in the QRZ Callsign database.

--

According to QRZ's Lloyd, the site will no longer accept callsign designators, prefixed or suffixed, as independent callsigns. This would include reciprocal calls such G 3 slash K6PZW -- a call I might be assigned if I were visiting England.

Lloyd says that these listings were problematic for both the QRZ website and the QRZ CD ROM, and they were of questionable value to begin with. As of the latest software update, the server will no longer accept or record such entries. The logic is that anybody wanting to contact the callsign holder could just as easily look them up by their primary callsign.

Also gone will be non ham call signs such as those self issued by individual SWL's, Weather watchers, and others. Lloyd says that Q-R-
Zed will continue to accept SWL listings as long as they are issued by a formal body, and so long as they have an alphanumeric format. But Lloyd says that an SWL callsign cannot be a primary login account name to a website that manages amateur radio callsigns.

The bottom line: Non-amateur callsigns will continue to be excluded from the QRZ CD ROM and will take last priority with server management resource. In other words, they will be listed on a time and space available basis, only.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

These changes are in addition to the posting policy changes that Lloyd announced two weeks ago. (QRZ.com)

**

RADIO LAW: SENATE WARNING ON CABLE RATES

The Senate says that it will consider new regulations for cable television unless the industry addresses soaring prices and allows consumers more channel choices. Members of the Senate Commerce Committee said pressure from angry constituents is leading them to look at ways to hold down cable rates and let subscribers choose individual channels rather than packages set by operators.

Since Congress deregulated the industry in 1996, cable rates have increased by 53 percent while inflation has risen 19 percent. Cable operators said the jump reflected higher programming costs, more channels and system improvements such as rewiring to provide digital TV. (Published reports)

**

RADIO LAW: BETTER CELLULAR SERVICE

The government says wireless companies are doing a better job of switching customers who want to keep their cell phone number. In the first month after the change took effect, the Federal Communications Commission received 24-hundred complaints. Most were from people who said the transfers were taking too long. In the past month, the number of complaints has fallen to 400. Customers have had the option of keeping their phone numbers when they switch to a new carrier since November. (Science OnLine)

**

EMERGING TECHNOLOGY: PERSONALIZED PHONE MUSIC SERVICE FROM SONY

Meantime Sony Corporation has announced what it called the first personalized radio service for mobile phones. Under the still-unnamed music streaming service, subscribers would not own any of the songs but could create a customized channel to listen to the music they want, storing favorite tunes in personal playlists. Users would also be able to listen to music from a collection of predefined channels. A "smart personalization" feature could also keep track of the subscriber's music preferences and make song suggestions. (Sony)

**

THE SOCIAL CIRCUIT: TENNESSEE IN AUGUST

Turning to the ham radio social calendar, word that Tennessee's Short Mountain Repeater Club will be sponsoring the Cedars of Lebanon Hamfest on August 28th. This, at the Gladville Community Center in the town of Gladville Look for vendors, a large tail gate sales area and lots more. For more information e-mail keharris@netc.com or take your web browser to www.qsl.net/smrc (E-mail)

**

THE SOCIAL SCENE: LIGHTHOUSES OF AUSTRALIA 2004 ANNUAL DINNER WEEKEND

And if you want to travel a bit, this year's Lighthouses of Australia Dinner will be held in Launceston, Tasmania on Saturday, October 2d. The event will include a trip to the National Archives Office Touring Exhibition on Australian Lighthouses known as "Beacons by the Sea." It will also include visits to the Low Head Light and the Pilot Station Maritime Museum also at Low Head the same weekend. (GB2RS)

**

THE SOCIAL CIRCUIT: GERMAN VHF CONVENTION HAS NEW DATE

And from Europe word that Germany's Weinheim VHF Convention, which
had originally been scheduled for August 28th and 29th will now take place on 11th and 12th of September. The new venue is Bensheim which is 10 kilometers north of Weinheim. Full details are on the web at

www.ukwtagung.de (DARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: CB SPECTRUM SHARING IN THE UK

There may soon be some new sounds on 27 MHz C-B in the United Kingdom, and they won't be saying 10-4 Good Buddy. In fact they may
be very formal sounding. This, as British telecommunications regulator Ofcom proposes to allow local religious and community organizations to operate one-way low power broadcast stations within the U-K Citizens' Band allocation. Our producer, Bill Pasternak, WA6ITF, has more:

--

No. Its not a joke. And Great Britain's Office of Communications --
Ofcom -- says that this is how the new shared C-B service will work.

At first a small number of organizations will be licensed to transmit religious services in a limited number of pilot areas. These would be called Community Audio Distribution Systems or C-A-D-S. Their specific purpose will be to allow house-bound religious congregation members -- people unable to travel to a house of worship but who wish to hear local religious community services -- the ability to do so.

If proven effective, Community Audio Distribution Systems would be expanded as a short-range and inexpensive wireless public address systems. The U-K radio regulator says evidence of demand for such arrangements has arisen primarily from within religious communities and this is where Ofcom expects the majority of use to be. But its not making this a religious-only radio service. In fact it is encouraging other community groups could also use the system for other similar purposes.

To test these plans, Ofcom is proposing a closely monitored year-long pilot program in the areas where interest has been most widespread and sustained. This includes West Yorkshire in England and all of

Northern Ireland. In those regions C-A-D-S users will share spectrum with the Citizens' Band users in a way that Ofcom says will provide the flexibility required to transmit religious and community service material while protecting other spectrum users from harmful interference. At least it will try its best to do so.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting.

--

Can something similar happen here in the U-S-A. Not likely. At least not very soon. C-B is still to crowded, unruly and unstructured a band to effectively share. But it is expected that other administrations world-wide will be watching this United Kingdom C-B sharing experiment with an eye to introducing similar services in their nations as well. (RSGB)

**

WORLDBEAT: BIG VHF TECH SYMPOSIUM DOWN-UNDER

The Wireless Institute of Australia's Central Region is holding a Technical Symposium Saturday October 2nd. Rex Moncur VK7MO will discuss Digital enhancement of VHF signals, Doug Mc Arthur VK3UM EME Techniques, Joe Kasser VK5WU Computers for Amateur Radio and David Giles VK5DG will explain that Amateur Satellites are really only high tech repeaters on orbit. The venue is the Modbury Heights School with talk-in on 148.850 MHz. (WIA News)

**

HAM RADIO IN SPACE: INDIA'S HAMSAT READIED FOR LAUNCH

A Dutch student is helping India put its first Amateur Radio satellite in orbit. Willian Lijenaar, who has graduated as an electronics engineer, has provided a transponder to the satellite.

According to the W-I-A News, the Indian project is called HamSat and is scheduled for launch in four or five months. Reportedly, the coordinator of HamSat had asked the young Dutch engineer to design and build the transponder. Along with Lijenaar's unit an Indian built transponder will be part of new bird as well. (WIA News)

**

RADIO SCIENCE: NASA TO SAVE HUBBLE

NASA has decided to try to save the orbiting Hubble Space Telescope. Possibly by sending a Canadian made robot to fix it.

Nasa Administrator Sean O'Keefe told researchers at the agency's Goddard Space Flight Center in Maryland about the plan. He also has instructed engineers to begin work to put the robotic mission into orbit by 2007. (NASA)

**

DXCC: SOMALIA NOW ACREDITED

Some good news for D-Xers. Effective immediately, the ARRL DXCC Branch will accept QSL cards for operations taking place in Somalia using the 6O / T5 prefix and suffix. This includes the Somaliland which is north-western Somalia and Puntland in north-eastern Somalia. These are autonomous areas but will be accepted along with the southern and central areas of that nation.

The DXCC will also accredit operations possessing written permission from any recognized authority that is acknowledged to be in control of a particular region of Somalia. All cards will count for the Somali Democratic Republic. And says the DXCC, QSL's for past operations will be accepted where proper documentation has been submitted.

Of coarse this is subject to change based on future developments in Somalia. We quill have more D-X news a bit later on. (ARRL, GB2RS)

**

DX

In D-X, word that Kris Partridge, G8AUU, is working in Baghdad and has received the callsign YI9AU. Kris is reported to be active on the High Frequency bands using 100 watts to a long wire but hopes to improve his antennas soon. He is also hoping to become active on Echolink and says that he be in Iraq until early or mid-September.

And G0JMU is again active from Malawi as 7Q7HB. Reports say that he will be there until at least the 22nd of September.

Also, news that 5B4AFM will operate as J42004A from Skopelos and Athens through the 1st September. The island of Skopelos counts as EU-072 for the RSGB Islands on the Air award program.

Lastly listen for the Cook Islands to be on 6 meters with a better signal in coming weeks. This as KC5YKX reports over the VHF Reflector that he has shipped a 5 element beam there for ZK1CG to use. ZK1CG should be on the Magic Band as soon as the antenna arrives. QSL all of these operators in these stories as directed on the air.

(All aboveDX from various DX sources)

**

THAT FINAL ITEM: ECHO - THE TONE ACCESS HAM RADIO SATELLITE

And finally this week a rhetorical question. Why use continuous tone coded squelch access to talk through a ham radio satellite? AMSAT says that there are several very good reasons and Amateur Radio Newsline's Norm Seeley, KI7UP, has them in this report:

--

Continuous tone coded squelch is better known in ham radio circles under its Motorola trade name of P-L or Private Line. And AMSAT says that there are several good reasons to use it on the new Echo ham radio satellite.

First, and simply, is on orbit power management. The ability to minimize the amount of power used by the satellite.

Recent data collection shows that on average, Echo's tone access FM repeater transponder is on for less than 40% of an orbit. There are orbits where that number is as high as 65%, but the average is below 40%. That means the satellite is conserving over 60% of the power that would have been consumed by the transmitter if it were being keyed up by every random signal passing through its receiver. Since you cannot easily change rechargeable batteries on a satellite like you can on a terrestrial H-T, power management is crucial to the long term stability of Echo or any man made satellite.

The second reason kind of tag's onto the first. Its the idea of minimizing the three letters dreaded by hams world wide: Q-R-M.

In the tone access mode Echo does not have to listen to other traffic on the Amateur bands or any other signal not intended for the satellite to relay. While the satellite still has to compete with these R-F sources to capture the receiver, they are not retransmitted downlink. This means you do not have to listen to taxi cabs being dispatched in some third-world nations where the V-H-F Amateur bands have more business going on than ham radio contacts being made. A problem that the world wide Intruder Watch program has been fighting for years.

Yet another reason for tone access on Echo. By closing the audio path when no access tone is present the ground based user hears a short unmodulated carrier for the duration of the squelch tail. This can be used as a good measure of how well you are actually hearing the satellite.

Without tone access filtering, uplink band noise is heard. And, any ham who has heard a carrier access repeater where the squelch is open knows what that sounds like. Amplified noise that is sometimes difficult to differentiate from the actual band noise. In the case of a ham radio satellite it means not knowing if you are hearing the bird at all.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

After Echo's launch there was talk on some terrestrial repeaters that
AMSAT had put a private P-L repeater in space. This is far from the

case. Without tone access, the lifespan of Echo would be significantly reduced and fewer hams would have their chance to make contacts through it. (ANS)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). He's not clue-resistant at all. He has a well-formulated plan.
Since he's not getting a timely administrative law hearing, he's
trying to force a criminal case, which gets resolved a whole
lot quicker than an FCC hearing. He has a pretty good track
record in criminal cases; we only hear about the couple convictions.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 674
BID: $OPDX.674
August 30, 2004
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W5PF, KM6HB, AC7DX, K8YSE, DF4SA, DL1EK & The DX News Letter, EA7FTR, F5CWU & La Gazette du DX, F5NQL & UFT, F5ASD, F6AJA & Les Nouvelles DX, GM4SUC, GU0SUP, I1JQJ/IK1ADH & 425 DX News, JA1ELY, JA0SC, JA0VSH, JI6KVR & JA-IOTA Islands News, PA7FM, PY5EG, VA3RJ & ICPO, VU3DJQ and QST/ARRL Letter for the following DX information.

SPECIAL NOTE FROM EDITOR (KB8NW): SSSSSHHHH!!!!!!! You did not hear this from me. My wife Linda (OPDX's Chief-Proof Reader) has a birthday today (August 30th) and hits the "BIG FIVE O" (50th). I still think she looks like 29. Birthday wishes can be sent to: lmsm54@hotmail.com
Remember, you did not hear this from me. (I will deny it!)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/August, through Sunday, 29th/August there were 216 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

135th HPM BIRTHDAY ANNIVERSARY. Many stations will be active on the air to help celebrate the 135th birthday anniversary of the League's co-founder and first president Hiram Percy Maxim, W1AW, who was born September 2, 1869. Look for ARRL Life members and League's elected and appointed volunteers and officials to append /135 to their callsigns. The HPM/135 event begins at 0000z on Thursday, September 2nd, and concludes at 2400z on Sunday, September 12th. To find out if you are eligible to sign /135, please see September's QST (page 40) or visit the following Web page for details at: http://www.arrl.org/qst/2004/09/field-positions-135.html
The Maxim Memorial Station W1AW will be on the air for the 135th birthday anniversary event. While W1AW has been appending "/90" to its callsign to mark the ARRL's 90th anniversary, it will go with the /135 identifier during the birthday celebration period. A certificate is available by working at least 25 HPM/135 stations and submitting a log extract including date, time, band, callsign worked and exchange for each /135 contact. This certificate is endorsable in increments of 25 contacts up to a maximum of 100. Details are also available on the above mentioned Web site and QST.

3D2, FIJI. Mark, KM6HB (ZK1AHB) will be active as 3D2HB from Viti Levu (OC-016) from August 30th to September 7th. Activity will be on 40-6 meters with 30 meters RTTY as a priority. Operations will only be 100 watts into a vertical. QSL via his home callsign direct or by the Bureau.

4S, SRI LANKA. Masa, JQ3DUE/4S7DUG, will lead a group of Japanese operators to Sri Lanka between September 18-23rd. Activity will be on 160-6 meters with emphasis on the lower bands. They plan to have four stations active all day long. QSL via operator's instructions.

5U7DX IS NOW QRT. QSL Manager Dennis, PA7FM, informs OPDX that after just 8 days of operations with almost 1000 QSOs made in his spare time, Michael, PA5M, is now in Mali (TZ). He will try to get a licence, although chances look small that he will get one in the short term. On the 16th of September Michael will go to Ghana (9G). A licence there shouldn't be a problem. In the meantime, Dennis states that the design for the 5U7DX QSL is almost ready to go to the printer (full color photo QSL again). The final logs for 5U7DX are on: http://www.pa7fm.nl

5X, UGANDA. Graham, 5X1GS, was pretty active over the past weekend on 20/15 meters SSB. Watch around on 14156 kHz after 2000z and 21215 kHz after 1230z. QSL via WB2YQH.

7X2ARA CQWW CW CONTEST STORY. Con, DF4SA, reports, "Since the CQ magazine with the CQWW CW results is out, I have received several E-mails regarding my operation from 7X2ARA in the 2003 CQWW CW Contest. For those who like reading the long story and see some pictures, have a look at my website. You will find the 7X2ARA story PDF file among others at:
http://www.qsl.net/df4sa/dxped.htm
It's more like a traveling story, not only a contest story. Once again thanks to the 7X hams for making this adventure come true.."

9U, BURUNDI. Pierre-Marie, F6FLN/HB9DTM, is in Bujumbura for two months with the United Nations High Commission for Refugees (UNHCR). He has gotten

his licence (9U6PM) valid through next February. He has a TS450 and will be active on SSB. However, he is waiting for his keyer to be sent to him. His activity over the past week has been on 15/12/10 meters between 0800 and 1530z. Watch around or on 21242, 21270, 24948 and 28505 kHz.

9Y, TRINIDAD AND TOBAGO. Bernd "Ben", DL6FBL, will be active as 9Y4ZC during the CQ WW DX CW Contest (November 27-28th) as a Single-Op/All-Band/ High-Power entry. QSL via DL6FBL. He will use two Tribanders, a 2-element 40m beam and verticals for 80/160m. For updates, watch his Web page at: http://www.dl6fbl.de/9y4zc

A5, BHUTAN. A group of French operators from the Clipperton DX Club (CDXC) that include Gerard/F2VX, Jean-Louis/F9DK, Vincent/G0LMX and Alain/F5LMJ will in Thimphu from October 24th to November 11th. During the 1st week from Thimphu they will participate in the CQWW SSB Contest and after that they will move to Jakar for building a new club station. All QSLs are via F9DK and all QSOs will be confirmed via the bureau.

A NEW AWARD FROM BARTG! The Britis Amateur Radio Teledata Group (BARTG) is pleased to annouce the last in its series of continental awards. The OCEANIA award completes the continental awards from BARTG. The award is available in three classes: Class 3 is for 10 countries; Class 2 is for 25 countries; and Class 1 is for 45 countries. The claim can be endorsed as ALL RTTY, or ALL PSK, or can be mixed digital modes. You can also claim single band or mixed bands. There are three methods of claiming: 1) Submit the relevant QSL cards. 2) Submit a list of countries worked, endorsed by TWO officials of a recognized club or organisation. 3) For countries worked in one of the BARTG RTTY contests. Awards cost £6.00, USD 10.00, or 10 Euros. For the full rules, please see the awards pages on:
http://www.bartg.demon.co.uk
Applications should be sent to Phil Cooper, GU0SUP. Queries can be E-mailed to: pcooper@guernsey.net

C5, THE GAMBIA. Jef, ON4ACA, will be active from here for 2 weeks starting October 27th. His callsign was not provided, but his activity will be on all bands (possibly 160/80m) CW/SSB and a Single-Op/Single-Band (20m) entry in the CQ WW DX SSB Contest (October 30-31st). QSL via ON4ACA.

DXCC NEWS.....
Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operation is approved for DXCC credit: OJ0J - Market Reef July 1-4, 2004

WORD THROUGH THE GRAPE VINE (InterNet Mailing Lists) states the following have and have not been accepted for DXCC:
HP1/DJ7AA is NOT BEING ACCEPTED for DXCC by the ARRL due to the lack of documentation.
FO/ON4AXU operation IS BEING ACCEPTED for DXCC.

FM, MARTINIQUE. Laurent, F5MUX, will return here for the next CQWW SSB Contest (October 30-31st) as a Single-Op/All-Band entry. He hopes to get his previous callsign as FM2GO, if not he will get a TO prefix. QSL via F5MUX, QSL Bureau or direct to his new address: P.O. Box 42, 29950 BENODET

Cedex, FRANCE.

FW, WALLIS AND FUTUNA ISLANDS (Also 3D2). Nob/JA7OV and Hiro/JA7AQR will operate as FW7OV and FW7AQR, respectively, from Wallis Island (OC-054) between October 9-15th. They will be active on 40-10 meters SSB and RTTY with a 15 meter 2 element Yagi and multiband dipoles with 100 watts. They state, "Sorry there will be no CW activities." One or two days before and after their FW operation, they will be operating as 3D2TY (JA7OV) and 3D2YT (JA7AQR) from Fuji. QSL to their home callsigns via the bureau or direct to the following addresses:
JA7OV - Yoshinobu Takahashi, 4-9-36 Emata, Yamagata, 990-0861 JAPAN
JA7AQR - Yoshihiro Tanaka, 1-10-6 Minamihara, Yamagata, 990-2413 JAPAN

IOTA NEWS.....
AS-134. After 4 years of silence, the Hebei/Tianjin Province Group will be activated by Fan Bin, BA1RB, from September 18-20th, as BA1RB/3. Activity will be on 20-10 meters including the WARC bands. Modes will include RTTY and PSK31. Operations will be 40-48 hours depending on the weather and tide conditions. Antennas will be two sets of 2 element yagis (for 20-10 meters. w/WARC bands), a vertical and dipole.
BA1RB's planned schedule (may vary due to propagation) is:
Local Time Band
------------ -----
Evening, 18th 17m
Morning, 19th 12m and 10m
Evening, 19th 20m
Morning, 20th 15m
ADDED NOTE: If possible, they may test 160/80m at sunset.
QSL via EA7FTR.

AS-173. NOW QRT! Raman, VU3DJQ, who received permission to operate as AT0RI from Rameswaram on Pamban Island in the Tamil Nadu State South Group (India), has gone QRT earlier than planned on August 28th. QSL via: P.O. Box 6073, Bangalore 560060, India.

EU-054. Alberto, IT9MRM, will be active as IF9/IT9MRM from Favignana Island (IIA TP-001, MIA MI-025), September 7th from 0900-1700z. Activity will be from Punta Sottile Lighthouse (ARLHS ITA-145 and WAIL SI-024) on 40/20 meters SSB. QSL direct or via the bureau.

EU-124. Look for the Barry Amateur Radio Society to activate GB5FI from Flatholm Island now through and September 1st. QSL via GW0ANA, direct or by the bureau.

EU-136. Operators OE1CIQ, OE8YDQ and OE6CAG will be active from Krk Island (CI-046, MC-185) as 9A/homecall, September 7-11th.
If the weather permits, they will also try to activate the following islands: Plavnik Mali Islet (EU-136, CI-225, MC-225), Kormati (EU-136, CI-178, MC-165) and Cres (EU-136, CI-012,

MC-056). QSL via operator's instructions.

NA-066. Tom, WA6WPG, will be operating from Santa Barbara Island (WLH-0258), September 25-26th. He will be using solar panels and 2 large batteries, and expects to be able to run 100 watts both days on 80-10 meters, CW/SSB. The callsign will be WA6WPG/P. QSL direct or by the Bureau via WA6WPG.

ILLW 2004 UPDATE/WRAP. Mike, GM4SUC, Organizer and Coordinator of the 2004 International Lighthouse/Lightship Weekend, states that there were over 360 stations active in 51 countries from lighthouses and lightships during the event. New countries were SV9, YB, GJ, OA and HB9. Overall most countries had the same number of stations as last year except Wales who went from 1 to 8 stations while the USA went from 72 to 45 stations. Next year's weekend will be from 0001 UTC on Saturday, 20th August until 2359 UTC on Sunday, 21st August 2005. Any comments on the weekend would be appreciated to either Kevin/VK2CE or Mike/GM4SUC.

JW, SVALBARD. Operators JW5NM, JW7FD and possibly others will be active as JW5E during the CQ WW DX SSB Contest (October 30-31st) as a Multi-Op/ Single-Transmitter entry. QSL via JW5NM. The groups Web page is: http://www.mamut.com/polarpost

KL7, ALASKA (Special Event). Now through September 6th, look for the special event station KL7AA from the Alaska State Fair. QSL via AC7DX with a SASE #10 envelope for a certificate. No postcard style please. No Bureau QSLs.

QSL INFO AND NEWS.....
QSL ROUTE CHANGE. The QSL route for FP/KT1J has changed effective immediately. K1WY is not the QSL Manager for this station at this time. Send your QSL requests for a contact with FP/KT1J to KT1J for all contacts. QSL direct (w/SASE) or by the Bureau.

LX5, LUXEMBOURG. Look for LX5A to be active in two upcoming contests:
CQWW RJ RTTY Contest (September 24-25th) - Operators LX1ER and LX1RQ.
QSL via the LX Bureau or LX1RQ.
ARRL 10m Contest (December 11-12th) - Entry mix mode (Multi/Single).
Operators are: KT8X (CW); LX1ER and LX1RQ (SSB).
QSL via the LX Bureau or LX1RQ.

R1, MALYJ VYSOTSKIIJ ISLAND (POSTPONED!). Reports indicate that the R1MVI operation scheduled for August 27-29th, has been postponed due to technical reasons. New dates are expected to be announced later.

RARE GRID TO BE ACTIVATED. Just a reminder! Look for Matt/KB8KNM and Dan/KB8UYZ to activate the rare Grid EN67 from Michigan's Keweenaw Peninsula as K8C on September 5th. For the county hunters, that's Keweenaw County. Activity will be on 80-2 meter SSB for just a one day operation. For more details refer to OPDX.671. QSL direct via Dan, KB8UYZ. All QSLs will be answered. A S.A.S.E. is appreciated, but not required.

SOUTH AMERICAN TRIP. Look for Tono, EA9CP, to activate a few South American countries over the next month and a half. His schedule is as follows:
Peru - Active from Punta Hermosa from September 9-15th. His callsign will be OA4/EA9CP.
Ecuador - Active from Quito from September 19-21st and October 3rd. He will be active as HC1/EA9CP or HC1CB.
Ecuador - Active from Isla San Cristobal (IOTA SA-004) from September 22nd to October 2nd.
Costa Rica - Active from San Jose from October 4-11th. His callsign will be TI1/EA9CP.
Colombia - Active from Isla San Andres (IOTA NA-033) from October 11-13th. His callsign will be HK0/EA9CP.

SPECIAL EVENT. Operators Jerome/F5ASD and Gerald/F4ASA will be active using the special callsign TM5BDM to commemorate the 90th anniversary of the First Battle of the River Marne (1914-2004) during the WWI, September 4-5th. Their QTH will be 40 km east of Paris Villeroy (Dpt 77), Charles Peguy Memorial. Activity will be on 80-10 meters using a TS-140 and FT-100 into a G5RV. QSL Manager is F5ASD; QSL direct or via the Bureau.

TA, TURKEY (IOTA Ops). Operators Thierry/F5SNY and Christian/F8BOD are in Turquie up to September 10th, and will be active as TA/homecall. They will try to activate some of Turkey's islands such as AS-115, AS-123 and AS-098 for the IOTA program.

TK, CORSICA. Christophe, F4DZY, will be active from here as TK/F4DZY from September 8-22nd. Activity will be on the HF bands on SSB. QSL via operator's instructions.

TX/C, CHESTERFIELD ISLAND (Update). The German group who plans to go here in October will be active on 160-6 meters CW/SSB/RTTY. Their callsign will not be announced before their operation. Operators will be Chris/DL5NAM, Jan/DJ8NK, Hawa/DK9KX, Dieter/DJ9ON, Dieter/DL3KDV and Heye/DJ9RR. Activity will begin on October 15th or 16th, and last for 8 days. For more info and pictures, please visit their Web page at: http://www.df3cb.com/chesterfield

V63, MICRONESIA. Kaz, JA0VSH, informs OPDX that he and wife Miyuki, JG0PBJ will be active from Micronesia as V63KZ and V63MP from September 17-26th. Activity will be SSB and CW on 160-10 meters. QSL via their home callsign. His NEW home address is as follows: Miyuki Maruyama / Kazuhide Maruyama, 1-25-49, Irima-cho, Chofu, Tokyo 182-0004 Japan.

V63, MICRONESIA. Sho, JA7HMZ, will be active as V63DX from Pohnpei (OC-010), October 29th through November 3rd. Activity will include a Single-Op/All-Band entry as V63B in the CQWW SSB Contest. QSL via JA7HMZ. ALL QSOs are OK via the ARRL/LoTW.

VP8, FALKLAND ISLANDS. The Group Tomball DX'ers (GTDX) has announced their second annual DXpedition. This year the group consisting of Cal White/WF5W, Keith Dutson/NM5G, Madison Jones/W5MJ and Paul Frantz/W5PF, will visit the Falkland Islands. They will arrive on Saturday, November 20th, and

leave on Saturday, December 4th. Activity will include an entry in the CQWW DX Contest as VP8WWW. During the rest of their stay the group will be active on all bands from 80-10 meters with the possibility of 6 meters depending on conditions. The WARC bands will be emphasized, and there will be activity on RTTY and PSK. Individual callsigns will be issued upon arrival in Stanley. QSL all callsigns via W5PF. The group will have two Kenwood TS-480HX tranceivers. Amplifiers are not permitted, so this will be a low power operation. Operation will be on or near the following frequencies:
CW - 3503/3523, 7003/7023, 10103, 14023, 18073, 21023, 24893, 28023, 50103
SSB - 3795, 7055, 14195/14260, 18145, 21295, 24945, 28480, 50103
RTTY - 7035, 10133, 14083, 18101, 21083, 24920 and 28083
PSK - 7035/7080, 10143, 14071, 18101, 21071, 24920 and 28120

For the latest information, please check their Web site at: http://www.gtdx.com

WRTC 2006 NEWS. Oms, PY5EG, has informed the contesting community that the next World Radiosport Team Championship (WRTC in July 2006) will be in Florianopolis, and the WRTC2006 Committee has started the activities to organize the event. The initial Committee has been formed and include the following: PP5JR/Sergio, PP5WG/Walter, PP5UA/Pedro, PT2ADM/Gustavo, PY0FF/Andre, PY1KN/Marcelo, PY2EMC/Eric, PY2YP/Cesar, PY5CC/Peter, PY5KD/Luciano and PY5EG/Oms. More individuals will be added to the Committee later. A WRTC 2006 Web page has been set up, but still under construction at: http://www.wrtc2006.com
On the Web page, Oms advises, "You can see our preliminary rules and also the criteria selection and something about our beautiful Florianopolis. From time to time we will incorporate new information on our page, and we kindly invite you to continuously visit the WRTC 2006 page." They also invite the Ham radio community to subscribe to their reflector via their Web page in order to receive all news about the event at: http://maresia.onda.com.br/mailman/listinfo/wrtc2006

XX9, MACAO. It has been announced that Hiro, JA0SC, has been forced to cancel his August 24-31st operation. No other details were given.

Well people, once again I was right. The mystery poster on this board, mr private is none other than KG4COQ, aka Don Roselli. You notice that those idiotic postings about conversations, people posting thier trash on swap nets, and the usual accusations of jammers on the Sicks Four repeater in Tampa have gone away? Yes, I did it again. I do appologize for Roselli though. It's sad to think such a deviant, and sexual predator calls himself a Ham Radio operator. Don, would you like to post further, or do I take you to town on this news group? It'd be my pleasure for your accusations towards me, and the harassment I faced while living in Tampa. Shame on you Don Roselli, KG4COQ.

1088. The exciting world of APRS

Start learning about the exciting world of APRS with APRSPoint, the APRS software regarded by most hams as having the best map support and most intuitive user interface. Track other hams on a zoomable, street-level detail map in an intuitive and easy to use interface. Send instant short messages through either RF or internet link. If you are an experienced APRS user, you'll appreciate the ability to plot a digipeater or other ham stations' signal range on the map, connect to APRS internet servers, send email through your ham radio, and other advanced features. This week you can get APRSPoint with MapPoint 2004 included for the best possible price ever. Check out the website at http://www.aprspoint.com/ for details.

i am not don...
i guess your narrow mind sees that cut and pastes of group mailed
emails from don count for you thinking he is me because i cut and
paste them to the newsgroups. you can dislike don, thats your choice,
i dont dislike him, he hasnot done a thing to me. id like to see some
evidence on the child molestation accusations, thats a pretty stiff
charge without providing some proof, until then i will consider don an
ok guy. u want to prove me wrong about don? tell me where to find the
molestation evidence, until then, chill.

1094. Win-Test contest logging software available in English

Hi -

FYI

We are pleased to inform you that Win-Test software and the Win-Test web site are now translated in English for most parts.

Win-Test is a pure Win32 contest software written by two members of the FY5KE team, Olivier F5MZN (also author of DxNet DX-cluster) and Laurent F6FVY.

All major international contests, and several HF and VHF national contests are now supported (30 in all, for version 2.1.6-rc3).

A trial version, features list, quickstart and reference manuals are available here:

http://www.win-test.com

1096. CollinCollectors Association First Wednesday Night Sept 1st!

Newsgroup: rec.radio.amateur.misc
Date: 2004-08-31 11:49:07 UTC
From: WA9VRH Larry <wa9vrh@mtco.com>
Message-ID: <41346513_5@corp.newsgroups.com>
Source record: 56558
Cross-posted to: rec.antiques.radio+phono,rec.radio.amateur.boatanchors,rec.radio.amateur.misc

FIRST WEDNESDAY AM NIGHT !!! Sponsored by the Collins Collectors
Association.

Cedar Rapids, Iowa - Wednesday Sept. 1st on 3880 kcs at 7:30PM local East
Coast time marks the start of the latest chapter of First Wednesday AM
Night, drawing hundreds of vintage stations from across the country.

The event is anchored by a "tall ship" AM station in each time zone. The
East Coast will run for 90 minutes in response to the tremendous
participation in the Eastern Time zone. The remaining time zones will be an
hour. We encourage stations to check-in on AM using Collins and other
transmitters, new and old. It's an opportunity to revel in this nostalgic
mode, enjoy giving vintage equipment a "run," and sharing some storytelling
about classic vacuum tube homebrew and commercial designs. Typically more
than a hundred stations take part in the evening's coast-to-coast AM event;
by the time it concludes at 10P, PDT (1A EDT).

A logbook of check-ins, with the equipment used, appears in the
"Announcements & Events" section of www.amfone.net on the page's "AM Forum -
BBS."

In months past, anchor stations have included those running the beautiful
Collins 300-G, pictured below, as well as those running the amateur KW-1,
and other noted models.

http://www.amwindow.org/pix/jpg/300g.jpg

LISTEN for the following anchors and stop by to say hello, won't you? You

don't have to be running Collins or vintage gear to be
welcomed into the
group.

7:30P-9P East Coast Anchor: Joe N3IBX

8P-9P Midwest Anchor: Tony W9JXN and Jim W0NKL

8P-9P Rocky Mountain Anchor: Jim WA0LSB in Larkspur CO

8P-9P West Coast Anchor: Bill N6PY in Palmdale CA

LOL. Change your typing style too, huh Roselli? Good. But folks,
this response from my message if from Don Roselli, KG4COQ, the
mastermind, the trouble maker on the Sick's Four repeater. His
blatent accusations of jammers has landed him some major problems.
Now that I have the attention of this newsgroup, I intend to go
further than you'd ever imagine. I think folkswill get a better kick
out of what I have to offer as far as information goes, versus your
posting of old useless Ham gear by no nuts Hams in Tampa?

Let me ask you this. What is your intention of publicizing who
checked into your stupid repeater, and what they said? Why would
anyone care?

I noticed that your postings drastically decreased since I exposed who
you are, Don Rosseli. Shall I go further?

1103. Hurricane Frances - Brevard County Procedure Changes

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-01 01:46:05 UTC
From: Bill Newkirk <wnewkirk@bellsouth.net>
Message-ID: <IQ9Zc.44359$N11.10176@bignews5.bellsouth.net>
Source record: 56565

To List:

In anticipation of the possible arrival of Hurricane Frances and to overcome some of the issues raised during hurricane Charley the following guidelines will be in place:

1.) As with Hurricane Charley we will run three nets simultaneously in south county. Checkins shall be made initially through the South Brevard Net and location assignments will be made from the South Brevard net.

2.) All traffic going to Brevard County EOC shall be routed through the South
Brevard county net with the exception of routine skywarn traffic. South Brevard Storm damage reports resulting from the hurricane shall be communicated
to the South Brevard net as soon as possible after having first been reported
to NWS.

3.) Unless specifically requested by South Brevard or Shelter net controls, operators are asked to refrain from passing weather information over the nets.
If you plan on staffing a location bring a portable tv or monitor 162.550 on
you ham radio, or take an am/fm radio into the location you staff. please limit your reports to NWS to safety to life and property reports. i.e. visually verified tornados, hail, severe flooding (not roadway flooding unless
it is stranding vehicles), wind or other damage.

4.) Please be courteous to the people you are providing communications for. Your attitudes and actions will have an affect on how amateur radio emergency
operations are perceived by the agencies we serve. If you are staffing a shelter try to maintain a positive attitude to help alleviate the stress of the other people in the shelter with you. The people in the shelters will perceive the communicator as their link with the outside world. If the radio
operator is confident

5.) Plan on being prepared to remain at your assigned locations for an extended
period of time. This means have enough fresh batteries to run for 72 hours wherever you are deployed. Bring your own supplies including food, water, medications, cots, chairs, paper, pencil, pens radios, spare fuses,spare antennas, extra coax, soldering iron/solder, portable TV etc. A good rule

of
thumb: If you don't bring it - you won't find it and you won't have it.
Check
the Palm Bay Emergency Management site which can be accessed from the DCS
Website (See bottom of page for link)

One operator during hurricane Charley brought his own sleeping cot into the
shelter. Several other amateur radio operators found out the Red Cross does
not supply cots and the floors were hard and cold. Another thing to
consider,
in the middle of the storm the shelters will be autonomous. Police, Fire,
EMS,
and Red Cross will not dispatch anything anywhere. If someone has a heart
attack in the shelter, First aid will have to be administered by shelter
personnel until the winds subside to safe speeds.(chances are good someone
could die in a shelter). Don't forget also roads can be blocked by debris
which also can hinder the response time of the emergency crews. Don't count
on
meals from Red Cross for the same reason. Are you a diabetic ? bring your
medications and the food you will need to keep your sugar levels from
dropping.

Clayton Bennett sent photos of his operating position in a shelter. Check
out
the photos on the DCS website.

At the height of the storm conserve your energy as much as possible so you
are
alert and ready to deal with the aftermath of the hurricane.

6.) Please follow the instructions of the net control operators.

Net Frequencies:

Net Primary Secondary
Tertiary

South Brevard (Main) 146.895 145.270
146.895 Simplex
Shelters 146.610 147.000
146.610 Simplex
Skywarn 146.850 146.850
Simplex

Steven Hathaway
South Brevard County Emergency Coordinator

1104. Melbourne FL , radio exams cancelled.

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-01 01:52:19 UTC
From: Bill Newkirk <wnewkirk@bellsouth.net>
Message-ID: <zW9Zc.44386$N11.31877@bignews5.bellsouth.net>
Source record: 56566

Since the current tracks take Frances to even near here by Saturday morning, there won't be radio examinations in Melbourne this Saturday (9/4).

Possible Cat 4 storm on the horizon and people will have better things to do than to get out in the wind for a test that will be available again next month (and possibly at the Hamfest the next week.).

1105. Re: WIFI DXin

In article <4K8Zc.12020$zE3.7656@newssvr24.news.prodigy.com>,
Recordking@Hotmail.com says...

> I am looking to do some WIFI DX here in the setup I am looking to get 12 to
> 15 db gain antenna 30ft to 40ft singal booster/amp. How much range would I
> expect to get with this setup also where can I get this stuff kinda cheap
> online.

A little advice.

First, posting the same identical message three times will not get
you the info you're asking for any faster. In fact, it may result in
your not getting any further responses at all.

Second: Google is your friend.

Happy hunting.

yeah...yeah...yeah...yada.....yada.....yada.......

More original bullshit from off 75 Meters in the evening.

Suggestion: Try model trains as a new hobby. That bunch has
more-that-a-few people in it who are possibly
more neurotic than does ham radio. (Especialy the "N-scale"
enthusiasts! There's a real bunch of candidates who get upset if one tiny
pipe or plastic piece that you need to see with a magnifing glass
is missing or 'not to scale'....whew! cukoo-cukoo-cukoo!)

PLONK!

1117. for amateurs evacuating the brevard county area...

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-02 03:28:09 UTC
From: Bill Newkirk <wnewkirk@bellsouth.net>
Message-ID: <TqwZc.4061$Np2.7@bignews4.bellsouth.net>
Source record: 56579

Return-Path: <shathawa@bellsouth.net>

To List:

Following is a list of coordination information for Amateur Radio and CERT Personnel who make the decision to evacuate the area. Upon return, after the storm has passed, Amateur Radio Operators and CERT personnel will stage at the Palm Bay BCC north Parking Lot for assignments. If the parking lot is inaccessible or unusable as a staging area. We will stage in the Bayside Lakes Publix Plaza parking lot near Beef O' Brady's.

For Amateur Radio Operators :

Below is a list of frequencies that can be used by amateur radio operators who evacuate the Melbourne/Palm Bay area to stay in touch. We will plan on making contact at 5:00 pm, 6:00pm, and 7:00 pm. on 14.340 MHz.
In the event radio communication conditions are bad, try one of the other listed frequencies. We will use these as calling frequencies so once contact is made you and your other party may want to select another frequency to move to or you may wish to remain on frequency and join the group that will be on the frequency.

Operators that remain in the Melbourne/Palm Bay area may also use these frequencies to contact individuals that have departed the area for news etc. if things get slow.

When you return to the area after the storm has passed we will assume no repeaters are left standing and will coordinate our activities on 145.520 Simplex. A net may be established on 145.520 by the time you return. You may be directed by net control to move to a frequency that is not programmed in your radio. You may want to plan on having your radio operating manuals with you when you evacuate. Establishing communications will be our top priority when you return.

145.520 MHz Simplex
14.340 MHz Primary

21.415 MHz
28.335 MHz

If you know of an amateur that is planning on evacuating and is not in the distribution list or did receive this notice, please forward or give a copy of
this message to them
Please print this list out and take it with you when you leave the area. Good
Luck Stay Safe

Thank You
Steven Hathaway
South Brevard County Emergency Coordinator

Define "repeater".

Obviously, the relays of the early days, as in "American Radio Relay League",
was a form of repeater.

The ARRL's "FM and Repeaters for the Radio Amateur" from 1972 opens with
a brief history, and it makes the case that the first VHF repeater was
on 5 meters, in 1932, with the callsign W1AWW. Though it would not
appear to have been an automated repeater.

There were AM repeaters, in California, in the fifties.

I think the earliest FM repeater dates from the early sixties, but I'm not
certain. There were articles by Byron Goodman in CQ from about 1964 on
converting commercial two-way equipment to amateur use, but I'm not
sure if FM repeaters started up then.

Wi-Fi Shootout in the Desert

By Kim Zetter | Also by this reporter Page 1 of 1

02:00 AM Aug. 03, 2004 PT

LAS VEGAS -- Mobile warriors having trouble making a wireless connection across the hall might want to give some Ohio teens a call. This weekend they were able to make a 55-mile Wi-Fi connection.

The teens from Cincinnati got an ovation at the DefCon hacker conference here Sunday when organizers announced at the Alexis Park Resort that the winners of this year's Wi-Fi shootout might have broken a world record for ground distance in establishing a 55.1-mile Wi-Fi connection.

Today's the Day. DefCon, in its 12th year of gathering hackers, security professionals and undercover intelligence agents from various countries, held its usual list of extracurricular competitions to accompany talks on subjects like hacking with Google and hacking RFID tags.

The Wi-Fi shootout, held for the second time, was among the most popular contests. Six teams participated, including two women who won an award for the most innovative antenna design, which consisted of an assortment of cardboard, duct tape and a car sun visor. That's only slightly less conventional than previous contestants, who built antennas from Pringles and Hormel Chili cans. The jury-rigged antenna achieved a connection at 0.82 miles.

Contestants had to set up a pair of computers, get an 802.11b Wi-Fi connection working on each one and then see how far apart they could place the computers and still maintain a connection using homebrewed and commercial antennas with and without amplifiers.

While one part of the winning team climbed a mountain with equipment, another part of the team climbed a second mountain. Then the first group

shot a signal from one station to the second station with an encrypted message provided by the judges. They logged increasing distances over two days. (Wired magazine helped sponsor the contest.) Contest judges verified the distances using GPS coordinates.

Last year, teams got caught in a two-hour traffic jam before they reached the base camp, at 4,650 feet above sea level, then faced rain and thundershowers in addition to blistering heat. This year they faced only the heat and the absence of bathrooms and fresh beer for miles around.

Ben Corrado, Andy Meng, Justin Rigling and a fourth friend, Brandon Schamer (who didn't accompany them from Ohio), won the greatest distance achieved for an 802.11b network. The teens, two of them 18 years old and the other 19 years old, achieved 55.1 miles using homebrewed antennas on both ends along with amplification, exceeding last year's winner by 20 miles. Then, when they established that record, they turned off their amplifiers and broke the record for an unamplified connection at the same distance. At the announcement on Sunday, the crowd rose to its feet.

The Guinness world record for Wi-Fi connection stands at 310 kilometers (about 192 miles), achieved in 2002 by Wi-Fi equipment maker Alvarion and the Swedish Space Corporation. But the companies achieved the distance by launching the equipment in a Swedish weather balloon, which many feel is not the same as a ground measurement, since there are fewer obstacles to block a WiFi signal in the stratosphere. The Swedish group also used amplification to achieve its record, but the DefCon team maintained its 55.1-mile connection even without amplification. Guinness World Records could not be reached for comment in time for publication to determine whether the DefCon team's efforts count as a distinct record.

Corrado told the crowd that they initially had no plans to attend DefCon but decided to enter the contest 19 days earlier after a "business plan" they devised fell through.

"We were going to war-drive around Cincinnati and find unencrypted wireless access points," Corrado said. "We knocked on people's doors and asked if (they) wanted us to encrypt them, and they just got all freaked out. So we were searching for other things to do with the equipment we had just purchased."

After Meng stumbled across the DefCon Wi-Fi shootout website, Corrado called Rigling and said, "Hey, dude, we're going to Las Vegas in like 19 days!"

They already had a few 9-and-a-half-foot satellite dishes that they had collected around Cincinnati over the last few years.

"We were planning on putting them up on towers behind our houses and sharing our broadband Internet connections (with people)," Corrado said, to a chorus of hoots and hollers from the crowd. But due to "parental restriction" they scrapped that plan.

"We still had the dishes laying in our backyards and we thought, what the hell. Why not?" Corrado said.

After collecting more equipment, they ran a test run, placing the stations two-and-a-half miles apart, and got a connection that was much better than any link they had ever established with laptops sitting side-by-side in their bedrooms.

When Meng's dad, a radio frequency engineer, looked at the test-run data he said, "Oh my God. They might have a chance at this. They might actually have to go to Las Vegas."

Not without Justin's father, however. Greg Rigling drove them across the country in a van, with the 10-foot satellite dish strapped to a trailer. Then he spent two days driving around Nevada's mountains helping them get a signal.

They might have achieved an even greater distance, Justin Rigling said, "but there was no road left."

For their efforts, the teens received a stack of O'Reilly books, Best Buy certificates and ber-hacker badges, allowing the teens and Justin's father lifetime admission to DefCon for free.

After the awards ceremony, the three were seen in a corner of the conference room trying to sell their equipment to lighten the return trip home.

False. There are more licensed hams than at any time in history.
Unfortunately some are very bashful about actually getting on the air. The
biggest problem is that today, the average person has never heard of ham
radio and has no idea what it is.

Every piece of technology has its place. PDA, wireless, cell phones, etc
have different abilities than ham radio as they are on different frequencies
and have other limitations. Hams know this but don't do a good job of
getting out the info on the different capabilities of the different
technologies. Perhaps sometimes the hams themselves aren't up on the
advantages and disadvantages of each technology.

Was K6MYK....Art and Millie Gentry. Started out as a AM repeater, became the
147.240Mhz RPTR on Mt. Lee in the Hollywood hills for many years. Was later
moved to "Loop" canyon in Sylmar where it lives today. It still runs the
ORIGINAL controller.
Art and Millie are dead now, the remaining machine is owned and operated by
N6NMC (Bill).
Hope that helps.

1127. Special event station 1944/2004

Hi all

TM6OLH will be on the air from 5th sept to 19th sept 2004 to commemorate the Liberation of LE HAVRE (Normandy FRANCE) on 12th september 1994 by the british troops.

60 years in the past, LE HAVRE was liberate after strong fightings around "Festung Le Havre" LE HAVRE (fortified town LE HAVRE) . 80% of the City was destroyed by airplain bombing and 2500 people died on 5th and 6th sept 1944.

The special event station will be active in a british camp reconstitution on 11th of september 2004. We will transmit on HF, phone, CW, SSTV and Hellschreiber mode. Please, watch 20m and around.

On 12th sept 04, two convoys of old WW2 vehicles will drive in LE HAVRE by two different routes (North East and East) like in 1944. We expect two tanks, a Paton and a Churchill armoured vehicles. Photo pictures of this event will be sent in SSTV the days after.

Thanks for your attention and receive our best regards.

Gilbert RATS F4ASK
Vice-chairman F6KOH, LE HAVRE radio-club
LE HAVRE WIRELESS SOCIETY (Oldest radio-club in FRANCE, founded in 1921)

Bonjour tous

TM6OLH sera actif du 5 au 19 septembre 2004 dans le cadre de la comm moration de la Lib ration du HAVRE (Normandie FRANCE) le 12 septembre 1944 par les troupes britaniques.

Il y a 60 ans, LE HAVRE a t lib r apr s des combats tr s importants autour de la "Festung Le Havre" (Forteresse du Havre). 80 % de la ville a t d truite par des bombardements a riens et 2500 personnes on trouv la mort les 5 et 6 septembre 1944.

La station sp ciale sera active depuis la reconstitution d'un camps militaire britanique le 11 septembre 2004. Nous transmettrons en HF, phonie, CW, SSTV et Hellscheiber. Veuillez veillez le 20 m et les bandes l'entour.

Le 12 sept 04, deux convois de v hicules militaires de la Seconde Guerre Mondiale entreront dans LE HAVRE par l'Est et le Nord Est de la ville comme le 12 septembre 1944. Nous esp rons deux chars Paton et Churchill dans les convois. Des photographies de cet v nement seront envoy s par SSTV les jours suivants.

Old gear's function is to radiate and receive RF.

What is it that you expect "modern" gear to do?

The _REAL_ Radio Ham builds and/or modifies and
adapts existing equipment. It is the CBer who goes out to
buy off-the-shelf "modern" gear.

Steffan,

WELCOME! The club is your best bet. We're just a lot of old farts here (:-) There's so much neat stuff to do and neat new equipment. BUT the old stuff, particularly Heath, is in demand. Be careful if you get offers. There's a new FM satellite just up, some new modes like PSK31 and all the rigs are computer controllable, so you can mix various interests.

I'm working on some computer control software for blind hams and I say that I am fixing it so I can have my 'computer-toy' play with my 'ham radio-toy' so I can go up stairs and relax watching TV !! (:-)

Afraid you may be right. It didn't happen with code free
VHF. We'll need better advertising of ham radio in the
electronics press, and various radio rags. (even CB, eeeeK!)
I'm an ex-CBer from 1976. Decided I liked 2 way radio enough
to step up to a ham license.

Mention that the prospective ham should visit several ham
clubs to find one he feels comfortable with.

1134. Question about Frequency Shift Keyed signals

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-04 01:14:40 UTC
From: James216440@yahoo.com
Message-ID: <5bf6bcf0.0409031714.6ec4fe87@posting.google.com>
Source record: 56495

There is an application that uses FSK. But the actual information is not coded by the frequency shift but rather by the length of time one of the pulses is turned on. The pulses are about 2 milliseconds long. The information is coded on one of them. The other is always the same length. The frequency shift is always a constant.

Now, my question. If you send this signal into a standard FM Rx it will produce a tone. Is this tone simply the difference between the two RF frequencys? Is the information coded on the one pulse lost in such reception? Or is this audio tone something far more complex that still contains encoded information?

TIA

Why? The two frequencies do not exist at the same time in the receiver.

Mike

Also be sure to listen to the Sick's Four repeater in Tampon bay.
There you will find Don Rosseli, KG4COQ, aka
hamradioman2000@yahoo.com, the private poster running his mouth
ATTEMPTING to be a hero by passing traffic, and passing gas.
Personally, I think he excels in the second of the two. Also keep
this in mind, most people are terrified of this hurricane, and the
prospect of the damage it can do. Don Rosseli, KG4COQ is happy it's
coming. Now he can be ever more popular in the area amongs his five
or six friends he has on Ham Radio for being Mr. Big Balls net
control. If you have the unfortunate experience of listening to that
stupid repeater in Tampa, or on Echo Plink, listen to this guy. Loser
or what? Keep in mind the big boner he's sporting from the excitment
of the approaching disaster. Typical of his deviance.

Up next, the Don Rosseli criminal record postings. Stay tuned.

But if the shifting, the pulse repetition, is taking place at a high
enough frequency it will be heard as a tone. And, yes, the information
is still there because the waveform of the tone should be that of the
modulating signal.

Amateur Radio Newsline™ Report 1412 September 3, 2004

The following is a message from the Amateur Radio Newsline Support Fund. Here's the funds administrator, Andy Jarema, N6TCQ.

--

Well, here I am again, so theres obviously another financial crisis that Amateur Radio Newsline is facing. And this time its a real doozie. Let me explain it to you.

During the summer many of you are away and donations dwindle to a mere trickle. At the same time, some of our biggest yearly expenses occur during July and August. This includes the Young Ham of the Year Award presentation that we host every year in Huntsville, Alabama. While we had planned ahead, we did not know exactly how much we would need and we were caught short. The price of airfares was up as was the cost of hosting the mini banquet for our recipient, her family and friends.

Added to that were higher than anticipated telephone costs to cover the breaking news stories we brought you over the summer. And right now that leaves us with less than $50 in the bank and several hundred dollars in outstanding bills that must be paid right now to keep Amateur Radio Newsline coming your way.

As we have said before, Amateur Radio Newsline is a federally charted 501(C)(3) and California state not-for-profit corporation. For most United States residents it means that your donation is tax deductible.

So please help keep the news on your local net, on your repeater and on your computer by making a donation to the Amateur Radio Newsline Support Fund. Its address is Post Office Box 660937, Arcadia, California. The zipcode is 91066.

Again that's the Amateur Radio Newsline Support Fund at Post Office
Box 660937, Arcadia, California, 91066.

On behalf of the entire all volunteer world-wide Amateur Radio Newsline team, I thank you for listening to this appeal and for your ongoing support that keeps the news of Amateur Radio coming your way.

I'm Andy Jarema, N6TCQ. Now Amateur Radio Newsline report 1412.

--

Thanks Andy. Now Amateur Radio Newsline report number 1412 with a release date of Friday, September 3rd, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL bandwidth based restructuring proposal causes controversy and maybe some reconsideration. Find out more on Amateur Radio Newsline report number 1412 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: REACTING TO THE ARRL BANDWIDTH PROPOSAL

An ARRL proposal to restructure Amateur Radio along bandwidth lines has caused a lot of discussion in the nations ham community. And it may cause the League to rethink its position. Amateur Radio Newsline's Mark Abramowicz, NT3V, is in Philadelphia, and has the rest of the story:

--

Shortly after the ARRL began circulating the proposal and posted it on its website, the e-mails, phone calls, HF, VHF, and digital-mode traffic took off.

And now, Amateur Radio Newsline has learned the bandwidth proposal may be tabled for more study when the ARRL's executive committee meets next month.

That confirmation comes from W6OBB in Nevada. If the call sign isn't familiar, the name behind it might be. He's Art Bell, host of the weekend edition of "Coast to Coast AM" heard on more than 500 commercial radio stations across the nation.

Bell, who joined the fight against Broadband Over Powerlines several months ago, and featured the subject on his radio program, expressed concern about what he called a Draconian proposal that would over-regulate the ham bands. Bell tells me he relayed that concern in a phone call to ARRL President Jim Haynie W5JBP.

Bell characterizes the discussion as cordial and at the end, he says Haynie related he was re-evaluating the proposal based on many comments he had received.

"He indicated to me and told me I could pass on to you that they're looking into pulling this whole thing back and taking a harder look at it," Bell says.

While Bell says he believes the ARRL had good intentions with the proposal, it may have gone too far.

"What began as an examination by the League of how we could possibly encourage the digital mode, it went a little too far and began to over-regulate," Bell says. "I'd kind of like to see it go the other way and I'd like to see our bands freed up."

Haynie says he's gotten a lot of feedback on the proposal. He says it came from the League's desire to promote - not restrict - innovation and experimentation. He says it was also a response the Federal Communications Commission's desire to see more innovation from the ham community.

"I think we rose to the challenge," Haynie says. "We have demonstrated Software Defined Radio that just knocked their socks off, in my view.

"We have come up with some other stuff - Joe Taylor and some of his things for moon bounce. And I think the Amateur Radio community needed a wake-up call is what they needed and I think that's what we've gotten and were given."

Haynie says it's clear the digital modes like RTTY and PSK 31 need attention.

"Where do we want to go to the future?" Haynie asks. "And, as I mentioned a couple of years ago, I took my model 28ASR and took it to the scrap man. But that's the standard that's used today is 850Hz shift at 45 baud.

"Well, we don't do too much of that. I'm not saying there's not RTTY enthusiasts out there, there are and I appreciate that and I know that and I want to protect their rights to do those things."

Art Bell says he and others don't object to digital innovation. But he doesn't think the proposal hits the mark.

"There are many with differing interests who are not too pleased with the proposal and, on the face of it, it simply does not make sense," Bell says. "I agree that we should encourage the digital modes and development, but we shouldn't try to push something into place that is not techincally ready to happen yet."

Restricting bandwidth, Bell says, won't promote innovation.

"Why do we have to cut and slice and dice and regulate," Bell says. Why not just let anybody virtually go anywhere and let all of us just live together with some gentlemen's agreements which we have now and which work very, very well on most bands?

"So with that in mind, look at the Canadians. The Canadians have a 6khz limit and they can go anywhere on the band they want from the bottom to the top. And I don't see why that would not apply and work well in America."

Haynie says he wants to hear more from hams and he's encouraging all of us to get into the FCC's Part 97 rules and share input on the proposal at the ARRL's website, that's ARRL-dot-org.

"Look at the rule book and see what's there now, "Haynie says. "And, is there something that could be changed that would allow a new technology to be developed, then that's what we want to know."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the ARRL proposal and reaction to it in upcoming Amateur Radio Newsline reports. (ARNewsline(tm))

**

RESTRUCTURING: DROPPING CW TESTING IN CANADA

Meantime, to the north, another form of restructuring proposal is being considered by hams in Canada. This as telecommunications regulator Industry Canada publishes a Gazette Notice called "Recommendations from Radio Amateurs of Canada to Industry Canada Concerning Morse Code and Related Matters".

The Radio Amateurs of Canada proposal deals with the WRC-2003 decisions concerning Morse as a compulsory qualification for High Frequency operation in the Amateur Service. Radio Amateurs of Canada has recommended that Industry Canada delete the mandatory aspect of the requirement for Morse testing but leave it as a voluntary qualification. This, because knowledge of code may be required for reciprocal operation in those countries retaining a Morse requirement.

The notice was published on Saturday, August 28th and gives Canadian radio amateurs sixty days in which to respond. Radio Amateurs of Canada recommends that the nations ham community endorse this proposal. (RAC)

**

ENFORCEMENT: 10 METER INTRUDER WARNED

Here in the United States a commercial business has been warned to stay of the 10 meter ham band. The FCC's Daryl Duckworth, N-N-Zero-
W, explains:

--

Duckworth:"Dandy Service Corporation of Warrendale, Pennsylvania, was
issued a warning notice fot unlicensed radio operations on 28.085 Mhz. Two of their vehicles were the source of transmissions on August 5th of this year in Michigan on Interstate 94 at mile-marker 262."

--

Dandy Service was told to advise its drivers that operation of radio transmitting equipment without a license is a violation of the Communications Act of 1934. That it could subject the operator to fine or imprisonment, as well as an seizure of any non-certified radio transmitting equipment. Monetary forfeitures normally range

from $7,500 to $10,000. (FCC, RAIN)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N7VGS repeater serving Star Valley Wyoming.

(5 sec pause here)

**

THE BPL FIGHT: IT MAY BE COMING TO SO. CAL.

A heads up warning to hams living in the California counties of Los Angeles, San Diego and Riverside. According to ARRL officials in the Southwestern Division, Broadband over Powerline may be coming your way.

Writing in the latest issue of the division electronic newsletter, Director Art Goddard, W-6-X-D, and Vice Director Tuck Miller, N-ed-6-T, say that power companies in these areas may be considering BPL as a new business venture. The two officials add that the regions Amateur community needs to work together to see if they can head off these B-P-L flirtations before they become entrenched on the ham radio bands.

The report goes on to say that local ARRL Section Managers are already on top of the situation. The S-M's are reportedly forming Local Action Teams to work on all levels in handling the B-P-L threat to the area. (ARRL Southweestern Divisioon Communicator)

**

OPERATIONAL NEWS: TO PL OR NOT TO PL - THATS THE SERA QUESTION

Repeaters in eight states and the hams that operate through them may soon face mandatory use of continuous tone coded squelch. Then again, they may not. Amateur Radio Newslines Gary Pearce, KN4AQ, is in Raleigh, North Carolina, trying to sort it all out:

--

SERA, the SouthEastern Repeater Association, ignitied a furious debate when its Board of Directors voted to require the use of tone as a condition for frequency coordination for all repeaters in its territory. SERA is the frequency coordinating group for eight southeastern states: Georgia, Kentucky, Mississippi, North and South Carolina,| Tennessee, and parts of Virginia and West Virginia.

The SERA Board voted at its June meeting that some form of tone access will be a condition of coordination for all new repeaters effective immediately. Existing repeaters will need to adopt tone

within two years, by July 2006. The board was acting on a motion by Steve Grantham AA5SG, the Director from Mississippi. The goal of the policy was to reduce the number of complaints that SERA coordinators receive from repeater owners whose carrier access repeaters are keyed up by users of a co-channel neighbor.

In discussion at the meeting, the new policy was softened some when coordinators asked if this meant that repeaters would be automatically decoordinated if they decided not to use tone. The answer, according to an article in SERA's magazine the Repeater Journal, was "no, but…" SERA would not entertain an interference
complaint from repeater owners who remained carrier access.

The debate began in earnest when the August issue of the Repeater Journal began arriving and the ARRL published a story about it on their web site. Repeater owners argued the merits of tone itself, along with complaints that SERA didn't poll its members, and non-member repeaters, before making the decision.

The decision may not be final, according to SERA President Roger Gregory W4WRG:

--

Gregory: I've received, and we have received a lot of comments pro
and con about this policy. And all I can say right now is that we're
taking a second look at it and it's not really written in stone at
this time as to what kind of decision we're going to make one way or
the other."

--

SERA's next Board meeting takes place in January, but the group can
reach an earlier decision at any time through an e-mail ballot.

Reporting for Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

So will the hams in SERA coordinated states have to use tone access on every repeater? Right now, the answer seems up in the air. (KN4AQ, ARNewsline(tm))

**

HAM RADIO IN SPACE: ISS GOES CROSS-BAND REPEAT

Speaking of repeaters. there's a new cross-band F-M system in space
and its home is on the International Space Station. This, as the ARISS program announces that the amateur radio equipment aboard the orbiting outpost is now on the air in repeater mode.

The downlink frequency remains 145.80 MHz. The new uplink frequency is 437.80 MHz and all frequencies are subject to Doppler shifting.

ARISS leaders say that they realize that many hams will miss the packet station that the cross-band F-M voice repeater replaces. Burt the groups leaders say that the cross-band repeater will allow further experimentation of the ISS amateur radio system.

For further information on working satellites and adjusting for Doppler shift, please review Emily Clark's (W0EEC) excellent presentation on AMSAT's website, http://www.amsat.org/amsat-new/information/faqs/Intro_sats.pdf (ARISS)

**

RADIO LAW: FCC ADOPTS RULES TO ENHANCE NETWORK OUTAGE REPORTING

Back on mother Earth in Washington, the Federal Communications Commission has adopted new rules requiring wireless, wireline, cable, and satellite telecommunications providers to report information about significant disruptions or outages to their systems to the Commission. The FCC says that these reports must be filed electronically. The Commission also ruled that all sensitive information collected as a result of these new rules will be protected from public disclosure. The full story is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250543A1.doc (FCC)

**

RADIO LAW: FCC REDEFINES DTV CONVERSION SCHEDULE

The FCC has also taken steps toward deciding exactly which channels broadcasters will end up with when they switch to digital television. By unanimous vote, the Commissioners have set up a timetable that will decide by June 2006 which channels people will tune in on to see their favorite programs. .

FCC chairman Michael Powell says that the vote signals that substantial progress has been made in switching television from its current analog transmission system to digital. He adds that the national dialogue has shifted from wondering if the DTV transition would ever end to exploring when it should end. (FCC)

**

RADIO LAW: CANADIAN GROUPS CHARGE THAT HD RADIO WILL HARM RECEPTION

Meantime, Canada charges that High Definition or Hi Fi digital Radio will harm reception of Canadian stations inside its own border. At least that's the headline from the August 30, 2004 edition of Inside
Radio.

According to the story that follows, both the Canadian Boadcasting Corporation and the Canadian Association of Broadcasters have asked the country's technical regulatory agency to protest iBiquity's In-Band On-Channel digital radio system. They allege harmful effects on current A-M reception, especially during nighttime hours. The whole story is on-line at http://tinyurl.com/6uubn and www.insideradio.com (CGC)

**

HAM AWARDS: THE RCC IS BACK AND ITS FREE

Some good news. The Rag Chewers Club or R-C-C award is back, but it will not be sponsored by the American Radio Relay League. Bill Pasternak, WA6ITF, has the details:

--

Its the Society for the Preservation of Amateur Radio -- better known by the acronym SPAR that will be sponsoring the new R-C-C. The group has announced that as of September 1st it will adnminister this fun award and will do so following the old ARRL rules.

According to SPAR, all a ham has to do to get an R-C-C is to present evidence of having had an actual one on one Q-S-O that lasted at least 30 minutes. The QSO can be made on any legal amateur frequency.

In early 2004 the ARRL announced it was discontinuing the Rag Chewers' Club Award due to a lack of interest. Conversations SPAR held with hams seemed to indicate that the lack of interest was due mainly to the cost of the award. So SPAR says that the award will be available free of charge to all licensed radio amateurs.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los
Angeles. Jim.

--

All certificates will be distributed by e-mail as Adobe P-D-F files that you can print and frame. The awards are numbered and endorseable by mode. Complete rules and an on-line application are on the SPAR website at www.spar-hams.org. (SPAR, QRZ.com)

**

NAMES IN THE NEWS: HAPPY 104 BIRTHDAY TO KJ6KQ

And less we forget, a belated birthday greeting goes out to Bill Diaper, KJ6KQ who turned 104 on August 12th. That's right, we

said
104, and probably making him the oldest living radio amateur in the United States, if not the world.

According to a posting on the Q-R-Zed dot com by Tom Ferguson, N6SSQ, website, Bill is a member of the Pacific Amateur Radio Guild and these days resides in the Masonic Homes in Union City, California. Tom says that there is a radio shack in the basement that Bill used up till a year ago but is very difficult for him to access now. That's because the station is in the basement next to the laundry room. Bill says it is dark and damp down there and must get assistance to get there and have someone tune and adjust the frequency on the rig for him.

N6SSQ adds that the Pacific Amateur Radio sent Bill a flurry of letters and cards on his birthday and that he was very pleased to get them. (QRZ.com)

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM FAIR JAPAN ATTRACTS 30000 ATTENDEES

Turning to the ham radio social scene, Japan's largest hamfest, the JAIA Ham Fair, was held the weekend of August 21st and 22nd. The venue was Tokyo's Big Sight International Convention Center. Among
the highlights of gear being shown were Yaesu and Icom both showcasing their high end $10,000 H-F transceivers. Kenwood did not match in the super high end radio category but had a well attend ongoing demonstration of their ARCP-480 Radio Control Program.

But the manufacturers and dealers were only a small part of the show. Over 170 radio clubs also had booth space at the show. These ranged from large organizations like JAMSAT, the Japan Shortwave Club, and SEANET down to local organizations who use their booth for flea market sales.

Also present were a wide variety of organizations promoting every aspect of Amateur Radio. This included mountain-topping operators, microwave activity enthusiasts and antenna construction experimenters. Operations represented included facsimile, SSTV, ATV,

RTTY, 10M FM, 6 Meters, CW devotees, QRP, homebrewing, classic rigs, military surplus and even a contingent from the A-M community.

Ham Fair is Japan's largest annual gathering of radio amateurs from
the Pacific Rim. An estimated 25,000 to 30,000 attended this years event. (WIA News)

**

THE SOCIAL SCENE: WSWSS 2004 FALL CONFERENCE IN FRESNO CA

Back on this side of the Pacific, the Western States Weak Signal Society tenth annual VHF and UHF Conference takes place Saturday, October 9th. The venue is the M2 Antenna System Facility, at 4402 N. Selland Ave in Fresno, California. Registration starts at 8 AM with the conference program slated to begin at 9 AM. For more information write to David Peters, KI6FF, 14291 Middletown Lane, Westminster, California, 92683. You can also e-mail David to ki6ff@juno.com (VHF Reflector)

**

HAM RADIO BUSINESS: OAL NO LONGER REPPING DEM

In news from the ham radio business world, David Clingerman, W-6-O-A-L says over the V-H-F Reflector that his company known as the Olde Antenna Lab of Denver, Colorado is no longer representing Down East Microwave, Inc. Dave says to please refer your help questions, pricing information and orders directly to Down East Microwave in New Jersey. (VHF Reflector)

**

HAM RADIO NEAR SPACE: UK BALLOON LAUNCH LICENSED FOR SEPT. 12

G3ZHI reports that a license has been granted for a United Kingdom high altitude ham radio balloon flight. The project is now authorized for operation on 2.500 GHz on Sunday, September 12th. The license has special permission to operate at up to 50,000 feet instead of the usual flight ceiling of 2,000 or 5,000 feet.

The launch is scheduled to take place at about 1.30. Plans are still afoot to relay pictures via the new 13 centimeter GB3FT repeater if the system is completed and on the air in time for the flight. More information on this experiment as it becomes available. (G3ZHI)

**

WORLDBEAT - UK:: NEW RSGB ON -LINE

There's a new ham radio promotional video out and it has a definitely
British flair. And in an effort to help to promote amateur radio, the recently-created Essex Amateur Radio Club has started streaming

the new RSGB video "What is Amateur Radio" on the Internet.

The Essex group is providing it at speeds of 26 kb and 57 kb so it can be viewed by those using dial-up as well as broadband. If you want to take a peak it is available in cyberspace at www.essexamateurradio.org.uk (RSGB)

**

WORLDBEAT - NORWAY: HACKER DEFEATS AIRPORT EXPRESS

Meantime on the European mainland the same Norwegian hacker known for developing D-V-D encryption-cracking software has apparently struck again. This time his target is the security system that protects Apple Computer's wireless music streaming technology.

Jon Johansen has released a hacking system on his website that provides a key to unlock the encryption Apple uses for its AirPort Express. The unit lets users broadcast digital music from Apple's on-line iTunes Music Store on a stereo that's not plugged into an Apple computer. This permits other software applications from competitors to work with the proprioritary AirPort Express codec. Apple is reportedly considering taking legal action in the case. (Published reports)

**

RADIOSPORTS: HOST STILL NEEDED FOR 2005 ARDF GAMES

Turning to the world of radiosports, a reminder from Joe Mell, KZ0OV, that a group is still meeded to host the fifth U-S-A Amateur Radio Direction Finding Championship games. This, in the summer of 2005.

Some prerequisites for being the host include having suitable sites for 2 meter and 80 meter hunts along with the ability to provide foxhunting courses. There are also the organizational aspects to consider. These include providing registration services, housing for the contestants, meeting rooms, transportation to and from the hunt areas and lots more.

If your club is interested in hosting this event, please contact Joe by e-mail before September 15th to homingin@aol.com. Full details about the games and how to become the 2005 host is on line at www.homingin.com (ARNewsline(tm))

**

DX

In D-X, word that K3GV portable VY2 is active on 15 and 20 meters as from Prince Edward through the 12th of September. The island counts as NA-029 for the RSGB Islands on the Air award program. QSL's go to
K3GV at his callbook address. (RSGB)

And while this is short notice, the All Asian SSB contest will take place beginning at 00.01 U-T-C on Saturday, September 4th and will run for 48 hours. Operation is on 160 through 10 meters with stations in Asia trying to work the rest of the world. The official exchange for this one is a signal report and the operator's age. (WIA News)

**

THAT FINAL ITEM: NRC MEETS IN BATAVIA NY

And finally this week, a big meeting of broadcast band SWL's is taking place as we go to air. Here's Fred Vobbe, W8HDU, with the details:

--

Audio report only. Download the newscast at www.arnerwsline.org

--

Fred has promised to be here net week with a full wrap-up on this years gathering. (W8HDU)

> still contains encoded information?

You won't hear a "tone". The FM demod audio output will follow the rate of change of the carrier frequency. For example, if the carrier frequency changes at a constant rate, you'll hear a tone during the frequency transition period. There will be no audio output during the period of time that the carrier is not changing frequency. How long the carrier sits at the frequency which contains the duration-encoded information will not be detectable at the audio output because the carrier isn't changing frequency at that time. If the frequency transitions are abrupt, you'll hear something like a click between the mark and space frequencies.

> modulating signal.

I do not know the answer to why. All I know is that you in fact do
get a tone if you run this signal through a FM Rx.

Maybe I was not specific enough in terms of the RF signal. Let me try
again.

The low frequency pulse is 2 milliseconds long every time at the start
of a sequence. This 2 millisecond pulse is the start signal.The
higher frequency pulse (higher by 5 KHz) ranges from 1 to 2
milliseconds long. If it is under 2 milliseconds enough of the low
frequency pulse is sent to get to 2 milliseconds. Each consecutive
high frequency pulse controls one and only one channel of information
(and in general each of the nine channels will be different in
information and thus pulse length) up to the ninth high frequency
pulse. Then the information is either repeated or modified in one or
more channels depending on the inputs to the transmitter.

So, I repeat my question. What is the nature of the tone from the FM
Rx and does it still contain the timing information sent on the high
frequency pulse?

Thanks

Perhaps it is simply that you cannot face up to the truth of what is Ham
Radio, a technical pursuit, and what is CB Radio, a consumerist hobby
for those who buy ready-made equipment and just press buttons?

There are many, many CBers-Masquerading-As-Radio_Hams today
whose numbers far outweigh those of _REAL_ Radio Hams. It is
a pity that you have been seduced by the former, for your description
of your Dad made him seem like the latter.

It is sad that another possible recruit to Ham Radio, you, has fallen by
the wayside of mediocrity so soon, especially considering your
claims about your technical background.

Sic transit gloria Mundi.

Perhaps it is the preponderance of CBers-Masquerading-As-Radio-Hams
that has caused the FCC to perceive that Radio Hams as a group
are just as dumbassed as other consumerist users - CBers, Broadcasters,
Telecoms Providers, and that Radio Hams should pay a going rate
for the spectrum that they use?

It's never too late to change, and to restore _REAL_ Ham Radio.

Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx

The Newsline says that ARRL will give up its bandwidth restriction idea. This is in the current news.

RESTRUCTURING: REACTING TO THE ARRL BANDWIDTH PROPOSAL

An ARRL proposal to restructure Amateur Radio along bandwidth lines has caused a lot of discussion in the nations ham community. And it may cause the League to rethink its position. Amateur Radio Newsline's Mark Abramowicz, NT3V, is in Philadelphia, and has the rest of the story:

--

Shortly after the ARRL began circulating the proposal and posted it on its website, the e-mails, phone calls, HF, VHF, and digital-mode traffic took off.

And now, Amateur Radio Newsline has learned the bandwidth proposal may be tabled for more study when the ARRL's executive committee meets next month.

That confirmation comes from W6OBB in Nevada. If the call sign isn't familiar, the name behind it might be. He's Art Bell, host of the weekend edition of "Coast to Coast AM" heard on more than 500 commercial radio stations across the nation.

Bell, who joined the fight against Broadband Over Powerlines several months ago, and featured the subject on his radio program, expressed concern about what he called a Draconian proposal that would over-regulate the ham bands. Bell tells me he relayed that concern in a phone call to ARRL President Jim Haynie W5JBP.

Bell characterizes the discussion as cordial and at the end, he says Haynie related he was re-evaluating the proposal based on many comments he had received.

"He indicated to me and told me I could pass on to you that they're looking into pulling this whole thing back and taking a harder look at it," Bell says.

While Bell says he believes the ARRL had good intentions with the proposal, it may have gone too far.

"What began as an examination by the League of how we could possibly encourage the digital mode, it went a little too far and began to over-regulate," Bell says. "I'd kind of like to see it go the other way and I'd like to see our bands freed up."

Haynie says he's gotten a lot of feedback on the proposal. He says it came from the League's desire to promote - not restrict - innovation and experimentation. He says it was also a response the Federal Communications Commission's desire to see more innovation from the ham community.

"I think we rose to the challenge," Haynie says. "We have demonstrated Software Defined Radio that just knocked their socks off, in my view.

"We have come up with some other stuff - Joe Taylor and some of his things for moon bounce. And I think the Amateur Radio community needed a wake-up call is what they needed and I think that's what we've gotten and were given."

Haynie says it's clear the digital modes like RTTY and PSK 31 need attention.

"Where do we want to go to the future?" Haynie asks. "And, as I mentioned a couple of years ago, I took my model 28ASR and took it to the scrap man. But that's the standard that's used today is 850Hz shift at 45 baud.

"Well, we don't do too much of that. I'm not saying there's not RTTY enthusiasts out there, there are and I appreciate that and I know that and I want to protect their rights to do those things."

Art Bell says he and others don't object to digital innovation. But he doesn't think the proposal hits the mark.

"There are many with differing interests who are not too pleased with the proposal and, on the face of it, it simply does not make sense," Bell says. "I agree that we should encourage the digital modes and development, but we shouldn't try to push something into place that is not techincally ready to happen yet."

Restricting bandwidth, Bell says, won't promote innovation.

"Why do we have to cut and slice and dice and regulate," Bell says. Why not just let anybody virtually go anywhere and let all of us just live together with some gentlemen's agreements which we have now and which work very, very well on most bands?

"So with that in mind, look at the Canadians. The Canadians have a 6khz limit and they can go anywhere on the band they want from the bottom to the top. And I don't see why that would not apply and work well in America."

Haynie says he wants to hear more from hams and he's encouraging all of us to get into the FCC's Part 97 rules and share input on the proposal at the ARRL's website, that's ARRL-dot-org.

"Look at the rule book and see what's there now, "Haynie says. "And, is there something that could be changed that would allow a new technology to be developed, then that's what we want to know."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the ARRL proposal and reaction to it in upcoming Amateur Radio Newsline reports. (ARNewsline(tm))

1154. Re: First Repeater?

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-05 08:37:30 UTC
From: radiomaker@aol.com

The QST article appeared in the March 2004 issue and was titled Once Upon A California Mountaintop. It was written by the Newsline guy WA6ITF who interviewed Art W6MEP on tape in 1979.

The article directly quotes that interview and not only tells about his K6MYK repeater but also an earlier experimental repeater K6GW near San Francisco back in the 1950s. There is als an amusing sidebar by Burt K6OQK who put up the nations 2nd repeater under the supervision of W6MEP and pictures of the machine.

1155. Re: Just Getting Started.. Need some advice!!!!

The essence of Ham radio is that it is a technical hobby that also
carries the capability to chat to other people. It seems that by
being incapable of dealing with trivial faults that you have fallen at the
first hurdle. Indeed, as you said that your Dad's gear has been in the
attic for years you are not in a position to make the criticism that
you do below.

You are creating problems where possibly none exist.

Mediocrity such as you display below is one of the marks
of the CBer. The _REAL_ Radio Ham tackles such issues
with enthusiasm; the enthusiasm for technical challenges
that is the mark of the _REAL Radio Ham.

Perhaps you would feel more at home in one of the CB groups, OM?

DX Bulletin No. 675
BID: $OPDX.675
September 6, 2004
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W5KAU, K8YSE, W9VA, DL/VE3ZIK, DL1EK & The DX News Letter, DL6KAC, EA7FTR, F5CWU & La Gazette du DX, F5NQL & UFT, G4OBK, G0WRE, HA3JB, HA0HW, I1JQJ/IK1ADH & 425 DX News, IN3VZE, JI6KVR & JA-IOTA Islands News, M5AAV, MM0DFV, ON5NT, PA2R, PA7FM, SM5SIC, VA3RJ & ICPO, VK6APK and ZS6WPX for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th/August, through Sunday, 5th/September there were 209 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9U, 9V, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

135TH HPM BIRTHDAY ANNIVERSARY (REMINDER!). You have just under a week to go for this celebration. Some stations believe this is a contest and are confused what the /135 is. No, it is not a contest. Many stations are on the air to help celebrate the 135th birthday anniversary of the League's co-founder and first president Hiram Percy Maxim, W1AW, who was born

September 2, 1869. Look for ARRL Life members and League's elected and appointed volunteers and officials to append /135 to their callsigns. The HPM/135 celebration concludes at 2400z on Sunday, September 12th. To find out if you are eligible to sign /135, please see September's QST (page 40) or visit the following Web page for details at:
http://www.arrl.org/qst/2004/09/field-positions-135.html
A certificate is available by working at least 25 HPM/135 stations and submitting a log extract including date, time, band, callsign worked and exchange for each /135 contact. This certificate is endorsable in increments of 25 contacts up to a maximum of 100. Details are also available on the above mentioned Web site and QST.

3Y, PETER I ISLAND (Update). A multi-national team of 21 operators is now complete for the 2005 January/February 3Y0X DXpedition. The operators are: F2JD, HB9AHL, HB9BHW, K0IR, K4UEE, K3NA, K4SV, K5AB, K9SG, LA6VM, N2WB, N4GRN, N6OX, NK7C, NP4IW, OH2BH, OH2PM, PA5M, UA3AB, VK4GL and W0RUN. Alternates are in place for any unexpected cancellations. They plan to operate for two full weeks with nine stations on the air 24 hours a day. Most members of the team will meet in Atlanta, GA, between September 23-26th. This is a serious meeting to discuss details of the operation which include practice shelter set-up, equipment checks and seminars (such as safety, search and rescue, emergencies and medical care, logging, propagation, equipment operation, dietary and food, environmental concerns, and operating Techniques). The voyage to Peter I Island will start from Punta Arenas on January 14th. The voyage to Peter I Island will take 6 to 7 days. The exact landing date will depend on weather. The team is still looking for contributions. If you would like to donate, please send them to K4UEE, F2JD, JA1ELY and ZL2AL. More details are available on the 3Y0X Web page at: http://www.peterone.com
They have recently setup a souvenir store to help collect funds for their operation. So vist and purchase a souvenir from the DXpedition at the "Peter I Store" at: http://www.cafepress.com/peter1store

7Q, MALAWI (Update). Ely, IN3VZE, reported last week he will be active as 7Q7CE from September 9-23rd. He informs OPDX this week that his friend Renato, IN3BHR, will be with him at the Resort Club Makokola, the southwest shore of Lake Malawi. The callsign Renato received is 7Q7RB. Activity will be on all bands 160-10 meters SSB. QSL 7Q7RB via his home callsign IN3BHR, direct or via the Italian Bureau. QSL 7Q7CE via his home callsign IN3VZE, direct or via the Italian Bureau.

9A, CROATIA. Zrinko (Zik), DL/VE3ZIK (also 4N1DX), will once again be active from Croatia between September 12-19th. This will be a holiday style operation from the QTH Bilice, near Sibenik (JN73WS). He will try to concentrate on WARC bands and 10m FM. If somebody wants to make a sked, send an E-mail to: zik@contesting.info
Also, there is some posibility to be active from some Croatian Islands. For those who already sent QSL card direct for his July activities, please wait until QSL cards come from printer. QSL ONLY via DL3PS, direct or by the DL Bureau (too dificult to receive bureau cards from VE3-land since he is now permanent in Germany).

C9, MOZAMBIQUE. Andre, ZS6WPX, informs OPDX that he will be in Mozambique from October 28th to November 1st on business, so his activity will be limited. He will be active as C91Z mostly on SSB, but also some CW and RTTY. Also, his XYL, Magda, will be active as C91Y. She will be active mostly on phone when time permits. Andrea will also been a Single-Op/ High-Power entry in the CQ WW DX SSB Contest (October 30-31st). QSL via ZS6WPX DIRECT ONLY. ADDED NOTE: Andrea states that for the CQ WW CW Contest, look for Chuck/W4GMY and Joe/AA4NN to be in C9.

DXCC NEWS (Annual Deadline Comes To An End!). Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX of the following: "DXCC Annual List Deadline Change: Beginning in September 2004, there will be no deadline for the DXCC Annual List. We have been working toward this end for several years. In previous years, September 30 was the cutoff point for compiling the entity totals for the DXCC Annual List published in the DXCC Yearbook. Over the years, DXCC participants tended to collect cards and submit them once a year, in September, to ensure the highest possible total for the listing. A major downside of the deadline is that we receive over 25% of our annual credit submissions during the month of the deadline. This in turn creates a huge increase in workload and a lengthy processing time. Going forward, the lists of DXCC standings previously published in the DXCC Yearbook will be replaced by complete lists on the ARRL Web site. The new Web-based lists should be ready and on-line early in the first quarter of 2005, when the listings in the DXCC Yearbook would normally have been published. After initial publication, the new lists published on the Web will be updated regularly, perhaps weekly or even daily. They will also include the standings of all DXCC members, not just those who made a submission in the previous year (as has been the practice with the printed Yearbook due to space limitations).
A smaller version of the Yearbook will be published containing highlights of the standings, along with other features, as in the past."

EA6, BALEARIC ISLANDS. Christian, DL6KAC, will be going to EA6 again starting September 6th through probably September 28th. Activity will be from Mallorca Island (IOTA: EU-004, DIE: E-021) and will be on 40-10 meters, mainly on SSB, and maybe some digimode. Antennas will be dipoles with 350 watts of power. This will be a holiday style operation! QSL via the DARC Bureau or direct (QRZ.com).

GM, SCOTLAND. Andre, GM3VLB, will be active from Skye (EU-008) and possibly several other islands in the Inner Hebrides during the next week and a half. Depending on the weather, look for him to activate the following 8 islands: S. Rona (DI27), Scalpay (CN18), Longay (CN19), Staffin (DI28), Flodigarry (DI29), Wiay (CN21, Soay (CN16) and Crowlin (CN20). QSL direct only via his home callsign. ADDED NOTE: Andre plans to activate the Isle of May (IOTA EU-123, SCOTIA CS01) as soon as he can after his return from EU-008.

IOTA NEWS.....
AS-004. Operator JO1DPQ will activate Miyake Island during September 11-15th. Natives of this island left and fled to the main island due to an eruption of a volcano 4 years ago. QSL via his home call, direct or via the JARL bureau.

AS-108. A short story and photos on the recent Ramkin Island operation can be found on the following Web page at:
http://www3.ocn.ne.jp/~iota/newpage85.htm

AS-117. Kenji, JA4GXS, will be active as JA4GXS/4 from the Otsu Island (JIIA-AS-117-110), September 19th (0800z) to September 20th (2300z). Activity will be 80/40/30/20/15 meters CW/SSB. QSL via the bureau or direct to: Kenji Sasaki, 2-15 Ishikannon-cho, Yamaguchi, 753-0038 Japan.

AS-118. Members from the Kuwait Amateur Radio Society plan to be active as 9K2F from Failaka Island for a 3 to 4 day operation at the end of September.

EU-010
EU-011. Operators G3ZAY, M0BLF, M0TDG, M0NKI and M3OXY to be active September 6-10th, from the Outer Hebrides (EU-110). There will also be a number of brief Summits on the Air (SOTA) activations in Harris and North/South Uist. QSL via their home callsigns. Weather permitting, they also plan to operate during the daylight hours only as GM6UW/p from the Monach Islands (EU-111) on either the 6th or 7th. QSL GM6UW/p via M0BLF (Bureau cards can be requested by E-mail to: M0BLF@domsmith.co.uk).

EU-146. Members of the Scottish HAM Portal, Will/PE1OPM and his friend Jeroen (SWL NL12339), are going to activate Dutch Schouwen Duiveland Island. They will be on the air Saturday, October 16th, to Sunday, October 17th. The operation's frequencies are the known IOTA frequencies on the HF bands: 80m (3750 kHz), 40m (7055 kHz), 20m (14260 kHz), 17m (18128 kHz) and 15m (21260 kHz) when conditions permit. They will take a Yaesu transceiver FT-897 and a couple of portable antennas. For more information, please check out their Web site at:
http://home.zonnet.nl/eu-146/
QTH Location: Co-ordinates 51'42'59N - 03'56'32E; QRA Loc. JO11XQ. Please send your QSL cards via PA QSL Bureau or to PE1OPM: Will Bakker, Molenstraat 33, 4641BA, Ossendrecht, The Netherlands.

OC-171. Paul, G0WRE, will be active from Magnetic Island in the Queensland State (North Coast) South Group and possibly another island which they will know upon arrival for the IOTA Program in the Queensland State (South Coast) North Group. The dates are not sure as of yet, but it will be between October 14-20th. Paul states that his callsign will be allocated to him upon his arrival in Australia. Activity will be mostly 20 and 15 meters SSB (14260 / 21260 kHz +/-). Anyone wishing a contact for a new one for OC-171 can E-mail Paul prior to activating Magnetic Island at:
g0wre@blueyonder.co.uk
He states that all contacts will be automatically sent via the RSGB Bureau (He does not require your card!). But he will accept direct requests via his QRZ.COM address.

SA-056. Look for Tono, EA9CP, to activate the Isla Cojimies (Ecuador) during his South American trip (See OPDX.674). Activity will take place during September 17-21st. His callsign will be HC4CB and HC4/EA9CP. QSL boths callsigns via EA7FTR.

J42004/SV9, CRETE. Phil, G4OBK, will be active a few hours each day from Akrotiri, Western Crete, starting September 8th. He will have wire antennas for 30-10 meters. Phil will use the special Olympic callsign J42004Q until September 15th and then revert to SV9/G4OBK. He expects to be active on RTTY and CW and maybe a litle PSK31 and SSB. QSL is via his home callsign, direct or by the bureau. His Web page is: http://www.qrz.com/g4obk

JT100, MONGOLIA. Yuri, UA9OBA, has been active as JT100M. This is a special callsign being used until September 13th during the Mongolian leg of the Altay-Himalaya Transasian off-road expedition. Activity has been mainly on 20 meters SSB around 14180 kHz (at various times). There have been some QSNs reported on 80/40 meters. QSL via UA9OBA. Also, visi the Web page at: http://off-road.ru

KH7K, KURE ATOLL. It has been announced that the DXpedition to Kure Atoll by the Pacific DX Group, which was planned for mid to late October, has been postponed due to "transportation problems." The PDXG feels that the next possible opportunity for an operation to Kure will be late winter or early spring 2005. The PDXG asks that all groups or individuals who have contributed towards this operation or are thinking of contributing, to please continue to support their effort as they work to raise the necessary funding. The regional fund raisers can be contacted at:
funds-na-sa-kure@inix.com - North/South America
funds-eu-kure@inix.com - Europe
funds-ja-kure@inix.com - Japan
funds-kure@inix.com - All other areas
General inquiries should be sent to: pdxg-kure@inix.com

OH0, ALAND ISLANDS. Oleg/ES1RA and Jaak/ES1FB will be active as OH0/ES1RA/P and OH0/ES1FB/P, respectively, from September 7-10th. QSL via their home callsigns.

QSL INFO AND NEWS.....
QSL LA3SRK/P via SM5SIC. Activity was from Hitra Island (EU-036) during this past weekend's Reg1 Field Day. Operators were from the Skandinavisk Radio Club. More info is available on QRZ.com under LA3SRK.

NOT THE MANAGER. Graham, M5AAV, reports that he is NOT the QSL Manager for 5W0SB. He does not have the logs or any cards, so consequently, confirmations for this activation are only available DIRECT from I2YSB.

T33C BUREAU QSLS. Rob/PA2R and Flo/F5CWU have announced that this week the first batch of OQRS QSLs will be sent via the bureau. So far around 2000 labels of max. 3 QSOs per label have been processed via OQRS, which is a great number. Remember, registering QSOs will save the QSL Manager, F5CWU, a lot of time to manually register all bureau cards and your spending money on printing QSL cards. You also save time because

the time it takes to get your card to the QSL Manager is "0" days instead of a year or more. QSOs made with T33C can be registered via OQRS at: http://www.dx-pedition.de/banaba2004/
(Choose the Online Logs menu.)
The latest logs have been uploaded to the log search.

R1MV, MALYJ VYSOTSKIJ. "The Daily DX" reports that the R1MVI operation has been rescheduled to take place September 10-12th. QSL via RA3AMG: Denis Skobelkin, A.k. 698, LV-1010 Riga, Latvia. It is recommended to use Denis's Latvian address instead of his Russian address.

S9, SAO TOME. Jorge, CT1EFV, will be a part of "Latitude Zero Equatorial Challenge 2004". This challenge is humanitarian (they will be carrying medicines to deliver to the mission of the AMI), cultural (they will recoup a Portuguese school, deliver 6000 Portuguese books to the library of Sao Tome) and also open new roads to impassable parts of the Island. Half of the team will make use of local communications (VHF, telephones and satellite) while Jorge will be operating the HF bands as S92LZ from the Island of Sao Tome (IOTA AF-023) between September 19-26th, providing conditions and logistics allow. He will use a Kenwood TS50S mounted onboard a Land Rover and will make use of a G5RV antennas. QSL via CT1EFV (QRZ.com).

SPECIAL EVENT. Alek, VK6APK, member of the Northern Corridor Radio Group, states: "The state of Western Australia is celebrating its 175th anniversary of existence this year. As part of the celebrations, the Northern Corridor Radio Group Inc (VK6ANC) is activating the special callsign VI6175WA. The callsign will be aired for the month of October. Its first operation will be in the Oceania DX SSB Contest on the first weekend in October. After that it will be used on the HF bands by individual members of the club. We hope to have activity on all the hf bands and all modes during the course of the month. More information will be posted shortly on <http://www.ncrg.org.au> and also on QRZ.com. QSL cards have already been printed by UX5UO Print <http://www.ux5uoqsl.com> and will be available for all contacts via the manager, VK6NE, direct with return postage or via the bureau is fine."

SPECIAL EVENT. The Orkney Wireless Museum will be on the air as GB2OWM during the Orkney Science Festival now through September 11th. Probable operating times will be weekdays and Sundays between 2:30 and 4:30pm and on Saturdays from 10:00am to 12:30pm. For more details, please visit the Scottish HAM Portal Web page at: http://www.scotham.net

SU8, EGYPT. Gab, HA3JB, informs OPDX that he will operate as SU8BHI from Cairo, September 21st through December 20th. His activity will include an entry in the CQ WW RTTY DX and CQ WW DX CW Contests. Activity outside of the contest will include CW, PSK, RTTY, SSTV and some SSB. QSL via HA3JB, only direct to: Gabor Kutasi, H-8601 Siofok, P.O.Box 243, HUNGARY - EUROPE. There will be an online log at: http://www.qsl.net/ha3jb

TT8, CHAD. Francois, F6GYV, reports that he has received his new licence and the callsign issued to him by the Tchadian Authorities is TT8FT. His station in Ndjamena consists of a FT-847 Transceiver and dipole. Francois's

job is with the mobile telephone service, and he states this leaves him with very little time to operate. Look for him to be on the air only during his evening hours (Ndjamena time) and on Sundays. He states, "Some of you have asked for 160 meters activity. I'll try to build an HM antenna with my few own parts (nothing to find or buy for amateur radio gear here). More information later." QSL via the French Bureau (via F6GYV) or direct to: Francois Theveneau, Celtel Tchad, BP 5665, Ndjamena, Chad. ADDED NOTE FROM FRANCOIS: "I apologize for my past stay in Mali but, because of my job, I couldn't make a lot of traffic with my TZ8FT callsign."

TZ6, MALI. QSL Manager Dennis, PA7FM, informs OPDX that after his stay in Niger, Michael, PA5M (5U7DX), is now in Mali until September 16th (or possibly the 22nd per Ghis/ON5NT). When this was written, OPDX was informed by ON5NT that Michael was in Bamako. He will be traveling around the country, and in his spare time he will be active as TZ6M. He was spotted this past week on/or around 14190 kHz after 1900z. As usual, he has a Web site with online logs at: http://www.pa7fm.nl
ADDED NOTE: Michael, PA5M, will be one of the operators going to Peter I Island in early 2005.

WFP NEWS. Ghis, ON5NT, in Dubai, UAE, provides the following updates of amateur radio operators that are with the "UN World Food Program" (WFP) in the following countries:
TT, CHAD. Robert, S53R (ex-YI9R, A52KR), is heading for Chad for about a 10 day stay. He was expected to arrive there around September 2nd. He has applied for a TT8RK or TT8KR callsign. It is expected to hear him on the bands as early as Monday, September 6th. Knowing Robert, this might be a "mostly CW" operation. As he is there for work, he will only operate during his spare time. QSL via K2PF.

ST, SUDAN. Dane, ST2T (S57CQ, ex-YI9T, A52DX), is still in the Sudan, but not very active due to a heavy workload. However, he was heard during this past weekend's All Asian Contest. QSL via S57DX.

VARIOUS COUNTRIES. Michael, PA5M (5U7DX just recently), continues his African trip. You might expect some activity between now and the end of October from TZ, 9G and TY. Again, his activity is work - dependent. QSL via PA7FM.

W9DXCC CONVENTION (Reminder/Update!). The Northern Illinois DX Association is pleased to announce the 52nd annual W9DXCC Convention on September 18th. The convention will be at the Holiday Inn in Elk Grove Village, IL, about five miles west of Chicago O'Hare International Airport. Their banquet speaker is John Devoldere, ON4UN. John will also be appearing during the day along with John Battin/K9DX and Jerry Rosalius/WB9Z, in the Low Band Forum. Eric Scace/K3NA will be on hand with the story of the 3B9C Rodrigues Island 150,000+ QSO DXpedition. Jay Terleski/WX0B will tell us about his Fort Bragg NC military antenna farm featuring phased log periodics. Scott Robbins/W4PA will have the Ten-Tec Orion Story and Lee Finkel/KY7M has his 5U5Z African Adventure to relate. Propagation expert Carl Luetzelschwab/K9LA

will be back for his fifth year as he updates our prospects in the declining years of Cycle 23. The ARRL Forum features Central Division Director Dick Isely/W9GIG, Vice Director Howie Huntington/K9KM, DX Advisory Committee Chairman Jim O'Connell/W9WU, Membership Service Chairman and Logbook of the World Guru Wayne Mills/N7NG, and BPL expert Greg Lapin/N9GL. Jim Cain/K1TN, author of the YASME book, will present a program about Danny Weil/VP2VB, arguably the first DXpeditioner and Lloyd and Iris Colvin, W6KG and W6QL. For the IOTA fans, Mike McGirr/K9AJ, Jim Model/K9PPY, and Gordon Bazsali/WB9EEE will have the latest Island News. Card checking will be available for DXCC, other ARRL awards, and the CQ DX awards program. Full details about the convention are available at the W9DXCC Web site: http://www.w9dxcc.com
On-line registration is available as well as a link to the hotel for on-line lodging reservations. Further information is available from the 2004 Chairman Bill Smith, W9VA, at: w9va@aol.com

> he is now permanent in Germany).
>
> C9, MOZAMBIQUE. Andre, ZS6WPX, informs OPDX that he will be in Mozambique
> from October 28th to November 1st on business, so his activity will be
> limited. He will be active as C91Z mostly on SSB, but also some CW and
> RTTY. Also, his XYL, Magda, will be active as C91Y. She will be active
> mostly on phone when time permits. Andrea will also been a Single-Op/
> High-Power entry in the CQ WW DX SSB Contest (October 30-31st). QSL via
> ZS6WPX DIRECT ONLY. ADDED NOTE: Andrea states that for the CQ WW CW
> Contest, look for Chuck/W4GMY and Joe/AA4NN to be in C9.
>
> DXCC NEWS (Annual Deadline Comes To An End!). Bill Moore, NC1L, ARRL
> DXCC Manager, informs OPDX of the following: "DXCC Annual List Deadline
> Change: Beginning in September 2004, there will be no deadline for the
> DXCC Annual List. We have been working toward this end for several years.
> In previous years, September 30 was the cutoff point for compiling the
> entity totals for the DXCC Annual List published in the DXCC Yearbook.
> Over the years, DXCC participants tended to collect cards and submit them
> once a year, in September, to ensure the highest possible total for the
> listing. A major downside of the deadline is that we receive over 25% of
> our annual credit submissions during the month of the deadline. This in
> turn creates a huge increase in workload and a lengthy processing time.
> Going forward, the lists of DXCC standings previously published in the
> DXCC Yearbook will be replaced by complete lists on the ARRL Web site.
> The new Web-based lists should be ready and on-line early in the first
> quarter of 2005, when the listings in the DXCC Yearbook would normally
> have been published. After initial publication, the new lists published
> on the Web will be updated regularly, perhaps weekly or even daily. They
> will also include the standings of all DXCC members, not just those who
> made a submission in the previous year (as has been the practice with
> the printed Yearbook due to space limitations).
> A smaller version of the Yearbook will be published containing
> highlights of the standings, along with other features, as in the past."
>
> EA6, BALEARIC ISLANDS. Christian, DL6KAC, will be going to EA6 again
> starting September 6th through probably September 28th. Activity will

> be from Mallorca Island (IOTA: EU-004, DIE: E-021) and will be on 40-10
> meters, mainly on SSB, and maybe some digimode. Antennas will be dipoles
> with 350 watts of power. This will be a holiday style operation! QSL

i thought it was a pretty good warning when it came in an unsolicited message on a news group. NEVER visit a site that you don't know what you are going there for. and NO, seeing fake pictures of osama is not a good reason.

ARRL, of by and for the former CB and now ham
appliance operator.

ARRL, a dying organization, whose officials will grab all
the money they can before ARRL finally goes belly up.

ARRL loves suckers who keep mailing in membership
dues to a do nothing orgainization to line the pockets of
ARRL officials.

ARRL, an organization that screws ham operators at
every turn, if it means putting another dime in the pocket
of ARRL officials.

Send your dues in suckers!

Amen brother!!

> ARRL, a dying organization, whose officials will grab all
> the money they can before ARRL finally goes belly up.

Yup!-Yup!-Yup!-Yup! Amen Brother preach it!!

(almost as big in the tacky pathetic money grabbing department
as is Profit "young black boo-taye diddiling" RG Stair in Walterboro
and Gene "Get on the telephone!" Scott. My all time favorites
however are still the brainless lackies in tacky callsign ballcaps
who shill for and staff the booths for the ARRL at the hamfests.
Those BONOBO CHIMPANZEES are almost as brainwashed
as is your average Church of Scientology gleep on the streetcorner
downtown.)

...then again, how much different is Hare-Krishina chanting and extolling
the virtues of the ARRL at hamfests or public gatherings *be any more
different*
than common, garden variety mental illness?

> ARRL loves suckers who keep mailing in membership
> dues to a do nothing orgainization to line the pockets of

Don't forget that's all TAX FREE REVENUE ALSO!
What a deal eh? Scientology and UFO Church Cults
near Rachel, Nevada wish they had it that good!

> ARRL, an organization that screws ham operators at
> every turn, if it means putting another dime in the pocket
> of ARRL officials.
> Send your dues in suckers!

....and make that check out to "CASH" and leave the "pay to" line blank!

PFHBBLLTTTTTT!! -.-. --.-

Since most of us in this newsgroup are fully aware that almost all of the ARRL officials are volunteers and work for free, you have succeeded only in exposing yourself as the ignorant troll that you obviously are.

Nice try...and now it is my pleasure to cordially invite you to try the rec.radio.cb newsgroup, where you will fit in much better and might even become a respected regular, given enough time.

I agree. It's way too easy to become a troll these days. Back in the
old days, you had to learn DOS commands first. None of this
point-and-click crap that's so easy even a child could do it, you had
to learn how to type, you had to learn about filenames and extensions,
you had to learn how to use a keyboard. Today's trolls are spoiled
because all they have to do is click their little mouse. Windows is
going to be the end of trolling as we know it, mark my words. They
ought to bring back DOS. That's what separated the real McCoys from
the wanna-be's back in the good old days - DOS.

Besides, what happens in an emergency? Your computer crashes and
Windows won't boot, you need to know DOS in order to get in there and
fix it. These trolls of today don't know squat about DOS, and when
they end up trashing their Windows they have to haul their computer
off to a club meeting to get a REAL troll to fix it. DOS works when
nothing else will work, that's why they should never have gotten rid

of it. Windows just made the Apple and Commodore riffraff from years ago think they are real computer users. Bring back DOS and let 'em all go back to their Commode Door 64 where they belong.

Proposed three-step ARRL membership Application
process:

A. Join ARRL, send your $35 dues to Newington, you sucker.

B. Since you proved you are stupid, now send another $35 to
Kerry For President HQ.

C. Wow, stupid twice. Ok, send $100 and we will sell you a
bridge in Brooklyn.

ok everyone, heres some of the hams heard using the 146.640 N9EE repeater during the last several days during the hurricane.... N0RW N5WSS KG4WLL KG4ZUO KD4NWL KG4MKZ KA4RU KG4EAO KG4WLI N1XTV or N1XTB KB4EL W4IO KG4OGN KG4COQ KG4WCD KB4EO WB2HYA WA8JSC KA3YAE KG4QPE KS4JL

plenty more but dont remember all of them... glad to see everyone coming together and helping with communications!

locally we had alot of wind and rain, the most wind and rain came after the storm had passed in alot of areas, lots of trees down, power lines snapped, some damage in mobile homes, it could have been alot worse, fortunately it was downgraded to a tropical storm by the time it reached us. lets hope the next one thats comming passes us right by.....

if ur going to post about anyones criminal records, be sure to post truth, backed up by public sources, none of this he said he did crap without bacing it up with evidence, i wont believe it unless i can see its source, such as criminal website links or the like...

I say we re-activate the 14.313 kook wars of year's past.
Perhaps even parts of 75 Meters as well. Ratchet up the QRM
and goofyness on the HF bands, that will no doubt draw-off
much of the mayhem from off of the NG's. Just be sure to
not use your callsign and RH will not bother you.

Oh my God, this is rich. Tell me something hamradioman2000@yahoo.com (private parts)aka Don Roselli, KG4COQ what exactly did everyone do to help with communications? What contribution did they make to your city with your worthless check ins, I'M HERE sort of mumbo jumbo that you and your friends (both of them) are so famous for? Did they assist in anything? Resolve anything? Ask yourself this. If it wasn't for the sicks four repeater group, what wouldn't have been accomplished? Save any lives? Get any recommendations? Just as I said dum dum, you guys are WORTHLESS, so stop trying to make it sound to the rest of the world like you're worthy of your Ham Radio licenses, because you are not!! Oh and the next time I check in on Echo Link dum dum Don, it would benefit you to answer me.

Don, children should be treasured, and not taken advantage of. Get the picture?

Amateur Radio Newsline™ Report 1413 – September 10, 2004

Amateur Radio Newsline report number 1413 with a release date of
Friday, September 10th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Hurricane Frances strikes Florida and ham radio is prepared. Hear the ham radio first responders in action on Amateur Radio Newsline report number 1413 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HURRICANE FRANCES VS. HAM RADIO

Hurricane Frances pounded Florida with high wind and heavy rain after it smashed across the state's East coast. Close to 4 million residents lost power and telephone service. Cellular phone networks that survived Frances’s gale force winds quickly became overloaded. Enter ham radio. Amateur Radio Newsline’s David Black, KB4KCH has been following the story from our South-East bureau in Birmingham, Alabama:

--

When Hurricane Frances hit Florida on Labor Day weekend, the storm ripped roofs off buildings, toppled trees and cut power to about 4 million people. Also lost was part of the states telephone and cellular service. This created a communications vacuum.

But hams affiliated with SATERN - the Salvation Army Team Emergency Radio Network, A-R-E-S, and the Hurricane Watch Net were expecting Frances. Radio amateurs had been tracking this storm as it ravaged its way across the Caribbean. And it was ham radio that let the world know of the destruction the giant storm had caused as it hit some of the islands:

--

“Roger roger. On Elutheria Ill say about 40 percent of the structures have damage. In the Rainbow Bay area where I live I would say about 70% of the hhomes here have structural damage. Over.”

--

Once a Category 4 hurricane with winds of 145 mph, Frances had weakened to a Category 2 storm as it neared Florida. Winds dropped to a peak of 105 mph as it made landfall at Sewall's Point, north of Palm Beach, around 1 a.m. Eastern Daylight Time on Saturday, September 4th. Ham radio operators affiliated with

the Hurricane Watch Net tracked its approach:

--

“This is KA5E with the Hurricane Watch Net. We are currently taking measured weather reports out of the affected area for Hurricane Frances. Do I have any stations on with pdates or signifigant weather reports. KA5E, over.”

--

The powerful storm hit Florida with ferocious winds and sheets of rain. The hurricane was so large and slow moving that its western outer edges had began arriving on the east coast on Saturday morning. On Sunday morning its eastern edges were still pounding the coast from which 2.5 million people had been told to flee. Repeaters interconnected using I-R-L-P and Echolnk were pressed into service to help coordinate the latest round of evacuations:

--

“KC4PNC KB1CYO net control. Go ahead sir,”

“They have called for mandatory evacuation for Hillsboro county for manufactured homes and also mobile homes. They have not ordered a mandatory for low lieing areas but they are strongly recommendng it.”

--

And as evacuee’s poured into shelters, communications volunteers were needed. A call was put out over the interlinked repeater network and the hams responded

--

“We are looking for any volunteerr Amateur Radio operators to help with shelters. We have eight shelters open right now. Those are being manned. However, since its a declared evacuation all of the other shelters will be opened and we are looking for vlunteers to man those shelters. KC4PNC.”

--

As Frances path of destruction hit Florida's central Atlantic coast counties, blinding rain squalls drove clouds of sand into the air. At the same time high waves thundered onto the beaches. One ham watched as his rain gage was torn away and white caps pounded ashore:

--

“Any kind of rainfall accumulation?”

“No, that gage blew away but I can tell you that we are in a high tide area right now and I can see the tides up about a foot and a half and I have water coming over my seawall. But its not a problem. We are still at a much higher elevation. The water is over the seawall along the Intercoastal Waterway.”

--

As palm trees rained coconuts and then toppled over and buildings suffered extensive damage there was also a tragedy at sea. And the U-S Coast Guard turned to Amateur Radio for help:

--

“I want to remind the net that the Coast Guard has asked us to lend assistance in the search for the Anna Marie. It is a vessel that went down off the coast of Sarasota this evening about 10 to 12 miles out. Any assistance or any information on the Anna Marie that went down with the crew 10 o 12 miles out of Sarasota, the U.S. Coast Guard would appreciate your assistance.”

--

At airtime its not known what happened to the Anna Marie nor the fate of its crew. But as the search continued, there was yet another threat. Early on Sunday the 5th, the massive weather system spawned a tornado, and the warning went out over the I-R-L-P ham radio network:

--

“The tornado is expected to be by Bostwick by by 2:45 Eastern, Forholm by 3:00 a.m. and thats all I have.”

--

As that twister touching down the National Weather Service office in Jacksonville issued a tornado warning for Northern Clay County including the city of Orange Park. Also affected were St. Johns, Clay, and Putnam Counties. And as dawn was breaking radar picked up a developing tornado near Doctors Inlet moving West at 45 mph. Only some damage to roofs was reported.

But reporting weather was not the only chore radio amateurs were involved in. Another as health and welfare. Letting worried relatives and friends know about those stuck in Frances path. Many like this central American station who was happy to hear that the hurricane was headed away from his daughters location:

--

“OK. Great. Thank you very much. I appreciate that information. We are here in a location where we do not have any TV or any other communication. We are on the beach on the West coast of Panama. So thanks very much I do appreciate it. This is HB1XRO and the handle is Bob.”

--

By Monday afternoon, Frances had crossed the eastern Gulf of Mexico and made its second landfall in Florida's northwest Panhandle section some 20 miles south of Tallahassee. Now it only a tropical storm with sustained wind near 65 mph. Damage was mainly to power and telephone lines. At that point the forecasters were predicting the storm would move north-northwest at about 8 mph, and was not expected to regain hurricane strength.

Frances soaked Georgia, dumping 11 inches of rain in a 24 hour period in the town of Patterson.

Media reports blame Frances for at least seven deaths in Florida, including two people who were killed Saturday when the roof of he building they were in collapsed. There were also two deaths in the Bahamas. One of these was a teenager who was reportedly electrocuted when he tried to hook up a generator to a power mains that was still on.

With thanks to the hams who supplied the storm audio over the Internet used in this report, I'm David Black, KB4KCH at the South-East bureau in Birminham Alabama for the Amateur Radio Newsline. (ARNewsline(tm))

--

**

RESCUE RADIO: HAM RADIO PREPARES FOR IVAN

And its not over yet. As we go to air Hurricane Ivan is making its way cross the Caribbean and could strike the United States. CQ's newsdesk reports that Amateur Radio at the National Hurricane Center, WX4NHC, was to be reactivated for Hurricane Ivan at 2 PM EDT Thursday, Sept. 9, and will be active on Friday-Sunday 8 AM-11 PM EDT. The Hurricane Center will be on the Hurricane Watch Net on 20 meters as well as the VoIP Hurricane Net,. The latter is a combination of IRLP and Echolink stations.

The Cayman Islands and Jamaica are the next locations in the path of this extremely dangerous Category V Hurricane which now has maximum sustained winds of 160 MPH per the latest advisory issued at 5 AM EDT Thursday morning.

VoIP Net Control Station Rob Macedo, KD1CY, says they are trying to coordinate with the IRLP node owners on the Cayman Islands and Jamaica on usage of their nodes and liaisons to those affected areas. Currently there are no Echolink or IRLP nodes in Cuba.

National Hurricane Center advisories indicate that the path of Hurricane Ivan is not clear after it passes over Cuba on Sunday. Residents in the affected area should monitor the situation closely. There is a possibility that the hurricane's forward progress could slow and emergency nets may be activated for an extended period of time. It also means that ham radio communications volunteers could have a lot more to do in the coming days. (CQ)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the repeaters of the Condor Connection intertie serving the great American South-West.

(5 sec pause here)

**

RESCUE RADIO: FIRST RESPONDERS SAY THEY NEED INTEROPERABILITY

Meantime, three years after the nine eleven terrorist attacks, thousands of police and fire divisions in cities and counties across the United States still

do not have coordinated communications capabilities. So says the First Response Coalition and Amateur Radio Newslines Norm Seeley, KI7UP, has the details:

--

The First Response Coalition calls this lack of interoperability an unresolved national crisis and it has decided to take on the FCC and big business to solve it. This as the organization reaches out directly to more than 43,000 local police and fire officials to solicit their help.

First Response wants Congress to overturn the FCC decision to award spectrum to Nextel in favor of a plan that deals both with interference problem and the interoperability crisis. Gene Stilp, who is the First Response Coalition coordinator says that the FCC plan involving Nextel is wrong for police officers and firefighters. This is because it only takes on only part of the interference issue. Moreover, it does not do anything about the lack of interoperability between emergency response groups.

The First Response Coalition says that this outreach program is getting a very favorable grassroots response. So far over 17 fire chiefs have joined ranks with the group in opposing the FCC's current plan for what they call a give away of taxpayer-owned spectrum.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

About the only emergency responders these days who have full two way radio interoperability are radio amateurs. Hams had voluntarily set world-wide communications standards many years ago. (First Response Coalition release)

**

RESCUE RADIO: AMBER ALERT LINKS UP TO THE WEB

The nation's Amber Alert system has become a web available tool. This, thanks to a portal made available by the E2C company of Scottsdale, Arizona.

Until now, Amber Alerts have been a primarily radio based technology. This meant that messages had depended on the nation's Emergency Alert system for relay and delivery. The new Web-based system can process and transmit the same emergency information more quickly and make it available to a wider variety of devices. It also comes with software that pinpoints the location of a child abduction and sends out emergency notification targeted to that geographic area.

As of now, Amber Alert managers in 11 states have access to the new portal. Use of the system is expected to expand to the 49 states that have statewide Amber Alert systems. Hawaii has no statewide system but has several local alert networks. (E2C)

**

THE BPL FIGHT: VK 4-WHEELERS JOIN BPL FIGHT

A Four Wheel Drive hobby group has joined the fight against BPL. Its happening down-under. WIA Newscaster Phil Waite ,VK2DKN, reports:

--

The VKS737 4WD HF Radio Network, joined the fight against BPL last week, following the recent WIA news broadcast by Jim Linton, VK3PC, highlighting the BPL industry's attack on interference protection for so called `recreational radio services' and an approach from WIA Director, Glen Dunstan, VK4DU.

VKS737 are currently circulating their members with information about the threat BPL poses to their activities, and encouraging their members to lobby politicians on the issue.

The VKS737 network is used extensively for emergency communications in remote areas, as well as serving the communications needs of outback travellers. Their current membership is around 7,000 and they potentially reach 250,000 Australian 4WD owners.

Many of their network base stations are in urban areas potentially affected by BPL and VKS737 members are rightly concerned about the threat presented to their HF communications. Their organisation is also associated with the Australian Citizens Emergency Radio network, who provide similar services on citizens band frequencies.

Phil Waite, VK2DKN, for the WIA National News.

--

The Wireless Institute of Australia is discussing ways the two organizations can assist each other in the fight against BPL. (WIA News)

**

INTRUDER WATCH: STRANGE SIGNALS AT 7238 KHZ

According to Bob Gonsett, W6VR, for the past three weeks, hams in the southwestern U.S. have been reporting a mysterious signal in the 40-meter band. One party described it as a "mechanical sound." Another speculated that it was "data."

Engineers at Communications General Corporation in Fallbrook California took a quick look at the situation on Septeember 6th. And at 3:20 P-M Pacific Daylight Savings Time the company found several close-spaced CW carriers. The four strongest signals at CGC's lab were on 7238.063, 7238.150, 7238.237 and 7238.412 kHz. The signal on .237 was the strongest of the group and the frequencies reported should each be accurate to better than plus or minus 30 Hz.

Communications General says it is not sure if the signal was coming from one specially modulated transmitter or from transmitters at different locations. Bob Gonsett adds that it will be interesting to learn the source or sources of these transmissions. (W6VR, CGC)

**

SAFETY: RADIO ENGINEER ELECTROCUTED WHILE WORKING ALONE AT TOWER SITE

The hazards of working near power lines has been brought front and center again. This with word that a Wyoming broadcast engineer has killed while working at a transmitter site in Colorado.

Thirty nine year old Robin Bradley Thomas was killed while working alone, trying to install a radio transmitter. The accident happened about 18 miles northwest of Red Feather Lakes in northern Colorado. Indications are that Thomas of Cheyenne died when he accidentally came in contact with high-voltage and was electrocuted. Thomas was described as an experienced engineer who contracted out his services. (CGC)

**

RADIO LAW: CELLPHONE PROVIDERS SUED OVER LOCKED PHONES

A consumer watchdog group sued three cellular telephone companies. This. for "locking" their phones to make it harder for customers to switch carriers.

The Foundation for Taxpayer and Consumer Rights is the group that filed the suit in Los Angeles. It accuses AT&T Wireless Services Inc., T-Mobile USA Inc. and Cingular Wireless, of using software in their handsets that prevents them from being used on a competitors' network.

All phones in question use Global System Mobile communications, or GSM technology which effectively limits a handset to a specific carrier using a non interchangeable SIM card. The lawsuit complains that this is an unfair and deceptive business practice under California state law.

The phone companies are defending their policy. They say that they routinely subsidize handset cost and would loose substantial revenue if they allowed customers to easily use those phones with another carrier. (Foundation for Taxpayer and Consumer Rights)

**

REPEATER COORDINATION: METROCOR MORITORIUM TO END DECEMBER 15

Attention repeater owners in the New York metro and surrounding area. An impoerant deadline is aproaching.

You may remember that your new area frequency coordinator MetroCor had put in place a two year moritorium on new co-channel coordinations when the group came into being. It had also asked existing repeater operators who have documented proof of expired coordination from the now defunct Tri State Amateur Repeater Council to update their coordinations with MetroCor.

In a posting to QRZ.com, MetroCor's Mario Sellitti, N2PVP, says that this moratorium had minimized the possibility that new coordinations might inadvertently displace longstanding users of the spectrum. It also helped to avoid creating disputes where none previously existed.

Now, says Sellitti, this period must now come to an end. He says that MetroCor will be terminating the moratorium as of midnight, Saturday, December 15th.

But he adds this qualifier. Sellitti says that anyone in the area having a repeater or knowing of one belonging to another ham, and that repeater qualifies for this exception, to please refer to MetroCor's on-line F-A-Q in item No. 11. This will give you or the person with the other machine the information needed to gain new coordination through MetroCor. Those in need will find it on-line at www.metrocor.net/faq.htm. (MetroCor, QRZ.com)

**

THE SOCIAL SCENE: W9DXCC CONVENTION IN ILLINOIS IN SEPT

Turning to upcoming social events, Joe Shrader, W9JUV says that the 52nd annual W9DXCC Convention and Banquet takes place Saturday, September 18th. This years venue is the Holiday Inn Chicago in Elk Grove, Illinois with noted DXer and author John Devoldere, ON4UN, as the featured banquet speaker.

John Devoldere leads the world in countries worked on 80 meters with over 350, and is first ham outside of North America on 160 meters with over 290 contacts. He is also an avid contester was elected to the CQ Contest Hall of fame in 1997. Devoldere is also one of the best speakers in the hobby.

This is a show you won't want to miss. For registration and lodging information visit the www.qth.com/w9dxcc on the world wide web. (W9JUV)

**

THE SOCIAL SCENE: SVHFS IN NC NEXT APRIL

And make plans now to attend the 9th Annual Southeastern VHF Society Conference. The 2005 gathering will be held in Charlotte, North Carolina next April 29 and 30.

Guy Titman, K4NUS has offered to be host and facilities chair for 2005 gathering. More information is on the web at www.svhfs.org (VHF Reflector)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM TECHNOLOGY: HAM DREAM DIGITAL VOICE QSO

What is believed to be the first two-way digital voice contact in South Africa took place between ZS1AN and ZS1AU on August 10th. Contact was made on 15 meters with both amateurs using Ham Dream software for the QSO. Amateur Radio Newsline's Bruce Tennant, K6PZW has the details:

--

Ham Dream is an open-source version of the Digital Radio Mondiale broadcasting standard. It was adapted for amateur use by HB9TLK and gives hams the ability to talk almost noise free. Here’s how.

Speech is converted to digital data using a low-bitrate vocoder analog to digital converter. The data is then transmitted using a high-speed modem. At the receiving end the data is decoded to recover the audio at the receiver. Although still in the evelopment stages, there is worldwide interest in Digital Voice, which can deliver very high signal-to-noise ratios over medium quality narowband S-S-B channels.

For those who want to experiment, HamDream software can be downloaded free of charge from the South African Radio League's website at www.sarl.org.za.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, reporting.

--

Further information on digital voice in ham radio is available on HB9TLK's website. Its in cyberspace at www.qsl.net/hb9tlk (GB2RS)

**

EMERGING TECHNOLOGY: TiVO OVER THE NET

Federal regulators have approved technology allowing TiVo subscribers to send copies of recorded shows over the Internet. In its decision, the Federal Communications Commission said the new feature by Alviso, Calif.-based TiVo has enough protections in place to prevent mass distribution of copyrighted material.

The technology would allow a TiVo subscriber to download broadcasts to a computer and send copies of recorded shows over the Internet to an office or home or to a small circle of friends, as long as they are on the subscriber's registered account. The Motion Picture Association of America, the National Football League and others complained that the new service would allow the 1.6 million TiVo subscribers to redistribute shows over the Internet to virtually anyone, anywhere. (Published news reports)

**

EMERGING TECHNOLOGY: FCC TAKES NEXT STEPS TO PROMOTE DIGITAL TV TRANSITION

Its full speed ahead with the conversion to digital television. So says the FCC as it issues a Report and Order that it says implements several steps necessary for the "continued progress of the conversion of the nation's television broadcast system from analog technology to digital television.

The paper covers almost every aspect of the conversion process over the next several years. It also highlights the coming events and should be considered "must reading" for those interested or involved in the future of digital T-V. You will find it on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250542A1.doc (CGC, FCC)

**

WORLDBEAT: NEW UK REPEATER SERVES LONDON AND KENT

And if you are planning a trip to the UK, don't forget your reciprocal license and your HT. And be sure to try out a new repeater serving the needs of hams in the North Kent and South East London England area.

Its call is GB3OK and it is sponsored by the Bromley Repeater Group and it went on the air on the 16th of August. It transmits on 145.650 MHz with the standard 600 Kilohertz input offset and requires a 103.5Hz tone to access the receiver. The trustee of GB3OK or repeater keeper as the British call them is Tony Ravelini, G1HIG, in the city of Kent. (GB2RS)

**

DX

In DX, HA3JB tells the Ohio Penn D-X Newsletter that he will operate as SU8BHI from Cairo, Egypt. This, from September 21st through December 20th. Activity will include CW, PSK, RTTY, SSTV and some SSB. QSL direct to HA3JB. (OPDX)

And UA9OBA, has been active as JT100M. This is a special callsign being used until September 13th during the Mongolian leg of the Altay-Himalaya Transasian off-road expedition. Activity has been mainly on 20 meters SSB around 14.180 Mhz. QSL via UA9OBA. (OPDX)

**

THAT FINAL ITEM: THA FINAL ITEM: A KEYLESS T-HUNT

And finally this week, a Michigan ham radio operator from the Ford Motor Company was part of a two man team that has solved the mystery of malfunctioning remote keyless car door openers, garage door openers and other such devices in Las Vegas, Nevada. A problem with R-K-E devices that had baffled many residents since a massive outage began last February.

Las Vegas resident Bill Zawistowski was one of those complaining. He and others vented their frustration to anyone who would listen including the FCC. Ford responded by flying in two R-F detectives. Earl Morse, N8SS, represented the auto maker and Nabil Hachem was from Alps Automotive, which makes the keyless car-door devices. And it did not take very long for Morse and Hachem to figure out what was happening:

--

Morse: "When we got there we discovered a signal in the paassband of the RKE receivers which was actually strong enough to keep the RKE from activating its own receiver in the vehicles. We investigated further and found it to be a stuck repeater. We can leave it at that."

--

Morse says it was not much different than a ham radio T-hunt except for the frequency:

--

Morse: “Having experienced Fox Hunting first hand. the only difficult art was shifting all my equipment to that frequency. All of my antennas were relatively useless because they were cut to 2 meters an 440 so we had to make some new antennas for the 315 Mhz. band.”

“We did have one advantage in that the RKE group had purchased a Doppler direction finder and we utilized that a lot.”

--

Morse tells Amateur Radio Newsline that once they found the transmitter it only took a few phone calls to get it turned off. The problem did surface again a week later but this time one landline call got it to go QRT for good. (ARNewsline (tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). August 12, 2004 06:11 PM EDT

Gettysburg, Pa (API)

In a surprise announcement today, FCC Chairman Michael Powell released preliminary news of a new "user fee" based revenue system for amateur radio operators. "This exciting initiative, suggested by a leading amateur operator and jumpsuit model (photo at http://tinyurl.com/48krd), is designed to raise funds to subsidize the deployment of BPL service throughout America, but especially in disadvantaged places like Franklin County, Tennessee."

Details of the plan are not complete, but the fee structure will be based on actual on-the-air use of amateur radio, and will be sensitive to the value of the communications in progress, according to the Chariman. "As an example, emergency communications during a hurricane would be billed at a higher rate than less valuable usage like the North Carolina Lumbago Net." Powell remarked. "Contesters would get special high volume discounts, since their communications simply repeat the same old stuff over and over all weekend long" he stated.

Fees will also vary based on the particular mode in use, with CW being charged a premium rate because "it get's through when nothing else can". Video modes like SSTV, however, would command super-premium rates "because a picture is worth a thousand words" the Chairman said.

In a related family announcement, Chairman Powell's father, Secretary of State Colin Powell, stated that the IARU would be contacted to ensure that foreign DX operators communicating with US stations would be assessed fees based on their 'rarity' on the DXCC "Most Wanted" listing. Secretary Powell cited an alleged operation from "T5" which he expected would owe "several tens of thousands of dollars" retroactively based on claims on an internet newsgroup by an operator with the screen name "Billy Beeper".

Stay tuned for further details. Movie at 10.

Seems to me, I read somewhere that this was nothing more than a crock of shit. I don't recall seeing it posted in the FCC's Daily Digest which I get.

Well Roselli, I notice since my last posting you've been very quiet. Now we, the Hams of the world, know it's you. It's you that's disguising yourself on here mainly because you have a vast array of people you are hiding from. And why is that so? If you were such a hero as you profess, then you'd have no reason to hide. Might I recomment because of your shoddy reputation both on and off Ham Radio, you cease and desist on the subject of that repeater in your area. You're not a hero, you're a criminal. You're not a nice guy, you're a mean bastard to Ham Operators you don't know, and to children. Shame on you.

So how many members are there now? Is it for woman only?
Not to be rude but I wonder if it would be legal to have a group called
" AmateurRadiomen" ;)
Good luck with your new group!

I was actually afraid that the shortwave kooks would find a different hobby after Clinton left office and y2k fizzled out.

But 9/11 came along. And that opened up a whole new branch of kookdom. And I'm proud to say that the kooks are still able to get themselves pretty stirred up from time to time.

The spirit of Amateur Radio is alive and well and
preserved in clubs, associations, transmitter hunts,
contests, and it's ability to establish relations across
classes and borders. One of my admired clubs is the
OARC in Qrlando, FL. It survives, grows, brings in
new blood, everyone participates, they have successful
field days, ham-cations. In olden days clubs didn't last
forever. Another admired organization is the Cactus-
Intertie repeater association. A group of mountain-
toppers sine-qua-non. Cover the West and beyond and
seem always be looking for a new peak to climb and
put another repeater up there..I wouldn't be a bit
surprised to find one of theirs on the moon someday.
When lightning strikes or fires bring down a link some
one always manages to get things going again. And,
then there's nothing like keying up in Arizona and
chatting with a "fraternity" member in say Pasadena.
As long as standards are maintained and the spirit
stays alive, ham radio will be around..IMHOP..73s..

It would make sense to ask for them here, and to post them to
alt.binaries.e-book.technical.

I suppose it wouldn't hurt to ask for them in
alt.binaries.e-book.technical too, but I'd be careful about cross-posting,
so that somebody doesn't accidentally post a binary to this newsgroup and
have the post cancelled.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th/September, through Sunday, 12th/September there were 218 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1MV, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TI9, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9L, VP2M, VP2V, VP8/h, VP9, VQ9, VR, VU, XE, XT, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

6W, SENEGAL. Al, F5VHJ, will be active as 6W1RY in the CQWW SSB DX Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via F5VHJ.

7X, ALGERIA. Luis, EA5KY, editor of El Mundo del DX in the Radioaficionados, official bulletin of the URE, informs OPDX that operators Angel/EA1QF,

Pere/EA3CUU, Paco/EA4BT, Emilio/EA7AAW, Julio/EA7JB, Juan Lucas/EA7TL and Ramom/EB4EPJ will be active from here October 2-9th. Callsign will probably be 7X0AD, but it's not confirmed yet. QTH will be 7X0AD's house, and he will be one of the operators as well. QSL is via EA4URE. This activity is a cooperation between URE and ARA.

9K, KUWAIT. Yaser, 9K2YM, will be active in the upcoming CQ/RJ DX RTTY Contest (September 25-26th) as a Single-Op/Single-Band (20m) entry. QSL via 9K2YM (DIRECT, address QRZ.com).

9M6, EAST MALAYSIA (IOTA/Contest Op). Saty, JE1JKL, informs OPDX that he will be active as 9M6NA on Labuan Island (OC-133), East Malaysia, starting November 24th until the end of the CQ WW CW DX Contest (November 27-28th). He will be active before the contest probably on 160m, 80m and the WARC Bands (CW only). During the contest, he will be a Single-Op/ All-Band/High-Power entry. QSL via JE1JKL (E-mail requests for Bureau returns are welcome!). His E-mail address is: 9m6na@jsfc.org
His Web is at: http://jsfc.org/je1jkl/9m6na.html

ANTARCTICA AWARD (MDXC - Press Release). Antonio Cannataro, IZ8CCW, Mediterraneo DX Club (MDXC) Secretary, informed OPDX that the MDXC is pleased to introduce the "Antarctica Award" to the DX-oriented Amateur Radio community. Information and details on how to obtain and view this nice looking award are available the MDXC Web page at: http://www.mdxc.org/antarctica
Should you need further information or a higher resolution version of the award image, please feel free to contact the MDXC secretery at: mdxc@mdxc.org

ATTENTION LOTW USERS! (Logbook of the World Certificate Renewals).... "To all Logbook of the World certificate holders - All LoTW certificates currently have a term of one year and must be renewed before expiration. No additional documentation will be required if the renewal request is created before the certificate expires. We will send an email reminder to all certificate holders whose certificates are about to expire. This email will refer users to detailed renewal instructions on the Logbook of the World Web site (www.arrl.org/lotw/renew).... 73, Logbook Team"

CU, AZORES. The editor of the "DX News Letter", Karlfried, DL1EK, informs OPDX that each year he and others try to find another place of interest for the CQ Word-Wide SSB DX Contest at the end of October. After their successful Jersey and Sardinia operations, they decided to go to the Azores Island (CU - IOTA EU-003) to set up their Multi-Operator station this year. The team consist of Burghard/DF8XC, Peter/DH4JQ, Alfons/DJ8VC, Hans-Jorgen/DL1YFF, Franz/DL3PS, Stefan/DL7AOS, Lars/DL9LR and Karlfried/ DL1EK. The callsign for the contest is not yet known. One week before and also one week after the contest they will use their own callsigns (e.g. CU2/DL1EK). Activity will be on 160-10 meters (sorry, no 30 meters) on CW and SSB. For skeds, please contact the following E-mail address: dl1ek@r25.de
Look for further information on their Web page soon at: http://www.rwdcc.de

FK, NEW CALEDONIA. It seems that Mike/KM9D and his girlfriend Jan/KF4TUG will be staying here until September 15th. Mike is active as FK/KM9D and has been quite active. Over the past weekend he was heard on CW at various times on 160/40/30/20/17/12 meters. QSL via OM2SA.

FP, ST. PIERRE AND MIQUELON ISLANDS. Pete, NN9K, is now active as FP/NN9K from Miquelon Island (IOTA NA-032, DIFO FP-002, WW Loc. GN17TC) until September 18th. He has really been keeping DXers busy on 30 meters over the past weekend. His main goal is to provide FP QSOs as much as possible on 30 meters. He will be on other bands from time to time but mainly on CW. QSL via his home callsign, by the bureau or direct to: Peter Beedlow, 741 Greenway Ave, Colona, IL 61241-9337, USA.

HB0, LIECHTENSTEIN. Andy, LY2BVB, will be active as HB0/LY2BVB from September 20-23rd. Activity will be on 80-10 meters CW/SSB. This will be a holiday style operation. QSL via bureau is OK.

IOTA NEWS.....
SA-NEW. An international team presently consisting of Marco/CE6TBN, Mario/CE6NE, Lucas/LU1FAM and Mike/K9AJ, will be active February 11-14th (2005) from Rennel Island, Ultima Esperanza Province South Group (CE8). Activity will be on CW and SSB. Further information will be available soon at:
http://www.ce6ne.cl

SA-086. Look for members of the Atacama Desert DX Group and Radio Club La Serena to be active from Gaviotas Island, September 25-26th, to commemorate the 40th IOTA Aniversary. This will be a multi-mode and band operation (CW, SSB, BPSK31, RTTY and SSTV; 80-10 meters and the WARC bands). They will be using the special callsign XR2G. A Web page is currently under construction (URL not provided).

IS0, SARDINIA. Operators Roberto/IS0GRB, Alessandro/IS0MYN, Basso/IS0CLA, Gianni/IS0XDA, Angelo/IS0ADZ, Alessio/IS0SEL, Antonello/IS0XSE and Stefano/IS0WBT will be active as IS0A in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Multi/Low-Power entry. Activity will be on 160-10 meters. All antennas are homemade and their contest site is 1000 meters above sea level. They do have a Web page and live images will be provided through a wireless link on 2.4 GHz to the Internet at:
http://www.cqis0.it/is0a
QSL to IS0MYN or eQSL.

J45, DODECANESE. Operators Laci/HA0HW and Tomi/HA4DX will be active as J45HW and J45DX, respectively, with an unnamed HA friend from Faliraki, Rhodes Island (EU-001). The operation will take place September 26th through October 3rd. Activity will be on 40-10 meters, CW, SSB, RTTY and PSK31. QSL via operator's home callsign via the HA QSL bureau or direct by the QRZ.com addresses.

JA UPCOMING DXPEDITIONS (Reminder).....
4S - (OPDX.674) Masa, JQ3DUE/4S7DUG, will lead a large group of Japanese operators (possibly 25) to Sri Lanka to be active between September

18-25th. Activity will be on all bands and modes. QSL via operator's instructions.

FK - (OPDX.672) Eleven members from the Mitsubishi Electric Tokyo ARC (JM1YGG) will be active September 16-19th, as FK/JM1YGG and FK/homecall from New Caledonia (IOTA OC-032, DIFO FK-001). Activity is planned for 80-10 meters CW, SSB and FM. QSL via JM1YGG, by the bureau or direct to: Mitsubishi Electric Tokyo Amateur Radio Club, 2-1-1 Marunouchi, Tokyo, 100-8310 JAPAN.

KP2/WP2, U.S. VIRGIN ISLANDS. Operators Barry/W3FV, Tom/K2TW and Tony/N2TK will be active from contest station WP2Z on St. Croix, U.S. Virgin Islands, for the CQ WW SSB Contest, October 27th to November 3rd. They will be a Multi/2 entry in the contest. QSL WP2Z via KU9C. Before and after the contest, they will use their "own call/KP2". QSL to their home callsigns.

LIGHTHOUSE ACTIVITY.....
Albert, IT9MRM, will be active as I8/IT9MRM from the Capo Spartivento Lighthouse (ARLHS ITA-043 - WAIL CL-009) this week. Activity will be on 40/20/15 meters SSB, starting at 1400z, September 14th through 1200z September 15th. QSL via his home callsign, via the bureau or direct to: Albert Mattei, Via E. Millo, 20 Augusta 96011 (SR) ITALY.

Bill, KI4BBK, will be active from the Chesapeake Light Tower (ARLHS USA-168) in Virginia, September 25th (between 1600-1800z). His primary frequency will be 14270 kHz, but he will also try 18145, 21370 and 28370 kHz as conditions permit. QSL via his home callsign, direct with #10 sized SASE or SAE with sufficient postage.

MIA CONTEST. The Mediterranean Islands Contest, organized by the Mediterraneo DX Club, will take place from 1200z September 18th to 1200z on the 19th. Rules can be found at: http://www.mdxc.org/contestmia/rules.htm
Also, MIA Contest software can be downloaded at:
http://www.mdxc.org/contestmia/download.htm
< Build your MIA Contest log with it! >

NCDXF PRESS RELEASE. At its Board of Directors meeting on September 11, 2004, in Cort Madera, CA, the Northern California DX Foundation re-elected the following officers and directors:
President Len Geraldi K6ANP
Vice President Al Burnham K6RIM
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Rusty Epps W6OAT
Director Dave Pugatch KI6WF
Director Chuck Ternes N6OJ
Director Glenn Vinson W6OTC
Director Steve Merchant K6AW
Director Ken Anderson K6TA
Director Tim Totten N4GN
Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

PIRATE ALERT. Per, LA7DFA, informs OPDX that the station signing JX7DFA during July and August of 2004 was a PIRATE. Last time Per was active as JX7DFA from Jan Mayen was in 2002.

QSL INFO AND NEWS.....
DANISH DATABASE MOVES TO A NEW URL. Boye, OZ7C, informs OPDX that The Danish DX Group's Web page will be (or is) closing down soon at: http://www.qsl.dk
The Web which has QSL and MANAGER databases has been moved to the new URL address at: http://www.ddxg.dk/oz
This Web page has more than 355,000 records and weekly updates. They hope this Web site will be permanent.

NOT THE QSL MANAGER. Steve, OM3JW, informs OPDX that he is receiving QSLs via the Bureau for YI0M again. He wants to inform the radio amateur community that he is NOT the QSL Manager for YI0M. Operator was Peter YI9OM (OM6TY), during the 2003 CQ SSB WPX Contest, and the QSL Manager is his father OM6TX.

W3HNK IS MANAGER FOR THESE NEW ONES: 4X1UH, AP2NK, C4M, FK8AH, FK8GX. RW6AWT, UA9QFF and YI9WRV.

R1MV, MALYJ VYSOTSKIJ. By the time you read this the R1MVI operation should be QRT. QSL via RA3AMG: Denis Skobelkin, A.k. 698, LV-1010 Riga, Latvia. It is recommended to use Denis's Latvian address instead of his Russian address.

S7, SEYCHELLES. Marco, HB9OCR, will be active as S79MH from Praslin Island, October 26th through November 6th. Activity will be on all HF bands excluding 80 meters. He will also be in the CQ WW DX SSB Contest (October 30-31st). QSL via HB9OCR.

S7, SEYCHELLES. All arrangements have been made for Willi/DJ7RJ and Klaus/DJ4SO to be on the air from Seychelles beginning October 3rd, for 2 or 3 weeks. They will be operating as S79RJ (DJ7RJ) and S79SO (DJ4SO) on 40-6 meters and on CW/SSB/RTTY/PSK31. Use of the 80 meter band has not been authorized, but they will be requesting permission to operate on 80 meters during the weekends (3505 kHz +/-). QSL via their home callsign.

SILENT KEY. World traveler and DXpeditioner, Frank Turek, DL7FT, became a "Silent Key" (SK) on August 17th, 2004. Over the years Frank went to many rare locations and handed out new ones to many people. He is survived by his wife Siegrid, DL7CN, who will be handling QSL duties. She will continue to keep the DL7FT Post Office Box open. OPDX and its readers would like to send out our deepest sympathy to Frank's family and friends.

SV9, CRETE. Gerben, PG5M will be spending his holiday (dates not provided) on the Island of Crete and will be active as SV9/PG5M. He will be operating occasionally on 40-10 meters CW only. His equipment is a FT-897 and a G5RV. QSL via PG5M (ex-PA0GAM, PA5NT), by the bureau or direct to: G.A.Menting, Waezenburglaan 104, 9351 HG Leek, Netherlands.

SV9, CRETE. Operators Stelios/SV9FBM and Chrisovalantis/SV9FBZ will be active as SY9Y in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Single entry. Also, look for Stelios/SV9FBM to be active as SY9Y in the CQ/RJ WW DX Contest (September) as a Single-Op/All-Band/Low-Power entry. QSL both operations via SV9FBM to: Stelios Aggelakis, P.O.Box 113, GR 72200 Ierapetra, Crete Island, Greece.

T42, CUBA. Operators Angel/EA1QF and Carlos/EB1AA will be here from October 12-25th. They will be working on a "Radiosolidarity" project, and will be busy working on several HF station installations. In their spare time, they will be active as T42R. QSL via EA4URE.

TA3, TURKEY. Dennis, DL7RBI, will go to Ephesus near Izmir, Turkey, for his holiday from September 18th to October 1st. He will be active as either TA3/DL7RBI or as TA3Z*, depending on the possibility of getting a Turkish Guest License. Dennis will be active mostly in the local evening hours on 40-10 meters, with 100 watts and mostly on CW (SSB on request). Listen for him on one of the following frequencies (+/- QRM):
CW - 7016, 10116, 14016, 18086, 21016, 24916 and 28016 kHz
SSB - 7090, 14250, 18150, 21250, 24950 and 28250 kHz
Please QSL via his home callsign. For further information (in German), see the Web page at: http://www.dk0uni.uni-bonn.de

TC2, TURKEY (Special Activity). Berkin, TA3J, will activate the special callsign TC2K4J from Antalya, in the memory of the unforgettable 40 Silent Keys of Turkish Radio Amateurs, between 0240z, September 24th and 0240z, November 2nd. Activity will be on 160, 80, 40, 20, 15, 10 and 2 meters, including the WARC bands and on all modes. He will give a report each day on the memory of one TA Silent Key (For Example: On September 24th, 59-TA0A). QSL via TA3YJ, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL Cards are OK. Details on the special award which is available, as well as a list of the "TC2K4J Commemoration Program" on the following Web page at: http://www.geocities.com/tc2k4j/

TT8, CHAD (Update). Ghis, ON5NT, in Dubai (A61), informed OPDX that Robert, S53R, was not able to pick up his license last weekend because the PTT office in N'Djamena was closed. When he went to the PTT on Monday (lucky he had sent a fax before he left Dubai), the papers were ready but still had to be signed. In the meantime, he went on a mission for 3 days to the northeast of the country (with a small plane, max. lugguage 10kg, so he could not take his gear anyway). During his absence, someone from the office picked up his license. He finally came on the air on Thursday last week as TT8KR. He will in N'Djamena until about Tuesday, September 14th. He said he will try 160m, but the roof of the hotel is very low. Another report states Robert will be listening on 1828 kHz sporadically (or possibly 1831 kHz if frequency is not good) on the mornings and evenings of September 13th and 14th.

V6, MICRONESIA. Lanny, W5BOS, plans to be active as V6O from Pulap (Pollap) Island (IOTA OC-155), West Chuuk, Fed. States of Micronesia, October 18-23rd. No other details were provided. QSL via N6AWD.

VP5, TURKS AND CAICAOS ISLANDS. Look for Dave, AH6HY, to be active as VP5/AH6HY from Salt Cay in the Turks Islands group (IOTA NA-003) from September 23rd to October 2nd. Activity will be on 40-10 meters, SSB only. QSL via his home callsign, direct or via the bureau.

XU, CAMBODIA. Wim, ON6TZ, will be active as XU7TZG now through September 28th. Suggested frequencies are: 7075, 14220 and 21320 kHz (+/- QRM). However, he was heard this past weekend on 17 meters SSB between 1030 and 1300z. QSL via ON4AJV.

Z38, MACEDONIA. Zoli, HA1CA, has received his license and will be signing as Z38C. He will operate from Macedonia on the HF bands for the next two years. Later on he will put up some antennas for 2m and 70cm too. (His QRA is KN01..) QSL via HA1RS.

ZD8, ASCENSION ISLAND. Ian, G8WVW, has been active as ZD8I and will be here until the end of March 2006. No QSNs have been reported since August 20th, but his activity will be SSB on 80-6 meters (no 30m). Suggested frequencies are: 3737, 7077, 14237, 18137, 21337, 24937 and 28537 kHz. QSL via G4LTI. Check his Web page at: http://www.zd8i.net

ZK3, TOKELAU ISLANDS. Operator Chris, ZK3DX, has been quite active on 20/17/15/12/10 meters SSB usually after 2330z (for stateside) and 0530z (for EU). Length of activity is not known. QSL via EB2AYV.

64 picnic

Please put Oct.16,2004 (3rd Saturday in Oct.) on your calender. This
is the date of the next 146.640 N9EE repeater picnic.Held at Starkey
Park,it will start at 10:00 AM .Those planning to attend please return
email to me as we like to know who will be in attendance.If you need
info on how to get to park ,I will send you info if asked and info
will be posted on the 64 website (see address below) soon.
We ask that you all bring something to share with the group. I will
let all know what is needed.
I realise that we all just got thru 2 big storms but what better way
to relax and get away for a while ?
Please let me know soon so I can plan this great event.We had over 45
hams at the last one in April and all had a fantastic time.
Please feel free to forward this mail to anyone who may like to read
it.
Thankyou,
Don,

Yes, and then watch the lawsuits pour in. This is just like black
groups that tout for blacks only. Try a white only group. Same
thing. Just an example, NOT a racist remark, I hope.

new 2m repeater on space station
a new 2m repeater is now operating on the
international space station 24 x 7
the uplink is on uhf 437.800 and the downlink is on vhf 145.800
no tone burst or ctcss is required
the radio is a kenwood tmd700 operating in remote crossband mode
it just retransmits on vhf what it hears on uhf
so if you are getting through you can hear yourself
on the downlink

anyone can work it using a co-linear

to see where the space station is 'live' check

http://science.nasa.gov/temp/StationLoc.html

for 3 days in advance predictions download the pcsat decoder program

http://www.ui-view.com/uiview32/pcdec242.msi

when the iss repeater is being worked the audio may be streamed in the
amsat
conference server on echolink so anyone anywhere in the world can
listen in

http://tinyurl.com/4zqu6

Televangelist Paul Crouch, founder of the world's
largest Christian broadcasting network, has waged
a fierce legal battle to prevent a former employee
from publicizing allegations that he and Crouch
had a sexual encounter eight years ago.

Crouch, 70, is the president of Trinity Broadcasting
Network, based in Orange County, whose Christian
programming reaches millions of viewers around the
world via satellite, cable and broadcast stations.

The former employee accuses Crouch of engaging in
homoerotic S&M and penetration on numerous occasions
in hotels.

1223. Online postage costs worldwide?

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-14 15:25:43 UTC
From: "Odd Erling N. Eriksen" <odderi@pvv.org>
Message-ID: <ci72hn$g4h$1@orkan.itea.ntnu.no>
Source record: 56435

Hi,

As the venerable greenback is no longer sufficient to cover postage costs worldwide from some countries, I was wondering if anyone has compiled a source of postage costs from country A to country B world-wide.

Doubling my QSL costs by either putting US$2 in each envelope or by buying IRCs (US$ 2.50/ea. in Norway) does not sound tempting, but neither do I expect any QSL manager to chip in for my insufficient return postage. Any advice appreciated.

1224. Learning Morse

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-14 15:48:08 UTC
From: Andrew Crawford <check_signature@127.0.0.1>
Message-ID: <ci73ro0mc4@drn.newsguy.com>
Source record: 56436

Dear All,

Does anyone have any tips for learning Morse using the Kock method? I'm using the "CW trainer" program and it's working... kind of.

I am learning at 25wpm. I find I can identify the sounds of the letters no problem at this speed, so it's working from that point of view.

However, I can't physically write that fast! By the time I get one letter written another three have gone by. I can "buffer" them a little but even so after writing down a few letters I'm hopelessly behind.

It's very discouraging. Any hints?

Cheers,

Andrew

At speeds in excess of 20wpm (the limit on how fast the typical person can write), you will need to either copy on word processing software (or old fashioned typewriter) or learn to copy in your head.

However here are some things that can help a bit. Use script (cursive) not printing. Printing is far too slow, especially block letters. Also don't worry about neat as that also slows you down.

Set the letter speed at 20 or 25wpm but set the word speed at about 15wpm. Your brain may still be lagging slightly on identifying the letters and may need a slightly larger gap between them until you get more practice.

Also strive to simply write the letter without even thinking the letter name. If you think of the letter name, it will slow you down. You want this to be an automatic reflex.

A program that I prefer for the Koch method is the G4FON software. It is available for free download from the internet at http://www.g4fon.co.uk/

Hi to all

this is the most recent post to everyone - enjoy and thanks to all those hams that helped out with the hurricane and cleanup. you make ham radio a great hobby and we all are proud

below is from a press release from the tropical breeze newspaper about the recent hurricane and the Safety Harbor Amateur Radio Club involvement

thanks and gooday

P S. ham with a extra license - where do you get the info from about be whe are you to make such alligations
---

On Saturday, the 14th of August, 2004, we in the Tampa Bay Area breathed a sigh of relief. We had been spared by the fury that was Hurricane Charley. Others among us had gone into action, providing aid and comfort for the Floridians that had not been spared. Among those groups were the members of the Amateur Radio Community. Radio Amateurs, also known as HAMS, are specialist in providing emergency communications to areas that have been ravaged by disaster.

Some of the operators that responded to the emergency were members of the newly formed Safety Harbor Amateur Radio Club (S.H.A.R.C.). Members served in Hardee County, assisting with the restoration of emergency communication. We also worked with the Salvation Army, providing communication to co-ordinate assistance for victims in the effected area. Our efforts were a small, but important, part of a major assistance operation conducted by the Tampa Amateur Radio Club.

Most public service communications today are heavily reliant upon land-line telephone, cellular telephone, and fax systems to conduct routine operations. In disasters such as hurricane (or even power-outages), these systems fail. Subsequently, police, fire, and other public service radio channels become rapidly saturated. Amateur radio operators are capable of providing such agencies with a complete back-up radio communications system with many additional channels. Furthermore, they is capable of using radio frequencies instead of phone lines to transmit computer data (through radio modems, a.k.a. "packet radio").

Although HAMS consider their vocation a hobby, they all know there is a serious side. We are experts at creating radio communication where none existed before. HAMS also provide communication for all types of

special events. Event co-coordinators have only to ask.

At the present time S.H.A.R.C. meets on the first Tuesday of each month at the Paradise Restaurant on Main Street in Safety Harbor. For more information about the club, or Amateur radio in general, you can call Bill at 726-0203, or email sharcmail@tampabay.rr.com.

==========

Thankyou for your interest in "The 64 Newsline".
This newletter contains news that may be of interest to the users of the Tampa Bay N9EE,146.640 repeater.
==========
If you have anything to share with the 64 Ham community you can send it here to be sent to our mail list.Any mailings sent here become property of the Editor and will be sent out as soon as possible.

Don't know what Kock is, but.

If you can, run the letter speed up higher. I squeaked by the high octane
Extra just before they diluted it in, what 2001? & can copy 22WPM _random
characters_ if the letter speed is at 30. This is called "Farnsworth" or
maybe other names, and it gives your brain more time to process.

Force yourself to "copy behind". We have a sort-of sound buffer in our heads and it is possible to be processing and writing the letter which is 2, 3, 4 letters in the past. "HOUSE" you are writing "H" when "S" is coming in. I think this will help alot if you can do it.

You will then be able to hear letter *combinations* as one sound.

Don't write the little stuff "the", "and" stuff like that.

If you can find someone to practice with it'll help a lot also. You both won't mind each others mistakes and trying to actually transfer information adds a lot of interest. If you have a ticket already, code practice oscillators (or something improvized) on a quite frequency or just on the phone can be fun.

I prefer to work around 13-15 WPM. I get on 3-4 times a year. When I am copying someone at 7-10 WPM it seems really slow. When they send "the" it's a pain since I have to copy and write each letter (Yes I have to write it) If they were to send it at >= 20 WPM, I'd hear it all as one thing. I just recognize it easier. I only have a few of these. My Dad called this "having a vocabulary".

It's really weird to realize you can copy a whole word...particularly since I am not a very good CW op. If I get flustered, down the tubes I go and miss a lot. I have to be in the right mood. Sometimes it seems quite easy, and sometimes it is a real chore to copy.

You do realize that the scheme, and it is the right way, is that while
the characters are sent at a fast rate the spacing between characters
is such that the words per minute is fairly low. This way, you start with
hearing the rhythm of the letters rather than the dots and dashes, but
you are indeed starting at a slow speed. You slowly reduce the spacing
between characters, as you get more capable.

So my suggestion would be to increase that spacing until you get good,
and then start decreasing it.

This coming Sunday....

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday September 19th 2004
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

This link simply gives a link to the United States Postal Service to
calculate postage from the US to the target foreign country. It does not
give postage from the foreign country to the US or from one foreign country
to another.

The same way you get to Carnegie Hall - practice, practice, practice.
After a while, instead of recognizing individual characters, you start to
recognize word patterns.
I'll bet you already recognize the rythm or pattern of some words - like the
word "the" - or your name.
or the word "name" the word "is" etc.... it'll be like listening to someone
talk. - where you don't need to write it down.

If you keep posting your nonsense, you'll find out COQueer.

The news you posted is no longer news. People read newspapers, and
have access to superior web sites other than your mindless flab. Why
do you even bother to post this crap? You NEVER answered this,
NEVER!! Does anyone actually care?

I see you're no longer using your alias Don Roselli/KG4COQ. What
balls.

QRZ Updated: 2002-12-14 11:00:14

Looser # 1 Gary - just cant get a clue - that is all I have to say about such a total jerk. Gary so high on the looser list that he is not worth wasting my time

Looser # 2 - Mr John Greene, this guy is such a jerk, he hags out on the 146.67 machine. is best friends with the retarded guy KD4VLX Greg and always bashes our wonderful 146.64 machine, Ron and all the users of the machine. then gets on the 146.64 machine and talks to everyone like they are his friends. John is a 2 faced a**hole and needs to go away from our 146.64 croud

today and seen below we also would like to welcome and announce some of our newest calls on the 146.64 machine

Hi!

Is there anybody out there than can send me a mail with firmware version 6.0
for Yaesu FT-1000(D)?
If so, I will be very happy :-)

Please use this e-mail address: oz1bv(a t)oz1bv.dk

Best 73 de OZ1BV, Brian

1237. FS: Fluke 73III DMM & T5-600 Ammeter

Amateur Radio Newsline™ Report 1414 September 17, 2004

Amateur Radio Newsline report number 1414 with a release date of
Friday, September 17th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio meets hurricane Ivan. Find out
the details on Amateur Radio Newsline report number 1414 coming your
way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO VS. HURRICANE IVAN - IN THE CARIBBEAN

Last week it was Frances. This week it's Ivan. Bother killer
storms
that took lives and destroyed property across the Caribbean before
making landfall on U-S shores. And as has been the case s many times
this year, ham radio was ready. Our team coverage starts here:

--

I'm Henry Feinberg, K2SSQ:

--

" The eye center of hurricane Ivan was located near latitude 17.9
North and longitude 78.7 West, or about three-zero, thirty miles or
five-zero, fifty kilometers South-West of the Western tip of Jamaica
and 190 - one hundred and ninety miles or 305 kilometers
East-South-East of Grand Cayman"

--

That was a warning relayed over ham radio in the Voice over I P
Hurricane Watch Net. Hurricane Ivan had hit Jamaica with wind speeds
near 155 mph. And as the storm approached, hams involved in the
Hurricane Watch Net relayed up to the minutes reports to the National
Hurricane Center in Miami:

--

"...wind speed sustained at 80 miles per hour. Gusts to 100
miles. Is
getting horizontal ran. Skies are darkening rapidly..."

--

The killer storm had already been blamed for at least 64 deaths in the Caribbean, including 34 in Grenada. It hit Jamaica on Saturday, September 11th packing winds close to 165 mph. In downtown Kingston, 20-foot-tall trees were uprooted, some flung onto the roofs of cars, and twisted metal roof panels strew the streets. At least 11 people were killed as the storm blew across.

Now on Sunday the 12th, reports were coming in from Ivan's next stop.
From the few hams in the Cayman Islands who were riding out the storm on the air using whatever gear they had that would run on emergency power:

--

"Zed-F-one kilo oscar has come up a couple of times reporting flooding
in areas that have never flooded before in a hurricane. They have some intermittent cellular telephone service. The land line phones are down and a lot of flooding. VP5DB with the Hurricane Watch Net."

--

Then there was this dramatic report to the Hurricane Watch Net from a crew member of the British Royal Navy ship Richmond that was anchored not far off shore. The Richmond had cut short her visit to Curacao to standby to assist islands devastated by Ivan:

--

Audio only. Hear it at http://www.arnewsline.org

--

Category 4 and 5 hurricanes can cause buildings to collapse, destroy mobile homes and flatten trees and road signs. Such storms are accompanied by a surge of sea water and require evacuation of low-lying areas within 5 miles to 10 miles of the shore. Normal lines of communications are almost always cut and this was the case with Ivan. And broadcasters in the Caribbean who were able to stay on the air had their reports passed to the outside world using ham radio. Stations like Wenty Bethune, 6Y5IC, who had survived Ivan' rampage on
Jamaica and was on the air from Kingston using battery power:

--

"We cannot confirm it, but we understand that there are people in the
Caymans standing on their roofs shouting for help. Sounds like a traumatic situation in the Caymans. This is coming off FM radio about an hour ago. QSL?"

--

6Y5IC said that he was also handling traffic into and out of the storm ravaged area. He added that he could probably operate for about to weeks using batteries.

Now Ivan was on a direct path toward Cuba. This, as Florida residents braced for a third storm to hit the state in a month. And on Monday the 12th a strengthened Hurricane Ivan headed toward the tip of western Cuba with winds in excess of 160 miles per hour:

Ivan bombarded western Cuba with the full fury of a category 5 hurricane. It damaged hundreds of homes and swamped at least two towns. The storm was so vast that its clouds simultaneously covered Cuba, the Florida Keys, the entire Florida peninsula and parts of the Bahamas, Mexico, Belize and Honduras.

Florida expected the worst. But after passing Cuba Ivan kept traveling West into the Gulf of Mexico. And even as Cuba was being hit hams on Mexico's Yucatan Peninsula like Juan Berndes, XE3AAF, were
checking into the Hurricane Watch Net to report that Ivan was being felt:

--

"Roger, OK. I can only tell you that we have been having squalls
--
intermittent squalls all throughout the morning, and that's about it.
That's the information I can give you at the present time.
Over"

--

Now, a hurricane watch was in effect the entire Florida panhandle and as far west as Louisiana, including New Orleans. Ivan, still a category 4 killer storm was on his way to the U-S mainland. I'm Henry
Feinberg, K2SSQ. (ARNewsline(tm))

RESCUE RADIO: HAM RADIO VS. HURRICANE IVAN - LANDFALL

I'm Bill Pasternak, WA6ITF, continuing our coverage of Hurricane Ivan.

Packing gale force winds, Hurricane Ivan slammed ashore near Gulf Shores, Alabama in the wee hours of Thursday, September 16th. Anticipating the storms arrival, Alabama, Florida, Louisiana and Mississippi had declared states of emergency a day earlier. A last minute shift spared New Orleans a direct hit but some 360,000 homes and businesses were without telephone service or power in Alabama, Louisiana and Mississippi. And throughout it all, ham radio operators did their part by passing health and welfare traffic, damage assessments and those very important storm position reports:

--

"Repeating the 4 a-m CDT position: 30.9 North, 87.7 West.
Movement
toward the North near 214 miles per hour. Maximum sustained winds near 115 mph. Minimum central pressure 947 millibars."
--

Notice something interesting about that audio? The station reading that report is not in the continental United States. In fact he's thousands of miles away in Australia. But thanks the latest technology developed by hams -- a service called The Internet Repeater Linking Project -- Amateur Radio operators anyplace in the world can pitch in to help when there is an emergency like hurricane Ivan.

But long before the storm made landfall residents of the Gulf States and the nations ham radio community were preparing for the its arrival. On Wednesday the 15th, some highways were converted into one-way evacuation routes. This, after authorities from the Florida panhandle to Louisiana ordered wholesale evacuations of low lying areas. Everyone from New Orleans east to Apalachicola, Florida was on alert because even the tiniest change in the storm track now could move the location of the storm's landfall by hundreds of miles. And after taking a day off to regroup, the Hurricane Watch Net on 14.325 MHz again sprang to life. Some of those checking in were directly involved in storm relief efforts:

--

"Kilo Delta 5 Golf Golf Lima north of the Coast. I'm
operating the
Operations Center at Camp Shelby, Mississippi. Over."

--

Even though the storm was still well out to sea, it did not take long for reports from hams in Ivan's target area to begin flowing in.

--

"Kilo Charlie 5 Romeo Fox Uniform. What is your traffic?
Over"

"Thank you very much. The name is Paul and I am in Ft. Walton
Beach,
Florida. Ill give you the coordinates. Latitude 30.44 North.
Longitude 86.62 West. And the Barometric Pressure is 29.79 and
falling. The winds are estimated at coming from the
East-South-East."

--

Now it would be a waiting game for residents along the gulf coast as
they waited and watched as hurricane Ivan roared toward them with.
When Ivan did make landfall it lashed southern Alabama with 135 mph
winds and threatened much of the Gulf Coast with surging flood waters.

--

"This is K5PSB with the Salvation Army Team Emergency Net looking
for
stations with traffic in the affected areas of the Caribbean or the
Gulf Coast. Ill take anybody that I can hear. K5PSB."

"W-A-0-Lima Sierra Bravo."

And the latest advisories from the National Hurricane Center show that
Ivan still has a lot of destructive force left. The latest storm
track as of noon, Thursday September 16th shows Ivan heading
North-North-East through parts of Georgia, Tennessee, Kentucky and
Ohio as it downgrades in intensity and begins to fall apart. But
falling apart may be a bit of a misnomer because even then a hurricane
can continue to be a destructive force.

But even as Ivan is weakening, yet another storm is gaining strength.
Hurricane Jeanne intensified as it made its way to the Dominican
Republic after hitting Puerto Rico on Wednesday. Jeanne is moving
west at about 9 miles per hour with maximum sustained winds of 80 mph
and will likely be the big ham radio story, next week.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The hurricane, one of the strongest on record to hit the region, has
killed at least 65 people. With the hurricane season not yet over
these hams could be kept busy for some time to come. (ARNewsline)

(Note: Audio of Hurricane Ivan communications was recorded off-air
and from Internet relay feeds. Our sincere thanks to the may hams
world-wide who supplied them.)

**

RESCUE RADIO: SOCAL SHADOW DRILL

Out on the U.S. West coast, twenty-five city of California's
Huntington Beach Radio Amateur Civil Emergency Service volunteers
participated in a simulated city-wide Emergency 911 system crisis on

Saturday, August 28th. Called the "Shadow Drill," radio volunteers received 9-1-1 calls and dispatched fire department equipment and personnel for an eight hour shift.

The objective of the drill was to provide an alternative dispatch communications system to all Huntington Beach Fire Department resources, including hazardous materials, ambulance and fire response apparatus. This was the third year in a row that Huntington Beach RACES performed the Shadow Drill for the city. (KH6WZ)

**

THE BPL FIGHT: PHILLY MAY GO NON-BPL WIRELESS

Philadelphia says it's looking to have wide spread Internet access available over the next few years, but it likely will not be B-P-L. This, as the City of Brotherly Love looks to create a 135-square-mile wireless network instead. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the rest of the story:

--

Philadelphia's Mayor John Street has a vision to turn this community of historic and diverse neighborhoods into a Digital City. And, he's not looking at Broadband Over Powerline Internet Access to do it.

Instead, Mayor Street, a big fan and user of technology - he carries his own Blackberry everywhere - sees the wireless world as the way to go. And, he's committed a task force to explore an estimated $10 million investment in the idea.

Mayor Street's chief information officer is Dianah Neff.

"Outdoor wireless has come on the scene and has presented an affordable entry point to create a dense, cellular mesh network that would act like an umbrella over the city," Neff explains. "And it's a transport, it's an outdoor transport that would allow wireless access that then goes to the Internet for all people in the city."

Neff says users of the system would have easy access. She notes one test site near City Hall is being getting great reviews.

"You can access it through a lap top, through a PC tablet through a hand-held device," Neff says. "You would log on, put in your code to the system. And in the case of Love Park - which is a hot spot now - it's free.

"All you have to do is go on and register. And then you get a connection out to the Internet."

Neff says the plan proposes to attach transmitters/receivers atop light pots.

"The best place to mount these in the outdoors is on the light posts because you need a power source," Neff says. "You could mount the

radio antennas actually on the light posts which reside in the public right-of-way which is owned by the government.

"And that's why this has to be a public-private partnership and there's limited space on there you can't put a dozen companies' wireless device.

"But if you had this infrastructure that anybody could either pay to connect in for profit or ride for free, based on criteria that will be established, you would be able to do it."

Neff says the system would be "hot" for outdoor use. But there is equipment available to bring the signal indoors.

"There are devices that can be placed in your window to bring outdoor wireless," Neff says. "If your proximity is close to a fixed-wireless outdoor point, you may be able to get it in your house.

"And, so we see that there's a great opportunity to be able to go either out onto your front porch and log on into a wireless environment outdoors, or through a device, if you want to bring it into your home, to all rooms in your home.

"That may be one of the fee-services that would allow us to sustain the system."

Neff says the task force is looking at a couple options in terms of fees.

"The mayor is committed to providing some level of free access whether that's in public outdoor areas or as a low cost to everyone," Neff says. "There has been a committee that's been formed - the Wireless Philadelphia Executive Committee - they're looking at fees, roles and responsibilities in the investment and the sustainability of the system."

Neff says the committee will deliver a report to Mayor Street by December. After that, bids will be sought and Neff says she'd like to see several neighborhoods up and running a few months later.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Philadelphia hopes have the whole network in operation sometime in 2006. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being

relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ENFORCEMENT: LETS MAKE A DEAL - FCC STYLE

The FCC has accepted an offer from an Iowa ham to turn in his Amateur Radio license in order to avoid having to pay a $12,000 fine. It did so in a September 7th Memorandum, Opinion and Order that partially granted a June 6, 2003 Petition for Reconsideration filed by Scott E. Kamm, N0UGN, of Sioux City.

Back on May 7, 2003 the FCC issued a $12,000 Forfeiture Order to Kamm for what the agency said were willful violations of several sections of its Amateur Service Part 97 rules. The Commission said that the offenses involved intentional interference to communications on 146.31 MHz, the transmission of music on an amateur station, and failure to identify an amateur station by call sign.

The FCC says that in support of his Petition for Reconsideration that Kamm offered to immediately withdraw his pending application for renewal of his license. He also offered to refrain from applying for any other license for a period of five years.

The FCC says that it agrees to this offer. As such it concludes that cancellation of the $12,000 forfeiture was warranted. (FCC)

**

ENFORCEMENT: $10000 PAGING FINE AFFIRMED

The FCC has affirmed a $10,000 monetary forfeiture to Jeffrey Amedro of Morgantown, West Virginia. Amedro does business as Cell Page and the FCC says he has racked up a number of violations. Cathy Anno, KB0FDU, reports:

--

The FCC says that it issued the fine for what it calls willful and repeated violation of Section 301 of the Communications Act by Amedro's company Cell Page. This, by operating radio transmitting equipment on the frequency 157.740 MHz without FCC authorization to do so.

On September 5th, 2003 the District Director of the Commission's Columbia, Maryland Office issued a monetary forfeiture in the amount of $10,000 to Cell Page. Cell Page did not contest the violation. Rather in its October 16, 2003 response, the company requested a reduction or cancellation of the proposed forfeiture.

Presumably, intending to claim its inability to pay Cell Page stated that it had been in contact with a certified public accountant to complete its tax returns. Once completed, Cell Page states that it

would forward three years of tax returns to the Enforcement Bureau by approximately October 31, 2003.

The FCC says that as of its decision to affirm the fine, neither Amedro nor Cell Page has submitted the company tax returns. Without the appropriate financial documentation, the FCC says that it can not consider Cell Page's claim of inability to pay. So it is now denying
the request by Cell Page for reduction or cancellation of the fine.

For the Amateur Radio Newsline, I'm Cathy Anno, KB0FDU.

--

The fine against Cell Page was affirmed on September 7th. Amedro was given the usual 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: CLEANING UP INTERFERENCE

The FCC has written to Andrews Cleaners in Andrews, Texas. This to tell proprietor Andrew White that he regulatory agency has received complaints that equipment at the business may be causing harmful radio interference to a local ham radio operator.

In its letter, the FCC tells White that the agency has the responsibility to require that such problems be rectified within a reasonable time if the interference is caused by faulty consumer equipment. It also suggests that he might want to contact the ARRL for guidance about radio interference that involves Amateur Radio operators. (FCC)

**

HAM RADIO IN SPACE: SIGNALS BOUNCED OF THE GENESIS RE-ENTRY

A group of ham radio operators have successfully bounced signals off the ionized trail of the Genesis space probe. This, as it re-entered the Earth's atmosphere on September 8th.

According to Robert Brown, KR7O, several stations trying to be heard off the probes fiery trail were monitored at his QTH from 1552 to 1600 UTC. This is part of what Robert heard:

--

Backscatter audio

Robert says that all signals heard were on 144.200 MHz in the 2 Meter band. Among them were KC6ZWT and WA6KLK who were using voice. There were also others trying to make the path using CW. K7RO adds that KC6ZWT reported hearing Robert's signal over the same backscatter

ionized path. All of the stations involved in this test were located in California. (K7RO)

**

DX

In D-X, BB2RS reports that a group of Japanese amateurs are operating from Sri Lanka as 4S7DUG from September 18th to the 23rd. Activity is on 160 to 6 meters with an emphasis on the lower bands. They plan to have four stations active simultaneously. (GB2RS)

And F4DZY is active from Corsica stroke TK through the 22nd of September. Look for him on the High Frequency bands using SSB and QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: HAM RADIO, HURRICANE FRANCES AND THE PRESIDENT OF THE UNITED STATES

And finally this week, the story of hurricane Frances, some ham radio operators who helped to keep a local commercial station on the air after the storm and two who met with President Bush on his recent tour. Joseph Lenartiene, KD4BTD has the rest of the story:

--

Pres Bush: "I want to thank the Emergency Operations Centers all across the state of Florida, the first responders, Police and Firefighters, the people working long hours here, I want to thank the Red Cross"

--

While President George Bush did not mention Amateur R radio Operators in his national Press Conference held on Wednesday, September the 8th, He did the next best thing while visiting Florida's Treasure Coast
that day when he shook hands with Bruce Reid, K9SHT and Lee Kaufmann KG4BYG at the St. Lucie County Emergency Operations Center in Ft. Pierce Florida.

--

Kaufmann: "Well we had two special visitors today, we had The President and the Governor both came in. The one nice thing is that he greeted everyone here: He didn't just walk by. He came in, said
hello and saw the ham station in the shelter here and even was aware of what we were doing."

--

Other than the President stopping by, thing were pretty normal at the EOC Ham Station according to Lee.

--

Lee: "I was running communications between the EOC and the shelters
and today was a little bit calm but yesterday was busy sending messages. I think we had somewhere in the number of a hundred messages back and fourth between the shelters."

--

Not the most glamorous work but as expressed by St. Lucie County EC Ernie Marques, KF4IHX, very Satisfying.

--

KF4IHX: "We had a busy last 6 days. We've handled over 350 pieces of
traffic during this emergency and we're very pleased because for a brief period of hours, ham radio was the only link between our shelters and we proved a point that Amateur Radio can get through when nobody else can."

--

While Frances stayed awhile to visit St. Lucie County, The Special Needs Shelter felt the wrath and when the need came to find a new QTH for the evacuees, (Sound of a Nextel) not Nextel but N9SRO answered the call.

--

N9SRO: "The Special Needs Shelter needed someplace to relocate because they had sustained some damage during the Hurricane. Nextel's
were a no go after the storm but I was able to facilitate communications via the ham radio to get that move started."

--

Hurricane Frances officially made Landfall in a town called Sewall"s Point in Martin County Florida. The next County south St. Lucie. While Amateurs down there did much the same from their EOC, A few did more. Louie Delonoy, K4LOU, Helped put Martin Counties Radio Station, back on the air.

--

K4LOU: "Martin County had been telling people all day Friday on their
Billboard to tune to WSTU for the latest news. Now there comes Monday Morning and they're off. I called Ben, N4BG and he tells me chances
are they took a major hit. I come up, he takes me around to the back,

and here's their tower on top of the dish with the two STL feeds
on
them. You know, sitting on the roof. So I go up there and inspect it
moved everything around and Boom, they're on the air."

--

And Port St. Lucie Broadcasters Vice President Greg Wyatt
couldn't be
happier.

--

Wyatt: "We now have the Louie, Ben, and Jerry show here at WPSL,
WJNX, and WSTU. Between the three of em, they managed to get two
radio stations on the air in 5 hours and now the third one today. I
tell you, its mind boggling."

--

Although it was far from over for Florida thanks to Hurricane Ivan,
Amateur radio on Florida's Treasure Coast has returned to what it
was
before the storm. The major lesson learned here was the need for
relief after the storm. And that's what Treasure Coast Hams are
ready
to do for those affected by Ivan.

For Amateur Radio Newsline, I'm Joe Lenartiene, KD4BTD, in Ft.
Pierce
Florida.

--

Joseph Lenartiene, KD4BTD, is with WQCS FM in Ft. Pearce, Florida.
(KD4BTD, ARNewsline(tm))

Lots of stuff for sale.....

1ea. TPN5522A Power supply/charger, 110v input/14vdc, 8A output, for Darcom Moscad telemetry units, has a couple cables to go with it. Looks new, Listed at $725

1ea. FUD1700A Jedi Adapter for Darcom Moscad telemetry units, one cable and one accy port adapter, excellent cond. Listed at $240

Taking offers and info on above.

1ea. TRN5768A Quantar decoder board, new in box, $125

1ea. GE MP-D VHF handheld, 19B801501P4, Full keypad, Good cond, radio, battery, rapid charger. <may or not have lapel mic> $175

1ea. GE PCS VHF 8ch. handheld. PC1H3A08, good cond, radio, batt, rapid charger, $100

1ea. GE MPI handheld, 2ch VHF, good cond, radio, batt, charger, $60

15ea. MT1000/P200 rapid chargers, mix of gray/black, excellent cond.
2ea. MT1000/HT600 standard chargers, excellent cond.

1ea. SHINWA SO756C rapid charger
4ea. STANDARD rapid chargers, CSA531A, HX482/582, maybe others.
1ea. UNIDEN APX114 Rapid charger

All chargers above are in very good to excellent condition, some dirty, etc, $20ea.

1ea. rapid charger, NLN7175A for EXPO radios, exc cond. $40

Several Misc HT220 Omni, HT90/440, MT500 and other maybe, just email if you have a specific model number you are looking for. I DON"T KNOW what some of these fit. $10 each.

6ea. MT1000/HT600 clip/slide in holsters, fair/dirty, missing lanyards $15 for all.

3ea. MT1000/HT600 type lapel mics, strain reliefs dry rotten, cords good, good cond/dirty, $30 all.

2ea. MT1000/HT600 Public safety SP/Mics, strain reliefs dry rotten, 1 cord good, I with splits, good cond./dirty. TNC connector and small switch on top. $30 both.

2ea. Uniden Force mobile/base hand mics, $25 both.

1ea. Johnson mobile/base hand mic, 13pin quick connector, appears new, but has white powdery stuff on the cord, packing powder?? Could be cleaned. Excellent condition. $25

5-6 VHF antennas for MT1000, HT90, other...? Good cond, $15 all.

Uniden mobile speaker and MastrII mobile speaker, excellent condition, no end connections, $15 both.

Pics available for the serious buyer, paypal or money order, Uship.
thanks,
Randy

PS: No third world, western union, village-computer-using, low-life-no-good tazmanian pus toad lookin', greasy fingered, chicken bone suckin' fake check printin' bottom-feeders need apply. Tnx.

1243. Google no longer archiving groups

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-18 09:34:15 UTC
From: eas90168@aol.com
Message-ID: <4b031b96.0409180134.1cd6e42@posting.google.com>
Source record: 56455

Hello Everyone!
I sure hope I am posting in the appropriate group. Over the last few days, Google is no longer archiving several Rec.Radio newsgroups. For example, Google is no longer allowing me to see current posts in the following Radio newsgroups;

rec.radio.
rec.radio.amateur
rec.radio.amateur.digital
rec.radio.amatuer.packet
rec.radio.amateur.swap

Anyone else having the same problem with the newsgroups via Google? If you are not using Google and can still see current dated messages in the above groups, please let me know how you are doing it.

Eric N7DLV

For the code test, sending is NOT required. Today there are only three levels of license: Tech, General, and Extra.

Tech: Must pass the element 2 written test. Gives you all privileges above 30 megaherz. If you also take the element 1 code test (5wpm, receive only), you will have the old Novice HF privileges in addition to your VHF/UHF privileges.

General: Must pass element 1, element 2, and element 3 (a written test).

Extra: Must pass element 1, element 2, element 3, and element 4 (a written test).

Note that the Tech license gives you credit for element 2. The General license gives you credit for elements 1, 2, and 3. In other words you don't have to retake an element for which you have credit. If you can find your old Novice ticket, it will give you credit for element 1 even if expired. However higher class tickets that have expired don't give you credit for anything.

The Advanced ticket is no longer being issued so to get the privileges you used to have as an Advanced, you may want to go for the Extra. It is possible to do this in one test sitting if you are prepared as you can take the next test as soon as you pass the previous test. You don't have to wait for your ticket to test for higher classes.

Study guides can be obtained from the ARRL (www.arrl.org) and W5YI (www.w5yi.org). The ARRL guides explain the material quite thoroughly plus include the question and answer pool. The W5YI study guides simply give the question and answer pool with very brief explanations. For those who have never been a ham, I recommend the ARRL set of guides. In your case, perhaps the W5YI guides might be sufficient. Note that the question and answer pools are publicly available. In each case the pool of possible questions is several hundred but only 35 questions are on the Tech and General tests while there are 50 on the Extra test. You can take practice tests online (see www.eham.net and www.qrz.com). The practice tests are randomly generated so no two are alike. You might want to try them while you wait for your study guides to arrive to see where you stand and what material you will need to review more intensely

They will also have lists of test locations, contacts, and local clubs. However, since many clubs only publish their test schedule locally, you might want to find a local club and get information on the availability of tests in your area. If they don't list one in your area, simply do a web search using the name of your local large city and the words "amateur radio." If your are in the San Diego area, search for SANDARC. They are an organization of clubs in that area and do their own testing, i.e. they are a Volunteer Exam Coordinator (VEC) themselves and so do not go through ARRL or W5YI and will not be listed on the latter web sites. However all VECs use the same question pool to generate exams so the study guides for one are valid for all.

>
> Eric N7DLV

There's no good reason for most of those to be archived. They aren't
legit newsgroups.

> rec.radio.
This is to mark a sub-hierarchy. There shouldn't be anything at
that level. On the other hand, anything below it could not exist
unless "radio" was there.
> rec.radio.amateur
Likewise, this doesn't exist. What you'd be looking for, you've
already found, rec.radio.amateur.misc
> rec.radio.amateur.digital
Again, a placemarker. When it was created, they wanted room in
case there were other digital modes that deserved a separate newsgroup.
That has yet to happen, so it's all lumped into
rec.radio.amateur.digital.misc
> rec.radio.amatuer.packet
I don't know how this one existe, likely a rogue newsgroup creation
message.
> rec.radio.amateur.swap
This has never been a legit newsgroup. The proper one has always
been rec.radio.swap because people often swap or sell things that
aren't restricted to one of the radio hobbies. Thus it's part of
the sub-hierarchy that includes rec.radio.shortwave and rec.radio.cb
and the whole rec.radio.amateur.* subhierarchie.

There is a formal process to creating newsgroups, and proper naming is an important part of that. But sometimes individuals do send out creation messages, and some newsservers do accept them. So you can get odd newsgroups created at some sites, but they never account for much since few sites carry them, and they can't propogate properly.

In other cases, people don't understand the naming process, and guess at newsgroups, which sometimes does seem to cause them to be created at some sites. But take note that this pretty much happens only because someone is cross-posting, and they throw in the kitchen sink, including newsgroups that shouldn't exist. On some sites, they may be treated as separate newsgroups. And of course, when that sort of cross-posting happens, it fools people into thinking they are legit newsgroups, and those people may themselves start adding them in.

If you check the deja/google archive, pretty much all of the messages in those newsgroups will have been cross-posted. Any that are actually just posted to one of those newsgroups likely originates from google; in effect they keep the illegitimate newsgroup alive by archiving it. They will also show little traffic, which is probably the reason google stops archiving. A quick glance shows lots of junk in them, proving that they aren't being used, even if they were legit enough to be used.

There is no loss from them not being archived, since few would be able to post to them separately, and they were not legit newsgroups to begin with.

TEW will be busy supporting Hero Kerry in his quest to dump Bush. TEW is a
blind-eyed Democrat who cannot see the forest for the darned trees.
AB8MQ will be busy cruising the playgrounds and posting his usual filth on
the NimBusters board.
KK4TL will whistle Dixie while claiming innocence in all of this.

Meanwhile, the Cedartown Stalker will march ever onward and forward. Take
your phones off the cradle between 0200 and 0600.

Lloyd will be presenting the entire group with undeliverable pizzas at half
price. Drinks are extra.

Geno is invited, too. Geno's presence causes Roger's blood pressure to climb
by twenty points, cystolic. With luck, Roger's heart will blow up.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2004 DX MAGAZINE'S MOST WANTED SURVEY. Once again the "DX Magazine's" annual "Most Wanted Survey" is being conducted now through October 31st. The survey is open to all DXers, and the form is available on the Web at: http://www.dxpub.com/dx_survey2004.html

Look for the results published early next year 2005.

3Y, PETER I ISLAND (DXpedition Team 3Y0X Announces Major NCDXF Sponsorship Grant). From Chicago, on September 18th, the 2005 Peter I (3Y0X) DXpedition Team announced that it has been awarded a major sponsorship grant by the Northern California DX Foundation, Inc. (NCDXF) [see NCDXF below]. The press release states, "A multinational team of twenty operators and one explorer, led by Antarctic DXpedition veterans Ralph Fedor, K0IR, and Bob Allphin, K4UEE, will activate Peter I Island between 14 January and 10 February, 2005. Other team members come from France, Norway, Russia, Switzerland, Finland, Australia, The Netherlands and the United States, and possess significant DXpedition and Antarctic experience. The Chilean registered vessel Antarctic Dream, and its dedicated helicopter, will be supporting the group for their entire journey.
'This DXpedition is funded principally by the contributions of its twenty-one members plus this very generous grant by the Northern California DX Foundation,' said Bob Allphin, K4UEE, co-leader of the DXpedition. However, because of the extraordinary cost of chartering the Antarctic Dream to travel safely to and from this remote location, additional assistance is still being sought from the world-wide DX community."
For further information on the Peter I DXpedition, and how to contribute to the success of this DXpedition, go to: http://www.peterone.com

7X, ALGERIA (Update/Change in Callsign). Luis, EA5KY, editor of El Mundo del DX in the Radioaficionados, official bulletin of the URE, informs OPDX that operators Angel/EA1QF, Pere/EA3CUU, Paco/EA4BT, Emilio/EA7AAW, Julio/EA7JB, Juan Lucas/EA7TL and Ramom/EB4EPJ will be active from here October 2-9th. Callsign will be 7W0AD, not 7X0AD as first announced. QTH QSL is via EA4URE.

AMSAT ELECTION. As a result of the 2004 AMSAT Board of Directors elections, Thomas Clark/W3IWI, Louis McFadin/W5DID and Paul Shuch/N6TX will serve on the Board for two years. The first alternate is Bruce/KK5DO and the second alternate is Stephen/W4EPI.

ANTARCTIC OPERATIONS (VP8, VP8/G and VP8/O). Mike, GM0HCQ, who has operated from Antarctica since 1990 and works as a ship's Radio Officer onboard the BAS vessels, has informed OPDX of his forthcoming trip to the Antarctica onboard the British Antarctic Survey vessel RRS James Clark Ross. The vessel sails from the UK on September 22nd, and he will operate as GM0HCQ/MM for the trip to the Falkland Islands (VP8). His Estimated Time of Arrival (ETA) is October 20th. From there Mike will then opearte as VP8CMH/MM while onboard the ship. All being well, Mike will also operate from the following bases:
1) Signy Base, South Orkney Islands. Callsign will be VP8SIG. The proposed dates are October 26-31st.

2) South Georgia. Callsign will be VP8SGK. The proposed dates are November 2-7th and November 18th.

3) Rothera Base, Adelaide Island. Callsign will be VP8ROT. The dates are December 7-12th.

All the dates are provisional and may well change for operational reasons. Operating from the bases also depends upon Mike's workload onboard the ship and the work that is being carried out at the base during the ship visit. Mike states, "I hope this year to be able to operate on CW from Signy as I will be taking my Ten-Tec Corsair with me. Normally I use the base equipment, but Signy does not have a CW facility." Mike advises OPDX that he will be publishing information regarding the operation from the bases nearer the time via his Web site at: http://www.gm0hcq.com

C9, MOZAMBIQUE. Operators Joe/AA4NN and Chuck/W4GMY will be active as C91F in the CQWW CW Contest (November 27-28th) as a Multi-Single/All-Band (160-10m) entry. QSL via AA4NN. Pre-contest activity (November 24-26th) will be CW only. Joe will sign C91NN and Chuck will sign C91CG.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Branch Manager, reports that the following operations are approved for DXCC credit:
4W4JEG - Timor-Leste from October 7, 2003 to June 30, 2004
T6RF - Afghanistan from July 1, 2004 to August 31, 2004
TT8KR - Chad from September 7, 2004 to September 14, 2004

EL2, LIBERIA. Pat, EI5IF, who is currently serving with the Irish Army contingent in Liberia has finally succeeded in obtaining a Liberian licence. Listen for him over the next three months using his new callsign EL2PM.

EM0, UKRAINE (Special Activity). The club station of the "Ukrainian State Centre of Radio Frequencies" will be active as EM0ITU during the period September 20-24th in connection with holding the ITU workshop at the "ITU Centre of Excellence" in Kiev, Ukraine. QSL via UT3UZ: Alex Arbuzov, P.O. Box 240, Kiev-232, 02232, Ukraine.

EUCW EVENT POSTPONED. The "Club Francophone Telegraphiste" (CFT, Belgian CW Club) announced that the first contest organized by the "European CW Association" (EUCW), which was scheduled for September 19th (this past weekend), has been postponed to avoid interferences with the Scandinavian Activity Contest which has taken place for years on the 3rd weekend in September. A new date has been announced for the EUCW Contest event, so please mark your calendar as follows: The Contest will happen November 11th, from 0500-1500z. This contest is "Open", so all EUCW Clubs members and all the other are welcome and invited to enter this competition. For more information and rules, please visit the CFT Web pages (available in French, English and Flemish languages) at: http://www.on5cft.be.tf/

EY8, TAJIKISTAN. Nodir, EY8MM, plans to be active in contests over the next few months. His contest schedule is as follows:
CQ/RJ DX RTTY Contest (September 25-26th) - Single-Op/Single Band (20m) - Possibly an all bands entry - Depends on his
time for antenna work.
CQ WW DX SSB Contest (October 30-31st) - Single-Op/Single Band (20m) or Single-Op/All-Band entry.
CQ WW DX CW Contest (November 27-28th) - Single-Op/Single Band (20m)

or Single-Op/All-Band entry.
QSL all via K1BV. Nodir's Web page can be viewed at:
http://www.qsl.net/ey8mm

FT/X, KERGUELEN ISLANDS (Microlite Penguins DXpedition Team Press Release). From Singapore, on September 19th, the Microlite Penguins DXpedition Team announced that it has been awarded an exclusive sponsorship granted by the Northern California DX Foundation, Inc. (NCDXF) [see NCDXF below], thus enabling the planned 2005 DXpedition to the Kerguelen Islands (FT/X). The press release states: "A multinational team of twelve highly experienced operators from France, Ireland, Switzerland, Canada, Australia, Singapore, South Africa and the United States will activate Kerguelen on the HF bands between 15 March and 02 April, 2005. The New Zealand registered vessel Braveheart, used during the 2002 Microlite DXpedition to South Georgia (VP8GEO) and South Sandwich (VP8THU), will again be supporting the group for their entire 30-day journey.
'This DXpedition is funded entirely by the twelve team members and a generous and exclusive grant by the Northern California DX Foundation,' said James Brooks, 9V1YC, DXpedition Team Leader. 'There are no other club, foundation, individual, manufacturer or QSL sponsors.' Additional details regarding the Kerguelen Islands DXpedition will be released in the coming weeks."

FW, WALLIS AND FUTUNA ISLANDS (Also 3D2). Operators Yoshinobu/JA7OV and Yoshiki/JA7AQR will be active as FW7OV and FW7AQR, respectively, from Wallis and Futuna, October 9-15th. Activity on SSB will be on 7088, 14135, 18135, 21235, 24935, 28435 and 50135 kHz. On RTTY, watch 21083 kHz. They will use an IC-706MKIIG and a 2 element Yagi. There will be some quick and short operations from the Fiji (3D2) on October 8th and 16th, using the callsigns 3D2TY (JA7OV) and 3D2YT (JA7AQR). Look for them on 21235 kHz SSB. QSL to their home callsigns, either direct or via the JARL bureau.

IOTA NEWS.....
AF-019. Gianni, IZ8CGS, will be active from Lampedusa Island (MIA MI-126), September 23-26th. QSL via IK8VRN.

AS-024. Steve, K7USJ, member of the Tokyo Intl. Amateur Radio Assoc., will be active as 7J1AIL/JR6 from Iriomote, in the Yaeyama Islands, from September 29th through October 2nd. Activity will be on 40-6 meters using CW and SSB, as well as FM on 29.300 MHz. QSL to K7USJ direct or to 7J1AIL direct or via JARL Bureau.

AS-037. Operator JQ6GXP/6, who was active from Kami-Koshiki Island (JIIA AS-037-003) over the past weekend, will move over to Shimo-Koshiki Island (JIIA AS-037-007) and will be active until September 21st. QSL via the bureau or direct to JQ6GXP.

EU-011. Members of the Taunton and District ARC, Bill/G3WNI, Tom/G0PSE and Dave/M0AOD will be activating the Isle of Scilly from October 2-9th. The callsign will be GB0SM, and the QTH will

be St. Mary's Island. Activity will be on 160-10 meters, possibly also 6 metres. Modes will be CW and SSB. QSL via the Bureau or direct to G0PSE. E-mail requests for Bureau QSLs go to: g0pse@qsl.net

EU-120. Members of the Chippenham and District Amateur Radio Club will be active as GB2LI from Lundy Island, September 21-28th. Activity will be CW/SSB on all HF bands plus possibly 6 and 2 meters as well. QSL via G3YBT.

OC-173. Gary, VK4PY, will activate Melville Island in his spare time. He has just moved there and has work commitments for the next few weeks. He will be very busy there driving bulldozers but has taken a rig and a couple of antennas. He will operate only SSB. QSL direct to VK4FW: Bill Horner, P.O. Box 513, Nambour, 4560, Australia.

KP2/WP2, U.S. VIRGIN ISLANDS. Operators John/K3TEJ and John/K3CT will be active as KP2/K3TEJ and KP2/K3CT from November 23-30th. Also, look for them to be active as WP2Z during the CQ WW DX CW Contest (November 27-28th) as some kind of Multi-?? entry. QSL contest activity via KU9C. Outside of the contest, a special emphasis will be on 160m and the WARC bands. QSL via their home callsigns.

LX, LUXEMBOURG. Six Dutch operators will be active as LX/PA6Z from Saturday, October 2nd until Friday, October 8th. Their activity will be on all bands from 160-6 meters on CW, SSB and PSK31 (24 hours a day). QSL information is via PA1K (bureau or direct).

NCDXF ANNOUNCEMENT (Major Sponsorship Grants for 2005 DXpeditions). The Northern California DX Foundation, Inc. (NCDXF) announced at the W9DXCC DX Convention (in Chicago, September 18th) that it has awarded major sponsorship grants, for the 2005 Kerguelen Islands (FT/X) and Peter I (3Y0X) DXpeditions. Together, these grants exceed $100,000, and represent the largest grants made in the history of the NCDXF. The NCDXF press release state: "Len Geraldi, K6ANP, NCDXF's President, noted that these awards are substantially larger than normal amounts provided by NCDXF in aid of major DXpeditions. 'These exceptional grants were awarded in light of the rarity of operations from these locations, the significant individual contributions being made by the participants themselves, as well as the very high cost of mounting DXpeditions to such remote locations,' said Geraldi. He called on the worldwide DX community to continue their support of NCDXF, thereby enabling such rare and challenging locations to be activated for the 'Deserving'."
"The Northern California DX Foundation was founded in 1972 to assist worthwhile amateur radio and scientific projects with funding and equipment. Although the words 'Northern California' still appear in its title, the activities of the Foundation are international in scope, rather than regional. In addition to providing financial aid to significant DXpeditions, the Foundation, in cooperation with the IARU, maintains a worldwide network of high-frequency radio beacons that help amateurs assess the current condition of the ionosphere. The entire system is designed, built and

maintained by volunteers at no charge except for the actual cost of the hardware and related components."
"The Foundation is an organization described in Section 501(c)(3) of the United States Internal Revenue Code, and all contributions are tax-deductible to the extent permitted by law for U.S. taxpayers. The Foundation does not have a paid staff, and no Foundation officer, director or advisor receives a salary or compensation in any form from the Foundation." More information about the NCDXF can be found on its web site at: http://www.ncdxf.org

OJ0, MARKET REEF. Just a reminder that members of the "World Wide Young Contesters" (WWYC) plan to activate Market Reef (EU-053) as OJ0YC between September 23rd and 26th. The team of operators include SM3WMV/Mike, OZ1AA/Thomas, KU5B/Colin and OH6GDX/Pat at the moment. The DXpedition's goal is to be a multiplier in the Scandinavian Activity SSB Contest (SAC) (September 25-26th), and to be on the air as a serious competing station too. They will also work a bit of RTTY during the contest the same weekend, but the main focus will be on the SAC SSB. Apart from HF, OH6GDX will mainly be focusing on working 2 meters (maybe also 70cm). Activity on 2m will be at least on the FSK441a, CW, SSB, FM modes. Mike promised to work some 6m QSOs too. QSL via OH6GDX: Patrik Willfor, Langviksgatan 24 B13, FI - 65100 Vasa, Finland.

QSL INFO AND NEWS.....
Alan Roocroft, VK4AAR, informs all OPDX readers that "all DXers should be aware that Australian postal rates increased by 10% starting 6th September. Please make allowances for this when enclosing reply postage. Also, it is not a good idea to attach Australian stamps to your SAE because 95% of DXers get the wrong series of stamps and the wrong value. Please let us do it ourselves. We know the system best and it is different to most countries." JUST A REMINDER! Alan is the QSL Manager for the following stations: 9V0A, 9V1DX, C21RH, KH2VM, P29RH, V63PD, VI0ANARE, VK0MM, VK6AN (OC-266), VK6BM (OC-234), VK6BSI (OC-243), VK6LI (OC-071), VK8AN, VK8AN/6 (OC-154), VK8AN/8 (OC-229), VK8AV/3 (OC-136), VK8DP, VK8MI (OC-173), VK8RH, VK8XC, VU3RSB, YJ8AA, ZK2JJ and ZK2PJ. QSL "DIRECT ONLY" to: Alan Roocroft, P.O. Box 421, Gatton 4343, Australia.

SI9, SWEDEN. During this past weekend, SI9AM was active from Utanede (Grid Locator JP82iw) during the 46th Scandinavian Activity Contest (CW), by SM3EAE, SM3FJF and probably some more SM3-operator. Look for SI9AM to be active again during the Scandinavian Activity Contest (SSB), September 25th, 1200z to September 26th, 1200z by DF6JC and DL1EJS, including some activity outside of the SAC. This is a great opportunity to become qualified for the SI9AM Award. For more information, look at: http://www.qsl.net/si9am/ QSL via SM3CVM, by the bureau or direct to CBA.

SILENT KEY. The MCMARS reports: "Silent Key Captain Lee E Reisenweber, 57, K3RGD (VP2VE), passed away Saturday, February 21, 2004, at the San Juan VA Medical Center, San Juan, Puerto Rico. He is interred at Puerto Rico National Cemetery Bayamon, Puerto Rico. Lee was president of the

BVI Amateur Radio League (an IARU member), first licensed at the age of 12. During the Vietnam War, he served in the United States Marine Corps. Lee's family asks that anyone knowing Lee who has pictures or stories they can share or anything of Lee's the family might want, to please send them to D. L. Borgman, 11111 NE 105th Avenue, Archer, Florida 32618 or email to dlb@borgmangroup.com."

SPECIAL EVENT. Look for the special event callsign TM9POR, to be active on HF, VHF and UHF, using SSB, CW, ATV, SSTV, APRS and Packet. QSL via operator's instructions. Activity will take place during the annual "Open Doors for Telecommunications" in Mezieres (Ardennes) (North of France, near the Belgian border) which takes place September 26th.

SPECIAL EVENT. Members of the Cray Valley Radio Society are activating GB2BF next weekend (September 25-26th) to raise money for the British Wireless for the Blind. They will be on all the HF bands, except 24 MHz and 1.8 MHz. They will be running two stations - one on HF, one on the low bands. The more contacts they make, the more money they will raise for the fund. They have people who are sponsoring them per 100 QSOs, so the more QSOs the better! They will be active for the full 48 hours and expect to make well in excess of 1,000 QSOs. A special QSL cards will be available, either direct or via the bureau to Owen, G4DFI.

TC2K4, TURKEY (Special Prefix Activity). Last week we mentioned that Berkin, TA3J, will activate the special prefix/callsign TC2K4J from Antalya, in the memory of the unforgettable 40 Silent Keys of Turkish Radio Amateurs, between 0240z, September 24th and 0240z, November 2nd (See OPDX.676 for more details.). Nilay, TA3YJ, informs OPDX that the NEW prefix, TC2K4, stands for TC2004. QSL via TA3YJ, direct (only SASE and 1 IRC, no green stamps please) or by the bureau. SWL QSL Cards are OK. Details on the special award which is available, as well as a list of the "TC2K4J Commemoration Program" can be found on the following Web page at: http://www.geocities.com/tc2k4j/

TRAC ON TRACK! (Special Event) The Thornhill Radio Amateurs Club (TRAC), with the cooperation of the York-Durham Historical Railroad (YDHR), is pleased to announce: "TRAC on Track - a mini DXpedition". This is not a trip to an exotic island or a perilous perch above an active volcano, but simply a fun trip on a train, with radios. All are invited to contact VA3RRT on Sunday, September 26th, between 1500-2300z. Listen on 7065 kHz +/- and 14200 kHz +/- (Also, 146.550 MHz and possibly 70cm). There will possibly be an APRS station on board. Full details can be found online at: http://www.trac.ca

V26, ANTIGUA. Team Antigua will ride once again into action to activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the 2004 running of the CQWW SSB Contest on October 30th and 31st. Their plans are to enter the Multioperator/Two-transmitter category. For a complete station description, complete with photographs and rate charts of the Team Antigua V26B Superstation, go to the Web page designed by Brian, N3OC (aka V26OC) at: http://n3oc.dyndns.org/v26b/
Their Grid Square will be FK-97 and IOTA Number is NA-100. Members of

Team Antigua will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days both before and after the contest. There is also a possibility of some Satellite operations on AO-7 and AO-51 with time and orbital conditions permitting! Most likely their operators will begin to make their presence felt on all bands starting on or about October 26th until about November 3rd. Please be advised that QSL requests for V26B should NOW be directed to KA2AEV DIRECT ONLY at this time. They cannot guarantee a timely response for QSLs received via the Bureau route! The members of Team Antigua and their callsigns are:
V26A - Dale, N3BNA QSL via WB3DNA
V26B - Sam, WT3Q QSL via KA2AEV ADDED NOTE: Look for a
V26EM - Ed, W2SN QSL via W2SN few new members who will
V26G - Ed, N2ED QSL via N2ED announce their QSL routes
V26KEN - Ken, N2KEN QSL via N2KEN when their Antiguan callsign
V26OC - Brian, N3OC QSL via N3OC become finalized.
V26OX - Kevin, K3OX/2 QSL via K3OX
V26R - Mike, KA2AEV QSL via KA2AEV

VK9L, LORD HOWE ISLAND (Update). Bill Horner, VK4FW, President of the Oceania Amateur Radio DX Group Inc (www.odxg.org), reports that after weeks of preparation, all equipment was delivered to the boat last Thursday. It will be stored on the island awaiting the teams arrival on October 9th. Operators include: IV3FSG and VK2IVK (YLs), G3UML, IK6CAC, VK3SU, VK4NEF and VK4FW. As there will be two DXpeditions in the Pacific at the same time, they are adopting the following suggested transmit frequencies:
CW - 1812, 3512, 7012, 10107, 14012, 18072, 21012, 24912 and 28012 kHz
SSB - 3785, 7045, 14260, 18140, 21260, 24950 and 28495 kHz
RTTY - 7080, 10120, 14090, 18100 and 21090 kHz
6m - 50.100 MHz (A Yaesu FT-857 with beacon will cycle on this frequency giving everyone a chance to call)
Bill also states, "As we arrive on the island late in the afternoon we will have very little daylight time to insatll antennas. However, it is our full intention to have one of the multiband verticals installed and on air quickly followed by a low band vertical for 40m. We are still chasing another operator to compliment the above crew." Inquiries can be sent to: vk4fw@westnet.com.au

VP2, ANGUILLA. Look for the VP2E Team to be active again during the 2004 CQ WW SSB Contest (October 30-31st) as a Multi-2 entry. Operators mentioned are: Ray/KC5EA, Gordon/N5AU, Jeff/N5TJ, John/K5MR, John/VE3EJ, Norman/K1DG, and Andrew/N2NT. QSL vai N5AU. Members will be active prior to contest on the WARC bands.

VP5, TURKS AND CAICOS ISLANDS. Once again four members of the Western Washington DX Club will be hitting the DX trail, this time to VP5 land. Operators Roger/W7VV, Ralph/VE7XF, Rick/KT7G and Dick/K7BTW will be active in the 2004 CQWW CW Contest (November 27-28th) from VP5JM's location on Providenciales Island in the Turks and Caicos Islands. They will enter the contest as a Multi-2 entry and operate as VP5W. Outside of the contest, from November 21-30th, they will use VP5/homecalls. QSL VP5W to W7TSQ, outside the contest QSL to their home callsigns. Outside of

the contest, they will concentrate on the WARC bands and 6 meters on CW, SSB and digital modes.

1254. 7237 "mystery signal"

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-20 01:15:34 UTC
From: David Stinson <arc5@ix.netcom.com>
Message-ID: <Waq3d.1918$Bg5.33@trnddc07>
Source record: 56466

Greetings everyone.
Some of you may have heard of the "mystery signal"
that shows up on 7237 KC intermittantly,
seemingly around Sedona, AZ.

I looked at the spectrum of the clip and
found that all the intelligence is concentrated
above 1.5 kilohertz.
Most of the "good stuff" is located at
2 kiloHertz and higher.

I filtered out the stuff below
1.5 kiloHertz and enhanced the information
above on a sliding, linear scale going up
to 400% enhancement at 20 kiloHertz,
trying to "pull out" any scraps
that might be left.
I clipped out the carrier at 10 kHz
and did a noise reduction.

I passed the clip through a
product detector and produced two clips
with slightly different processing.
The two clips are available at the address below.
I found the intelligence to be
approximately 5-7 kiloHertz above
the detector LO.
While there are carriers evident at 1150
Hertz and also at about 10 kiloHertz,
they do not appear to be necessarily
connected to the "voice."
It is definitely speech,
though there is not enough of the
scraps of the intelligence left to make it
readily understandable. Cadence sounds
very much like a talk radio announcer,
but may be a ham.
Also might be in spanish, which I deduce
from what may be a couple of rolled "r"s.

I believe it's going to be an intermittant
parasitic from a spanish broadcasting station.
It can happen during the loudest
fraction of each word spoken,
which would help explain

the clipped intelligence. Many things can
cause this- even an air conditioner switching
on and off can create an electrical situation
where a parasitic can escape. That could
explain the "click" and the intermittent
nature of the signal.

If you speak spanish (I don't), please
listen to these two clips and see if
you can make anything out:
http://tinyurl.com/5g27e

If any ham in the area has a
wide band receiver (one without a single-sideband
or other narrow filter) that can record this
sound straight to their sound card with at least
20 KC of bandwidth, giving us intelligence to work with-
we might get an "ID" on this one.

Kind Regards,
David Stinson

In case you haven't noticed, this is the DX newsgroup. This bulletin is probably the most useful piece of DX info posted here. If you don't like seeing it here, just set your newsreader filter to keep it from appearing on your machine. Or simpler yet, just don't read it.

Or what about his abuse of the repeater system for which he was spanked by the rain report?

N8WWM guilty of FCC violations. According to the FCC, N8WWM, Dog Adair committed several violations over the air at the expense of the Toledo Amateur Radio Club by utilizing their repeater to break the law. The amateur club received a warning letter from the FCC concerning Adair's violations and were told to take steps to make certain the violations by Adair will not be repeated. Adair not only hurt the entire image of amateur radio with his inexcusable behavior, but damaged the reputation of yet another entity trying to further the good of amateur radio. It's a shame when bad apples like these make it so clubs can't even trust their own users to abide by the rules they were sworn to uphold. Adair is also an infamous presence on the internet. A google search of "N8WWM" reveals a peek into the world of the individual identified as Adair. In addition to FCC violations, Adair has, in the past, been accused of being a prolific spammer, breaking several internet laws and violating several terms of service agreements with internet providers.

Hi!
Do you know a software for the generation a PSK31 signal with the
(i)nphase and (q)uadratur component seperated?
I got some MAX2450 ICs and thought about driving them with the IQ signal
and connecting an oscillator to it for generating the HF...

Thank you!

Regards,
Andreas Weller, DF1PAW

Subject: [W4GAC_SPARC] Call for amateur radio operators to help in North Florida
Date: Sun, 19 Sep 2004 21:53:52 -0400

From Dale Sewell, N4SGQ, NFL Traffic Manager

Amateur Radio Operators to help the individuals of Escambia and Santa Rosa Counties in the panhandle of Florida.
As you may have seen on TV or heard on the radio, most of the people in those northern coastal areas are without power, potable water, phone service, cell phone service, and television stations and AM Radio are off the air, some FM stations operable if you have battery operated receivers. Many hospitals are non operational, and many residents in all counties impacted have lost their homes. Still more will not be allowed to return to their homes because the foundations of these homes are unstable and are considered condemned and will be razed.

There is an immediate need for 30 operators in Escambia County, the Pensacola area, and 16 operators in Santa Rosa County-- (as in be there by Monday or Tuesday). Additionally these operators will need to be replenished or relieved every 3 to 4 days by other volunteers.

I know that we have served where needed locally through three hurricane events, many of us are still cleaning up our own properties and restoring our lives but our services are sincerely needed to assist those in direst need of everything that sustains life and the means to acquire these necessities is in the sole hands of radio operators like you and I.
If you are can help, we need your skills.

Please send this out to all amateurs on your email list

Read on for more information.

Health requirements:
- Due to the elevated temperatures and humidity from ground water, any ham with heart problems or breathing difficulties (asthma, etc.) is requested not to volunteer for the trip. Your efforts however may be

of invaluable use here at home. More on that later.

Communications:
Most local communications will be done on 2 repeaters in the areas:
Escambia County 146.760 -600 (100.0 PL)
Santa Rosa County 146.700 -600

There will also be some simplex frequencies in use for passing traffic and information.

Map- directions- and tracking numbers:
Dale Sewell, N4SGQ the coordinator for all deployment, will issue* Tracker numbers, instructions and a special map for deployment to assist operators in getting to the staging location.

Length of deployment:
Plan for 4 days (at your option longer) adjust your "kit" as necessary.

Fuel:
If you are driving, keep your tank topped up, and carry at least a 5 gallons of extra fuel with you (observing the common safety issues with any combustible mixture). It may be some distance to a station.

Expenditures:
Persons volunteering for deployment should keep all receipts pertaining to their deployment plus total mileage for the duration for possible reimbursement by the state.

What you will need to bring:
Radios:
A good working 2 meter radio with a portable antenna is necessary (something to hang the antenna up with, such as string or fishing line, is recommended)
A handheld 2 meter is a good idea- but bring a 12 volt power source for charging batteries, extra batteries, AC charger as needed
An HF radio with some type of tuner may not be necessary but is a good option- remember to bring an antenna that can be supported between tree branches (such as a long wire, dipole ant. or end fed zep ant.) as well as plenty of coax to reach your radio.(100 ft. or more is a good figure).

Personal items:
Sleeping:
Some type of bedroll for personal comfort (air matters, sleeping bag) and a pillow. You may be sleeping on a floor or in the back of a truck. Plan for unknown conditions.

Eating:
Plan on packing personal food for 4-5 days (breakfast, lunch, dinner, snacks) and eating utensils, portable stove(grill) and cooking utensils. There are some food wagons on the way, and some may be in area, but many people are still eating MRE's (Meal Ready to Eat).

Take as much water with you as possible, 5-8 gallons is recommended.
There is a boil water statement in affect for all counties impacted.

Toiletries:
Soap
Towels -how many do you use in 4 days
Wash cloth
Shaving equipment
Toothbrush and tooth paste
Plastic trash bags for dirty laundry, trash, water proofing your dry goods, etc.,
A small bottle of Clorox for treating non-potable water for bathing (10 drops per gallon) is a good idea.
toilette paper- 2 rolls or more
anything else I might have forgotten in this category.

Medical and health related:
Take any pills that you may be taking, for at least 7 days worth in a Zip loc type bag to keep dry.
A basic medical kit is a good idea. The many hospitals are down and the DMAT teams are not completely located to service all areas.
Lots of good mosquito repellent. Most with DEET are a good choice.
Citronella candles are optional

Clothing:
Clothing for 4-5 days (pants, shoes, socks, shirt, underwear, etc.)
Rain coat or poncho
A warm jacket may not be needed but you can always bring it back if you don't use it.

Be self contained in all aspects including personal toilet needs.

Here is Dales most recent message:

Currently the need is for 46 total. There are less than 10 traveling in
so far so consider the 46 request open as there are locals cycling out fast from fatigue. I anticipate additional request shortly. Filling the 46 request is the primary concern at this point. We had a good response for a weekend turnout but the week is going to be tough. Any help you can give us on that will be appreciated. The plan is a familiar scenario. Self sufficient, no power, lodging, 8am to 7pm curfew in Escambia, no fuel in effected area, repeaters up in both counties, water and food available Red Cross style but bring what you can, no sanitary facilities guaranteed, and a need to work with the ability to make decisions in a difficult environment.

The travel routes going in are detours and are slow going, full of National Guard who are helpful. The Post Traumatic Stress issues are a
factor. The tempers are getting short from fatigue and heat. These folks really need help and everyone out there knows what that's like.

That's the situation.

Thanks in advance for putting up with waiting for this information.

Subject: Re: Equipment
Message-ID: <20040904.033638.2136.0.philipvelderssr@juno.com>

Don;
This is the stuff I have for sale or swap for. (I do not need
money, just selling old station and got new equipment, so no ridicules
offers.)

1 Yaesu FT-847 all band transceiver - with 50,144,440,1300 mh.+ power
supply, antenna tunner
perfect condition, had 1 yr, used daily on 75, 40,20, & 145 mh.
replaced it with a Yaesu FT-1000MP Mark IV
1 Yaesu FL-2100 B 1kw amp.
replaced it with a Ameritron AL-82 1.5kw Amop.
1 Yaesu G-800 SA Rotor & controle
1 Kenwood TS-520 had three yrs as spare with service manual.
finals weak, but usable as spare tranceiver.
had been used as 2nd receiver.
1 Mosley tribander TA 33 Jr used 7 years, works great, needs clean-up
hardware new, year or so ago.

I need....

1 Hustler 6-BTV or
1 Hustler 5-BTV Antenna
1 Butternut HF9V or

1 Butternut HF2-V Antenna

So, I now have a bran new top of the line Ham set up along with a
new
2 ele 40 meter beam, and a new 11 ele HF beam, what a signal I now have.
WOW

picnic update

From: "Don KG4COQ" <kg4coq@hotmail.com>
To: the64newsline@hotmail.com
Subject: next 640 picnic
Date: Sun, 12 Sep 2004 13:22:14 -0400

Please put Oct.16,2004 (3rd Saturday in Oct.) on your calender. This
is the date of the next 146.640 N9EE repeater picnic.Held at Starkey
Park,it will start at 10:00 AM .Those planning to attend please return
email to me as we like to know who will be in attendance.If you need
info on how to get to park ,I will send you info if asked and info
will be posted on the 64 website (see address below) soon.
We ask that you all bring something to share with the group. I will
let all know what is needed.
I realise that we all just got thru 2 big storms but what better way
to relax and get away for a while ?
Please let me know soon so I can plan this great event.We had over 45
hams at the last one in April and all had a fantastic time.
Please feel free to forward this mail to anyone who may like to read
it.

==========
Thankyou for your interest in "The 64 Newsline".
This newletter contains news that may be of interest to the users of
the Tampa Bay N9EE,146.640 repeater.
==========
If you have anything to share with the 64 Ham community you can send
it here to be sent to our mail list.Any mailings sent here become
property of the Editor and will be sent out as soon as possible.
==========
Thanks and enjoy...

Is anyone familiar with the hardware details of the FSK process?
Specifically what components are involved in transforming a frequency
into a bit?

Thanks!
Dave

It depends on how it's done.

The earliest schemes were switching a capacitor in and out of the circuit
of a VFO. I think they may have used relays originally, but once
semiconductor diodes became common, they were used to do the switching.
Apply a voltage, the diode conducts, and thus connects the capacitor into
the circuit, lowering the frequency.

When SSB came along, a common means was to feed an audio oscillator into
the mic input, and that audio oscillator was shifted between two frequencies
in the same way as above. Since a single tone in an SSB transmitter is
the same as a cw transmitter (the transmitter translates the tone to
a radio frequency), then shifting the audio oscillator shifts the transmitter
between two distinct frequencies. This method was handy since it required
no modification of the transmitter, and you got the same shift across
the band. The previous scheme could not give the same shift as the
vfo shifted frequency, since it was a fixed capacitor in parallel with
the variable capacitor, so the fixed capacitor would give more shift as
the frequency went up (since it was a larger percentage of the capacitance
of the variable capacitor). The downside is that if the SSB transmitter
wasn't adjusted for good carrier supression and unwanted sideband supression,
or the audio oscillator did not put out a pure enough sinewave, then one
would get more than a single frequency out of the transmitter.

As an aside, on VHF AFSK (the shifting of an audio oscillator fed into
the mic input of the transmitter) was pretty much the only scheme used
for RTTY. Here, the result was not FSK, since you were using the regular
modulation, AM or FM, of the transmitter. And the audio oscillator
did not need to be as pure, since it didn't affect the spectrum of the
transmitter.

I actually don't know what the common scheme for FSK is these days.
If the transmitter is using DSP, the fsk can be done digitally.
I assume that DDS-based VFOs in current rigs may actually be able
to be reprogrammed at a fast enough rate that one just keeps loading
the two frequencies into the synthesizer as the shifting is needed,
but I've not kept track of recent rigs to know if that's what's being

used.

This is pretty reasonable at low bit rates. But some more recent DDS chips,
for example, TI's TRF4900, actually have a data pin, and the two frequencies
are programmable, so the chip has the two divisors onboard making it a
simple matter to switch between divisors.

I think you already have a couple of messages on how the frequency can be generated from a bit.

It appears to me you are asking for the opposite.

Basically, the modem runs the receive frequencies through narrow filters. If the frequency received matches the passband of the filter, the audio tone gets through the filter. The tone can then drive something as simple as a transistor amplifier or darlington pair from one state to another (e.g. from Vc=5v to Vc=0.5v). These outputs can then drive gates in the right combination to get your serial output.

What has changed over the past two decades is how the filters have been implemented and how the serial signal is generated.

What used to be narrow filters built with big inductors and critical capacitors became filters implemented using op amps which, in turn, became filters using dsp techniques.

Serial signal generation started out with straight off and on pulses to rtty ksrs, moved to simple uarts built with logic gates, which became uarts on ic's.

The basics are the same, however. Narrow filters for the tones and logic to generate the serial signal.

Ok, I have one more additional question. :-)

For a communications protocol such as RTTY, I know the mark and space frequencies indicate 0 and 1 values of a (usually) 5-bit character. But how does the receiving side synchronize with the transmitting side? How does the receiver continue to properly allocate the incoming bits? After, say, the 30th bit value, how does the receiver know that it *IS* the 30th bit value? Especially with three 1's or three 0's consecutively and no frequency changes...?

Is the receiver just very accurately timed? When it occurs, do the transitions from 0's to 1's (and vice versa) serve to resynchronize the receiver with the transmitter?

Sorry for the storm of questions, but thanks in advance!
Dave

OK, remember the whole start and stop bit thing?

The line sits at mark when idle. When a character comes, the line drops to space for one bit time. This is the start bit. Then the 5 or 8 bits are transmitted, then one, 1.5 or two stop bits, which are really nothing more than the minimum time between characters. So the receiver is guaranteed *at least* one bit time of mark followed by exactly one bit time of space between characters. The receiving side does need to be reasonably accurate, but only accurate enough to not garble a character. It never has to keep in sync for more than 10 bits worth (8 data bits plus a start and stop bit). If the protocol specifies more than one stop bit, from the receiver's perspective that is nothing more than additional time the transmitter has allotted to do end of character processing.

On your earlier question about receiving FSK, the various posters answered what you would do if you wanted to use an SSB or AM rig, or an audio FM rig to receive FSK. However, a purpose-built FSK receiver would probably use an FM discriminator, and simply recover data, rather than audio, from the discriminator. Remember that an FM discriminator has an output that is related to the frequency. If you fed the discriminator two frequencies, the output would be two voltages.

Sorry, I skipped something on the previous response.

I answered for ASYNCHRONOUS serial such as RTTY or async ASCII.

Some protocols, such as packet, use SYNCHRONOUS serial. Synchronous serial is a lot harder to receive. There are no start and stop bits, so the protocol doesn't involve that part of the overhead that async uses.

There are several synchronous protocols, but they mostly involve two characteristics.... first, there is some mechanism for the receiver to recover the clock. Frequently, the clock is embedded in the data, although is could be sent over another channel. This allows the receiver to know the bit boundaries. Every so often (typically every data packet) a special pattern is sent that allows the receiver to identify the character boundaries. In the common protocols, such as X.25 (or AX.25), there is also a prohibition against sending too many of the same bit in a row. Special procedures are invoked if this happens in the data.

I can't be the only one who's ever wanted to use one of these for
hamateur/SWL stuff.

I have need of the op/service manual for the Dictaphone Prolog
9800 series recorder, specifically the 9809. I have already contacted
Dictaphone, and not had any success (the originals have been purged from
their archives).

Original preferred, good-quality copies will be considered if the
schematics are reproduced clearly and full-size. In that event, copying
costs will be covered.

I will keep an eye on this thread in the newsgroup, or you can
drop me a note at the human-readable address below.

I don't view it as a storm of questions; I'd be surprised if anyone did, considering the floods asked by folks in some other newsgroups.

Synchronization can be A Right Bitch. Good, Cheap Timing is part of the answer, and I think that the receivers also do some timebase adjustments as needed to keep their bit-rate clocks in sync with the transmitters'.

When you add start and/or stop bit, things get a lot easier, and that is the case with most serial communications: you can reset the character and bit-time clocks per-character. When no sync bits are present, you have to derive the bit timing and character timing from the data-bit transitions in the data stream, and things can get a bit iffy. Telco circuits have hardware that requires K transitions per N bit times, and will stuff "1" or "0" bits into the stream on one end, and delete them on the other, before they get to the customer gear, so that the stream appears to be synchronous, even though it isn't really synchronous inside the telco circuit.

But TY gear is _asynchronous_: it has bits to signal the start and end of each character.

The general structure of a TTY character is

Start_Bit, Data_Bits, Stop_Bit.

The Start_Bit tells the machinery that there's a character coming down the pipe, and that it should get ready to move. When I was doing military communications, Way Back When, the start bit was a 1.5 bit time MARK, since there really were parts that had to get ready to

move, clutches to engage, and so on, and the extra time ensured that
things were ready when the first data bit came in. The stop bit was a
1.0 bit SPACE, IIRC, so that there was always a polarity change to
signal a new character. But that's memories almost 40 years old, and
I Could Be Wrong.

Try this for more info:

Another little piece of the story is that in start-stop operation the receiver samples the incoming signal at the place where it expects the center of the bit to be. Thus it is tolerant of signals that are too fast or too slow. Of course today it is easy to get the speed very precise; but in the early days it was a matter of motors with centrifugal speed governors.

With synchronous transmission the receiver knows where the bit boundaries are going to be, so it is possible to sample near the end of each bit time when all of the energy in the received signal has come in. Start-stop has to throw away roughly half of the energy in each bit because of the center sampling. Hence synchronous transmission has an advantage in signal-to-noise ratio.

In the days of mechanical teleprinters, synchronous operation had a much greater advantage. A mutilated STOP pulse would allow the receiving shaft to continue rotating, and then several characters would be received in error as a result of that single bit error. With electronic reception there is no rotating shaft, so it is possible to reset the receiver to the starting position instantly.

It is also possible with electronics to achieve a quasi-synchronous operation with start-stop signals. The idea is that instead of having the STOP pulse be arbitrarily long, it is of fixed length and an idle character is sent if there is nothing to send from the keyboard. This is usually called "diddle". With the incoming data stream being a steady stream of printable characters and nonprinting idle characters it is synchronous for the duration of the transmission. The detector can synchronize to this signal and take advantage of all of the energy in each signal pulse. The K6STI RITTY software (no longer marketed) operates on this principle.

The FCC isn't going to waste its time or money on this LID. He will be
gone in October of 05.

Just like they do with all the other bad boys.

And what will they finally get him for? Failure to have 'good amateur
practice'.

As for your constant comments about the ARRL bulletin service. With all
respect and consideration...you are without a doubt the dumbest idiot I have
ever heard of...with the possible exception of Glenn himself.

Now Dan, why the name calling all of a sudden?

ARRL Bulletin Service, AARA Bulletin Service, both are good. A "choice" is
good. Just like having CNN, FOX, NBC, and ABC News. CBS News was
intentionally omitted from my statement.

AMERICAN AMATEUR RADIO ASSOCIATION

MISSION STATEMENT
The mission of AARA is to promote the serious side of Amateur Radio
including competent Amateur Radio response to all real and genuine
communications emergencies, the promotion of international good will,
and education with particular focus on young people with a view toward
assisting them with making better career and life choices.

I've got serious doubts about the FCC actually doing something about Baxter.

> Just like they do with all the other bad boys.

Hope so.
. . . .

Dan, this is real old stuff from Wayne Green; his response to some ideas I had on stopping the K1MAN nuisance a decade ago. Perhaps some of his suggestions are still germane. Good for a laugh, if nothing else.

Andy:

While I can appreciate your frustration with Baxter, which I share, your approach to disenfranchising him seems to indicate that you either do not read my editorials or at least don't remember them. I've God knows how many times been quite blunt about NOT annoying the FCC with our problems. That's not only a waste of time, it's downright dangerous... and can cause far more trouble than poor little Baxter. Please remember that we keep trying to convince the FCC that we are self-regulating. Note the term "self."

If a few hams ever want to get rid of Baxter that's not all that difficult... and you don't even have to pay a hit man to clean off 14,275. All it takes is a little creativity and some coordinated effort.

As a matter of fact it would be fun to wipe out Baxter. And you wouldn't even have to have a small group of like-minded hams drive to Maine with hack

saws for his coax and tower or a concentrated campaign to turn his neighbors against him with propaganda. No, all it would take is a few hams with good signals and some coordination.

I'm sure you can come up with much more fitting tortures for Baxter than anything I could dream up, but my mind turns to getting the channel about ten minutes before his broadcasts with my own anti-IARN broadcasts. I'll bet I could come up with some material which would burn Baxter, yet would not quite be actionable. Or I might tape one of his broadcasts and just repeat it as a "service" right on top of him and wipe him out. I've got as good a signal as anyone and I'm only a couple hundred miles from him. Knowing the love they have for him in Maine I'm sure you can find one, two or even three strong stations fairly near him to join in the effort to "help" him get his broadcasts out.

Of course if you don't know anyone capable of outsmarting Baxter, then you have no choice but to give up and take up stamp collecting. Baxter may be loud, but I haven't yet seen any signs of a three digit IQ behind the mess he's been making for several years.

If you do decide to actually do something instead of wasting your time on the FCC and ARRL, please let me know.

Cheers ...
Wayne

Yes, because I can't figure in which book they'd be talking about PLLs.
Osborne books tended to be about software, and when it was hardware
it was about CPUs. I do have one Osborne book about video controller
ICs. But I don't remember there being general electronic books from
the company.

Thanks for all the great information guys.. that helps a lot...

So, where can I get a good comm program that has RTTY capability
(ideally freeware, to get started with) for my computer?

Thanks!
Dave

He badmouths the league constantly, yet plays the ARRL bulletins. This is the serious side right? This tells me it's all a joke, snubbing his nose at the FCC and fellow hams.

He is universally hated by all that come in contact with him. Or maybe your right...that is the serious side.

> including competent Amateur Radio response to all real and genuine
> communications emergencies,

How? By sitting on 14.275, which he voluntarily vacated a couple years back, 24/7 claiming to be a emergency activation. All he is doing is constantly replaying the same ole garbage. The ONLY thing resembling a Hurricane emergency net is his reference to Hurricane FRANCIS. Out of date to say the least.

the promotion of international good will,

Oh you mean like how he jumps on top of the Bermuda net on Sunday mornings?
Or the complaints he gets world wide to the FCC?
Good job Glenn.

> and education with particular focus on young people with a view toward
> assisting them with making better career and life choices.

Yeah he had that wb2jkj (??) school in NYC all snowed and suckered in. That lasted about a month.

Everyone he associates with he runs off. Fact.

Dan/W4NTI:
> Oh you mean like how he jumps on top of the Bermuda net on Sunday mornings?
> Or the complaints he gets world wide to the FCC?
> Good job Glenn.

Here is a perfect example of the kind of "international good will" (and "ugly American") actions of Baxter's broadcasting:

Hamilton, HM EX
Bermuda.

Mr. Ralph Haller,
Chief, Private Radio Bureau,
Federal Communications Commission,
Gettysburg,
PA 17326,
USA

Dear Mr. Haller,

It was a pleasure to meet with you at the IARU Region II Conference, in Orlando, Florida, last week. I appreciate the time you took to listen to the problem, which we in Bermuda have been living with for the past few years, and also agreeing to reviewing the enclosed documentation.

Further to the letter from the FCC, from Mr. Robert H. McNamera, to Mr. Robert S. Ross under reference 7240-F, I feel that the transcript of the tape I have done which is enclosed under reference DOC K14/89, is proof enough that third party traffic was indulged in where he states "Covered by FCC rule 97.113C Associated Press questions were answered in detail by VP9--over the net." At no time did he ask my permission to relay any of this information and I was unaware that I was on a 'phone patch. Some Bermudians who were in the Boston area stated that they heard my report over the radio, with my voice being broadcast as a result of my operation on the Bermuda Emergency Net. I do have tapes which we can arrange for copies to be made, but I do not wish to bore you with four hours of tapes, but if it is necessary, so be it.

As you may know, whilst at the Conference, the Honorable Patricia Dennis wished to meet with me because of her impending holiday in Bermuda. I have met with her and her family and we have discussed the above matter. I will be copying this correspondence to her so that she will be as fully informed as your good self.

We have attempted to get this matter resolved with K1MAN, ARRL, IARU etc but without any success. As you will see from DOC K3/88 he quotes the FCC ruling on frequency co-ordination as per the second paragraph. He broadcasts one hundred and thirteen times per week and his main reason for doing so is to keep the frequencies clear for when he wants to get on the air. I have a tape where he admits to doing this and agrees that he upsets various nets.

In DOC K7/88 he asks 19 questions about how we operate and this is the reason that I did not reply to his letter, not because of the correspondence I have had with ARRL. As amateur radio operators, we In Bermuda have a very friendly net which is not "hereby co-ordinated" by some rule or other. You will note from DOC K8/88 that the ARRL do not agree with his concepts.

I sent a report to "QST" on Hurricane Dean, (DOC K12/89) which I can assure you is factual. More people need to know what went on because if they listened to the broadcast (DOC K14/89) they would be totally mislead. I did a response on the Bermuda Net (DOC K15/89) and also read it out to other parties who were interested. K1MAN has agreed to broadcast a tape if I sent him one but he is then going to do a rebuttal, and this will not get anyone anywhere!!! I have taken the matter up with the Department of Telecommunications (DOC K16/89) and will be pursuing this also through the American Consulate General.

DOC K13/89 was sent to me by Mr. R. Ross the day after Hurricane Dean and as he says "I was totally incensed by the actions. ....."

DOC K19/89 shows that the IARU Region 2 Executive Committee have considered this as a result of the letters DOC K9/89, DOC K10/89 4 DOC K11/89 but basically are loath to interfere in another countries activities, if it can be settled otherwise. Resolve 2 in DOC K20/89 was passed and therefore each country will be responsible for its own emergency nets unless a request is made to the contrary.

I regret that this letter is rather long and that there is so much additional information. However, the Bermuda Amateur Radio Operators would be most grateful if this problem could be resolved.

In a recent conversation we had with KAMAN he stated that any Novice could broadcast 24 hours per day on 28MHz if they so wished. As I stated in DOC K11/85, page 2 paragraph 3, that if a small minority decided to broadcast from every country, the bands would be full and QSO's as we know them would not exist.

Many thanks for listening at Orlando and for reading this. I look forward to your reply,

Yours sincerely,
[A- S-, VP9--]

c.c. Hon. Patricia Dennis, FCC Commissioner

That letter was proven to be a forgery, despite its official looking
appearance. The FCC denied any such letter ever existed.
Perhaps Dan Rather and CBS might be interested in it?

Lloyd

You couls start with a google search for "rtty12g" which is a very
old program written in BASIC to run under DOS. That's a program I
have used to make a TTY machine play in a museum situation.

Or there's the modern free MMTTY program, which is intended for running
RTTY on the air, but it has an output to FSK key the transmitter and you
can use that to drive a TTY machine (through a suitable driver circuit
of course) What it doesn't do, and I wish it did, is while receiving
to output "cleaned up" TTY signals so they could go to a printer.

Go here for sound card programs. As mentioned mmtty is very good to start
with for rtty.

http://www.muenster.de/~welp/sb.htm#zvei

Here is another place to checkout. It mentions packet, but the interface is
for all sound card modes.

Amateur Radio Newsline™ Report 1415 September 24, 2004

Amateur Radio Newsline report number 1415 with a release date of Friday, September 24th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Shortwave broadcasters say no to B-P-L, big money awarded to put a pair of truly rare D-X locations on the air and a satellite broadcaster joins the rescue radio cause. Find out the details on Amateur Radio Newsline report number 1415 coming your way right now.

(Billboard Cart Here)

THE BPL FIGHT: SHORTWAVE VS. DIGITAL SHORTWAVE

Amateur Radio has another friend in its fight to stop the world-wide rollout of Broadband over Powerline technology. This, as a European short-wave broadcaster say that B-P-L and digital radio will have a lot of trouble co-existing. Fred Vobbe, W8HDU, is here with an update on digital radio and an explanation of why the two do not mix.

--

Jacob Freedman, N2MPN, found an interesting story on BBC News Online and thought he would share this news with A.R. Newsline listeners. In the link to the story, titled "Fears for new digital radio system" written by By Chris McWhinnie of BBC Monitoring in Amsterdam, the warning came from Peter Senger, the chair of the Digital Radio Mondiale (DRM) at the International Broadcasting Convention in Amsterdam.

DRM is a standard agreed by world broadcasters for a completely new short wave radio system. The new internet power line distribution system has been evaluated by engineers, including the BBC, and has been found to affect short wave in particular.

Short wave is mainly used to broadcast internationally and the AM bands have been used since radio first started in the 1920s. The DRM system uses existing AM broadcast frequencies to deliver near-FM quality digital sound. It uses compression to squeeze clear digital sound into the narrow radio channels that currently carry crackly analogue signals.

The DRM technology has the potential to make digital radio available in places that Digital Audio Broadcasting (DAB) radio or even FM will probably never reach. As for the hardware required to hear these stations, there will be a new consumer DRM radio in the shops by

Christmas 2005 and a tiny PC-only DRM set is already on sale.

DRM is not being used by many radio stations yet. However a number of radio stations have seen the potential for new cross-border radio stations.

A Germany-based music station is believed to be in the planning stages. BBC World Service and its counterparts abroad already have some regular DRM programmes and are backing the system.

DRM is being seriously considered in many countries where the FM radio band is full. China sees DRM as the answer to pushing digital radio across its vast territory.

The UK is not planning to use DRM for domestic radio. The UK has pinned its digital hopes instead on DAB, which offers stations like BBC 1Xtra, 6 Music, Oneword and Core. More digital radios have been sold in the UK than any other country.

Switching-off analogue FM and AM may take years and making millions of much-loved analogue radio sets useless will no doubt be controversial. If power line internet transmission is introduced, then international broadcasting on shortwave may also be consigned to history due to the interference from data travelling over mains electricity cables.

For Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

As we go to air, the proponents of Broadband Over Powerline have not yet challenged the Digital Radio Mondiale findings. (W8HDU, N2MPN)

**

PRESERVING THE BANDS: LEAGUE KICKS OFF 2005 SPECTRUM DEFENSE CAMPAIGN

Meantime, the ARRL has kicked off its 2005 Spectrum Defense Fund campaign and its slogan id that this is a lot more than just BPL. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

ARRL President Jim Haynie, W5JBP, appears to be the point man in this important effort to preserve our operating bandspace. He says that while interference from broadband over power line technology is the most prominent and immediate threat to amateur spectrum, donations from ARRL members and supporters make it possible for the League to face it and other spectrum challenges as well.

According to the ARRL Letter, in 1985, the League spent perhaps $200,000 on advocacy and spectrum defense. Today the annual outlay is close to $900,000.

Haynie says that he is aware that this work is something that hams cannot see, touch or feel, but it's just as important as those things

that they can. This is because we would not have all those other things if it were not for the fact that we have a place to operate.

Haynie notes that not all of the ARRL's advocacy efforts necessarily involve taking defensive measures, such as with BPL, but all of them are essential. The popular ARRL leader says that, as he sees it, the League's job is to look out for the best interests of all of Amateur Radio. This includes making sure that we have places in the ether to go on the air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The ARRL says that the Spectrum Defense Fund depends on membership support and is essential to the League's continued success in this AREA. Contributions can be made on-line at the ARRL's secure donor Website. You will find it at https://www.arrl.org/forms/fdefense/fdefense.htm Those contributing at or above the $50 level may request a gift as a token of the League's appreciation. (ARRL)

**

BIG DX NEWS: NCDXF MAKES $100,000 GRANT TO UPCOMING OPERATIONS

Some big news in the world of DX. This as the Northern California DX Foundation announces some big money sponsorship grants for the 2005 D-Xpedition season.

The awards were announced at the recent W9DXCC DX Convention in Illinois. The recipients are the upcoming Kerguelen Islands FT stroke X and the Peter One 3YZ0X operations. These are two of the rarest and most wanted locations on every hams most wanted list.

Northern California DX Foundation president Len Geraldi, K6ANP, says that that these awards are substantially higher than normal amounts provided to aid major D-Xpeditions. Together they exceed $100,000, and represent the largest made in the foundations history.

Geraldi noted that these exceptional grants made in light of the rarity of operations from these locations and the significant individual contributions being made by the participants. He also noted the very high cost of mounting D-Xpeditions to such remote locations.

The Northern California DX Foundation not only funds DX operations. In cooperation with the IARU, the organization also maintains a worldwide network of high-frequency radio propagation beacons that help amateurs estimate the current condition of the ionosphere.

The Northern California DX Foundation was founded in 1972 to assist worthwhile amateur radio and scientific projects with equipment and funding. More about the group is on-line at www.ncdxf.org and we will

have more D-X news later on in this weeks newscast. (N4GN)

**

Break 1

Its time for you to identify your station. Cue the announcer. Dick Tyler, WA2EHL if you please:

"From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including WA2EHL on Live 365 from Burlington, New Jersey."

(5 sec pause here)

**

RESCUE RADIO: HURRICANE IVAN IS BACK AND JEANNE ON THE WAY

A reincarnated tropical storm Ivan has made landfall a 2nd time. This, near the Texas-Louisiana line on Thursday evening, September 23rd. The one-time hurricane was expected to dump up to ten inches of rain over the coming weekend.

The 22-day-old former hurricane broke apart after hitting the U-S, but a piece spun back out to sea and reformed as a separate tropical storm. It them made its way back into the Gulf of Mexico before again making landfall.

Forecasters say Galveston, Houston and College Station Texas will be under a flood alert. C-Q Magazine's Bob Josuweit, WA3PZO quoting sources at the ARRL says the Texas Office of Emergency Management has requested activation of the Amateur Radio Emergency Service Net. The net will switch between 7.285 and 3.873 MHz depending on propagation and time of day for as long as its needed.

Meantime, along the Eastern seaboard, ham radio operators are preparing for the arrival of Hurricane Jeanne. This as the killer storm appears to be zeroing in on the southeast U.S. coast, with forecasts putting Florida firmly in the storm's sights with landfall possible on September 24th or 25th. The Hurricane Watch Net on 14.325 MHz announced plans to begin operations Friday, September 24, 2004 at 10:00 a.m. Eastern and continue till until 11:00 p.m. or until the 20 meter band closes .

As we go to air news reports say that Jeanne is responsible for at least 1,100 deaths in Haiti. 1,250 are still missing and the toll continues to rise. More ham radio storm coverage next week. (WA3PZO, CQ, ARRL, ARNewsline(tm), others)

**

RESCUE RADIO: HURRICANE IVAN IN NJ

Hurricane Ivan left its mark all along the Eastern U-S before it finally disappeared from that area. From the Carolina's through New England, there were daily news stories about Ivan spawning tornadoes and severe flooding. One area hit by the remnants of the storm was the state of New Jersey which is the home on Amateur Radio Newsline's Henry Feinberg, K2SSQ.

--

Mercer County, New Jersey, ARES and RACES was activated at about 5 PM on Saturday, September 18th. This, to staff the radio room at the Mercer County Emergency Operations Center.

Heavy rainfall caused by Hurricane Ivan remnants in the Catskill and Pocono Mountains Friday night was forecast to cause the Delaware River to reach flood stage in Trenton at 6 AM Sunday and to crest at record levels Sunday night.

The original crest forecast was for 8 feet above flood stage which is 18 feet above normal river level. That was later reduced to 3 feet but was still the highest level on the Delaware River since the catastrophic floods of 1954.

In Mercer County, Amateur Radio Operators staffed the E-O-C radio room continuously in four hour shifts until Monday morning. The radio room is licensed as W2MER and has H-F, 2 meter, 220, 440 and APRS ham gear permanently installed. It also has capability on all public safety and Red Cross frequencies used in the county. Extra radio amateurs were on call over the W2ZQ Mercer County ARES and RACES 146.67 Mhz. repeater. This, if additional communications was needed at shelters and other locations.

Hams used the New Jersey Office of Emergency Management's statewide NJ2EM 220 MHz repeater and the statewide 2 meter APRS digital messaging network to maintain links with the Hunterdon County and Warren County EOC's further up the river. Per the Mercer County EOC protocol, the hams also were the operators of the public safety radios in the EOC to maintain contact with the sheriff officers coordinating the evacuations along the river.

Amateurs participating as EOC Radio Officers included N2GJ, N0YMV, K2GW, W2SRH, W2QOB, N2JV-P, and WA2KM.

For he Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in New Jersey.

--

Gary Wilson, K2GW, is the Section Emergency Coordinator for Southern New Jersey Section. He says some 1500 people including 180 residents of a nursing home were evacuated to near-by shelters and hotels on Sunday the 19th. (K2GW)

**

RESCUE RADIO: XM SATELLITE RADIO TO ISSUE EMERGENCY ALERTS

There will soon be yet another source of emergency alert information, and you might say that this one is out of this world. Well kind of. Norm Seeley. KI7UP, has the details:

--

X-M Satellite Radio says that its getting into the emergency alert business. This by making available the X-M Emergency Alert channel to its more than 2.1 million subscribers, nationwide.

According to a September 10th press release the satellite radio provider will dedicate its Channel 247 to what it calls X-M Emergency Alert. The service will be dedicated to providing updated critical information before, during and after natural disasters, weather emergencies and other hazardous incidents to listeners across the country. The channel will also provide key survival information such as evacuation routes, shelter locations and updated weather emergency information for impacted areas.

Information sources of the broadcasts will include the Federal Emergency Management Agency, the National Oceanic and Atmospheric Administration, the National Weather Service, the U.S. Department of Health and Human Services and the American Red Cross. Also included will be local police and fire departments and eyewitness reports making the service about as all encompassing and up to the minute as it can get.

--

X-M hopes to have this new service fully operational fairly soon. (XM)

**

ENFORCEMENT: FCC QUESTIONS 40 METER MORSE PRACTICE OPERATION

The FCC has some questions for a Missouri ham who claims to be running Morse Code Practice on 40 meters. And in a September 2nd letter to Paul D. Westcott, KC0OAB, the regulatory agency also sets some pretty tough ground rules for him to carry on. Amateur Radio Newsline's David Black reports from our South-East bureau in Birmingham Alabama:

--

The FCC contacted Paul D. Westcott, KC0OAB, on June 21st of this year. The Commission told Westcott it was receiving complaints about high speed one way Morse code transmissions from his station on the 40 meter band. The Commission says it has complaints alleging that the ongoing transmissions interfere with normal amateur communications.

Westcott replied July 11th, saying his transmissions are indeed code practice, and he indicated that they are computer controlled. But the Commission now says Westcott's code transmissions are sent at an unvarying speed of about 30 words a minute. That they are sent continually, 24 hours a day, on 7.030 MHz. The Commission says the constant speeds casts doubt on Westcott's claimed motive for sending

the code transmissions.

The Commission reminds Westcott about amateur radio service rules requiring that a station be under the direction of a control operator during all transmissions. That means a control operator must be on duty at all the times Westcott's station is transmitting...and that he's responsible for preventing harmful interference to other stations.

The Commission tells Westcott to provide the dates, times and frequencies of all code practice sessions. And the FCC says that information is to be furnished by Westcott by either telephone or FAX at least one week in advance of any given transmission.

The Commission also wants Westcott to submit the name, address and telephone number of the control operator for all operation of KC0OAB when sending code practice. The FCC says the telephone number Westcott provides must be one at which the Commission can reach the control operator during the transmissions.

Finally, the Commission warns Westcott that enforcement action against him is coming if there are valid complaints that his transmissions continue to interfere with ongoing communications.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, at the South-East bureau in Birmingham Alabama.

--

Westcott was given twenty days from the date of the FCC's letter to respond with the required information. (FCC)

**

INTRUDER WATCH REDUX: STRANGE SIGNALS AT 7.238 MHZ DISAPPEARS

And that strange unidentified signal that Bob Gonsett W6VR reported to us on two weeks ago. The one being heard by hams in Western states on 7 point 238 Mhz? Well guess what. It has disappeared as mysteriously as it showed up and nobody is very sure of exactly what it was.

According to several Newsline listeners and our own monitoring, the last time the raspy buzz saw was heard it was late on Wednesday September 15th. By the 16th it was gone without a trace and has yet to pay the 40 meter phone band -- or any other ham band for that matter -- a return visit. (ARNewsline(tm) from listener reports)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE SOCIAL SCENE: SWL'S MEET IN CALIFORNIA IN OCTOBER

Turning to the social scene. the 2004 Radio Fest gathering of SWL's is slated for Saturday, October 16th. This, in the Community Room of the F&M Bank in Seal Beach, California.

Radio Fest is sponsored by the Southern California Area DX'ers group. Doors open at 9:30 Pacific Coast time. This years speaker list include Radio School's Gordon West, WB6N0A, plus representatives from the broadcast and short-wave sectors of the listening hobby.

Interested? Well, for more information please contact Stewart MacKenzie by e-mail to wdx6aa@earthlink.net or phone 714-846-1685 during normal business hours on the U-S west coast. (SCADS)

**

WITH THE HANDIHAMS: 2005 CALIFORNIA RADIO CAMP ANNOUNCED

And the Handihams have announced that the 2005 California Radio Camp will be the week of February 27th through Sunday, March 6th. If you are a member with a disability and want to attend, please contact Handiham headquarters for a camp application package. You may either call the office toll-free at 1-866-426-3442, or e-mail hamradio@courage.org. (HandiHams)

**

RADIO EDUCATION: ARRL TEACHERS INSTITUTE

And a quick note on the highly successful ARRL sponsored first Education and Technology Program Teachers Institute held the second week of August. During the week long program Mark Spencer involved the teachers in hands-on activities for integrating wireless technology, Amateur Radio, Amateur Radio on the International Space Station and other space-related activities into their math and science classroom curriculum. And word is that at the end of the week the teachers had enjoyed themselves so much that some said they weren't ready to go home. (ARRL, ANS)

ALL POINTS BULLETIN UPDATE: $25000 REWARD OFFERED TO CATCH TOWER ARSONIST

An update to our story three weeks ago about a fire bug who seems to hate radio. A $25,000 reward is now being offered information leading to the arrest and conviction of the person setting fire to radio towers in the Clark County and Portland, Oregon during the past six weeks including a blaze that burned down a ham radio operators home.

The most recent fires, set close together occurred on September 9th in Portland. This, only 12 hours after a federally led task force asked

for the public's help in finding the man they think might be a serial arsonist working alone.

John W. McMahon, a supervisor with the federal Bureau of Alcohol, Tobacco, Firearms and Explosives told the press that a task force was offering a top reward of $10,000 for information leading to the suspect's conviction. Comcast, whose service was interrupted by one of the fires, added $15,000 to the reward. This raises the bounty on the fire bugs head to $25,000.

The fifteen member task force investigating the incidents has concluded they were linked to 12 communications tower fires set since July 29th. The most recent fires will raise the estimated damage done by the arsonist to more than $250,000. The 11 previous fires had targeted communications towers or equipment and one private Amateur Radio tower.

As previously reported, the ham-radio tower fire, which was set August 20th. At that time it was the seventh incident and spread to an adjacent rental house, leaving it badly damaged. The resident, John Stein, AB7F, cut his hand trying to put out the blaze before firefighters arrived.

And a group of Public Safety organizations that is trying to help capture the serial arsonist has published a wanted poster complete with pictures. You can find it as a PDF file of it at www.sbe124.org (Portland SBE, others)

HAM RADIO IN SPACE: KE5AIT COMPLETS CONTACTS WITH 7 CONTINENTS

Yet another ham radio record has been set . On Saturday September 11th, Mike Fincke, KE5AIT became the first crew member of the International Space Station to talk to all 7 continents using amateur radio. This, when he made contact with Palmer Research Station Amateur Radio station.

During the contact Fincke spoke with Chuck Kimball, N0NHJ, while a packed radio room at the center listened in. Fincke and Kimball compared life in the two stations, discussed time zone differences and the experiments involving fluids that Fincke was working with.

Fincke is believed to be only the third astronaut to accomplish this all continent feat. The last such occurrence was in 1992 aboard STS-45 when astronauts David Leetsma and Kathryn Sullivan also talked to Palmer Station to complete their continent contact list.

Fincke will be finishing his tour in the middle of October when Expedition 10 Astronaut Leroy Chiao, KE5BRW, and Cosmonaut Salizhan Sharipov will come aboard. (Courtesy of Kenneth Ransom, JSC)

**

NAMES IN THE NEWS: G3YJO NAMED VISIONARY AND INNOVATOR

And word that Space News International on the Space dot com website has honored a UK ham. This as it names Professor Martin Sweeting, G3YJO, as one of the top space visionaries and innovators.

In a recent article the news service said that Sweeting turned Surrey Satellite into the world's microsatellite builder. Also that under his guidance this British company has trained a new generation of spacecraft builders throughout the world helping countries like Turkey, Thailand, Korea and Chile enter the space age. (GB2RS)

**

HAM RADIO NEAR SPACE: AMATEUR RADIO HIGH-ALTITUDE BALLOONS

Attention East Coast hams. The first SimSat engineering test balloon flights are targeted for launch on Wednesday, September 22, in the Maryland and Virginia area. These two experimental exercises are designated SimSat-1A and SimSat-1B. This is a good opportunity to show a local students how to receive the balloon's simple telemetry beacon. (ANS)

**

WORLDBEAT - CANADA: NEW CALLSIGN OROPOSAL

The Canadian national ham radio society Radio Amateurs of Canada has submitted a proposal on Amateur Radio Call Signs to Jan Skora. He is Industry Canada's Director Genera for the Radiocommunications and Broadcasting Regulatory Branch.

The Proposal, as approved by the Radio Amateurs of Canada Board of Directors, makes recommendations on changes to Call Sign Policy and Special Event Prefixes. This, all comes as the result of the WRC-2003 decisions amending the ITU International Radio Regulations to permit call signs in the Amateur Service to have up to four characters in the suffix. (RAC)

**

DX

In D-X word that HA0HW and HA4DX are active as J45HW and J45DX respectively. This, from the isle of Rhodes through the 3rd of October. Activity will be on 40 through 10 meters using CW, SSB, RTTY and PSK31. QSL as directed on the air. (GB2RS)

And TA3J will activate the special callsign TC2K4J. This, from September 24th to November 2nd in memory of 40 Turkish Radio Amateur Silent Keys. Activity is on 160 to 2 meters using all modes. (GB2RS)

**

THAT FINAL ITEM: PART OF THE BEEB ON THE BLOCK

And finally this week it look as if a piece of radio history may be up for grabs. This with word that part of the world renowned B-B-C World Service is for sale.

The United Kingdom's publicly funded British Broadcasting Corporation has reportedly approached Germany's Bertelsmann Corporation along with U-S media giants Time Warner and the Walt Disney Company as potential bidders for BBC Worldwide. BBC executives expect the division, which includes BBC America, BBC Prime channels and 26 magazine titles could be worth up to 3.5 billion dollars of needed revenue.

The U.K. government is currently reviewing the BBC's funding and license. One report said that the broadcasters internal review of its options appears to be timed to coincide with the government's evaluation as well. (W8HDU, Bob Ulm, WDOH-FM)

Here is the information off of the Internet.

On September 25th, 2004, S.A.R.C. will host a hamfest in Pasco County. Held at the First Lutheran Church, 6416 Delaware Ave. in New Port Richey, It draws amateurs from all around the area and runs from 8:30 AM to 2:00 PM. Plan now to attend this popular local area event. Contact Ron, N9EE at 727-376-6575 for more information.

I hope this helps.
73,
Pete

Exactly. And those who whine the loudest about K1MAN are
those with absolutely no life. Baxter does nothing illegal, never
has. However, he DOES march to the beat of a different drum,
as many famous Americans have. Baxter inherited lots of money,
which probably accounts for much of the envy sent his way.
Despite his wealth, he chose to earn a four year engineering degree
and go to work in private industry for many years.

Walter Cronkite thought enough of K1MAN that he did promos and
announcements for the station. If the most trusted man in America
trusts K1MAN, how can anyone else do less? All the rest is sour
grapes. Did Cronkite do W1AW announcements? *NO*

Ok, I understand the why and the how GOOGLE is not archiving certain newsgroups. However, even though GOOGLE is no longer archiving certain newsgroups, I am now seeing current dated postings to these same newsgroups. Can you explain to me how this is being done? If not through GOOGLE, which is free, how is it being done? Is there another service providing FREE access to these newsgroups? If so, whom?

Greetings:
I’m searching for information on the life and career of Fred C. Judd (1914-1992). Fred was a well known figure in the amateur radio world (callsign-G2BCX), designing many piece of apparatus, including the famous “Slim Jim” antenna, and writing numerous books on radio matters. He was also a pioneer in the electronic music field- his best known work probably being the soundtrack for the 1960’s puppet show, “Space Patrol.” If anyone reading this knew Fred, or has any memories of him, please drop me a line at-Shaunbrennan304@yahoo.nospam.co.uk (remove “no spam” to reply).

Thanks!
Shaun Brennan

Actually, it is k1man, who started this thread as "mr ham radio". Now, that's a bit of egotistical behavior, isn't it.? True to form, k1man hides behind a visade. Just as the other alias's used in this thread, and all the glad handing he gave himself, glenda, get a clue, we know when, and where, you post. You are so clueless, and your feeble attempts at playing on the internet are laughable. You are a joke. And a joke that will lose his license soon for malicious interference and pecuniary interest. HA!!!HA!!!

Should I reference the latest FCC action against you? Well yes, here it is:

http://www.arrl.org/news/enforcement_logs/2004/0501.html

Let's get into the Walter Cronkite ID. You think it's some sort of validation. You KNOW that you misled Walter for that ID. I have the evidence. Is it time for me to post the letter where Walter Kronkite's lawyers tell you to stop using his voice and image, because you misled them? Bring it on!

There is a lot more to the belgrade bastard, AKA the k1man, story. Next chapter to follow soon. Let's get this creep off the air. See you on 14275.

Chuck...K1KW

PS Hey glenda...I see that you don't have the BALLS to post under your real name...I guess that you aren't a real MAN??? RIGHT??? What's the matter, little Chrissy got you by the short and curly's?

It would be ever so nice if both K1MAN and W1AW stopped their 'broadcasting' crapola altogether. Who needs it?
There is NO way I will ever join the ARRL and NO way I will ever send Baxter a penny, either.

I have been a Ham for 25 years now and neither of these two have had any impact whatsoever on my licensing or ability to operate. (save for Baxter's jamming)
In my opinion, both are a waste of money. Who needs a QSL card with the ARRL logo on it? Does that make me a "better" operator? Does that enroll me in a group of self-proclaimed radio elitists? The ARRL of late seems to be nothing more than a paper tiger with a nice, little logo. Big deal.
Same for K1MAN. Who, in their right mind, would send him a single penny to be a part of his 'club'?
Baxter is rather full of himself in thinking that there are some amongst us who care to listen to him. Unfortunately, there are some of us Hams who take it upon themselves to 'jam' Baxter at every turn.
Good operating procedure? I think not!

So there you have it: Be not duped by the ARRL or Baxter. Neither have much to offer. Save your money and buy a new antenna...or whatever. Glenn Baxter is not a "good" operator, and in the same line of reasoning, neither is W1AW.

I use the good old tried and true solution for both...I simply hit the OFF button or tune elsewhere. Try it. It works.

(callsign not given)

Send in your dues suckers. If the ARRL ever underwent a
honest outside audit, you would find out you have been buying the
northeast radio elitists new homes, cars, radios, and computers
for years. Send in those annual ARRL dues suckers!

It appears that K1KW can't operate a news reader either. Not only do
his posts not thread properly because they are missing a references
header, his posts are identical - probably a canned response that took
him hours to compose.

He is a typical K1MAN critic: Clueless about Usenet and clearly
clueless about K1MAN. Even the United Nations has recognized the
humanitarian work of K1MAN, as have several foreign countries.

K1MAN reflects the very best in amateur radio. We should all be proud
of him.

1326. Searching .wav compat. Sky Sweeper for analysis

Newsgroup: rec.radio.amateur.misc
Date: 2004-09-26 15:01:31 UTC
From: Thierry <http>
Message-ID: <4156d9e1@news.vo.lu>
Source record: 56288
Cross-posted to: alt.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

Hi,

I just published a short review of Sky Sweeper Pro 5 on eHam.net, a marvellous spectrum and phase analyzer and DSP software.

I would like to review the product in depth now and I am looking for .wav files com compatible with Sky Sweeper 5.07. Files 1 to 5 min long, mono, 8/16 bits, 10, 20 or 40 ksamples/sec)

My objective is to estimate the threshold of the application in bad working conditions.

I know for example that a signal 30 dB over the noise but associated to shadows tunes at 24 dB during an EME QSO cannot be directly decoded digitally but its DSP filtering can help, etc.
I would like to determine this minimum in other working conditions than "loud and clear"...

I am mainly interested in SSTV (Martin's, Robot's, if possible a complete transmission), CW at 5-50 wpm with noise but readable at the audio (e.g. from Aurora, MS or EME traffic, etc), Hell, PKS31 or other "strange" signals including QRSS or STANAG.
Of course good quality files are welcome too.

Please make proposal via the email adr on my website
http://www.astrosurf.com/lombry

Thanks in advance

73

Oh BS Leroy. I hardly ever listen to W1AW. I used to listed to
MAN....UNTIL he decided he was God or something. Able to jam at will, sends
out fake felony affidavits, puts out blatent lies, badmouths fellow hams and
Federal Communications Commission personal, runs a BROADCAST TALK RADIO
SHOW, Locks his BS transmitter down for 24 hours a day that send out weeks
and months old information.

Go listen to him right now on 14.275 and hear all you need to know about
Hurricane Francis. While Hurricane Jeanne is trashing Florida. What a
world class idiot you are for supporting this loon.

What do you propose to do with the STANAG stuff? It's pretty well 100%
undecodeable.

Why Dan, what an oversight on your part, buying a
radio without a tuning knob on it! You know, a light
spin of the dial, and MAN is gone. Instead you buy a
radio with one fixed frequency, 14275.

Maybe it is the same model transceiver used by K1MAN. A spin of his own dial and he'd still be gone. Baxter is unbalanced.

Said by the guy who can't spell "know nothing." Oh, the irony.

> Cronkite has tried to get him to drop those announcements for years. Glenn

That makes no difference to the original point, which was that Walter
Cronkite recorded some promos for K1MAN. If Walter thought enough of
K1MAN to make those promos in the first place, then K1MAN was held in
high regard by Cronkite.

> has been contacted by Mr. Cronkite's attorney. I notice he doesn't have
> them on there any more. Wonder why?

1) The promos are out of date; 2) Cronkite wanted money, and 3) Bill
O'Reilly of Fox News has just recorded some new spots which may used
on K1MAN some time next year if O'Reilly can get FOX's permission. It
was all announced quite clearly on the web site.

As I said, K1MAN is a philanthropic citizen of the world whose
accomplishments are recognized by many famous people outside of ham
radio.

K1MAN is a giant.

When did the FCC change their rules?

97.101b - No frequency will be assigned for the exclusive use of any
station.

97.113a - No amateur station shall transmit any communication the purpose
of which is to facilitate the business or commercial affairs of any party.

97.113e - No station shall retransmit programs or signals emanating from
any type of radio station other than an amateur station.

97.313b - No station may transmit with a transmitter power exceeding 1.5 KW
PEP. (Ref: KE8SP, Tex Martin)

Well, sure. It's no secret that the ARRL has paid employees.
Though I doubt that they could afford new homes or cars. Radios
and computers ain't that expensive...

Simple. Someone has a misconfigured news server. There should be no posts to hierarchial markers. Would you post to a newsgroup called "alt"? Of course not. It's not their fault that some dumb-ass isn't aware of the currently authorized naming....

Not in this case. You should find that for NG "rec.radio.amateur.misc", such posting IS allowed (and the O/P-DX-B is also allowed for "rec.radio.info"). It's in the rec.radio.amateur newsgroup hierarchy guidelines and charter. Even Bill Pasternak's "A R Newsline" drivel is allowed here (but NOT on "rec.radio.amateur.policy").

I did explain. Read what I wrote already.

And again, check those messages you claim to see. As I said, most
will be cross-posted.

You do realize that the newsgroups have been around for a quarter century,
preceding dejanews/google by almost fifteen years. Google doesn't own
the newsgroups.

I like the Yaesu equipment, but don't like the yahoo signup
crapola.

I'll have to pass on this invitation unless you can find a
hosting site for it that doesn't require all the personal
information to participate.

Except for my e-mail address I fed 'em completely bogus info and their
signup robot swallowed it hook, line and sinker. Any spam tossed my
way as a result of signing up is "handled" by my spam filters.

CBS showcased laughable forgeries obtained from a man literally foaming at the mouth in order to accuse the president of malfeasance. But CBS would never put a single one of the 264 Vietnam veterans on the air to say what they knew about Kerry.

The Swift Boat Veterans for Truth show the role of the individual in history. It wasn't Republican strategists who finished Kerry off two months before the election; it was the American people. The Swift Boat veterans came along and kicked Kerry in the shins and no matter how much heat they took, they were brave and wouldn't give up. The veterans who served with Kerry told the truth and the American people listened (as soon as they managed to locate a copy of "Unfit for Command" hidden on one of the back shelves at their local bookstores).

CBS was forced to run a fake story so early in the campaign that it was exposed as a fraud -- only because of the Swift Boat vets. These brave men, many of them decorated war heroes, have now not only won the election for Bush, they have ended Dan Rather's career.

It's often said that we never lost a battle in Vietnam, but that the war was lost at home by a seditious media demoralizing the American people. Ironically, the leader of that effort was Rather's predecessor at CBS News, Walter Cronkite, president of the Ho Chi Minh Admiration Society.

It was Cronkite who went on air and lied about the Tet offensive, claiming it was a defeat for the Americans. He told the American people the war was over and we had lost. Ronald Reagan said CBS News officials should have been tried for treason for those broadcasts.

CBS has already lost one war for America. The Swift Boat Vets weren't going to let CBS lose another one.

Ann Coulter

> Who's Ann Coulter?

A very funny and bright conservative columnist.
http://www.anncoulter.org/

Coulter clerked for the Honorable Pasco Bowman II of the United States Court of Appeals for the Eighth Circuit and was an attorney in the Department of Justice Honors Program for outstanding law school graduates.

After practicing law in private practice in New York City, Coulter worked for the Senate Judiciary Committee, where she handled crime and immigration issues for Senator Spencer Abraham of Michigan. From there, she became a litigator with the Center For Individual Rights in Washington, DC, a public interest law firm dedicated to the defense of individual rights with particular emphasis on freedom of speech, civil rights, and the free exercise of religion.

A Connecticut native, Coulter graduated with honors from Cornell University School of Arts & Sciences, and received her J.D. from University of Michigan Law School, where she was an editor of The Michigan Law Review.

Ann Coulter also did a couple of op ed pieces a while back and was
the first to expose ex-U.S. Senator Max Cleland as a fake
and fraud, now reduced to an errand boy for the rapidly sinking
Kerry campaign.

The ARRL has a lot of expenses, of course. A fair bit of cash
is needed to buy fuel for the ARRL's fleet of Black Helicopters.
Maintenance on the Secret ARRL Lair, beneath Lake Geneva,
guarded by the Knights Templar, is also pretty costly. And
the remote monitoring of anti-ARRL kooks, so they can be
quickly rounded up when the New World Order takes over, is
another costly program--but well worth it, IMO.

In an attempt to increase my capital gains, I've designed and built a 1MHz wideband crystal radio receiver, because of the expense of putting this on the web I haven't had the time to explore the possibilities of developing a transceiver... at one time I had the necessary power for transmitting, but I lacked the parts! Public radio programming never sounded better, it's a real thrill to hear talk radio commentary from something I put together.

Well thought out Ken, but its the Knights of Columbus (hmmm KC changed
by those rascally Euros to MC)who reside in Hartford and don't forget
that they have cloned the Chairman and now
have his precious body fluids in a jar in Newington.

Major Kong's plane's primary target is an ICBM complex at Laputa. In
Jonathan Swift's 1726 novel Gulliver's Travels, Laputa is a place
inhabited by caricatures of scientific researchers. Hmmm sounds like
Newington to me

Cheers and beers Till we meet again

Watch for Kerry to cheat tonight on the debates.
Looks like the former-POW organization has linked up with
the Swifties for a new round of ads exposing Kerry's treason
when he returned from Viet Nam. You can hear the
libs screaming "foul" already.

I have 2 or 3 left of the GPS boards, ET-101, 12 channel engine boards. We bought them for a project and got too many. I will sell them for $55 each or all 3 for $135 plus shipping. Full specs below. We also have 5 Cirronet 2.4GHz WIT2410 DSS transceiver modules with MMCX to SMA whips for external antennas - I will sell them for $100 each. I also have chip antennas (patch) for the GPS boards.

Specifications:

a.. Channels: 12 parallel channels
b.. Sensitivity:-170 dBW
c.. Output Messages : NMEA 0183 V 2.2 protocol and supports command:GGA ,GSA,GSV,RMC,VTG,GLL
d.. Hot Start: 8 sec., average
e.. Warm Start: 38 sec., averate
f.. Cold Start: 45 sec., averate
g.. Acceleration Limit : <4g
h.. Altitude Limit: 18,000 m
i.. Re-acquisition: 100 ms
j.. Velocity Limit: 515 meters/sec
k.. Time Accuracy:lus synchronized to GPS time
l.. Position Accuacy:
a.. 15 m 2D RMS without SA
b.. 10 m 2D RMS WAAS enabled
c.. 1-5 m DGPS corrected
m.. Supply Voltage:
a.. 3.8~6.5 VDC
n.. Power Consumption:
a.. Continuous mode 60 mA
b.. Trickle mode 25mA
o.. Dimension: 72mm * 42 mm *12 mm
p.. Storage Temperature:-40 C~ 85 C
q.. Operation Temperature:-40 C~80C
r.. Humidity: Up to 95% non- Condensing
Features:

a.. SIRF star II Low Power Version
b.. All functions available as ET-202
c.. Supports different types of antenna connector
d.. Pin to pin ,compatible with ET-101 (SiRF Star I)
e.. Compatible with Rockwell & Conexant Jupiter/NAVMAN..etc

Amateur Radio Newsline™ Report 1416 October 1, 2004

Amateur Radio Newsline report number 1416 with a release date of Friday, October 1, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is ready as Hurricane Jeanne hit Florida. Find out the details on Amateur Radio Newsline report number 1416 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO MEETS HURRICANE JEANNE

Making landfall near Stuart, Florida, early on Sunday, September 26th, Hurricane Jeanne blew across that state with 120 mph wind and drenching rain. News reports say that the storm hurled debris into the air, tore rooftops off buildings and sent monster waves onto the shoreline. And as Jeanne's wrath played out on television screens across the nation, it was the calm voices of ham radio operators of the Voice Over I-P Hurricane Watch Net that signaled it was about to arrive:

--

"At 11 PM, the center of Hurricane Jeanne was located near Latitude 27.2 North and Longitude 80 West, or about 15 miles East of Stuart Florida. Jeanne is moving slightly North of West near 13 Miles Per Hour."

--

Hams also relayed a stark warning from the National Hurricane Center. One that said -- stay out of Jeanne's way:

--

"...with maximum sustained winds of 115 MPH with higher gusts, Hurricane Jeanne is a is a dangerous Catagory 3 hurricane on the Saffer-Simpson Hurricane Scale."

--
Over two million residents had been urged to evacuate. State officials said more than 42,500 stayed at shelters. Many of these were staffed by ham radio operators associated with A-R-E-S and RACES groups.

As Jeanne made her way across Florida, many residents were without telephone service and more than a million people lost power. But ham radio operators using all kinds of emergency power sources were on the air. In fact they were the ones who relayed word of some of the major outages:

--

"KA4EPS in Deerfield Beach passing on some information you might be interested in. Have some numbers passed along by the local utility company. Dade County has 2900 without power. Broward County 71,000 and Palm Beach County 487,000 without power."

"QSL Lou, Thanks."

--

The Category 3 storm became the fourth hurricane to pummel Florida in a single season. The three other hurricanes - Charley, Frances and Ivan - have all hit within the last six weeks. And hams like Paul Goodell, KG4GOQ, in the town of Lake Worth might not have sounded that great through all of the radio links, but he did get the word out:

--

"Estimated winds in excess of 100 miles per hour. Trees bent and laying over."

--

Then for a while there was a period of calm. This as the eye of the storm came ashore. It gave first responders a chance to assess the damage done so far:

--

"KG4YQK at the Port St. Lucie E-O-C W4SLC. We are in the eye of the storm presently. We had sustained winds of well over 110 miles an hour. We received substantial damage here locally. Trees down. Powerlines down. Flooding as well."

hurricanes. As it did, even public service communications took a hit:
--

"Net control is listening. Go ahead Paul:

"I just heard second han that the communications tower for Riviera Beach has collapsed. Probably not something for the national hurricane Center, but just as a note to anyone else out there listening to hear how bad these winds are going."

--

By late morning, Jeanne had weakened to a Category 1 storm with 75-mph top sustained winds, but its 400-mile diameter covered most of

the central part of the state including Tampa and Orlando. As Jeanne proceeded to fall apart while heading North-East over Georgia and the Carolina's she dumped torrential rain and spawned close to a dozen twisters. More on the aftermath of Hurricane Jean in future Amateur Radio Newsline reports. (ARNewsline(tm) with audio from the VoIP Hurricane Watch Net)

**

THE BPL FIGHT: PERTH INTERFERENCE NOT BPL RELATED

A widespread interference problem in Perth, Australia, that sounds like B-P-L has to be something else. This, after the city's Power Authority tells Dennis Muldownie, VK6KAD, that it is not using Broadband Over Powerline technology to monitor its electrical network.

There is now some supposition that noise that wiping out free to air TV channels 2, 7, 9 and 10 may be coming from some home network gear which uses the power mains to connect the various pieces in a home Local Area Network. But the noise is so widespread that it has to be more than one installation causing the problem. This, by radiating back out over the local Perth power grid. (WIA News)

**

THE BPL FIGHT: FCC TO RELEASE R&O ON BPL ROLLOUT

Meanwhile, back at home the ARRL says that an initial Report and Order on the rollout of B-P-L could be on its way out of the FCC this month. Amateur Radio Newsline's Mark Abramowicz, NT3V, has been following the story and has more:

--

The ARRL says that an initial Report and Order on the rollout of B-P-L could be on its way out of the FCC this month. Amateur Radio Newsline's Mark Abramowicz, NT3V has been following the story and has more…

As predicted almost on cue, the Federal Communications Commission appears ready to render its decision on Broadband Over Powerline Internet access.

And despite thousands of comments on the subject, many of them raising concerns about the interference potential of the technology, the ARRL says it has learned the panel is ready to act.

As one high-ranking ARRL official has told Amateur Radio Newsline, it's not a question of whether there will be BPL. There will. The question is in what form will it be rolled out and how effective will the safeguards be to protect other services.

In its recent bulletin, the ARRL advised it had learned the FCC's Office of Engineering and Technology would have its draft order on BPL ready for the commission's Oct. 14 meeting.

The ARRL has mounted a vigorous information campaign to raise awareness about the threat BPL poses. And, it has also tried to lobby at various levels to change some minds about the benefits the BPL industry says the technology will bring.

But it appears, based on the ARRL's BPL bulletin, that the organization is pessimistic about what will be coming out of the FCC's technology arm.

In fact, the ARRL's Chief Executive Officer David Sumner, K1ZZ, in a letter sent as a follow-up to a recent meeting with FCC commissioner Jonathan Adelstein sums up what the League is expecting.

"…the ARRL has no confidence that the draft report and order will be based on sound engineering and believes the rush to adoption is unwarranted and premature. " That excerpt of Sumner's letter from the ARRL's Bulletin.

In interviews with Amateur Radio Newsline, ARRL President Jim Haynie W5JBP says there was little doubt in his mind the issue would be decided BEFORE the presidential election. Haynie contends the issue is being driven by business interests who have the ear of the president and his technology advisors.

Haynie has told Amateur Radio Newsline of his concerns about the FCC's apparent lack of interest in following up on the many pending BPL complaints - filed as a result of system tests. He has told us he fears when the commission finally acts, it may bow to BPL interests that are seeking to weaken the impact of any interference complaints.

So the question many amateurs may be asking themselves as we await the FCC's order is where will this leave me? Is it time to put my radios up on Ebay and turn my focus to my computer and EchoLink?

The answer: Not so fast!

The National Telecommunications and Information Administration still has a card or two to play. Its technical people have raised interference issues and are continuing studies and plan to release more results in the next several months.

Will the FCC wait for the NTIA? Will the FCC table BPL? Not likely to both. Is there room for an appeal of any FCC BPL decision? If so, it would likely wind up tied up in the federal courts.

With the planned rollout out of Wireless Internet access here in Philadelphia and other cities across the nation, do the economics dictate a utility recovering its investment in BPL technology at a pace investors are willing to wait?

The questions are many and the debate is likely to continue for the next several days.

From our perspective, it seems unlikely the FCC decision - if it goes against amateur radio interests - will stand without a challenge. Too much time and talent has been invested in preparing the data showing what BPL can do to the amateur frequencies and our ability to operate.

We'll stay on top of it for you. And, once the FCC order arrives, we'll have the first reaction and what it will mean to you.

Stay tuned!

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the B-P-L issue in future Amateur Radio Newsline reports. (ARNewsline(tm, ARRL)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Rio Hondo Amateur Radio Club net serving our home town of Los Angeles California.

(5 sec pause here)

**

THE BPL FIGHT: BPL COMES TO CENTRAL VIRGINIA

Still with news on the B-P-L front, Charles Rivelle, K3FT, has some news about one electric company's future. He says over QRZ.com that the Central Virginia Electric Cooperative has completed testing of its B-P-L system in Nelson County and the company is now serving customers on 40 miles of operational lines.

The K3FT posting provides a link to a two-page advertisement that has been sent to thousands of customers throughout central Virginia. The ad alerts them to look forward to B-P-L service in the area noting that line crews are now installing the equipment needed to deliver Broadband over Powerline services. Up to 4000 homes and businesses will be eligible to participate in the first phase of this program. Central Virginia Electric Cooperative says its "always on" 256 kilobaud per second broadband connection is priced at a very competitive $29.95 a month.

Check this web site for details: http://www.forcvec.com/bplcoop/ (K3FT via QRZ.COM)

**

THE INTERNET: US FALLING BEHIND IN BROADBAND ROLLOUT

Meantime, the FCC insists that the United States is making progress in rolling out high-speed Internet service. This, despite facts showing that the nation is falling further behind other countries.

A new Federal Communications Commission report found that U.S. high-speed Internet lines had tripled to 28.2 million by the end of 2003 from June 2001, but the country at best was 10th place in international rankings down from fourth, lagging nations like Canada and South Korea.

FCC Commissioner Michael Copps criticized his own agency over the disappointing news. He says that the agency had failed to establish a coherent policy for broadband, sacrificing the nation's rank. Copps also noted that service was as cheap as $10 a month in Japan for 8 megabits a second versus $30-$50 for 1-3 megabits in the United States. (Published news reports)

**

CHANGING OF THE GUARD: STAN BURGHARDT, W0IT - S.K.

The changing of the guard in ham radio continues with word of the passing of two well known radio amateurs. The ARRL Letter reports that Stan Burghardt, W0IT of Watertown, South Dakota, died on August 22nd at age 93. Burghardt was the founder of Burghardt Radio Supply Inc. which is now known as the Burghardt Amateur Center. He was first licensed in 1931 as W9BJV and became W0BJV in 1946. Burghardt remained active on the air -- especially on 6 meters -- until his death. (ARRL)

**

CHANGING OF THE GUARD: ROGER BAKER, G4IDE - S.K.

And ham radio software writer Roger Barker, G4IDE, has passed away. Baker died on September 9th following a long bout with cancer. Baker was the author of UI View, PSK31SRV and a host of other digital mode software and was recently named as the first recipient of the 'Lifetime Achievement Award' by the Tucson Amateur Packet Radio for his services to digital communications.

Baker's packet radio program Winpack is currently in use by tens of thousands of radio amateurs around the world, while his UI View program is now considered to be the benchmark by which all other APRS Raster Mapping software is compared. (KB7TBT, G3ZHI, others)

**

ENFORCEMENT: KEEP OFF 10 METERS

The FCC has written to five trucking and transport companies warning them to keep their drivers from operating radio gear on 10 meters.

The letters went to Con Way CWX Trucking of Long Beach, California; Dowell Express, Inc. of Lavonia, Georgia; K & K Cartage, Inc. in Sunbury, Pennsylvania; Teeberry Trucking LLC whose home base is Charlotte, North Carolina and United Van Lines of Fenton, Missouri. Divers for these companies were heard operating radio gear without licenses on 28.085, 28.115 and 28.215 MHz

Each letter carries a stern warning that continued operation could lead to confiscation of the radio gear as well as a prison term and a hefty fine and for the unlicensed radio operator. These monetary forfeitures normally range from $7,500 to $10,000. (FCC)

**

ENFORCEMENT: A DEAL A PIRATE COULD'T REFUSE

And there appears to be two ways to get someone to stop rebroacasting your radio station. You can complain to the FCC or you can take another and apparently much quicker route that one station has. Norm Seeley, KI7UP, explains the unique and effective approach:

--

An unlicensed broadcaster is off the air in San Diegio, California. This, after a licensed broadcaster in San Clemente kind of took matters into its own hands and made the pirate a deal he could not refuse. Legally speaking that is.

When KWVE was recently advised that its signal was being rebroadcast by apparently unauthorized translator station in Lakeside, California, the station dcided to act. Rather than wait for the FCC to investigate and politely ask the pirate to cease and desist, representatives of KWVE paid the party a visit. The station also threatened in writing to seek legal injunction if the unauthorized rebroadcasts continued.

And you can call this approach as being very effective. The translator fell silent in short order and has not been heard since.

--

While this system is seemingly a lot faster it also means having to hire a lawyer and pay his fee. (CGC)

**

RESCUE RADIO: FCC PARTICIPATES IN COUNCIL ON EMERGENCY PREPAREDNESS AND INDIVIDUALS WITH DISABILITIES

The FCC has participated in the first meeting of the Interagency Coordinating Council on Emergency Preparedness and Individuals with Disabilities. This, at the Department of Homeland Security in Washington D.C..

The FCC was represented by K. Dane Snowden, the chief of the FCC's Consumer & Governmental Affairs Bureau. At the meeting, Snowden

announced that the FCC has issued policies and will launch outreach efforts. This, to ensure that facilities that provide telecommunications relay services for persons with hearing and speech disabilities are designated priority for restoration of service in cases of emergency. Snowden also described a rulemaking by the FCC to improve the emergency alert system to make it more accessible for people with disabilities.

The Interagency Coordinating Council on Emergency Preparedness and Individuals with Disabilities was established by Executive Order on July 22nd. Its purpose is to address the safety and security needs of people with disabilities. (FCC)

**

HAM RADIO ON THE INTERNET: BIG DATABASE UPGRADE AT QRZ.COM

The QRZ.com website call sign system is running a lot faster these. This as the result of a major an upgrade to a new and more powerful server.

The new database engine is a Sun E280R. This is a 64-bit industrial strength machine with dual 900 MHz processors, 4 GB of RAM, and a pair of 36 gigabyte 10,000 R-P-M Fibre channel disk drives.

Fred Lloyd who runs QRZ.com says that these new disks are really impressive. Fred says that he has clocked them at speeds of up to 64 megabytes per second. That equates to an entire C D ROM's worth of data being moved internally in only 10 seconds.

Lloyd adds that this new server only handles the call sign database. The main QRZ.com web server remains a 450 MHz Sun E420R with 2 gigabytes of RAM. (QRZ.com)

**

THE SOCIAL SCENE: THE WSWSS VHF/UHF CONFERENCE IN CA IN OCT

Turning to the ham radio social scene, a reminder that the Western States Weak Signal Society's annual VHF UHF Conference takes place on Saturday, October 9th. The venue is the M2 Antenna Systems facility in Fresno, California and features prizes, technical programs and a great BBQ Dinner. More info at www dot wswss dot org. (WSWSS)

**

THE SOCIAL SCENE: OPRC HAMFEST IN AZ. IN OCTOBER

Just to the East in Arizona the Old Pueblo Radio Club will hold its hamfest on October 16th at the Kinko Sports Complex in Tucson. For more information on this one please contact John Kalmes, KC7LIB, by e-mail to kc7lib@aol.com (SW Communicator)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

ARNEWSLINE(TM) SUPPORT FUND REPORT WITH N6TCQ

Audio report only: Hear it at www.arnewsline.org

**

RADIO HERITAGE: NAVY TO CLOSE SUB COMM CENTERS

The United States Navy says that it will dismantle two extremely low frequency radio transmission centers used to communicate with submerged submarines. The Navy says that the 400-million submarine-communications system, which has been in use since 1989, is outdated and no longer needed.

Two transmitter sites are involved. One is in northern Wisconsin and the other in Michigan. They will go out of service on September 30th but could take up to three years to disassemble and close down permanently.

Each system consists of a transmitter and an antenna strung on 600 12 meter high poles. The navy has used these extremely low frequency transmitters to maintain secure communications with submarines at sea but now will use 12 smaller transmitters, sited worldwide. (Pulished reports)

**

HAM RADIO IN SPACE: ISS REPEATER ON AGAIN

The FM Repeater and BBS on board the International Space Station was again open for general ham radio contacts on September 27th and 28th. During that time voice contacts were available on by transmitting up to the I-S-S on 145.920 MHz with a 67 Hz CTCSS tone while listening for replies on 435.300 MHz. The Bulletin Board used an uplink of 145.860 F-M and a downlink at 435.150 MHz. This operation was followed by a PSK-31 Experimenters Wednesday Test on September 29th.

The system will be on periodically and ARISS will announce the dates and times in advance. Check with the I-S-S Fan Club web page at www.issfanclub.comto see what the latest status is.

Also, keep in mind that the radios on board the space station are not able to correct for Doppler as the frequencies are channelized. It

is up to the ground station to do the Doppler correction. For 2 meters, the Doppler shift is about +3kHz at the beginning and goes to about -3kHz at the end. For 70 cm, the Doppler is about +10kHz at the beginning and goes to about -10kHz at the end.

The 70cm Doppler is roughly 3 times the 2m Doppler. Many of the tracking programs have the ability to calculate the frequency shift. (ARISS)

**

HAM RADIO IN SPACE: MIKE FINCKE ON THE AIR

And as his time on board the I-S-S begins to wind down ham astronaut Mike Fincke, KE5AIT, has been on the air quite a bit. Not only to talk to school students in pre-scheduled contacts, but also to any ham who wants to chat a bit. One of those who had the opportunity to talk recently with the intrepid space traveler is Scott Avery, WA6LIE, in Salinas, California, who had had his recorder running:

--

Contact audio here. Hear it at www.arnewsline.org

--

Scott says that his QSO with KE5AIT space mobile took place at about O2:15 on September 28th. Needless to say that signals were 5 by 9 and full quieting both ways.

Fincke and Commander Gennady Padalka, RN3DT will be finishing their tour of duty on the ISS in the middle of October. They will be replaced by Expedition 10 Astronaut Leroy Chiao, KE5BRW, and Cosmonaut Salizhan Sharipov. WA6LIE's full contact with the I-S-S can be heard on line at www.qsl.net/wa6lie (WA6LIE)
**

DX

In D-X word that Crete will be coming on the air in October. This as SV9FBM and SV9FBZ become active as active as SY9Y in the CQ World Wide DX SSB Contest on the 30th and 31st as a Multi- Single entry. QSL to Stelios Aggelakis, P.O.Box 113, GR 72200 Ierapetra, Crete Island, Greece. (OPDX)

And EA1QF and EB1AA will be on the air from Cuba from October 12th to the 25th. The pair will be working on a "Radiosolidarity" project, but will also be operational on the H-F bands from several station locations as T42R. QSL to EA4URE at his callbook address. (GB2RS)

**

THAT FINAL ITEM: THE ARDF REPORT

What do Burrowing Owls and 80-meter transmitters have in common? They are both targets of hams who like to do radio direction finding. Newsline's Joe Moell K0OV tells us more:

--

There's lots happening in the world of radio direction finding this summer. More young Burrowing Owls are leaving their nests in western Florida, so hams in that state who aren't busy with hurricane communications are by their receivers, listening for the radio tag signals to see where these critters will go. If you can help, please join them -- I'll tell you how in a moment.

Also, a 21-member delegation of ARDF Team USA competitors, trainers, jurors, and family members went to the Czech Republic and the World Championships of radio foxhunting, September 7th through the 12th. These World ARDF Championships take place every two years. USA's 2004 team members were OMs and YLs ranging in age from 19 to 62. Among them was Jay Thompson W6JAY, Newsline's Young Ham of the Year for 2003 and recent winner of the ARRL Hiram Percy Maxim Award. Each competed once on 80 meters and once on two meters, looking for three, four or five transmitters, depending on age and gender category.

USA began attending the World Championships in 1998, but European and former Soviet countries have been holding ARDF events for over 30 years. So it's no surprise that they dominated in the final standings. Nine of these nations garnered all of the individual and team medals. The total medal count was led by Czech, Russia, and Ukraine with 34, 28 and 26 respectively.

USA, Australia, and Great Britain were among the 19 nations that won no medals. But we're getting better every year. Two Team USA members had top-ten individual finishes in their categories. Nadia Scharlau of Cary, NC took 6th place out of 22 on two meters. She might have won a medal on 80 meters, but the battery fell out of her receiver and she had to find the last fox transmitter with just the bearings that she already had on her map, losing about ten minutes. Bob Cooley KF6VSE, age 62, of Pleasanton, CA placed 9th out of 34 on his two-meter run.

All of our team members earned their spots by taking medals in the USA National Championships. This year's were in California in June, and a site is already being sought for the national championships in 2005, 2006 and beyond. As USA's ARDF Coordinator, I would like to hear from you if your club is interested in putting on the championships.

You can read all about the ARDF championships, Team USA, and volunteer wildlife tracking -- and find out how to get involved -- at the usual place, www.homingin.com. That's homingin, as one word, homingin.com.

From southern California, this is Joe Moell K-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Again, that website Joe mentioned is www.homingin.com. And homingin is one word. (K0OV, ARNewsline(tm))

Yes indeed....Glenn Baxter is doing a fine job.

September 15, 2004

Mr. Glenn A. Baxter
RR 1 Box 776
Belgrade Lakes, ME 04918

RE: Warning Notice--Amateur Radio License K1MAN
Case #EB-2004-07

Dear Mr. Baxter:

On April 14, 2004, the Commission notified you of two areas of operation of your Amateur Radio station that, if not corrected, would lead to enforcement action against your licenses and/or designation of your renewal application for a hearing to determine if you are qualified to remain a licensee. Those were: 1) deliberate interference resulting from your commencing operation on top of ongoing communications, in violation of Sections 97.101(a) and (d); and 2) use of your Amateur station for pecuniary interests, in violation of Sections 97.113(a)(2)and (3).

We warned you that your transmissions start up on top of existing communications. We warned you that your publishing a "transmission schedule" does not give you the right to begin transmitting on a certain frequency at a certain time if there are ongoing communications on that frequency.

Regarding use of an Amateur station for pecuniary interest, we warned you you're your Amateur radio program transmissions regularly advertise your web pages at www.K1man.com, and on those pages you advertise items for sale, sales commissions and "overrides" that your State Directors and Section Managers can receive, and detail ways in which your Section Managers can earn money by recruiting members, selling hats, name badges or T shirts.

Not only have these violations not been corrected, but your web site that you continue to advertise offers credit cards and discounts for AARA card holders, in addition to the items and commissions mentioned above. Additionally, you advertised a physics conference and hotel rooms on June 6, 2004.

Additionally, we have received approximately a dozen complaints that your Amateur radio transmissions started on top of ongoing communications of individual operators, as well as on top of ongoing communications of the Salvation Army Team Emergency Radio Net, which handles health and welfare traffic for this season's hurricane victims.

Section 308(b) of the Communications Act of 1934, as amended, 47 U.S.C. Section 308(b), gives the Commission the authority to obtain information from applicants and licensees regarding the operation of their station and their qualifications to retain a Commission license. Accordingly, you are requested to respond to this letter within 20 days from receipt of this letter certifying: 1) what action you are taking to correct these deficiencies in the operation of your station; and 2) specifying what method of station control you have implemented for your Amateur radio transmissions.

Failure to correct the violations will subject you to enforcement action against your station and operator licenses.

In an inquiry of this type we are required to notify you that a willfully false or misleading reply constitutes a separate violation made punishable under United States Code Title 18, Section 1001.

CC: FCC Northeastern Regional Director
FCC Boston Office District Director
Honorable Paula D. Silsby, United States Attorney, U. S. Department of Justice,
District of Maine
David Collins, Assistant U.S. Attorney and Chief, Civil Division,
U. S. Department of Justice, District of Maine

The part about interfering with a real emergency net might just be what

is needed for the FCC to actually take action. It eliminates the need
for a decision that could be called subjective based on the content not
being bulletins.

Yup Dan. Now they don't need to approach it from the dicey "broadcast" angle. That one was always a coin toss, and We might have lost the broadcasts from W1AW in the process. But between interfering with other hams, the money items, and and opening up on top of an emergency net, I would say this should about wrap it up.

My kind thinks Clinton is a very dangerous upcoming menace, who will
stab anyone she has to in order to get ahead. She's a menace as big as
Bush. Bigger actually, she's got more brains, as twisted as they are.

Well said. Hillary has very strong Socialist leanings coupled with an
unquenchable lust for power. She is a dangerous woman indeed.

I don't know about the "more brains" thing, however. No woman in a proper
frame of mind would stick with an adulterer for all these years. Oh, wait.
Her thirst for power probably overruled any common sense...a good indicator
that she will put all else aside in her crusade to be the first Dictator Of
The United States.

Mr. Glenn A. Baxter
RR 1 Box 776
Belgrade Lakes, ME 04918

RE: Warning Notice--Amateur Radio License K1MAN
Case #EB-2004-07

Dear Mr. Baxter:

On April 14, 2004, the Commission notified you of two areas
of operation of
your Amateur Radio station that, if not corrected, would
lead to enforcement
action against your licenses and/or designation of your
renewal application
for a hearing to determine if you are qualified to remain a
licensee. Those
were: 1) deliberate interference resulting from your
commencing operation on
top of ongoing communications, in violation of Sections
97.101(a) and (d);
and 2) use of your Amateur station for pecuniary interests,
in violation of
Sections 97.113(a)(2)and (3).

We warned you that your transmissions start up on top of
existing
communications. We warned you that your publishing a
"transmission schedule"
does not give you the right to begin transmitting on a
certain frequency at
a certain time if there are ongoing communications on that
frequency.

Regarding use of an Amateur station for pecuniary interest,
we warned you
you're your Amateur radio program transmissions regularly
advertise your web
pages at www.K1man.com, and on those pages you advertise
items for sale,
sales commissions and "overrides" that your State Directors
and Section

Managers can receive, and detail ways in which your Section Managers can
earn money by recruiting members, selling hats, name badges or T shirts.

Not only have these violations not been corrected, but your web site that
you continue to advertise offers credit cards and discounts for AARA card
holders, in addition to the items and commissions mentioned above.
Additionally, you advertised a physics conference and hotel rooms on June 6,
2004.

Additionally, we have received approximately a dozen complaints that your
Amateur radio transmissions started on top of ongoing communications of
individual operators, as well as on top of ongoing communications of the
Salvation Army Team Emergency Radio Net, which handles health and welfare
traffic for this season's hurricane victims.

Section 308(b) of the Communications Act of 1934, as amended, 47 U.S.C.
Section 308(b), gives the Commission the authority to obtain information
from applicants and licensees regarding the operation of their station and
their qualifications to retain a Commission license. Accordingly, you are
requested to respond to this letter within 20 days from receipt of this
letter certifying: 1) what action you are taking to correct these
deficiencies in the operation of your station; and 2) specifying what method
of station control you have implemented for your Amateur radio
transmissions.

Failure to correct the violations will subject you to enforcement action
against your station and operator licenses.

In an inquiry of this type we are required to notify you that a willfully
false or misleading reply constitutes a separate violation made punishable
under United States Code Title 18, Section 1001.

I wish I had realized earlier that you are an equal opportunity politico-basher; we might have avoided a few disagreements.

I've actually been thinking that a Kerry win might be desireable if for no other reason that it could put to rest Ms. Clinton's presidential aspirations. If he wins two terms and the torch passes to Edwards, that's a minimum of 12 years, and possibly 16, before she would have a shot. Then it occurs to me that Edwards might very well give her a VP slot in eight years, and the whole fantasy goes up in smoke.

Actually, I thought the jig was up when you called me an anarchist, so I just let it ride. In years past I must have used "Oral Office" as frequently, monotonously, lacklusterly, ineffectually and unoriginally as dxEh? is using "'tard".

> I've actually been thinking that a Kerry win might be desireable if

Clinton may have a more devious ways to discredit an incumbent Kerry than the Bush mob. Whatever happened to all the Whitewater criminals? Vince Foster? All those pardons for money were sickening. Payola at it's finest. The Clintons obviously have friends in low places. They probably hang around in the same smoke filled bars that today's White House enforcers do.

Well, that's as good a forecast/prognosis as any. I'm waiting to see what skulduggery goes on in the next few weeks. Will they find some way to cancel the upcoming 'debates'? It would appear these things are not in the President's best interest.

Anyone who listens to the radio in order not to be swayed by the body language of the participants is missing a lot.

There should be a cute saying about foresight having 20/?? vision..kinda like a paraphrasing of the hindsight thing..

....

Not gonna happen. James Carville and the likes of his ilk are firmly in
Hillary's corner. They are seeing to it that Kerry will lose the election.
They don't want a Kerry win. A Kerry win would scuttle their nefarious plans
for a Hillary ascension to The Throne in 2008.

Hello,

due to the lack of space I have to blow out some NOS Siemens
electrolytics.

Datecoded 1984 NOS NIB they will surely be fully useful.

They have 470 uF at 250 V, two in series will provide stable and
reliable 240uF at 500 V.

Regular price for the box of 100 pcs is EUR 80,-

Special offer for the box of 100 pcs: EUR 50,-

Thatï¿½s 50ct for a 5$ electrolytic !!!!

If you buy 10 or more boxes price will be EUR 42,- per box.

See

http://www.askjanfirst.com/kb/KON8311.jpg for a picture and

http://www.askjanfirst.com

for our homepage.

or send me an email if you need more info.

I ship worldwide, shipping upon request.

Jan

K1MAN is clogging the airwaves with crap. Playing messages that are left on his phone over and over again. This is not information of general interest to radio amateurs and therefore it is illegal. This guy is nuts and his International Amateur Radio Net or whatever is a farce. This guy needs to spend some time in jail.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th/September, through Sunday, 3rd/October there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5N, 5R, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9U, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J7, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VK9N, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4Z0, ISRAEL (Special Event). Look for special event station 4Z0V to be active until October 9th. Activity is taking place during the Wine Festival at Rishon Le Zion. Activity over the past week was on 40/30/20/15/12 meters CW/SSB/PSK. QSL via 4Z4KX.

5Z4, KENYA (Interesting Callsign of the Week!). Miki, YT1CS, is currently active from Nairobi and will bethere until November 18th. His callsign is 5Z4YT1CS (ed. Wow! What a mouthful. Yes, it is true and there is no "/" [slatch] between the 5Z4 and YT1CS). It was reported that Miki's activity would only be SSB on 20/15/10 meters. There is a possibility he may activate some of the IOTA islands there. QSL via YT1CS (direct or by the bureau).

7W0, ALGERIA. The 7W0AD is now active until October 9th. Activity over the past weekend was very active on 30m (RTTY) and 17 (SSB/RTTY) with some 40m (CW). QSL via EA4URE.

CE0Z, JUAN FERNANDEZ ISLAND. Marco, CE6TBN, informs OPDX that there is now no amateur radio operator on this island. Eliazar, CE0ZIS, has left the island 4 month ago and is now living near Valparaiso City in CE2-land. Marco states that he has plans to travel to CE0Z next year, but he is not sure when yet.

CN, MOROCCO (Update OPDX.678). Last week we mentioned that Jan "Jim", SM2EKM, will be active as CN2KM in the CQWW DX CW Contest. Jan now has informed OPDX that he will be there November 23rd to December 1st. QSL via SM2EKM.

FR, REUNION ISLAND. Bert, PA3GIO, informs OPDX that he will be active as FR/PA3GIO/p from Reunion Island (AF-016), October 2-11th. Activity will be on 80-10 meters SSB only; using 100 watts and Doublet (Limited activity). He was heard this past weekend on 3800, 7046, 14260, 18145, 24945 and 28495 kHz. For Bureau QSLs, PLEASE use the easy QSL request form on his Web site. (ADDED NOTE: Also for all other operations.) For direct QSLs, please use the QSL info/address on his Web site at: http://www.pa3gio.nl/FR/

HZ1AB CHANGE. For almost six decades the HZ1AB club station in Saudi Arabia has been active. Originally known as the United States Military Training Mission station and more recently known as the Dhahran Amateur Radio Club, this station is now shut down. According to "The Daily DX" and the "ARRL Letter", Club Secretary Thomas Carlsson, SM0CXU/AB5CQ, said this week that new station license requirements in Saudi Arabia made it necessary to shut down the station, and the callsign has been reissued to a Saudi national. The QSL Manager Leo Fry, K8PYD, still has the HZ1AB logs and will handle any past/late QSL requests.

IOTA NEWS.....
AF-019. Check out the pictures on the recent September 24-28th IG9/IZ8CGS IOTA DXpedition to Lampedusa Island (MIA MI-126) online at: http://www.mdxc.org/ig9_iz8cgs

AS-024. Anci, JA2ZL, will be active as JA2ZL/6 from the Kobama Island (JIIA AS-024-008), now through October 7th. Activity will be on 40-10 meters (including the WARC bands) CW, SSB, RTTY and SSTV. QSL via the bureau or direct to JA2ZL: Anci Yamada, 17-8-2 Takiro-cho, Tajimi, Gifu, JAPAN.

EU-023. Arno, DL1CW, will be active as 9H3AP from Gozo Island, October 5-13th. Activity will be CW only on 40-10 meters. QSL via DL1CW.

EU-182. Nikolay/UX0FF, Alexandr/UR5FAV, and Vitali/UR5FGW will be active as homecall/p from the Island of Ankudinov in the Black Sea, October 7-10th. Activity will be all bands and modes. QSL via operator's home callsign.

NA-069. Jeff, VA3QSL, informs OPDX that he will be visiting Florida the 2nd week of November. He plans to be on the air from Estero Island (USI FL-035S) using the callsign VA3QSL/W4 from November 11-13th. Activity will be on 14260 kHz (+/-). QSL to his home callsign via the bureau, or direct with 1 greenstamp or IRC.

OC-147. Bachrun, YC9YKI, was heard this past week from Yapen Island (resident) on 15 meters SSB just little before 1230z. QSL via YB9BU.

IOTA VIDEO. A new IOTA video is available on the recent CS7T operation to the Estelas Islands. The press release states that this is a professional produced DVD and an excellent piece of HAM radio history directed by Jose Alberto, EA1OS, with incredible footage of these most beautiful Islands. For more details, please have a look at:
http://web.newsguy.com/ea12537/Intro_Videos.htm
They are not looking for any sponsorship so the DVD costs only 10 Euros (shipping included). For enquires contact Jose Alberto, EA1OS, at:
cs7t@wanadoo.es
or
Jose Alberto Suarez Rodriguez
C/ Praga 23 - Urb. Valaire
E15008 - A Corunna, SPAIN

JD1, MINAMI TORISHIMA. Itokazu, JR6TYH, is now active as JR6TYH/JD1 on Marcus Island (OC-073) until December 20th. During the past week, he was heard on 21260 kHz between 0600-0900z and again at 2200-0000z. He reportedly has a tribander for 10/15/20 meters. QSL via the JARL Bureau.

KH9, WAKE ISLAND. Terry/K7ASU and George/AH8H are now active as K7ASU/KH9 and KH9/AH8H until about October 23rd. Activity will be limited as the two operators will only be on during their spare time. All of the activity reported so far has been CW on 20 and 15 meters between 0700-1030z. Watch around 14018 and 21017 kHz. QSL K7ASU/KH9 via K7ASU. QSL KH9/AH8H via AH8H: George Talbot, PO Box 45, APO AP 96555-0045, USA.

LIGHTHOUSE ACTIVITY. Operators Jim/KA3UNQ and Stan/N2US will operate as N3L from Maryland's Hooper Strait Lighthouse (ARLHS USA-378), celebrating the 125th anniversary of the first lighting. Expected operation will be on SSB, October 16th, 1400-2200z. Suggested frequencies are: 14270 and 7270 kHz (+/- QRM). QSL with a SASE to KA3UNQ.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about October 10th to November 15th. His

callsign will be MM0LEO. In the CQWW DX SSB Contest, he will use GM3W [the contest callsign of the Wigtownshire A.R.C.]. He will use an Icom 706 (100 watts]), an R-5 vertical [10, 12, 15, 17, 20 meters], and a 40-meter dipole [in inverted-V, semi-delta configuration]. QSL via W3LEO -- QRZ.com address w/SASE or via W3 bureau for both callsign. His activity is good for the following awards and reference numbers:
Worked All Britain [WAB] Square: NW-95
CQ Zone: 14 ITU Zone: 27 Grid Square: IO-74ku
IOTA: EU-005 [Great Britain].

NP3, PUERTO RICO. Several members of the Yankee Clipper Contest Club (YCCC) will be traveling to the NP3U "Mi Casita" contest station of Carlos, WP4U, for the upcoming CQWW DX SSB Contest, October 30-31st. Operators Bill/N1HRA, Foster/N3KCJ, Joe/K1JN, Matt/WE1H, Pat/WL7Z and Dave/W1CTN will be making the trip. Look for some limited activity prior to the contest as homecall/KP4. QSLs for NP3U is via WP4U and for individual activity will be via the individual home call.

PIRATE ALERT! Bill, VK4FW, informs OPDX that he has received a few inquiries regarding a FW8FP station being active over the past week or so. He states, "This is a pirate..... don't waste your time QSLing please."

PJ2, NETHERLANDS ANTILLES. Andy, DL5CW, will be active as PJ2/DL5CW from Curacao (SA-007), November 1-15th. Activity will be on 80-10 meters on all modes. QSL via the bureau is a sured.

PROPAGATION (Last Minute Forecast Updates and More!). With the CQ WW SSB Contest coming up, Tomas, NW7US (AAR0JA/AAA0WA), Propagation Editor for CQ, CQ VHF, and Popular Communications, states for those who use the CQ Magazine Propagation Column "Last Minute Forecast" to help plan your operation, you might be interested in the "live" version of that table. Tomas has a live version of the LMF at:
http://hfradio.org/lastminute_propagation.html
Also, the NW7US HFRadio.org Propagation Center (http://prop.hfradio.org/) which features a collection of live space weather and radio propagation data, as well as commentary by NW7US, graphics, and so forth, has been updated with a new layout. The data has been "load balanced" between several pages. Specific data that is of interest:

1. CQ Magazine "Last-Minute Forecast" table is updated daily - for those who follow Tomas's column in CQ Magazine, you will know that the "Last Minute Forecast" is used with the published propagation tables. Use the latest table for DX scheduling, etc.

2. Optimal Working Frequencies and predicted Smoothed Sunspots and 10.7-cm Flux tables are updated on a regular basis.

3. Discussion forum for a wide topical range - from Propagation to Shortwave Listening, NVIS, and more (http://hfradio.org/forums/).

4. All of the major data is syndicated via RSS (XML RSS version 2.0) (http://hfradio.org/propsupport/prop.rss).

5. Same information, plus SWL BCL database search, DX spots, Callsign Lookup via WAP/WML (http://wap.hfradio.org).

6. Propagation and Space Weather e-Alert service (as used by the troops in the Middle East Theater, pigeon racers, and DXers alike) (http://prop.hfradio.org/ealert/).

QSL INFO AND NEWS.....
Dave, W5WP, informs OPDX that at the request of David, KH9AE (5X4CM and 5X4/KH9AE), he will be performing his QSLing "chores". Direct requests must be accompanied with an SASE. International (outside U.S.A.) must have an SAE and sufficient return postage. All requests will be answered, Those received via the bureau or without sufficient postage and SAE/SASE will be replied to via the bureau. Please do not request confirmation via eQSL as Dave does not subscribe to it. At this time, Dave does not use LoTW. He does not have the time to reconfigure the E-mail logs to meet LoTW requirements. Please send mail requests to: W. David Paperman, W5WP, 19266 Sims, Cleveland, TX 77328-6205. Dave states, "Please place the call of the station somewhere on the envelope as I am also the manager for CO2KK."

QSL 8S7A via W3HNK. Activity was last weekend from IOTA EU-037.

QSL JA4GXS/4 via the bureau or direct to JA4GXS: Kenji Sasaki, 2-15 Ishikannon-cho,Yamaguchi, 753-0038 Japan. Activity was by Kenji from No-shima Island (AS-117) (JIIA-AS-117-110).

Joe, W3HNK, has informed OPDX that he has the logs for the V44NK operation; July 10th and 11th 2004 ONLY!!!! PLEASE NOTE: Joe is "NOT" the QSL Manager for V44NK. However, he will answer QSL requests (ONLY) for the above 2 day operation!

OLD QSL COLLECTION. Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see some 2000 old QSLs in six different albums. This site contain:
- At least, one card, for each 58 deleted DXCC countries (more than 400 QSLs)
- Nearest the totality of current prefix, disappeared now (more than 800 QSLs)
- More than 300 QSLs from the Antarctic bases.
- Nearly 190 QSLs from the TAAF (Terres Australes and Antarctiques Fran&#65533;aises).
- More than 200 cards for the old timer with more than 100 countries before 1945.
- A card from the French Department before 1945.
The URL address for the Web site is : http://LesNouvellesDX.free.fr
Some cards are still needed for the collection and your participation is welcome, please visit their site and give them your comments by send an E-mail to: LesNouvellesDX@free.fr

SOUTH PACIFIC DXPEDITION. Operators Carlo/IK6CAC and Elvira/IV3FSG will activate a few Pacific Ocean island during the months of October and November. Look for them to join the Ocean Amateur Radio DX Group (ODXG)

as VK9LA and VK9LW from Lord Howe Island, October 9-23rd. See VK9L below. The Italian team will also activate New Caledonia (OC-032) as FK/IK6CAC and FK/IV3FSG from October 25th to November 4th. Activity is also planned for Loyalty Island (OC-033) and the rare Belep Island (OC-079). They will move from FK-land to Vanuatu (YJ) and be active between November 5-13th. Callsigns for YJ-land were not provided. QSL via operators instructions.

TJ, CAMEROON. Just a reminder! Also, refer to OPDX.669. Operators DL7DF, DL7UFR, DL7KL, DL7DF, DL4WK, DK1BT and SP3DOI will be active this week as TJ3SP and TJ3FR from October 6-20th. They will have four stations active and on all modes and all bands, except on 160m and 6m (no licence). For more information, please watch the Web page at:
http://www.qsl.net/dl7df

TO7, MARTINIQUE. Laurent, F5MUX, will be here and active between October 26th to November 5th. His activity will include the CQ WW DX SSB Contest as a Single-Op/All-Band/High-Power entry using the callsign TO7X. All stations which contact him on a minimum of 4 bands will receive a QSL DIRECT automatically. All others will be confirmed via the bureau. QSL via F5MUX.

V5, NAMIBIA. Vladimir, ZS6MG, will be active as V55V in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/Low-Power entry. QSL via ZS6MG. His Web page is at: http://zs6mg.hobby.com.mk

VE1, CANADA. Jim, VE1JF, informs OPDX that he will be running as a Multi/2 in the upcoming CQWW SSB Contest and will attempt to "make a market" (ed. that how he phrased it!) for EU/NA 10M QSOs. Look for him to be on 28450 kHz (+/- QRM) around 1300z both days. He expects to have the other rig running EU on 20m at that time, and will announce this and the frequency on the air. Jim will be running his F12 7/7/7 3-stack and is hopeful at least some of the EU Big Guns can hear and work him (He will of course be listening carefully for others).

VK9L, LORD HOWE ISLAND (Update). Bill Horner, VK4FW, President of the ODXG, informs OPDX that "All systems go. Callsigns..... VK9LA for the OMs.... VK9LW for the YLs." QSLs will be handled by the Oceania Amateur Radio Dx Group Inc, P.O. Box 513, NAMBOUR 4560, AUSTRALIA. Activity will be between October 9-23rd. Operators will be: Vicki/VK2IVK (YL), Elvira/IV3FSG (YL), Laurie/G3UML, Eric/VK4NEF, Mike/VK3SU, Carlo/IK6CAC and Bill/VK4FW. Suggested frequencies are:
6m - 50100 kHz (CW/SSB)
CW - 1812, 3512, 7012, 10107, 14012, 18072, 21012, 24912 and 28012
SSB - 3785, 7045, 14260, 18140, 21260, 24950 and 28495
RTTY - 7080, 10120, 14090, 18100 and 21090 kHz

YJ0, VANUATU. Trent, VK4TI, is now active as YJ0AX until October 10th. He was active this past weekend's Oceania DX Contest. Activity will be limited. Watch 40/20/15/10 meters on CW/SSB. QSL via VK4TI: Trent Sampson, PO BOX 1647, Toowoomba QLD 4350 Australia.

Which is exactly what Baxter wants. He wants this whole thing to be brought up so he can force a ALJ hearing. He then intends to drag the ARRL down with him.

Screw Baxter, I hope they bury his arse under the radio prison.

Dan/W4NTI

1427. Icom 706MKIIG to Amp question

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-04 00:30:21 UTC
From: Mike <avengerb32@hotmail.com>
Message-ID: <xQ08d.264562$bp1.253985@twister.nyroc.rr.com>
Source record: 56139

Normally, an amplifier is connected to an Icom IC-706MKIIG via the accessory jack on the back of the radio, but my IC-180 auto-tuner is using that jack. Therefore, can the amplifier relay cable instead be connected to the accessory jack on the back of the AT-180 tuner? I'm kinda' thinking that the accessory jack on the back of the tuner is simply an extension of the radios accessory jack. Any thoughts?

Indeed. Lardass Lloyd has been trying for over 10 years to upgrade and
get on HF and failed every time. Baxter is doing nothing but using ham
radio as a forum, since he couldn't get on commercial or shortwave
broadcast stations.

Poor Chickenshit, he had to go to an online dictionary to look up
"coccyx" to use the word in a sentence. He was so dissappointed that
it had nothing to do with his favorite snack that has a similar name,
but lower on one's body.

Pages 10,11 Irish Examiner's Cork County supplement TUESDAY, AUGUST 17, 2004

Noel Magnier talks to an extraordinary man (John Cahill, callsign EI7V) who has used his talents in many different ways

A John of all trades and surely a master of some

JOHN PATRICK CAHILL is by any standard an extraordinary man with an extraordinary career portfolio across a considerable range of projects, from designing to divining, cycling to computing and much more.
This shy, but intense and self-deprecating genius continues to have a zest for life which is truly inspirational for all ages.
The Strawberry Hill resident who designed and fabricated a life-saving incubator for new-born and ill babies is reluctant to talk about lives saved as a consequence. However, he does give a description of designing a purpose built stainless steel unit, using a stretcher base and rebuilding and securing all incubator elements to this, thus eliminating the problem and dangerous task of transporting babies by ambulance or even helicopter.
John Cahill, expressing being 'pleased' with the result, said the project required little physical work hut a 'handy' bit of thought and planning. This despite the fact his planning and skills meant safer passage for the many babies transported annually by Cork Ambulance services.
Born near Hazelwood, Mallow in north Cork to John and Hanna, he was the eldest of five children. He went to the local national school in the early years. He grew up playing handball, hurling and football and he finished national school and went on to the Patrician Brothers school in Mallow where his mother paid ten shillings entrance fee to the technical department.
John made the round trip of ten miles, walking five days of the week in all weathers.
His first working experience upon leaving school was with Thompson's garage in Mallow. As a bound apprentice where, after five years he qualified as an auto-electrician, the young Cahill had an avid appetite for engineering, science and physics and displayed an early aptitude for building dynamos and things electrical.
A move to Cork City in the early 1950s and time spent working as an auto electrician in O'Shea's garage in the South Mall spurred his ambition and when he quoted successfully for the installation of an X-ray machine in St. Finbarr's hospital it was the beginning of an association with the Southern Health Board which lasted for more than three decades.

Self-employed, the volume and variety of his work gradually increased specialising in maternity at hospitals from Clonmel to Bantry and Theo Infirmary, Bon Secour Maternity in Cork and also the Eye, Ear and Throat, attending to intensive care instrumentation in the Western Road where the hospital was situated and known to generations of Corkonians as the 'Iron Throat'. John's work also took him to Erinville Hospital on the Mardyke of which he speaks with particular affection.

Like a doctor, John was always on call to respond to any emergency of which there were many throughout the 30-plus years he worked with the then Cork Health Authority. Although John did not to University he studied Engineering in both Mallow and the Crawford Technical schools in Cork, as he says, "I was then, and still am to this day, a perpetual student of technical detail."

When John took an interest in photography he studied every aspect with the same zeal and forensic style and application he applied to his engineering skills. He built a darkroom in a shed at the rear of his house and began experimenting in quality monochrome (black and white) photography.

As his interest grew he discovered from entering local and international competitions that he had an aptitude for photography. He joined the Cork Camera Club and soon won many awards for his work at home and abroad. Soon he would become a renowned teacher of the art of taking photos.

He also became a part-time professional photographer taking only exclusive weddings (he won't mention names), as well as industrial and medical photography exhibitions which required the highest degree of skill.

His analytical mind took John to new horizons in colour processing. Colour film had to be sent to England to be processed but through his efforts in colour research he successfully conducted his own colour processing, the first in Ireland to do so. Initially this meant a special arrangement with Kodak in Dublin to procure specialised chemicals and other material from America which was not otherwise available in Ireland.

Pioneering colour photography processing was something John just took in his stride and he was happy to pass on the details to his pupils when he took up an offer as part-time teacher in the VEC in Scoil Eoin Naofa in Cork where he taught for over two years.

In the interim Cahill produced the first ever wedding album in colour in Ireland containing the then standard 8x10 pictures. He designed and built a special processor to achieve this work.

Never one to rest on his laurels John, (through a mutual friend who had an interest in greyhound racing) designed, built and installed a timing system which is used at all dog tracks throughout Ireland since the 1960s.

During that period, John was the first person, certainly in the Strawberry Hill/Sundays Well area of Cork City to receive television programmes by building a 'Yagi' antenna TV aerial which was capable of receiving programmes from Wenvoe in Wales and neighbours and their

children would come to Strawberry Hill on Saturday mornings to view children's programmes.
For recreation he took up cycling but John had to pedal that extra mile and he became a founder member of the Blarney touring club and was elected its first President. He and his fellow cyclists toured the south of Ireland regular1y.
Not content with just any bicycle, John Cahill did the inevitable and built his own bike from scratch, including the wheels, manufactured by Dave Wood of the UK to John's very own specifications. Never one to do things by half, he would soon number amongst his cycling friends two of Ireland's greatest - Sean Kelly and Tour de France winner Stephen Roche.
In 1993 John Cahill took part in a century cycle (100 miles) fund raiser for cancer - proceeds went to the Mercy Hospital in Cork. He also developed an interest in divining for water, missing persons and lost property. Soon he would become a member of the Irish Society of Diviners which was based in Dublin at the time.
John says that popular opinion had the hazel rod as an imperative to successful divining but he claims an ordinary coat hanger could be modified to do the job.
As a young man he became involved in radio and became an avid radio ham. Soon he began to build his own transmitters and receivers from junk parts brought in from England, mainly British Army government surplus after World War II.
His radio equipment were capable of world-wide communication using AM (amplitude modulation) which was also the same system used by Radio Eireann when the station broadcast from the old Cork Jail in Sundays Well, literally round the corner from John's home in Strawberry Hill. The AM system was also used by Radio Eireann broadcasting from Athlone.
John became proficient in Morse Code for Communicating and his call sign was EI7V
John's interest in radio says began in 1954, has evolved dramatically over the decades with computers playing a vital role and nowadays he has a GPS positioning system) which he uses for mapping or positioning routes on a car journey and also for waiting and calculating on spread sheets and general computer use and to make 'life easier for myself.'
When asked, John Cahill would admit that his expertise in precision engineering was the dominant force of his career and gave him most satisfaction and acclaim. The inventor/designer who in a later era would most certainly have gone to University, though he did pass up a degree opportunity, a BE. when he refused a posting to Carlow Regional Technical College having installed all the electronic equipment in the new building.
Exhibiting his work to students in college he found most gratifying and he states he never pursued degrees to validate his engineering skills which came naturally.
Today John P Cahill takes life easier, at least by his previous frenetic standards. For relaxation he plays the accordion and of course he plays well and yes he repairs, modifies and builds the

accordion and attends cï¿½ili music sessions and is a personal friend of that great musician Donal Ring.
John Patrick Cahill may have his roots in Mallow but his heart is in his beloved Strawberry Hill (where close by was born his friend, Ed Walsh, Professor of the National University, Limerick).
John and his wife, Bridie have regular visits from their daughter, Norma and granddaughters Avril, a medical research scientist in Cancer and Lorraine, studying to be a solicitor.
When first approached for this interview, John Patrick Cahill averred, "Nobody would be interested".
John got that one wrong. Just once.

Good evening

I will like to create a software on the grayline, I looking for information
for this subject (calculation, code etc...)
Thank your very much for your help.

My best regards,

F1USC

Hello all,
Recently I purchased a low-power VHF transmitter kit from Ramsey. After building this kit, I have discovered that it will not work for my purpose. I am trying to transmit audio and video about 20 feet from a satellite receiver to my bedroom. The power output from the transmitter is so low that the picture quality is very poor. I am a novice and I am hoping the experts that use these newsgroups can help me. I will post a link to the Ramsey kit manual. Will some of you guys please take a look at this manual, and suggest some simple (hopefully) methods to increase the power of this transmitter? There is no chance of interference with the neighbors, as my nearest neighbor is far away. Any help would be greatly appreciated. If you want to email the response, please send it to mndflmr@hotmail.com

Here is the link to the kit manual:
http://www.ramseyelectronics.com/downloads/manuals/TV6.pdf

Thanks for any help

Joe

1442. Re: Need help with VHF transmitter kit

The transmitter would necessarily comply with the FCC rules. Modifying it
to increase power is illegal.

If it does not transmit the distance represented, then either the
construction is wrong or the specifications are wrong.

The best and least expensive way at this point is probably to use better
antennas on each end. What are you using now?

Ten milliwatts is more than enough for a measly 20 feet, and i am
sure the kit puts out more than that.
Match (tune) the antennas at both ends for starters, orient them to
point at each other is the next step, and have a decent (sensitive)
receiver.
I only had a matched antenna at the (sensitive) receiver, and got
about 100 or so feet at 10mW.

Thats not true. The Marshall County, WV, ARES members all hold
the prestigious Radio Endorsement on their CDLs. You know
full well that this highly sought after endorsement allows Marshall
County, WV ARES members to legally use ANY frequency in the
electromagnet spectrum! Woger, you are just jealous because
you do not have a CDL, much less the much respected Radio
Endorsement to same. Your DeVry correspondence courses are
not even accredited. Remember the way Stagger Lee proved you
wrong so many times on negative SWR, inverse proportional
trapazoidonal wave theory, and micro dynamic quantum wave
theory, and many many other topics that your DeVry instructors
weren't even qualified to teach?

Thanks for all the hints. I have messed around with different receive antennas and I have finally gotten a usable picture. It kind of surprised me that I had to go through so much trouble at such a short distance. I am afraid I will never understand RF. At any rate, now my problem is with the audio (yes I have fiddled with all the adjustments in the transmitter). I cannot get the POPPING out of the audio. I phoned Ramsey and was told to exchange the 270 pf cap for a 220 pf cap. This cap is mounted on the underside of the board (see board drawing on the PDF). Well I will give this a try. I still wouldn't mind upping the power somewhat. I know there are resstrictions by I have no neighbors nearby. For some reason the schematic drawing is missing on the PDF. I do have the schematic that came with the instructions. Not that it does me a lot of good with my limited knowledge! Anyway, thanks everyone for the input.

I concurr. That transistor has the capability of putting out one watt,
though I don't think the circuit is designed to do that much. Even so, if
it is putting out even 100 miliwatts, that should get you several hundred
feet...with decent antennas. Once you are sure the circuit is operating
properly, work on the antennas . I did a TV transmitter of about 10 mw and
a really short whip antenna and got 20 feet no problem. Stuck it onto the
top of my camcorder and walked around the house. This was with the TV
"transmitter" from my 1970's "Pong" game and one of those broad band MMIC
amps...50 ohms in/out and a 18 inch whip above the camera. It was actually
in a Bud box with a home-made bracket that slipped into the light shoe. Had
to be a crummy antenna.

Is there a Windows version for programming the Icom IC-40s?
Unfortunately the dealer DOS version supports only Comms 1 & 2.

Failing an existing Windows version, can anyone supply me all or some
of the following information:

* File format (I assume it is encrypted as the same style as for the
Icom R10).

* What data is sent/received and in what sequence.

* Any other useful information.

* Any tips for programming comm interfaces. I'll be using Delphi 5.
I've never written a comm utility before. Might as well try now.

Amateur Radio Newsline™ Report 1417 October 8, 2004

Amateur Radio Newsline report number 1417 with a release date of Friday, October 8, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A New Jersey radio club makes a big donation to the local community and hams in Great Britain may get more privileges on 40 meters. These stories and more on Amateur Radio Newsline report number 1417 coming your way right now.

(Billboard Cart Here)

**

PUBLIC SERVICE: RADIO CLUB DONATES $400,000 TO NJ PARK

A radio club has donated $400,000 to Essex County, New Jersey. This, to pay for renovations already made to Irvington Park where the club has its headquarters. And there's more money on the way. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the rest of the story:

--

According to a story in the September 29th edition of the Newark Star Ledger, the $400,000 donated by the Irvington Amateur Radio Team came from the states Green Acres program. It will be used to pay part of the $1.1 million in renovations that included new tennis courts, basketball courts, benches and a track.

The club, a nonprofit organization that volunteers as keepers of the park. It is expecting another $500,000 in Green Acres funds to pay for the second phase of the parks upgrade. Phase I of the $2 million overall was completed during early summer. Phase II, scheduled to begin next year, will include a second floor addition to the field house, where the radio club has its headquarters.

Phase I was completed during early summer. Phase II, scheduled to begin next year, will include a second- floor addition to the field house, where the radio club has its headquarters. The funds obtained by the club have been matched by Essex County.

Charles Freeman, N2JGC, is the clubs president. He says that the park renovations have boosted community pride.

--

Freeman: "Its all volunteerism. Its a bunch of wonderful people who dedicate their time and service to I-ART - the Irvington Amateur Radio

Team, the Office of Emergency Management, CERT, and any way we can get involved in helping out our community."
--

Feeeman says that this has helped get some of the children off the street by getting them involved in computers and amateur radio.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ.

--

The club brought its headquarters to the park in 1998. Soon after, members became the primary caretakers of the facility. (Star-Ledger, ARNewsline(tm))

**

RESTRUCTURING: VICTORIA VK HAMS LOOSE LOWER HALF OF 70CM

The bottom half of the 70 centimeter band is no longer available for amateur radio in most of Australia's Victoria state. This, as the result of a new exclusion zone that has just become law. W-I-A reporter Jim Linton VK3PC explains:

--

The ACA has prohibited all amateur radio activity on the 420-430 MHz band within Victoria in an area of up to a 250 kilometre radius of the Melbourne General Post Office. That band will now be used for a new state-of-the-art digital radio system to replace the current analogue systems of the Victoria Police, Metropolitan Ambulance Service and Metropolitan Fire Brigade.

The exclusion zone has been anticipated and comes after other permanent Exclusion zones were imposed for similar purposes around Perth and Sydney, including the Australian Capital Territory. The band 420-430 MHz has been used for amateur fixed links and amateur television. The WIA has assisted with the timely closure and migration of those links in Victoria in liaison with the Bureau of Emergency Services Telecommunications and the ACA.

The new digital voice and data radio system now being installed for Emergency services will also provide common coordination channels to support multi-agency response to major incidents and events. The aim is to have it fully operational well in advance of the Melbourne Commonwealth Games in 2006. This has been

Jim Linton VK3PC for WIA National News.

--

Where else the A-C-A will impose these exclusion zones is not known as we go to air. (WIA News)

**

RESTRUCTURING: MORE 40 METERS FOR UK HAMS

Meantime there is much better news coming from the U-K. That's where Ofcom -- the Office of Communications -- says that it might change the rules and give that nations hams more access to 40 meters. Jeramy Boot, G4NJH, is in Nottingham with more:

--

Ofcom is proposing to vary the Foundation, Intermediate and Full amateur radio licenses to permit UK amateurs to operate in the band 7,100 to 7,200kHz.

The band would be allocated to the Amateur Service on a Secondary basis, and would be available on the basis of non-interference to other services, inside or outside the United Kingdom.

Ofcom announced a one-month consultation period beginning on 23rd September and all license-holders are invited to make representations to this proposal in writing or by e-mail.

Jeremy Boot, G4NJH

--

The cutoff date for U-K hams to comment on this proposed Notice of Variation to the nations Amateur Service rules is October 23rd. (GB2RS)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WB9AET repeater serving Chicago Illinois.

(5 sec pause here)

**

RESCUE RADIO: SATERN IN THE PUBLIC INTEREST

Ever hear of SATERN? Not the planet but a group of true helping hams that are always ready to serve the public need.

In our reports on the numerous hurricanes that hit the United States mainland the past few weeks we have often referred to several high frequency service nets. These include the Hurricane Watch Net, the Maritime Mobile Services Net and of coarse SATERN - the Salvation Army Team Emergency Network. You heard a lot of audio from the Hurricane Watch Net and the Maritime Mobile Services Net in our reports, but little of SATERN. That's because it was not really audible at our studio here on the U-S west coast. But we recently caught it being relayed on the Internet by K-A-4-E-P-S audio website and grabbed a few minutes of it in operation. Sometimes it takes nothing more than a referral to help out. Take a listen:

--

SATERN Net Audio. Hear it in the audio report at www.arnewsline.org.

--

Some of you may say that it sounds a little boring to just sit there hours on end, taking messages or directing people to a website. But that's an important part of the Salvation Army's job and the SATERN Net is one of its most important tools.

Major Pat McPherson, WW9E, explains it all on the SATERN website. He says that the Salvation Army Team Emergency Radio Network provides emergency communication support to the Salvation Army wherever needed. As a result, SATERN members have found themselves in tornadoes, floods, hurricanes, fires, aircraft accidents, bombings, earthquakes -- just to name the more expected types of emergencies.

In short, SATERN is not your ordinary radio club or net. Maybe not the most exciting to listen in on but it is ham radio in service to the public, at its very best. (ARNewsline(tm))

**

ENFORCEMENT: ENNIS COMMUNICATIONS IN $300,000 CONSENT DECREE

Turning to enforcement news, word that Emmis Communications has reached a $300,000 settlement with the Federal Communication Commission. This, after admitting that it broadcast indecent material on the airwaves.

Emmis owns 27 stations nationwide. The settlement comes in part from comments made by a nationally syndicated Chicago shock jock named Mancow Muller. Muller is an air personality at WKQX-FM and has been the source of every previous FCC fine issued to Emmis. To date that totals $42,000.

Besides the $300,000 payment, Indianapolis-based Emmis has also agreed to implement a company-wide plan intended to prevent future violations. (FCC)

**

ENFORCEMENT: ONE LAST CHANCE FOR K1MAN

The FCC appears to be giving Glenn Baxter, K1MAN, one final chance to strictly conform to the agency's Part 97 rules. This, before taking action against the Belgrade Lakes, Maine ham. The FCC's Daryl Duckworth, NN0W, explains:

--

Duckworth: "A warning letter went to Glenn Baxter, K1MAN, of Belgrade Lakes, Maine. Back in April of this year the Commission notified him of two areas of operation that would lead to enforcement action and / or designation for a hearing to determine his qualifications to remain

a licensee. This is regarding deliberate interference to ongoing communications and using the station for pecuniary interest.

Copies of the warning notice were also went to the United States Attorney in the United States Department of Justice, District of Maine.

This is Daryl Duckworth, NN0W, reporting."

--

In the September 15th Warning Notice the FCC's Riley Hollingsworth tells Baxter that the Commission has received approximately a dozen complaints that K1MAN Amateur Radio transmissions started on top of ongoing communications of individual operators, as well as on top of ongoing communications of the Salvation Army Team Emergency Radio Net. Hollingsworth says that this is a net that has been handling health and welfare traffic for this season's hurricane victims.

As to the pecuniary interest allegation, the FCC says that this is because Baxter's website lists a bulletin service transmission schedule and items for sale on the same pages. The FCC says that this is in violation of Sections 97.113(a)(2)and (3) of its rules.

Hollingsworth ends the letter by saying that failure to correct the violations will subject Baxter to enforcement action against his station and operator licenses. Baxter was given twenty days from the date the warning notice was issued to resoind. (FCC, RAIN)

**

ENFORCEMENT: FINE "KIND OF" REDUCED FOR GOOD BEHAVIOR

And a follow-up to a story we reported some time ago about a few unauthorized transmitters coming on the air in California. This, in 2003 around the time of Super Bowl thirty-seven. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with an update:

--

As listeners may recall, Global Radio, Inc. had requested that the FCC issue authority for it to operate on transmitters 89.1, 92.9, 93.7, 96.9, 104.1 and 106.9 Mhz. This, in conjunction with the Super Bowl thirty seven activities at Qualcomm Stadium in San Diego. T

he FCC granted operation on 93.7 and 96.9 Mhz under the call sign WN3XFL, but it specifically denied Global's request to use 89.1, 92.9, 104.1 and 106.9 Mhz. This based on possible interference to existing stations in Mexico and the U.S. as outlined under bi-lateral agreements.

But on January 26, 2003, an agent from the San Diego FCC field office was listening to the FM band. He observed that WN3XFL was active and operating, without authorization, on 88.98, 104.1 and 106.9 Mhz. This, in addition to its permitted operations on 93.7 Mhz and 96.9 Mhz.

Global's willful violation of its operating authority initially resulted in a fine of $12,000. In its reply, the company claimed it could not pay that amount but the Commission didn't buy that argument. Global also argued that its otherwise unblemished compliance record should be taken into account.

Well, the FCC did just that. Well, kind of. Because of the unblemished record, the Commission reduced the fine by $1200. If you do the math, that's now a fine of $10,800 that Global has been told it has to pay.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The full FCC finding in this case is on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-3017A1.doc (CGC)

**

THE HAM BUSINESS WORLD: A HEALTHY C3I

Turning to the ham radio industry, C3I says that it is not out of the ham radio business. In fact, following a short pause to reassess the current business climate, the concern is shipping out products and its business as usual according to company owner Owen Wormser, K3CB.

--

Wormser: "We are fully operational. We have built up a good stock of out standard antennas. We have taken special orders the last two weeks. So, we have been able to recover in about two to two and a half weeks time."

--

C3I is a unique company that manufactures printed circuit board modules, VHF, UHF and Super High Frequency, high-performance Yagi antennas and related accessories for the Amateur Radio and land mobile market. More information is on-line at www.c3iusa.com and look for a complete company profile with K3CB on an upcoming Rain Report. (ARNewsline(tm))

**

THE SOCIAL SCENE: TITUSVILLE FL. IN OCTOBER

Florida's North Brevard Amateur Radio Club will be among the first to begin celebrating the return of the good days following the hurricanes of 2004. This, as it announces that its Titusville Hamfest will be held on Saturday, October 23rd.

This year's venue is the Disabled American Veterans Chapter 109 building in Titusville. The event is open to the public from 7 a.m. to 2 p.m. Eastern time. More information is on the club webpage at www.northbrevardradioclub.org (Via e-mail)

**

THE SOCIAL SCENE: SAN DIEGO HAM RADIO ROUNDUP & HAMFEST

And on the West side of the country the San Diego Roundup and Hamfest hosted by ARRL San Diego Section takes place October 30th from 8 a.m. to 4 p.m.. The location is Hilltop Recreation Center on Ovieda Way at San Diego. For more information contact KC6NXZ by telephone at area code 619-561-6678 during normal business hours Pacific coast time. (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RALPH WRIGHT (MIKE RIVERS), W5JVI - S.K.

More sad news to report with word of the passing of Ralph Wendel Wright, W5VJI. Better known to his many fans as Mike Rivers, Wright dominated the airwaves at radio station CKLW from 1967 to 1970.

Wright suffered a cerebral bleed in May from which he never recovered. He passed away at his home in Antioch, Tennessee on Monday night September 13th.

In addition to being a top rated air personality W5JVI was also a gifted musician, jingle writer, a master at radio production and a very active ham radio operator. No public memorial service was planned. (W2JKD)

**

THE CHANGING OF THE GUARD: FRANK TUREK, DL7FT - S.K.

Also, noted D-Xpeditioner, Frank Turek, DL7FT, became a "Silent Key" on August 17th. Over the years Turek traveled to many rare locations to hand out new country contacts to many operators worldwide. He is survived by his wife Siegrid, DL7CN, who will be handling QSL duties and will continue to keep the DL7FT Post Office Box open. (OPDX)

**

NAMES IN THE NEWS: RAC LEADERS RESIGN FOR HEALTH ISSUE

Two key officers of Canada's national Amateur Radio Society have stepped down for health related reasons. According to an RAC bulletin issued on October 5th, President Daniel Lamoureux, VE2KA, and First Vice-president Bob Nash, VE3KZ have resigned after having been

hospitalized with heart related problems.

The bulletin says that the Radio Amateurs of Canada Board of Directors will convene a special meeting as quickly as possible. This, to deal with the vacancies created by these resignations. No date for the meeting has yet been announced. (RAC)

**

RADIO HEALTH: KOREAN RESEARCHERS CLAIM CANCER CONNECTION TO HIGH POWER RADIO TRANSMISSIONS

Korean scientists sat that they have found that regions near some A-M radio broadcasting towers show 70 percent more leukemia deaths than those without. This, according to Wired News which reports that the study, to be published in an upcoming issue of the International Archives of Occupational and Environmental Health, also found that cancer deaths were 29 percent higher near such transmitters.

Two years ago an Italian investigation found death rates from leukemia increased dramatically for residents living within two miles of Vatican Radio's powerful array of transmitters in Rome. The Koreans looked at the death rates in 10 regions with AM radio transmitting towers broadcasting at more than 100 kilowatts and compared them with control areas without transmitters.

The substantially higher cancer mortality in those who lived within two kilometers of the towers led researchers to conclude that more investigation was needed. However, they also said their study did not prove a direct link between cancer and the transmitters. (Published news reports)

**

HAM RADIO NEAR SPACE: A NEW ALTITUDE RECORD BY SIMSAT 1B

Pat Kilroy, N8PK, reports a new altitude record of over 112,900 feet was set by the SimSat-1B mission when it flew last week. Pat says that while the VHF telemetry failed early in the flight there are numerous clues as to why and the group is piecing the puzzle to help improve for future operations.

The Simulated Satellite or SimSat project is an education and outreach activity being developed by N8PK at the NASA Goddard Space Flight Center. A SimSat spacecraft uses a small high-altitude weather balloon platform to fly experiments designed and built by students to near-space altitudes.

In this case, a tiny CricketSat transmitter on UHF was also on board as a last minute hitchhiker. Powered by a standard 9 Volt alkaline battery and producing under 20 milliwatts, it operated all the way through splashdown and saved the day for tracking the flight.

More information and the part ham radio plays is on line at www.patkilroy.com/simsat on the World Wide Web. (N8PK)

**

HAM RADIO IN SPACE: MICROSAT ON DISPLAY

And some news from Dr. Perry Klein, W3PK, who says that The Smithsonian National Museum of American History has put a Microsat Mechanical Test Model on display in time for AMSAT's 35th Anniversary meetings. The satellite is suspended from the ceiling outside the NN3SI Smithsonian Amateur Radio Club station. That's located at "The Information Age" exhibit on the first floor at the West end of the American History Museum. (ANS)

**

HAM RADIO IN SPACE: SOLDERING ON-ORBIT

Meantime, the ham astronauts on the International Space Station have been trying to solder in zero gravity, and the results are intriguing. The NASA website says that the solder, heated, became a molten blob with a droplet of rosin clinging tight to the outside. As the temperature increased, the droplet began to spin, round and round, faster and faster, like a miniature carnival ride. You can see and enjoy the video of this experiment at at: http://science.nasa.gov/headlines/y2004/16aug_solder.htm (ANS)

**

DX

In D-X, word that G3UML is joining the Oceania DX Group operation from Lord Howe Island which is scheduled to start on 9th October. Separate stations will be active on CW and SSB. (GB2RS)

And look for DF7XE to be active portable SV8 from Thassos Island through the 13th of October. He will be using CW, SSB, PSK31 and RTTY on 10 to 80 meters. (OPDX)

Lastly, information that PA0CJH operating as 9G5JH is active from Ghana until November 13th. He is on 80, 40, 20, 17 and 15 meters using SSB, CW and PSK31. For each of these operations, Q-S-L as directed on the air. (OPDX)

**

THAT FINAL ITEM: ITS JOTA TIME

And finally this week, its time for scouts around the land to get together and take to the ham bands in the annual Jamboree on the Air. Amateur Radio Newsline's Mark Abramowicz, NT3V, is also a parent involved in the scouting program and has this inside look at the big event:

--

It's one of the best operating events of the year.

Why?

Because it showcases the best of our hobby to thousands of young people across the country and around the world.

For me, and others, it also gives us as operators a chance to reach out in brotherhood and friendship to young people. We get to serve as a bridge with our radios to other children and teens who share similar interests in Scouting.

Charlie Beck, chairman of Venture Crew 59, sponsored by the Frankford Radio Club and based out of Kutztown, PA is excited about his group's plans.

He says they will be operating KC3BSA from the Hawk Mountain Scout Reservation in Summit Station in eastern Pennsylvania.

"We're going to set up a couple stations in our science and tech center," Beck says.

At this point, he says you'll find Crew 59 on the HF bands on phone, CW and PSK 31. He says there are also plans to set up a VHF station and an EchoLink position.

Becks says the best part of the weekend event is getting visitors to the operation involved.

"I know we have some Girl Scout units and Cub packs and Boy Scout troops that will be stopping by," Beck explains. "They'll all get a turn to get on the air and try to make a contact with another Scout in another part of the world."

Beck says some get mike-shy, but that quickly dissolves with the help of a Venture Crew member sitting beside them.

"They'll be giving their name, their rank and talk about their hobbies and tell them where they're calling from which would be Schuylkill County in eastern Pennsylvania," Beck says.

Beck says the special part about JOTA is its diversity.

"There are Girl Scouts and Girl Guides. There's the World Association of Girl Guides and Girl Scouts that are invited to join in the JOTA," Beck says. "There's also a patch that the Girl Scouts can earn just like the Boy Scouts can earn for making contacts."

And, he says, for those who are a little shy about grabbing the microphone, there's also a keyboard.

"It's interesting to find the quiet Scout or the quiet boy to come in and sit down and get behind PSK 31 and really get in there and spend an hour chatting with different people around the world," Beck says.

Beck says Scouts across the country and around the world will be camping out and working radios from field conditions. Others will be going to stations of operators who've invited them in to take part.

Operators play a big part in making it happen and whether you've been a Scout in your lifetime isn't a factor. It's simply sharing the joy of the Amateur Radio service we've all come to appreciate.

Hope to hear you on the air during JOTA weekend.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The 47th Jamboree on the Air takes place October 16th and 17th. More information is on line at www.scout.org/wse/jota.shtml and the Leagues website at www.arrl.org. (ARNewsline(tm))

1455. Is it possible to create a directional VLF radiator?

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-08 18:41:07 UTC
From: hybridyne2000@yahoo.com
Message-ID: <4c9fff45.0410081041.20edf581@posting.google.com>
Source record: 56167

I need to create an AM modulated carrier of 25 Khz that is highly focused in beam width. I am aware of part 15 and will not be using this for any other reason than for research. I need a range of 50 feet. Receiver will be a tuned resonant tank with about 90 db of gain post detection. I would like to be able to "focus" this beam but being in optics I have no idea of how one might control the dispersion of a carrier like this. In other words in my field I can collimate or focus a light beam but dealing with this wavelength I have not a clue!

Thank You in advance for your input

Steve Sands

Same principles, just scale up!

Mike

PS. I don't think you can do it. At 50 ft you will still be inside the
near-field for both electric and magnetic components of the RF. The wave
hasn't yet assembled itself into an electromagnetic wave.

As a liberal, he would have to believe that everyone has a right to high speed internet so he would have to be for it. The only difference is he would expect the taxpayers to support it rather than expecting it to survive on its own profits.

Not at that frequency for that range.
a half-wave at 25 khz would be longer than the distance to the receiver.
(thinking aloud)-> let's see - 27mhz is known as '11 meters' - so 27 khz would be 1000 times longer - or 11 kilometers so an antenna would be about half that - or around 6 kilometers - then you would need reflectors and directors - and would need to mount it a half-wave high for propogation.
Don't they use vlf for talking to submarines?
I would try to pick a much higher frequency for experimenting. Around 150 mhz or so would make the antenna easier to work with .
focusing a light beam is easier because the wavelength is measured in nanometers - not kilometers.
use coax to carry the signal for 25 khz.

Register now for the FREE IARN Emergency Communications Graduate School which is held four times each year during the weekends of January 17th, April 18th, July 17th, and October 16th, 2004. A Certificate will be awarded to all those attending and passing the final exam.

Either fly into Boston and rent a car or else fly into Augusta, Maine where we will pick you up. Plan to arrive by Friday evening and to return home Sunday. You pay for your own travel expenses, meals, and accommodations. The IARN Emergency Communications Graduate School itself is FREE and is sponsored by AARA, the American Amateur Radio Association. Call now for your reservations at 207 495 2215. For more details go to www.K1MAN.com. www.K1MAN.com

The FREE (International Amateur Radio Network) IARN Emergency Communications training course, with 20 levels of official IARN Certification, is also available for on-line home study. Simply send two C-90 cassettes and enough return postage for five ounces to IARN, Box 440, Belgrade Lakes, Maine 04918.

Thanks for all the input. I did leave out an important fact. I did
intend to use a coil wound on a form or around a either a steel or
ferrite rod depending on efficiency. I have already done some tests
and projecting a detectable carrier is in the bag so to speak. The
problem lies in shaping the dispersion so I can focus the beam into a
limited space, say 25 feet in diameter at 50 feet from the radiating
coil.

Sorry for the omission.

"Mr Ham Radio" <MrHamRadio@MrHamRadio.com> wrote in message
news:10mfek55r78gca6@corp.supernews.com...
Glenn Baxter, K1MAN, and John Palmer, WB8TUZ, of Dallas, Texas,
announced today the kick-off of their new IARN AMATEUR RADIO PEACE
CORPS KIDS PROJECT. This nationwide and even world wide project will
systematically introduce Amateur Radio to minority kids world wide
for educational, motivational, and discipline learning purposes with
the intent of "Helping kids to make good career choices" according to
Mr. Palmer, a Radio Amateur from Dallas, Texas and former Engineering
Technician with the Heath Company in Benton Harbor, Michigan. The
first IARN KIDS PROJECT international conference will be held in
Belgrade Lakes, Maine this Summer. Mr. Palmer will appear as Glenn
Baxter's special guest in a weekly series about the KIDS PROJECT over
the K1MAN amateur radio short wave bulletin service beginning with the
12 January 2003 program. There is also a new web page for the IARN
KIDS PROJECT. Go to www.K1MAN.com and click on IARN AMATEUR RADIO
PEACE CORPS KIDS PROJECT. Mr. Palmer can be reached for further
comment at 214 375 8958. His E-Mail is jwpalmer3wb8tuz@earthlink.net

Mr. Baxter, K1MAN, is a former Industrial Engineer with the Collins
Radio Company (Automatic Process Division) in Cedar Rapids, Iowa. Mr.
Baxter stated that "I can't imagine any Radio Amateur who would be any
happier than those who have been in the engineering cultures of the
Heath Company or the Collins Radio Company. Mr. Palmer brings much
of the fabulous Heath engineering culture into our IARN and AARA
organizations, and we are all thrilled to have him aboard. Mr.
Palmer's dad was a black high school principal in Missouri, and also
brings a culture of innovative teaching and the education of bright
children into IARN and AARA. The American Amateur Radio Association is a
major sponsor of the IARN AMATEUR RADIO PEACE CORPS KIDS PROJECT," said Mr.
Baxter. For more information go to www.K1MAN.com.

.....

As I said. If one runs out of toilet paper I hear that Baxter's t-shirt
works just as well.
After all, the t-shirt is already full of shit so what is a little bit more?

IARN AMATEUR RADIO TALK PROGRAM

You can listen to the program on 14.272 MHz. USB or 3.977 MHz. LSB at 5:30 A.M., 1 P.M., and 8 P.M., or 3.890 MHz. Amplitude Modulation at 6:23 PM, and 9:30 PM, all Eastern Local Times. See www.K1MAN.com for further details. The talk show call-in number is 1-800-262-9543

SECOND ANNUAL TEACHER'S MEETING

The first annual teacher's meeting for amateur radio in the classroom was held on 12 July 2003 at the Plaza Hotel in Las Vegas, Nevada. It was a huge success. The second annual teacher's meeting will be held at the Holiday Inn in Augusta, Maine (Exit 31B from Route 95 coming from south and Exit 31 from Route 95 coming from the north). You can also fly into Augusta, Maine, and we will pick you up at the airport. Another option is flying into Boston, Mass. or Manchester, N.H. airports and renting a car. For Holiday Inn reservations for this meeting, call 1 207 621 8674 and also register with the American Amateur Radio Association by calling 1 800 262 9543.

Teachers using or ever having used amateur radio in the classroom with any success are invited to be speakers. Those others who have ideas for use in the classroom are also invited to speak. Call 1 207 495 2215 if you are interested. The meeting is free and will be held on Saturday, 10 July 2003. Guests should plan to come in as soon as Wednesday for informal meetings and spending time at and on the lake at Baxter Point and touring the studios of K1MAN and the offices of IARN, the International Amateur Radio Network and AARA, the American Amateur Radio Association. See http://www.k1man.com/web16/Page_5x.html For more information go to www.K1MAN.com and click in IARN Amateur Radio Peace Corps Kids Project: page 26.

DOES YOUR SCHOOL RADIO CLUB (OR YOUTH GROUP RADIO CLUB) NEED SOME DONATED AMATEUR RADIO AND/OR COMPUTER EQUIPMENT?

THE IARN AMATEUR RADIO PEACE CORPS FOUNDATION, INC. ASSISTANCE TO SCHOOLS AND YOUTH GROUPS PROGRAM - REQUIREMENTS FOR OUR HELP WITH DONATED HAM RADIO AND/OR COMPUTER EQUIPMENT FROM THE IARN AMATEUR RADIO PEACE CORPS FOUNDATION - SPONSORED BY AARA, THE AMERICAN AMATEUR RADIO ASSOCIATION. (See www.K1MAN.com for more details.)

THE BASIC REQUITEMENTS ARE:

1. You must be organized as a club which is affiliated with AARA, the American Amateur Radio Association. To do this, send a self addressed stamped envelope with enough return postage for five ounces to AARA, P.O. Box 440, Belgrade Lakes, Maine 04918. You will need at least 3 AARA life members in your club. (Student life membership is $15.00 per person.)

2. You must have a letter from your school Principal (or other appropriate authority) indicating that you have permission to put a vertical antenna (attached to a vent pipe, for example) on the roof of your school (or other building). Other roof antennas might be an inverted "V" on Radio Shack TV mast sections attached to something on the roof, or even a conventional dipole (or more than one dipole cut for different bands such as 20 and 40 meters, etc., with a single common coax feed line).

3. You must have a designated and secure space or room for your school radio club activities.

4. At least one member of your club must have a General Class or higher Amateur Radio license.

5. You do not need to have a club station license, but this is preferable.

6. ATTENTION VETERAN RADIO AMATEURS: Your donated Amateur Radio equipment to IARN [a 501(c)(3) tax exempt organization] for refurbishing and placement in schools and youth clubs is tax deductible at the fair market value as designated by you. Mail, UPS, or drop off your old or unwanted ham, CB, and even old computer equipment at: IARN, c/o AARA, the American Amateur Radio Association, Point Road, Belgrade Lakes, Maine 04918 U.S.A.

7. Go to www.K1MAN.com for more details about this IARN/AARA school and youth group assistance program.

8. Check in to the Classroom Nets Monday through Friday on 7.238 MHz. between 7 AM and 8:30 AM and on 14.272 MHz. (plus or minus QRM) between 9:30 AM and 12 Noon and also between 1:30 PM and 4 PM. Tune around between 14.265 MHz. and 14.285 MHz. from 8:30 AM to 6:00 PM, since the IARN 20 Meter Classroom Net is a frequency agile group of "hands on" Radio Amateurs!

IARN EMERGENCY TRAFFIC ACTIVATION LEVELS

LEVEL I - Emergency and health and welfare traffic for the affected area(s) is being E-MAILED to IARNtraffic@aol.com plus a 24 hour IARN AMTOR mail box on 14.127 MHz. LSB, SEL call KMAN.

LEVEL II - Same as Level I plus live nets on 14.275 MHz. USB. Also IARN HF bulletins are now on 14.272 MHz. USB; 3.977 MHz. LSB; and 3.890 MHz. AM. (Go to www.K1MAN.com for further emergency network information.

LEVEL III - Same as Level II plus deployment of volunteer radio operators with radio equipment and portable generators to the affected area(s) to hand carry all accumulated network traffic plus set up amateur radio stations in public places and/or shelters to solicit outgoing traffic. Radio jump team volunteer operators should pre-register by calling IARN headquarters at 207 495 2215. See www.K1MAN.com for further details and information.

Note: Radio amateurs and short wave listeners should monitor 14.272 MHz. USB; 3.977 MHz. LSB; and 3.890 MHz. AM. Call your local radio and/or T.V. stations and tell them what you and amateur radio are doing. Give them your telephone number and your E-MAIL address (or IARN traffic@aol.com) for the gathering of emergency and health and welfare traffic for the affected area(s).

See www.K1MAN.com

IARN AMATEUR RADIO TALK PROGRAM

You can listen to the program on 14.272 MHz. USB or 3.977 MHz. LSB at 5:30 A.M., 1 P.M., and 8 P.M., or 3.890 MHz. Amplitude Modulation at 6:23 PM, and 9:30 PM, all Eastern Local Times. See www.K1MAN.com for further details. The talk show call-in number is 1-800-262-9543

FOR IMMEDIATE RELEASE

Wall Street Journal, W5YI, World Radio, QST, Amateur Radio Newsline, CQ, W2NSD, and the American Amateur Radio Association world wide distribution list:

de K1MAN

7 January 2003, Belgrade Lakes, Maine

Glenn Baxter, K1MAN, and John Palmer, WB8TUZ, of Dallas, Texas, announced today the kick-off of their new IARN AMATEUR RADIO PEACE CORPS KIDS PROJECT. This nationwide and even world wide project will systematically introduce Amateur Radio to minority kids world wide for educational, motivational, and discipline learning purposes with the intent of "Helping kids to make good career choices" according to Mr. Palmer, a Radio Amateur from Dallas, Texas and former Engineering Technician with the Heath Company in Benton Harbor, Michigan. The first IARN KIDS PROJECT international conference will be held in Belgrade Lakes, Maine this Summer. Mr. Palmer will appear as Glenn Baxter's special guest in a weekly series about the KIDS PROJECT over the K1MAN amateur radio short wave bulletin service beginning with the 12 January 2003 program. There is also a new web page for the IARN KIDS PROJECT. Go to www.K1MAN.com and click on IARN AMATEUR RADIO PEACE CORPS KIDS PROJECT. Mr. Palmer can be reached for further comment at 214 375 8958. His E-Mail is jwpalmer3wb8tuz@earthlink.net

Mr. Baxter, K1MAN, is a former Industrial Engineer with the Collins Radio Company (Automatic Process Division) in Cedar Rapids, Iowa. Mr. Baxter stated that "I can't imagine any Radio Amateur who would be any

happier than those who have been in the engineering cultures of the Heath Company or the Collins Radio Company. Mr. Palmer brings much of the fabulous Heath engineering culture into our IARN and AARA organizations, and we are all thrilled to have him aboard. Mr. Palmer's dad was a black high school principal in Missouri, and also brings a culture of innovative teaching and the education of bright children into IARN and AARA. The American Amateur Radio Association is a major sponsor of the IARN AMATEUR RADIO PEACE CORPS KIDS PROJECT," said Mr. Baxter. For more information go to www.K1MAN.com.

IARN AMATEUR RADIO TALK PROGRAM

You can listen to the program on 14.272 MHz. USB or 3.977 MHz. LSB at 5:30 A.M., 1 P.M., and 8 P.M., or 3.890 MHz. Amplitude Modulation at 6:23 PM, and 9:30 PM, all Eastern Local Times. See www.K1MAN.com for further details. The talk show call-in number is 1-800-262-9543

AARA Telephone: 207 495 2215 E-Mail - K1MAN14275@aol.com Talk show call-in number is 1-800-262-9543

FOR IMMEDIATE RELEASE

Wall Street Journal, W5YI, World Radio, QST, Amateur Radio Newsline, CQ, W2NSD, and the American Amateur Radio Association world wide distribution list:

de K1MAN

8 January 2003, Belgrade Lakes, Maine

IARN AMATEUR RADIO PEACE CORPS/CREW 22 TEACHER'S MEETING

The first annual teacher's meeting about introducing amateur radio, as a means to help at risk children with career and other important life choices, will be held in Las Vegas on 12 July 2003. The meeting is being organized by Joe Fairclough, WB2JKJ, in cooperation with IARN and partial sponsorship by AARA, the American Amateur Radio Association. Joe can be reached at 516 674 4072 or E-Mailed at joeee1621@aol.com for further comment or go to www.K1MAN.com and click on IARN Amateur Radio Peace Corps Peace Kids Project for further information and other informative internet links.

Mr. Fairclough, a dedicated and energetic teacher, has been honored for his innovative amateur radio work with kids at the Dayton Hamvention and also has numerous other awards in this area. Glenn Baxter, K1MAN, and President of the IARN Amateur Radio Peace Corps Foundation, Inc. said that he is "delighted to combine forces with Mr. Fairclough and his Crew 22 machine in New Your City because we need his vast experience and energy with regard to educating at risk kids, and he needs our significant resources and energy with respect to getting the word out world wide that we are going, big time, to reach a lot of people and influence a lot of children out there in a very major way. Mr. Fairclough will be on our world wide K1MAN amateur

radio short wave talk program this week beginning 12 January 2003."

Mr. Baxter also said that "We still need speakers for the Los Vegas teacher's meeting, and all those interested in speaking or attending this first annual meeting should go to www.K1MAN.com for more information or else call Mr. Fairclough at 516 674 4072 to make arrangements and/or reservations."

IARN AMATEUR RADIO TALK PROGRAM

You can listen to the program on 14.275 MHz. USB or 3.975 MHz. LSB at 6:30 AM, 1 PM, 4 PM, 8 PM, 1 AM and 3:30 AM or 3.890 MHz. AM at 6:30 PM, all Eastern Local Times. See www.K1MAN.com for further details. AARA Telephone: 207 495 2215 FAX 2069 E-Mail - K1MAN14275@aol.com Talk show call-in number is 1-800-262-9543

> and projecting a detectable carrier is in the bag so to speak.
****
The
> problem lies in shaping the dispersion so I can focus the beam into a
> limited space, say 25 feet in diameter at 50 feet from the radiating
> coil.
****
*** Yes - that is the problem - and it is unsurmountable for that frequency
at that range
****
> Sorry for the omission.
****
The omission makes no difference -
You will not be able to focus a beam at that distance using that frequency.
you will be able to detect the carrier - but if you walk around the
transmitter in a circle at that range with your detector (receiver), you
will notice that it was not a beam at all - the signal strength will not
vary as you might be expecting.
again - I would use a much higher frequency to experiment with.
- but what the heck - try it anyway - then you will see for yourself that
you should have used a higher frequency.

Don't you just love it? Conspiracy Vic and his Band Of Bozos are at it again. (BOB for short)

This BOB must have little going for them. They seem to cherish their once a week time in the slot so as to spew their latest conspiracy theories. Listening to them for more than five minutes is a chore. Week after week they spit out the same old, tired crapola. What they said tonight is a rehash of what they said last week, and the week before that, and the week before that...

I wish David Tolassi would check in to their net. THAT would make it worth listening to!

Kerry "has a plan". Don't ask him what it is. I doubt he knows.

If the gangrenous degeneration that is the M3/CB Fools' Licence
here in Britland is anything to go by, the program described below
will be a big mistake, for it will flood the bands with those who
are not technically motivated in themselves. Ham Radio is a technical
pursuit and kids simply do not have the mathematical background to
enable them to do even the simplest of resistances-in-parallel
calculations.

A bit of a non-sequitur there, OM.

There is no reason to "get kids involved"

Ham Radio is made up of those who are sufficiently
interested to get themselves involved, and to educate
themselves. Those who are led by the hand will never be
anything more than CB fodder.

1494. Help ID CTCSS board

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-10 17:57:43 UTC
From: Jimmy Mac <kb6zop@remove.manicarcade.com>
Message-ID: <rKead.16852$54.278229@typhoon.sonic.net>
Source record: 56205

Hi All,

I'm working on a LOW BUDGET project and I am trying to use junk-drawer componants to revive some old equipment for some soon-to-be HAMS.

One project I have is to install a CTCSS (PL) board into a conversion UHF rig. I have the tone board vut it's not a ComSpec which are the ones I am most familiar with.

Can any of you help me ID and possibly come up with a spec sheet on the following part?

It's using the MX-Com MX315 chip Older model - no SMT. Has six dip switches instead of the usual five. Has a five wire connector with the following lables:

8T - Orange Wire - 8T??
RT - Yellow Wire - Receive Tone??
E - Brown Wire - ???
TB - Red wire
TO - Green Wire - I would assume to be Tone Out

On the componant side of the board is X52-1260-?0
On the solder side is J25-3186-03

I checked into MX-Com but they are long gone..

Any assistance would be greatly appreciated!

TIA

Please email any response to kb6zop AT manicarcade dot com

>
> P4, ARUBA. Andy, AE6Y, informs OPDX that he will be active with his new
> Arubian callsign, P49Y, between October 26th-November 2nd. His activity
> will include the CQWW DX SSB Contest. QSL via his home callsign.
>
> QSL INFO AND NEWS.....................
> 1990 MALPELO (HK0TU) QSLS. Francisco "Siso" Hennessey, HK3SGP, provides
> the following press release:
> "Several Colombian ham radio operators have inappropriately spoken on
> behalf of the Liga Colombiana de Radioaficionados and have
> misinformed
> the world amateur radio community about the status of the Malpelo
> 1990 DXepedition logs. The board of directors of the Liga Colombiana
> de Radioaficionados, at their meeting of September 30, 2004, decided
> to keep these logs open until December 31, 2004. The newly appointed
> QSL Manager is Mr. Francisco Hennessey, HK3SGP, whose address can be
> found in QRZ.com. We regret the inconvenient that this misinformation
> could have caused you, and suggest the DXers that require a QSL card
> to request it at their earliest convenience......"
> Ignacio Barraquer HK3CC
> President of the Liga Colombia de Radioaficionados
>
> The LX/PA6Z activation of Luxembourg by six Dutch operators is now
> over. There is an up-to-date website about this activity including

> an online log, picture gallery and QSO statistics. Please visit:
> http://www.qsl.net/pa6z
>
> OD5RMK QSLS. Tony, IK1QBT, (one of OD5RMK team) reports that the
> QSL cards for the July 2004 operation from Ramkin Island (AS-108)
> have been printed and requests are being processed right now. The
> QSL route is via I1HJT, by the bureau or direct to: Alfeo Caputo,
> P.O. Box 111, 17014 Cairo Montenotte - SV, Italy. Full information
> on the activity and on-line logs can be found at:
> http://www.qsl.net/ik1qbt/ramkin_index.htm
>
> SILENT KEY. Bill, VK4FW, informed OPDX that Henry Andersson, VK8HA, passed
> away at the Darwin Private Hospital on Tuesday, October 5th. For the
> people who might not know, Henry was a foundation member and later life
> member of the Darwin Amateur Radio Club and set up and ran the VK8 QSL
> Bureau for 38 years. In later years, he also managed the "Intruder Watch"
> for the WIA. OPDX and its readers would like to send out our deepest
> sympathy to Henry's family and friends.
>
> SV5, DODECANESE. Bob, OK2BOB, will be active as SV5/OK2BOB from Rhodos
> Island (EU-001), from 1600z, October 12th to 0300z, October 19th. Activity
> will be 160-10 meters mainly CW, but some SSB. QSL via his home callsign.
>
> T48, CUBA. Members of the "Las Tunas Contest Crew" T48K, will once again
> activate their contest station during the CQWW DX SSB Contest as a Multi-
> Single entry transmiting from "Punta Corella" at the north coast of Las
> Tunas. Operators mentioned are CO8DM, CO8KA, CO8JY, CO7GG, CO8ZZ and
> guest operators OK1DTP and OK1TP.
>
> TF4, ICELAND. Operator Sigurdur, TF3CW, will be active as TF4CW during
> the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band
> (20m) entry. QSL via LX1NO.
>
> TM8, FRANCE (HamExpo and Special Event). Maurice, F5NQL, DX Page Editor
> for Megahertz Magazine, informs OPDX that the 26th HamExpo in Auxerre,
> Burgundy, will take place October 16th and 17th. HamExpo is said to be
> the most important Ham Show in France and the second in Europe just behind
> the DARC's Friedrishshaffen of June. To celebrate this new event, the 89th
> Division of the REF-Union and the F5KCC ARS members will air the special
> callsign TM8AKR, from October 10-24th. Activity will be on 160-2 meters,
> included is 6 meters (but the French part of the band is only up ot 50200
> kHz); Grid Square JN17. Most of the activity will be on CW, but you'll
> be able to find this special callsign on SSB, RTTY and PSK31, too. All the
> QSO will be confirmed via the bureau. Direct cards will be available too,
> after January 1, 2005, via Pierre, F2WS (SAE + postage due - 2 USD outside
> Europe, 1 USD for Europe or one IRC for elsewhere). The callsign F5REF
> (REF-Union's callsign) will also be aired directly from the HamExpo Hall.
> The REF-Union is the French IARU Society which is organizing this event.
> Auxerre is located about 160 km south East of Paris, A6 Motorway, exit
> Auxerre-Sud (Auxerre South), then Auxerrexpo. More information about the

> HamExpo is available (in French) at:
> http://www.ref-union.org/auxerre/index.php
> There is also an English language translater tool on the page. Maurice,
> F5NQL, states that he will be one of the TM8AKR's CW operator.
>
> UK DX RTTY CONTEST. Jurij, MM0DFV, informs OPDX that beginning 2005 the

> VP9, BERMUDA (Update). Operators Julio/WD4R, Esteban/W4DTA, Bruce/W4OV
> and Fred/K9VV will be active as W4OV/VP9 in the CQ WW DX SSB Contest
> (October 30-31st) as a Multi/?? entry. QSL via W4OV.
>
> VU4, ANDAMAN ISLANDS. OPDX received two interesting reports this past
> week that a major call for helping and writing campaign to convince the
> Indian Telecommunication Ministry to authorize an operation to the
> Andaman Islands. It seems now is the right time to do it. Recently,
> there has been a sigificant change in the personnel at the Department
> of Telecommunications. The Minister of Communication is now a radio
> amateur, Shri Dhayanidhi Maran, VU2DMK. Currently, there are two Indian
> amateurs who are promoting a writing campaign and trying to obtain a
> VU4 license. At this time, OPDX is not sure whether the two operators
> are working together or separately.
>
> 1) Bharathi Prasad, VU2RBI, is one of the operators now applying for a
> good VU4 license. She is the leader of the 1978 DXpedition that last
> activated VU4, Andaman Islands. VU4 is now second or third on the most

> wanted DXCC Entity List. Bharathi's previously successful operation is
> an aid in her application. To help her obtain a VU4 license, please
> send
> a letter stating the need for this operation. A suggested letter is
> provided as follows:
> "Please grant permission for amateur ham radio operations on
> Andaman Island to Mrs. Bharathi Prasad, VU2RBI, and her team. Ham
> radio contacts with this location is desired by hundreds of thousands
> of radio operators world-wide, ranking number two of all most wanted
> places to contact anywhere. Immense good will and increased inter-
> national understanding will result to India and tourism interest will
> increase for the Andamans as a result of this ham radio operation.
> Thank you very much."
>
> They recommend to, please use your own words where possible. Please
> do this today and mail your letter to: Mrs. Bharathi Prasad,
> Qtr. #1284, Type IV Special, Sector 12, R.K. Puram, New Delhi,
> 110022 INDIA.
>
> Charly, K4VUD, states, "Bharathi's ability to receive lots of E-mails
> will break her budget." Thus, if you have time only to send an E-mail
> supporting letter, please send it to: k4vud@hotmail.com
> Charly will print these letters and mail the paper copies to Bharathi.
> They also state, "LETTERS FROM HAMS OUTSIDE THE USA WILL BE ESPECIALLY
> HELPFUL!"
>
> 2) Miku, VU2WAP, is the second operator who is trying to obtain a
> license
> and is requesting letters. Randy, WX5L, who has been taking to Miku,
> states the following:
>
> "Its seems still there is a lack of information, a lack of under-
> standing within the ministry about operating from the Andaman's and
> Miku has written several high level authorities explaining the use of
> this wonderful hobby. Miku needs support from the DX community to help
> in his application by letters of support and showcasing its benefits.
> Components of the letter could emphasize how amateur radio provided
> emergency communications during recent disasters in India, namely
> Gujarat earthquake and Andhra cyclone. During his stay he would
> demonstrate to the local businessmen, non-governmental organizations
> and the local authorities the use of this wonderful hobby and how it
> could provide a communications link if traditional modes would fail.
> Also, it can help open a window to the world showcasing Andaman
> tourism
> industry, its beautiful hotels and beaches and excellent fishing. If
> there are other facts that you feel would promote this effort, please
> enclose that in your letter."
>
> It is recommanded to please consider helping with your time and a unit
> of air mail postage which can be sent to the following address:

> Manoj Agarwal, 44/1E Fair Field Layout Race Course Road, Bangalore
> 560001, India. A written letter with a signature seems to carry so
> much more weight; but if you feel E-mailing would be your only
> recourse, send it to the following two addresses (both):
> dmaran@nic.in
> rhea@touchtelindia.net
> Randy, WX5L, also mentions that Miku is asking for approval between
> October 2004 and January 2005, so favorable winter propagation can
> be used.
>
> XU, CAMBODIA. Bruce/AA4XR/HS0ZCY and Champ/E21EIC will do a
> micro-DXpedition
> from Sihnoukville as XU7ADF and XU7ADE, respectively, between November
> 22-30th. Activity will be on 160-10 meters, including the WARC bands,
> and on CW, SSB and RTTY modes. They will use a G5RV, dipoles antenna and
> Kenwood TS-50S. Champ will also be active in the CQ WW CW Cntest as a
> Single-Op/Single-Band entry. QSL XU7ADF via AA4XR. QSL XU7ADE via E21EIC.
>
> YO, ROMANIA. Jean Michel, F6AJA, will again be active as YO/F6AJA from
> Bucarest between November 2-7th. Activity will be during his free time,
> and he will operate from the YO3KPA radio club.
>
> ZK1, SOUTH COOK ISLANDS. Mark, VK2GND, will be active as ZK1GND between
> December 24-30th, from Rarotonga Island (OC-013) in the South Cook
> Islands.
> He will be mostly on 14195 kHz and 14273 kHz. QSL via VK2GND.
>
> ZK1, SOUTH COOK ISLANDS. Look for Victor, ZK1CG, on the lower bands. He
> states that he will try to stay up until 1200z. He will check 1840 kHz +/-
> between 1000-1015z. He also states that he has been hearing G and EI
> stations at around 0600z on 3799.5 kHz each night.

THE LIFE OF RILEY

Or why Mikee 'Kalamazoo Cuckoo' ND8V was "in like Flynn" and continues to lead a charmed existence with Riley 'Rot' Hollingsworth K4ZDH

Once upon a time in America there came to be a giant of an organization called the American Radio Relay League (ARRL).

Much later, there appeared a shy and lonely radio amateur with the 'self-effacing' call sign K1MAN [HI, HI].

Sometime, somewhere, somehow yet later K1MAN came to the rather obvious conclusion that large organizations/associations, such as the ARRL or the Federal Communications Commission (FCC), in time lose touch with the constituents they are supposed to serve. This was not news, in that it has always been so.

Unlike others, who only 'bitched' about it, however, K1MAN decided to start a Bulletin service on 14.275 MHz a la the ARRL's W1AW in part to poke sticks into the respective eyes of both one-eyed Cyclops.

Surprise, surprise, the ARRL/FCC did not put K1MAN on their respective Christmas card lists.... Rather, they attempted to shut K1MAN down. Years and much effort later, they appear to have failed, at least to the extent that K1MAN remains on the air.

Concurrently and arguably partly as a result of K1MAN's so-called "bad example", a group of rogue Citizens Band (CB) operators with an amateur licence [and others without], decided to congregate on 14.313 MHz which frequency in time became a veritable 'zoo'. This was during the time when the amateur spectrum was supposedly 'self-governing/policing'....

Then, some four years ago the ARRL reportedly proposed and the FCC agreed to hire one Riley Hollingsworth K4ZDH as a 'radio cop', to clean up the 'amateur beat' generally. In reality, there were arguably only two items on Riley's immediate agenda: K1MAN on 14.275 MHz and the mess on 14.313 MHz but for the obvious and not so obvious reasons, very much in that order.

Unfortunately K1MAN had in the meantime contracted to teach full-time and as a consequence had to take a sabbatical from producing the time-consuming Bulletins. Then, at a series of 'hamventions', Riley the radio cop apparently loudly took credit for driving K1MAN off the air.... This played well at the FCC and among the 'great unwashed' and uninformed in the amateur community and earned Riley the moniker 'The Rotweiler'. Predictably, this had the same effect on K1MAN as a scarlet handkerchief has on a bull. K1MAN

consequently let it widely be known that he would be back with a vengeance and as they say in show business, the stage was set....

In the meantime, Riley continued to ineffectively try to come to grips with the zoo on 14.313 MHz. ND8V a.k.a. 'Kalamazoo Cuckoo' to friends and detractors alike, was one of the chief rabble-rousers there. He had attacked Hispanic-speaking stations "for years" calling them cockroaches, interfered with a maritime mobile net and threatened--on and off the air--any number of amateurs who stood up to his bullying. Throughout this, Riley did virtually nothing. Then, when even the US military reportedly had enough of ND8V's behaviour and caused a search to be made of his station, Riley 'The Rotweiler' was finally forced to act. He severely beat ND8V up--with a 'wet noodle'--by supposedly suspending his High Frequency (HF) privileges for a curiously 'pregnant' nine months! This again played well at the FCC and even in the amateur community, to whom 14.313 MHz in general and to some ND8V in particular, had become such an acute embarrassment.

Unfortunately, Riley had for some strange reason also made a 'Faustian bargain' with ND8V in part to the effect that if he behaved himself for the duration of the suspension, he would [surprise, surprise] be rewarded! All of his past sins were to be forgiven and forgotten--and what is most perverse--could not be used against him in subsequent disciplinary proceedings.... [Obviously, someone had turned their mind to the possibility--some say inevitability--of subsequent disciplinary problems. Who? Why?]

Interestingly, as part of this Faustian bargain, Riley apparently forbade ND8V to operate on 14.313 MHz--something he may not have had authority in law to do. But what is truly odd, when ND8V returned to HF--surprise, surprise ~a month before K1MAN's published intension to resume his Bulletins--he relocated to 14.275 MHz! With virtually the entire 20 m Band for ND8V to choose from, this was not entirely serendipitous....

ND8V returned to HF in September 2001 after 'serving' only eight of the nine month suspension [Riley can't count] and virtually immediately was [surprise, surprise] back in trouble again. Riley was again forced to use the wet noodle, i.e. to issue another Warning Letter that, for reasons still unclear, but likely related to the Faustian bargain, appears to have again 'gone away' without significant or indeed any consequences.

Immediately upon K1MAN's return, he was [surprise, surprise] subjected to organized and vicious interference (QRM) by ND8V and his toadies from the zoo on 14.313 MHz now increasingly congregating on 14.275 MHz. [Interestingly, most of these were/are from the 4th Call District.] Riley/the FCC reportedly sat back and listened, but pointedly took no action. Curiously, however, between this relentless QRM'ing and otherwise bad mouthing of K1MAN and inconvenient/neighbouring others, ND8V could be heard loudly praising Riley--in nauseating fashion--the just completed suspension and by now extensive 'rap sheet' at the FCC and elsewhere notwithstanding.... Things were getting curiouser and curiouser....

Within yet another month or two, ND8V organized another attack, this time on a Polish-speaking amateur from New York City (the New Yorker), on the neighbouring frequency of 14.273 MHz for in effect usually speaking in a foreign language and being too close to "his" newly chosen frequency. Now, 14.273 MHz had for only some fifty years unofficially been known/used as the worldwide 'Polish Calling Frequency'. For the obvious reasons, many consider such informal arrangements a very effective and efficient use of the radio spectrum. But, this was shortly after "9/11" and ND8V's apologists say that he should be forgiven for this misguided sense of 'American patriotism'..

Surprise, surprise, this attack on the sometime Polish-speakers generally and on the New Yorker in particular had a similar modus operandi (MO) to that used a year earlier on the Hispanics! ND8V also in quick succession organized his toadies from 14.275 MHz to write two transparently fictitious complaints to Riley against the New Yorker. Perversely, these involved allegations of 'perceived' overly-wide signals and interference no less, backed up by the 'thinnest' of malicious 'drivel' off the Internet. One concerned chiefly what were clearly fraudulent rebroadcasts of the New Yorker's CQs [they taped and retransmitted his signals on top of their own and then complained to Riley about it!]. To even casual observers, this was/is the well-known MO of CB'ers and together with voice imitations, was/is a recognized specialty of the zoo in general and ND8V in particular. As such, the complaints were an obviously 'put up job'.

Nevertheless, without checking the bona fides of the complaints or their chief instigator/organizer, or apparently doing any independent investigation whatsoever, Riley obligingly quickly issued two Warning Letters in succession to the New Yorker. These were then published on the ARRL website. This was/is Riley's standard operating procedure. Several knowledgeable and legally trained observers have aptly called this approach to enforcement "Trial By Press Release". [The ARRL's by-and-large noble institutional memory should be ashamed to be party to this.]

These Warning Letters emboldened ND8V who was then openly heard bragging to his toadies that he would drive the sometime Polish-speakers off the neighbouring frequency in general and the New Yorker off the air in particular.

Then, two of the sometime Polish-speakers on 14.273 MHz [one American and one Canadian] stepped into the breach and attempted to defend their fellow amateur..

Initially, first the American and then the Canadian helped the New Yorker draft and send three lengthy and increasingly detailed double-registered letters of reply to Riley--not one of which to-date has even been acknowledged!

The American then sent a double-registered letter covering an audiotape evidencing malicious QRM and a death threat to the New Yorker uttered by none other than--surprise, surprise--'Dumbo Bobbie' WD4AWO--one of the original complainants and ND8V's regular toady from the backwoods of Tennessee. For some curious reason, Riley has not to-date deigned to acknowledge this serious incident either..

Over the next several months the Canadian followed up with some 20 detailed e-mails, each one evidencing at least one instance of serious malicious QRM by ND8V. After several insistent prompts Riley finally laconically if inarticulately acknowledged some of these--not to be confused with answering them--but of course he did nothing substantive about them as usual..

Then, after about six months of this benign neglect--and worse--and the continuing vicious attacks by ND8V, Riley finally attempted to placate the increasingly irate Canadian by advising that he would hold a review of ND8V's licence status at his upcoming renewal time. Inexplicably, however, a couple of months later, Riley/the FCC renewed ND8V's licence without any review whatsoever! When confronted about this by the Canadian, Riley professed utter surprise and blamed the supposed error on some administrative 'foul-up'. Others thought/think otherwise..

Then, after nearly a year of inaction and 'flip flops', the Canadian finally read Riley the 'riot act'..

Riley's reply to this 'dressing down' was apoplectic, but informative for a change. He wrote that the Canadian should not bother him with "blow-by-blow" details--each one carefully crafted as a possible exhibit to any number of affidavits! Riley also stated that he had "just noticed" that the writer was a Canadian amateur!! This, recall, after more than 20 e-mails, all except one of which [a forward from the American] were very clearly identified with a Canadian call sign!!! The logical conclusion to be drawn from this is that Riley is either grossly inattentive to detail and/or that he doesn't recognize a Canadian call sign when he sees one some 20 times in succession and/or that he is disingenuous [for those not familiar with the last word, look it up under "L" in the dictionary]. Irrespective, Riley thereby very arguably proved himself to be unfit for the important position that he holds..

In his reply, Riley also unilaterally changed 'the rules of engagement' in mid-stream and suggested that the Canadian send him audiotapes instead of the blow-by-blow e-mails. It is interesting to note in passing that the form of complaint to the FCC is nowhere specified. In fact, an FCC Commissioner had shortly before this delivered a 'rocket' to the Enforcement Bureau [of which Riley is Special Counsel, you might recall] on this very point. Also, there are serious and possibly insurmountable evidentiary problems with tapes made by 'various and sundry'.

Nevertheless, the Canadian subsequently sent Riley a detailed letter covering a tape recording of a typical example, among others, of ND8V's usual sociopathic QRM. This incident was even independently corroborated by a station from California--which was 2 kHz down and was contemporaneously also maliciously QRM'ed by ND8V--and luckily caught on the same tape! Despite this 'double whammy', from two independent sources that did not previously know each other, Riley never replied to the Californian [a retired Sergeant of police, incidentally] and only grudgingly acknowledged the 'pesky' Canadian. But, to-date, he has taken no substantive action on the incidents as usual..

All the while ND8V perversely continued to praise Riley on the air as if he were his 'long lost bud' and bragged about unprecedented access to and sometimes daily telephone contact with him [while practicing attorneys regularly could not get through].... To subjective and objective observers alike, things were not only getting curiouser and curiouser, but increasingly bizarre....

Then on 25 November 2002 Riley wrote ND8V an unprecedented strong Warning Letter noting that the FCC continues to receive complaints about him concerning the ".appropriation of certain frequencies." and ".interference to certain operators". Riley inter alia cautioned that: "Any future incidents.even a single incident, will result in a monetary forfeiture and revocation proceeding against your license" and requested that ND8V refrain from operation on the 20 m Band. This unprecedented '.last warning, to last warning, to last warning, etc....' was again based on multiple, independent and well-founded complaints from several amateurs operating tens of kHz apart. At least two of these complaints were from mature, highly credible and wholly independent sources who did not then even know of the other's existence [but Riley obviously knew--and gave both the "mushroom treatment"]. Interestingly, both of these sources were also legally trained.. Moreover, one of the complaints was in addition reduced to/backed up by a very persuasive/extensive Statutory Declaration/Affidavit..

Surprise, surprise, distressingly similar historical fact patterns and well-founded/drafted independent complaints notwithstanding, ND8V was able to dispose of them via only one "private" telephone call to his 'bud' Riley! Therein, in true sociopath style [aided by his "calm voice characteristics" no doubt--ND8V later bragged about this on-air], he simply described the multiple independent and unconnected complaints to Riley as "all lies". Now Mikee is an accomplished practitioner of 'The Big Lie' approach. But, what is nevertheless so inexplicable and bizarre in the circumstances is that Riley obviously 'bought' this preposterously 'thin' excuse!

STOP PRESS!

SPECIAL COUNSEL RILEY 'ROT' HOLLINGSWORTH K4ZDH AGAIN SNOOKERED BY 'CALM VOICE CHARACTERISTICS' OF MIKEE 'KALAMAZOO CUCKOO' ND8V..

After receiving such 'unimpeachable evidence to the contrary' from ND8V--Riley then shamelessly rescinded the Warning Letter--before it was even published!!!

This again of course only emboldened ND8V who then sold his perfectly serviceable FT-1000D and bought an IC-756 PRO--so as to more effectively 'keep watch' on and 'splatter' the sometime Polish-speakers especially, in what he instructively called "War Mode". Subsequently, according to ND8V and his toadies, 14.275 MHz and vicinity was "always occupied", even when no one was using it! ND8V published a "schedule" to that effect on QRZ.com and anyone--but especially the sometime Polish-speakers--attempting to use any frequency between ~14.270 MHz and ~14.280 MHz would then immediately be 'stomped on' and/or [surprise, surprise] loudly and perversely be accused of interfering with him!

If a few of the sometime Polish-speakers [eventually there were only two!] could not thus be chased off and stood their ground, ND8V would then threaten them with being reported to his "friend and lawyer", Riley. For effect, he would even occasionally pass out Riley's direct/private telephone numbers! He also repeatedly threatened the Canadian with a report to Industry Canada (IC), the Canadian equivalent of the FCC [and equally ineffective]. All the while ND8V's regular toadies [chief among them 'Rambo Dan' W4NTI, 'Dumbo Bobbie' WD4AWO, 'Rude Rube' K4RUB and 'Miami Boob' W4ASX to partially name only a few of the more unbalanced and guilty], were ready and more than willing in the background to uncritically back him up in whatever he said or did.. Soon, no one--'rednecks' from the 4th Call District and/or ND8V's usual sycophants excepted--was safe in the middle of the 20 m Phone Band! All the while Riley/the FCC and even IC, despite being repeatedly advised, did nothing..

The American subsequently sent Riley another handful of double-registered letters covering some dozen tapes/instances of serious malicious QRM by ND8V. But of course Riley did not acknowledge this considerable effort and expense either..

Then in February 2003 ND8V together with his toadies organized a series of vicious on-air attacks on the two sometime Polish-speaking holdouts. That these attacks were also premeditated, organized and racially/ethnically driven is beyond question. Several amateurs and even a short-wave listener independently reported ND8V and his toadies 'laying in wait' and preparing for them as such. The attacks were on an unprecedented scale and of ferocious intensity. Many of them literally lasted for hours! Some again involved repeated threats of death and/or bodily harm..

Fortuitously, all of these attacks were taped--including the all-important beginnings--both by the American and the Canadian. This should have 'put paid' to 'who was on first, first and who second', who attacking and who defending, who calling whom racial/ethnic slurs, who threatening, etc. Riley/the FCC [and sometimes IC] were contemporaneously informed and on occasion provided the tapes and/or access thereto.

But again, nothing constructive materialized--actually, quite to the contrary..

Surprise, surprise, 'Kalamazoo Cuckoo' ND8V and 'Rambo Dan' W4NTI--those paragons of American radio amateur virtue--verbally reported the Canadian to IC and the American to the FCC! Because Mikee can't write, the manner in which they did this is again instructive. First, they repeatedly read out the respective and sometimes toll-free telephone numbers using a continuous loop feature and fraudulently exhorted anyone and everyone listening to call in a complaint. Then [surprise, surprise], they conveniently called the numbers themselves! This, perversely, after first viciously QRM'ing and threatening the American and Canadian--for more than three hours--using the usual full legal power +, a five element mono-bander [typically directed at the Canadian, because the American was too close], in splattering War Mode. All of which, including again as to who first properly occupied the frequency, etc., was/is unequivocally evidenced on tapes independently provided Riley by the American as well as the Canadian!!

Surprise, surprise, the ephemeral nature of verbal complaints and the supposed requirement for tapes/hard evidence, etc., notwithstanding, both of these 'august' organizations were then perversely apparently speedily preparing to act--against the two 'recalcitrant' sometime Polish-speaking holdouts--who so "unreasonably" refused to be driven off any frequency they first lawfully/properly and demonstrably occupied!!!

Almost in desperation, the American then put a $1,000 US 'bounty' for information leading to the arrest, prosecution and conviction of their tormentors/QRM'ers.. Not to be outdone, the Canadian subsequently raised the bounty to $2,000 CDN and for effect added "Dead or Alive", 'Texas/Dubya '-style..

In March 2003 the Canadian also drafted and whenever seriously QRM'ed read to his American colleague for comment, evolving versions of "The Life of Riley"--which ultimately called for Riley's removal from the FCC..

Surprise, surprise, within ~a week of the third weekly 'reading', Riley at long last decided to act--in a manner of speaking. He wrote a letter accusing ND8V of: causing deliberate interference, broadcasting and threatening [the life of the American, no less!]. All of this arising from just one relatively mild attack in the series--lasting only about an hour--on 26 March 2003 as patently incompletely reported by some third party [the identity of which is still unknown].

Nevertheless, Riley again categorically threatened ND8V's licence with: either a suspension and revocation hearing, or a loss of voice privileges for the remainder of the licensing term [i.e. for the next ~nine years]. But, despite the unequivocal nature of the underlying evidence [eventually Riley received three tapes of the same event from three independent sources!] and the relatively strong if curiously obtuse language used, Riley did not call it a Warning Letter..

Moreover, being the petty bureaucrat that he is, Riley did not like having his feet put to the fire, especially in so public a fashion. Thus, even while appearing to take some action against ND8V, he also decided to get even--with [surprise, surprise] the American, being the only one over whom he had some power. Riley disingenuously accused him of conduct ".as bad as or worse than." ND8V. Now, that is a standard indeed!!! Shame on you, Riley!

Incidentally, this was the only substantive communication the American had ever had from Riley in his life--the ~dozen reports and costly double-registered tapes he had submitted on ND8V notwithstanding!

But, no one should be/is fooled. As previously admitted and long suspected in any event, Riley has obviously been sitting near his energized antennas for much too long! To knowledgeable amateurs, Riley's recent self-serving and semi-articulate musings in general and about ND8V and the American and the 'Polish Calling Frequency' in particular, in the circumstances do not even pass 'the giggle test'..

This latest wet noodle lashing and the requirement to reply "within 20 days" notwithstanding, as of the time of writing of this piece, or some six months--but in reality two years--later, Riley is yet to do anything

substantive to ND8V who continues to terrorize 14.275 MHz and vicinity with manifest impunity..

How come 'Kalamazoo Cuckoo' ND8V is still licensed and leads such a "Life of Riley", many thinking amateurs ask???

There are some cynics who answer generally that the ties that bind--and blind--to this extent are to be found only within 'secret societies'--such as the Masons, the Ku Klux Klan and groups which meet for trysts in 'bath houses'.. But, being cynics, they probably over-generalize, if not over-state.

Others, who are less jaded, muse simply that Riley is ineffective because he is fundamentally incompetent. Some suggest that Riley's secretary is weak in basic fact investigation and reasoning ability and has too ready an access to his rubber-stamp signature.Those who are legally trained, laconically submit that Riley is simply 'wet' on the law. Still others suggest that Riley is legally, administratively and otherwise unethical. A few point out the obvious--that Riley is also from the 4th Call District--and as such is simply covering the 'butts' of his fellow southern rednecks [and/or Klan wannabes]. Some have even suggested that Riley is intellectually and otherwise dishonest. While K1MAN bluntly states--on-air and in writing--that Riley is a "cheap and corrupt politician".

Some of these characterizations might be true, in whole or at least in part. But, after only two years of close monitoring and observation, the "relationship" between Riley and ND8V appears to be both much simpler and at the same time much more complex than that....

In a nutshell, 'Kalamazoo Cuckoo' ND8V arguably leads "The Life of Riley" because Riley continues to treat this 'useful ~400 lb. idiot' and his uncouth toadies on 14.275 MHz and vicinity as the radio equivalent of thugs and 'brown-shirts' in his battle to get K1MAN and his Bulletins off the air. Riley was/is playing the dangerous game of 'the enemy of my enemy is my friend' and provides this crude racist bully 'deep cover', convenient 'escape clauses', lenient sentences and 'get out of jail free' cards virtually on request..

But, why has this gone on for so long? Arguably, because now 'Kalamazoo Cuckoo' ND8V also knows 'where Riley's bodies are buried'..

Whatever the short and/or long-term tactical merits of Riley's ad hoc, unprincipled and ultimately Machiavellian approach, because of the collateral damage it causes to non-combatants and innocent others, it constitutes highly irresponsible and unethical administrative behaviour and brings great discredit not only to amateur radio and the FCC, but also to the United States of America as a whole.

It is past time, therefore, not only for Mikee 'Kalamazoo Cuckoo' ND8V but also for Riley 'Rot' Hollingsworth K4ZDH to go....

Yeah.... My "Troll-o-meter" pegged out too.

Some folks are so amused with themselves while drunk that they imagine that they are suddenly literary geniuses. It's pretty easy to recognize this literary "style", which reached its pinnacle of development in the southern US during the years of reconstruction, following the civil war. Books of "southern literature" from that period are difficult to find these days - and even more diffiult to read as they mainly consist of maudlin drunken ramblings that read much like this guy's post.

I don't think Luvox or Prozac would help nearly as much as a big pot of strong coffee and some solid food, for a change. The guy needs to lay off the suds (or whatever) for a while.

Hey, take a little break there, Mr Ham Radio. Give yourself a chance to sober up, a little bit.

The regulation against using electronic devices that have not been determined by the operator to be harmless pre-dates the invention of cellular phones. The text of the regulation is:

&#65533; 121.306 Portable electronic devices.
(a) Except as provided in paragraph (b) of this section, no person may operate, nor may any operator or pilot in command of an aircraft allow the operation of, any portable electronic device on any U.S.-registered civil aircraft operating under this part.

(b) Paragraph (a) of this section does not apply to-

(1) Portable voice recorders;

(2) Hearing aids;

(3) Heart pacemakers;

(4) Electric shavers; or

(5) Any other portable electronic device that the part 119 certificate holder has determined will not cause interference with the navigation or communication system of the aircraft on which it is to be used.

(c) The determination required by paragraph (b)(5) of this section shall be made by that part 119 certificate holder operating the particular device to be used.

The FCC prohibits using cellular phones on aircraft, but that applies only to cellular phones, few of which exist any more. Most modern 'cellular' phones are in fact PCS phones, which are not subject to that regulation. This ban was created when the regulations for cellular phones were first written and was not included in the regulations for PCS phones.

Anyway, cellular phones are specifically banned by the FCC and few flight attendants are probably willing or able to verify whether a particular phone is covered by the regulation or not, while all portable electronic devices are banned by the FAA unless the air carrier has determined that they will not be harmful. Few air carriers are probably willing to test every type and model of electronic device for radio interference, but most of them have no problem with pocket calculators, laptop computers, and the like, even though

a laptop computer or PDA with Bluetooth or WiFi would seem to be a potential problem.

Nope. The FAA rules have not changed on this, nor have the FCC ones.
You can't use Advanced Mobile Phone Service (i.e., traditional cellular)
airborne. That is an FCC rule.

The FAA rule is just that the airline (i.e., the operator) must
determine when electronic devices are safe to use. The only thing that
has really changed is the "conventional wisdom" on the FAA's part got a
little tighter after some supposed interference issues (primarily blamed
on laptops) a few years back.

> Is cell phone usage also restricted on private jets, etc. for similar
> reasons?

Yes, all airborne use is prohibited. On cell phones permanently
installed on private jets, there has to be a warning label attached to
prohibit it's use in the air. (FCC rule).
>
> So my question... what is the technical reason for restriction of cell phone

Forcing you to use the Airphones is the least of the FAA's or the FCC's
concern.

The real reason is that the cellular phone industry does not want you
to. Their bread and butter is the ground based caller, and their
systems are not designed to work with callers that have some altitude on
the system (there are techncial deficiencies in this that I won't go
into unless you really want to know). As a matter of fact, the cellular
industry fought a company who wanted to share the spectrum
tooth-and-nail over airborne use.

Oddly, this prohibition is NOT written into the rules for the newer
wireless services (PCS, NEXTEL, etc...) that operate outside the AMPS
(800MHz) band. However, most of the carriers with these services still
discourate airborne use.

Actually, they are subject to the regulation when they operate inside
the AMPS band regardless of the technology used. Many of the PCS
services fall back to AMPS. Some of the other wireless providers do
digital service in the AMPS band as well.

PCS is a marketing term invented by cellular
carriers. Both 800 and 1900 Mhz are still
"cellular." PCS originally meant Personal
Communications Services which was a term
used even with old analog via touch-tone
before there ever existed 1900 Mhz "Cellular."
The system could not operate with just one cell because
if everyone was on the same site they would
interefere with one another. More profound
than that, but a cell-phone is still cellular
whether on so-called "PCS" or 800 Mhz
bands.

I noticed on the evening news the other night that someone is trying to get
a modular mobile "cell tower" approved that would be installed in commercial
aircraft so that passengers can use their own mobile phones. It will be
interesting to see how the FCC and FAA handle this one.

Back in '99, when I got active again, I happened across and was surprised to hear these transmissions as it sounded like broadcasting to me. I read a few of the FCC things thereafter, but it dropped off the radar screen.

So...did he and the FCC come to terms on his station operation? What was the official resolution? or is he still a problem in the FCC's eyes?

Just after the status/facts - not interested in opinions.

If all you want is the 'status and the facts' and want no opinions then YOU TAKE YOUR OWN TIME TO RESEARCH THINGS.

Go to Google and type in "K1MAN". That should keep you busy for a while.

Later this month an industry group is going to announce standards and an
icon that will come on to show that a device that is not in a transmit mode,
even if it is turned on for other uses.

Nevertheless, the FCC rule applies only to the 800 Mhz band.

Still won't work. The frequency the cell in the air is on, will be hitting
dozens of towers on the ground, making them unable to use that frequency for
other users on the land.

Oh good. Let's list all the reasons why cell phones belong in airplanes:

1) Airlines in bankrupty which (and I say this with enormous sarcasm) has NO effect on the morale of people who should be happy, like mechanics

2) A random selection of pilots who partied way too late the night before

3) Sky marshalls who saunter aboard like what's-his-name from Miami Vice, thereby making it perfectly clear who to strangle if you're a hijacker and need a gun.

4) Passengers who think flying is a convenient excuse to get plastered within 15 minutes of takeoff and mouth off to the crew.

5) People who've lived on potato chips and cheesecake since birth, but think they shouldn't have to buy two seats to contain their lard, and end up flowing all over your for 4 hours.

6) Air traffic control computers which are, in many cases, antiques.

7) Morons who will look right at you while you're listening to quiet music with your eyes closed and begin telling you their life story.

8) Fools who SLAM their seats backwards within seconds of the warning lights being turned off, and pretend they're instantly asleep?

On top of all this, you think there should be lots of cell phones in use on airplanes? I've got news for you: Do that, and it'll be more comfortable to take a bus through a Central American jungle with goats & pigs roaming the aisles. I don't know how old you are, but there was actually a time when flying was comfortable and enjoyable.

Not according to the FCC, and they (literally) make the rules and the definitions.

Grossly misleding journalistic BS. OK so maybe 72% of their customers
who have signed up for PPL BPL are satisfied with the service. Which
leaves 28% who apparently are not satisfied. Pretty dismal rollout eh?

And it ain't 72% of their power customers, it's only 72% of a tiny
collection of areas they've managed to wire for BPL so far. Based on
published map data PPL hasn't even scratched the surface of the huge
area in which it sells amps and volts. Looks to me like they have BPL
running on less than 1% of it's power wiring infrastructure and
they're already going out of their gourds trying to handle it.

> And what was that you head-in-the-sand types were saying about the
> supposed death of BPL?

Don't get yer knickers in such a twist, BPL isn't decisively alive or
dead yet by any means and no conclusions about it's ultimate fate can
be drawn at this point. This battle is gonna go on for some unknown
number of months/years to come just like our brawl in Iraq will.
That's just the way we are.

And expensive!

In 1958, I left my job in Frankfurt and looked at modes of
transportation home. I got a ticket on the Holland-America line for
$278. An airplane would have been $400--one-way!

To translate into millennium dollars, multiply by ten.

I dunno....my dad paid for it when I was 12 years old. :-) About the only negative thing I remember was that the airlines were silly enough to serve peas, which made for a bit of a mess on bumpy flights.

Best memory - 1987: My flight from Pittsburgh to Rochester NY was delayed by an hour due to crazy summer weather. When we finally boarded, the pilot came out of the cockpit and addressed the passengers. He said "Sorry about the delay, but there were thunderstorms. They've passed, but it's still pretty turbulent. I'll give you a choice. I can avoid 98% of the turbulence and we'll be in Rochester around 8:30. Or, I can go through the bumps and it'll be about 15 minutes quicker. The 2nd choice could be a little unnerving, but nothing we're not trained for and the plane's not built for. How about a show of hands - who wants choice A? And choice B?" Choice B won. We got home faster. :-)

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday October 17th 2004
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and

No it doesn't mean that. It isn't a binary situation (very satisfied
vs dissatisfied), but rather a gradation. You should have read the
article, which says that only 5% of the customers described themselves
as "dissatisfied" or "somewhat dissatisfied." What the 5% statistic
really means is that 95% of the customers were either satisfied or
very satisfied with the service.

> And it ain't 72% of their power customers, it's only 72% of a <FLUSH!>

[Rest of response flushed, because someone who didn't read the article
can't possibly have an informed opinion about the article.]

Not when you are talking about FCC rules. For regulatory purposes,
cellular specifically refers to 47 CFR 22 Subpart H which covers the
800MHz (AMPS) band. PCS is governed by 47 CFR 24.

Mr. Daniel L. Jeswald
89 Wildman Road
Anniston, AL 36201

RE: Amateur license W4NTI
Case #EB-2004-2561

Dear Mr. Jeswald:

Enclosed is a complaint we received about the operation of your station on December 26, 2003, on 14.255 MHz. The complaint alleges profanity and obscenity, as well as racial slurs.

Section 308(b) of the Communications Act of 1934, as amended, gives the Commission the authority to obtain information from applicants and licensees about the operation of their station. Accordingly, you are requested to review the complaint and respond to this office within 20 days.

In an inquiry of this type we are required to notify you that a willfully false or misleading reply constitutes a separate violation made punishable under United States Code Title 18, Section 1001.

Enclosure

I need a replacement for the 1SV153 Varactor diode used in the Kenwood
TS-440 HF rig. I've searched several sites including NTE and Tandy.
Anyone have any info or even specs?
Please respond direct. Tnx and 73, K4GJ

Of course I read the article Lloyd, I simply quoted your own stats.

And by the way Lloyd I've been to that area myself with my own
equipment and tuned the BPL signals in Emmaus on three occasions. I
worked there hands-on with Ed Hare when he was running the ARRL BPL
surveys, I was there when W3HJ ran his spectrum analyses of BPL, etc.
I also have a strong technical professional and business background
and know a problematic technology when I see one Lloyd. Been there,
done 'em. It ain't binary Lloyd, BPL is a technology which could go
either way down the road so I'll stick while you flush yer little
heart out around here. In the meanwhile I suggest that you put a bit
of work into getting out from behind the power curve on the subject.

Have a nice day Lloyd. 'Bye.

The cellular phone does use an adaptive power control (it's not tied to
the signal strength bar).

The problem is that even at mimimal power, if you're sitting close to
the window, you can be heard equally well by a large number of cells
over the system. There's nothing magic that they can do to stop this
short of rf shielding the aircraft windows somehow.

I could see the possibilities of strong enough signal not reaching the
ground to cause problems, but.....

Which company (Of the multitudes) will you have to belong to, to get your
phone to work? How will the plane's system communicate with the ground? By
cell tower? <g>

The only thing that I see wrong with this is that the cell "tower" needs to connect to the wired phone system. We know that it can't be hardwired, that would be one hell of a long cable! So, as the "tower" needs to transmit and receive (transceiver) from other transceivers on the ground that are hardwired to the phone system. You can put the ground transceivers on a different frequency pairs, but that's a whole new world wide system!

So the other people from other countries also saying BPL is a problem are
also singing ARRL anthem?? How interesting.. I didn't know Japan, Austria,
Australia, New Zealand, Germany, etc, etc were all part of the ARRL???
After all, there are radio users from all those places (and more) all
singing the same song - some long before the ARRL even thought about BPL...

Their "collective objectivity" is fine - they all find the same problems
from BPL...

>

It is problematic technology to HF RADIO USERS, not necessarily the BPL
customers. But do we really want a small group of happy BPL customers if a
larger group of shortwave listeners, amateur operators, and other HF and VHF
users are adversly affected??? I'm sure the survey of 'happy customers'
didn't include anyone adversly affected by the interference caused by BPL...

>> either way down the road so I'll stick while you flush yer little
>
> The professional engineers at the IEEE support BPL, the FCC chairman
> supports BPL, and even President Bush has put his support behind BPL

And what the hell do you expect 'business orientated people' to say?? BPL
proponents have splashed around the almighty dollar sign and mentioned about

how happy the voters will be that broadband is available to more people.. Of course they are going to support it!!!

What about all those other bodies that don't support it? The ones that look beyond what it delivers to the home. Of course if you don't look for any interference then you won't find any, will you.. You bloody yanks are so stupid - "oh the President supports it so it must be OK".. utter waffle that shows just how childish and easily lead you are... Would you believe that the earth is flat if the President said so???

> (see http://www.plca.net/WhiteHouseWhitePaper.pdf if you are expert
> enough to read portable document format). I'm afraid that the power
> players are backing BPL and that the ARRL doesn't have a snowball's
> chance in Hell of changing that. Wi-Fi technology from the pedestal
> to the house also means that the interference level claimed by Ed Hare
> simply won't be found in the final BPL product.

Crap - the problem comes from the radiated signal from the nice long wire antenna called power line - you know, that bloody long cable running down the street on top of the power poles... That is what radiates the most signal and spurious emissions, regardless of how it is finally delivered to the household. Even BPL delivered by underground shielded cables have shown unacceptably high interference levels around the properties serviced...

Are you radio orientated at all? What happens when you pump an RF signal into one end of a long unshielded piece of wire? You know, the kind of wire you'd use to make, well, a long wire antenna.... Of course, different lengths of power line will radiate different levels of signal, just as when you use a long wire antenna not tuned for the band you are on, but in the end the overhead power line is not a sheilded cable or coaxial cable - it's just a straight length of wire that radiates RF nicely....

Wake up and smell the bullshit you are waffling. EVERY country that has or has trialed BPL has reported at least some interference problems by various radio users, not just amateurs. Japan has banned it because the Government found the interference too much, Austria has stopped trials for the same reason. Now ask yourself which Administration really cares about their entire population - the Japs, Austria, etc that actually refuse a technology because it will adversly affect a large number of citizens - or the USA, etc, who are willing and happy to ignore the difficulties it will cause a large number of radio users simply because "it's new and exciting technology!!!". Which Government seems to be more interested in its citizens rather than just big business???

Christ sakes, asbestos was 'new and exciting' when it first came out - now it's killing people!

If I were you Amaericans I'd be seriously asking the Government exactly who they represent - the people or just the big businesses..... Seems the individuals rights have been sold out for the sake of 'technology'...

>
> It may be that the only way for amateurs to get an objective answer is

> to convince the K1MAN RFI Laboratory to run tests of its own.

Not just amateurs - all you shortwave listeners out there, trying to receive extremely weak signals from distant countries, will probably be worse affected and have absolutely NO interference protection or comeback....
Have fun!!!

The origin of the ban was due to concerns about cellphone transmissions interfering with onboard avionics. This is more likely to be a concern with older a/c. There is no hard data that I know of that substantiates the concern. There is some anecdotal evidence of interference though.

As another poster has mentioned, cellphones don't work well at altitude.

Both Boeing and Airbus are now working on systems to enable airborne use of cellphones.

I thought that the base station antenna patterns pretty much ignore any signal greater than a few (maybe ~10) degrees above the horizon.

OOOH! - here you go:
http://dataweek.co.za/news.asp?pklNewsID=14923&pklIssueID=422&pklCategoryID=47

It says in part:
Another phenomenon caused by the build-up of corrosion deposits in a RF joint is intermodulation, also known as the 'rusty bolt effect'. In this case, the corrosion deposits are 'nonlinear semiconductors' and cause signal mixing. The end result is interference from frequencies not transmitted at the joint, but created from the mixing of multiple signals received by the joint. The joint, in turn, acts like an electronic circuit which mixes signals. This problem is common whenever multiple electronic devices are used in close proximity. The shielding effectiveness of a non-linear joint cannot be measured using DC measurements or standard RF test methods.

Interesting

The origin of the ban on cellphone usage at altitude was to prevent phones from hitting multiple receivers which were using the same frequency. The designers of the AMPS system counted on being able to have many "cells" use the same frequency set because they were far apart. Put the phone in the air, and several of these stations would receive the transmissions from the call.

The origin of the FAA ban on electronic devices is as you say, but it is not unique to cell phones.

Everyone's got a conspiracy theory. Here's another: The ban on cellular
phones is kept alive by the book publishing industry. Some in the evil cabal
may actually have the best intentions: Trying to get cell phone addicts to
shut the phuque up and try reading something for a change.

You seem to have poor reading skills. Specific individuals were under
discussion, as was a specific BPL test installation in the United
States. If you want to change the subject in an attempt to include
your part of the world (Australia), I'm afraid you're only going to be
talking to yourself.

Freebanders, if you will, are bottom feeders.

Freebanders, if you will, are fat, lazy, and stupid.

Freebanders, if you will, ARE second class citizens, alone with others in
the criminal element.

Freebanders, if you will, will NEVER receive RESPECT from any licensed
Amateur Radio Operator.

Freebanders, if you will, are LOWER than trailer trash.

Freebanders, if you will, are not respected by good CB Operators.

Freebanders, if you will, lack motivation, skill, and education to become a
good operator.

Freebanders, if you will, are looking for the EASY way, not the CORRECT way.

You are different in one very basic way. We have a federally issued license to operate on the bands that we transmit on, you do not. As for being "good operators", I have heard good operating technique on the so called "freeband", just as I have heard poor operating techniques on the ham bands.

> We use Yasus, Kenwoods and Icom radios just like you do, so we know

What's a "Yasu", perhaps you mean a "Yaesu"?

> technical issues as well or better. It isn't like we've gone to the

Look at it another way --
just because you purchased an expensive car, it does not give you the right to drive like a maniac at 150 mph down the highway (although here in New Jersey, many folks seem to think it does). Just because you paid a lot of bucks for some radio gear, it does not give you the right to transmit on frequencies that you are not authorized to use.

> However, the attitude of some hams toward us is rude and
> condescending. We are treated like 2nd class citizens, partly because

I never thought of amateur radio operators as being an elitist group. I have known hams from every age group, all socioeconomic levels, and very diverse professions. The only thing that is common to them is that they have a love of radio.

I also do not see anything in the constitution about the rights of ham radio operators. Perhaps you are looking at a very different version of the constitution than I am familiar with.

> For those that do not wish to be under Uncle Sam's thumb, freebanding
> is a viable alternative to getting a ham radio license. What I am

If you don't wish to be under Uncle Sam's thumb, move out of the US.

> saying is that maybe the next time you meet a freebander it might be

One thing that "Elminster22" has proved is the gullible stupidity
of hams. He posted an obvious troll. Moreover, a troll which
has been posted to r.r.a.p. many times. Yet, dimbulb hams
bite on the sucker bait EVERY time, and that is why the same
troll is posted here over and over, to see the moronic knee-jerk
reactions from hams who should know better. Yeah, freebanding
is not legal, we all know that. However, Elminster22 does have a
few valid points. Totally ignore these trolls or give them a
courteous reasoned response. Nevermind, I am asking way
too much from today's dumbed down pool of ham operators,
who themselves only recently graduated from freeband and
14313.

Sorry, there are two issues. The FAA has it's own concerns about ANY electronic devices. There's not hard and fast info on a lot of these devices and the FAA has gotten more restrictive over time. However, the AMPS regs specifically prohibit it without specifying the reason. It would seem unlikely that a prohibition against airborn use however has anything to do with air navigation because NOTHING ELSE the FCC regulates really addresses that issue.

>
> As another poster has mentioned, cellphones don't work well at altitude.

Wrong. AMPS / Analog cell phones, the ones the regulatory applies to, work just fine from altitude. Actually too well. That was demonstrated on 9/11. However some of the digital (PCS, for example) services, don't work at all airborne (but they are not prohibited by regulation either).

It would be a real can of worms. If everybody had a GSM phone in the
US it might be doable. But every carrier these days tends to market
a multimode phone that bounces between CDMA, old style TDMA, analog AMPS,
GSM, and a couple of proprietary schemes like iDEN.

It's going to have to be a "only [insert carrier here]" phones work onboard
United's flights.

Yes there are differencs, the main one is you are operating illegally
while the hams are licensed to use the frequencies on which they oprerate.

> We are good
> operators and have knowledge of propagation and skip conditions.
> We use Yasus, Kenwoods and Icom radios just like you do, so we know

No matter what kind of equipment you use, how much you spend, or how you
use it, you are still illegal.

> However, the attitude of some hams toward us is rude and
> condescending. We are treated like 2nd class citizens, partly because
> we don't want to be part of the elitist "clique" that amateur radio
> has become. This should not be.

You mean because you are to lazy to get a license.

> We have the same rights under the constitution as legal hams do.

So show me in the constitution where you have the "right" to operate
illegally. You have the same right to get a license and operate legally
as anyone else, but you obviously are either to lazy or to stupid to
pass the test.

> For those that do not wish to be under Uncle Sam's thumb, freebanding
> is a viable alternative to getting a ham radio license. What I am
> saying is that maybe the next time you meet a freebander it might be
> wise to talk with him before you condemn him.

Maybe if you get licensed and operate legally you won't be condemed.

And by the way, the frequencies between 11 and 10 meters are not the
"freeband". That is a label you illegal operators have put on those
frequencies to make yourself feel it is OK to operate there. Those
frequencies are allocated to other services and just because you may not
hear someone else using those frequencies does not mean it is your
constitutional right to operate there.

MAN's 'purpose' you say??? Tell us LLllllooooyyyyyddddd what is his
purpose?

Oh let me help you...it is to sew hate and discontent among ham radio
operators. It is to thumb his nose at the FCC, it is to irrationally
insult the ARRL and then run their bulletins on his 'program' in order to
trash up the bands.

Two outstanding problems he has to fix:

Firing up his transmissions on frequencies other hams are
using at the time, and something about pecunary interest
when he tells people on ham radio frequencies to visit his
web site where he sells stuff.

Amateur Radio is a fraternity or skill, and licensed radio operators.
We openly welcome new "Hams" into the clique. Get a legal license and
see for yourself.

> This should not be. We have the same rights under the
> constitution as legal hams do.
Amateur Radio is not covered in the Constitution, it's governed by the FCC.

> meter bands aren't any different from licensed hams. We are good

<snip>

Yes you are. You're not licensed, and your ethics are more than a
little questionable.

You may not agree with everything that amateur radio has become.
You may not agree with the laws of this country which require that most
transmitter operators be appropriately licensed by the FCC.

That's fine. I happen to disagree most vehemently with our current
excuse for a president on most of what he's done. However, this does not
give me or anyone else the right to simply ignore the laws of the land.

If you are operating a CB radio outside of its designated channel
assignments, you're breaking the law. Period.

If you're operating an amateur 10-meter radio without a license,
you're breaking the law. Period.

> operators and have knowledge of propagation and skip conditions.
> We use Yasus, Kenwoods and Icom radios just like you do, so we know
> technical issues as well or better. It isn't like we've gone to the

Really? "Using" a radio does not automatically mean that you know
anything about the theory and practice behind what makes its innards
work. I'm sorry to say that many hams today have chosen not to maintain
the level of knowledge of electronics and RF theory that was required
for them to pass their initial exam.

HOWEVER -- That is their choice. Despite my own beliefs, I choose
to respect those who have done so for that choice. At least they made
the effort to study up and get their license.

BTW, you misspelled 'Yaesu.'

> local Wal-Mart and bought a Cobra 40-channel close-out for $35, and

Really? Care to post some proof of that? Specifics on what you
bought, where you bought it, and how much you really paid for it?
Perhaps copies of receipts?

> However, the attitude of some hams toward us is rude and

No you do not, because you are operating radio transmitters
without an appropriate license.

Also, please quote the portion of the Constitution that extends
any sort of "rights" to hams or "freebanders."

> For those that do not wish to be under Uncle Sam's thumb, freebanding
> is a viable alternative to getting a ham radio license. What I am

No, thank you. I'm not going to condemn him or her, if I happen to
meet one, but neither will I choose to share knowledge of technical
issues if asked.

I will not assist, in any way, anyone to operate a radio
transmitter illegally. To do so would be to risk my own licensing, and
that I will not do.

If you choose to continue to operate without licensing, well,
that's your choice. Do not expect such operation to be without
consequences, one such is very likely to be derision from those of us
who studied -- often for months -- to earn our licenses.

Also, don't be surprised if the FCC shows up at your door one of
these days.

Actually, PCS and 800 MHz digital CDMA work just fine airborne
provided there are only a few CDMA base stations near the aircraft,
but flying over a city it is hopeless. The problem is that in CDMA
systems many base stations transmit on the same wideband channel,
interfering with each other. The phone will never attempt to transmit
because it never succeeds in acquiring the system.

According to authoritative legal sources, ALL of MAN's
activities are quite legal. For some odd reason, probably
envy, many American hams are in denial and think MAN
is doing something illegal, which he is not. If ARRL is
legal, MAN is legal. Simple!

That would be fine if there were some industry cooperation with the
people planning on offering the airborne service. But the plethora
of incompatible modulation schemes now sort of demonstrates that this
level of cooperation isn't likely .

CERTIFIED MAIL 7099 3400 0015 4631 9236
To: W. Riley Hollingsworth, Esq.
FCC
Gettysburg, Pa. 17325-7245

From: Glenn A. Baxter, P.E., K1MAN
Registered Professional Engineer
Date 14 October 2004
Subject: Your letter to K1MAN dated 15 September 2004
and received 28 September 2004
Thank you for your letter and your interest in K1MAN. The legal opinions in your letter referenced above are not correct and the various allegations are false. K1MAN is in full compliance with all FCC rules, state laws, and federal laws. I encourage you to take "enforcement actions" and look forward to seeing you in court(s).

Regarding your request, I hereby certify that:
1. No corrective actions are necessary at K1MAN.
2. No changes are needed with regard to station control which is in full compliance with all FCC rules.

Good listening! GL and 73 de K1MAN
(signed)

AUDIO AVAILABLE OF FCC DECISION TO PROCEED WITH BPL

The FCC has acted to approve the implementation of Brodband Over Powerline technology (BPL) for widspread Internet access in the United States. We were able to get in and record part of the October 14th proceeding which is now posted as a downloadable MP3 file at our website: www.arnewsline.org/quincy under the title of "EXTRA".

The speakers you will hear inorder of their appearance are FCC Commissioners Michael Copps, Kevin Martin, Jonathan Adelstein and FCC Chairman Michael Powell. The presentation concludes with the actual vote to proceed with the implementation of BPL

I wish Riley and Glenn would stop dancing around each other and do
something. If Riley is
going to take action then he'd best get on with the show and stop sending
annual warnings.

In other words, Riley, it is time to put up or shut up.

Past Internet sex tapes have turned out to lead to lucrative TV
contracts for the exploited party. Perhaps the goat will get a show
of her own where she works on a farm and feeds pigs or maybe shows up
at Playboy parties hosted by "Hef."

Still, Woger should have kept the whole thing private. It's what real
gentlemen do.

1589. Tait T375 & T377 Help Required

Hi All,

I have acquired a Tait T375 RX and T377 TX exciter for our repeater.
I do not have any information on this set of modules (do have the previous model), and need to change the freq. and calibrate them.
These units use the diode switching for the freq, not a change of crystal.

For one, I would like to get information on the diode setup for freq setting, then I can get onto the calibration.

If anyone could provide me with Doc or PDF files, I'd be most grateful.

I can be sent to me at sparc_man@hotmail.com

Regards

Kevin, ZL1KFM.

1591. SECRET ICOM SALE: R-75 $425 W/ DSP AND FREE SHIPPING

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-15 02:02:21 UTC
From: Lucky <Lucky@TheBotStopsHere.com>
Message-ID: <10mubteo0gqhk7f@corp.supernews.com>
Source record: 56128

Hi guys. I have some good news for some of you interested in purchasing some Icom products during their "secret sale". It all started when I wrote HRO www.hamradio.com and asked them about giving the community a Christmas/Holiday deal. Well, we got it!

This is the deal. On Sat Oct 16th there will be a secret sale at HRO. The price marked for the R-75 will stay the same $525 but, if you order on Sat, you will get $50 off on TOP of the $50 rebate. Meaning, you'll be charged only $475 for it. Then after rebate you pay $425 for a brand new R-75 with Free DSP and Free shipping. What a deal! Plus, if you read the letter down below from the person at HRO, you will find hidden deals on other radios too.

If you don't wish to wait till sat, just order right now before stock runs out and write this in the comments box "Please Apply Icom Day Discount" The order won't be processed till sat the 16th and will ship on Mon. Just read the bottom letter from me to HRO and HRO's letter back to me. Great deals!

You'll see more posts from me on this matter so don't get upset. I hope some of you guys spread the word and cross post this for me.
Thanks

Glenn, your timing could not be better.

Here's the deal .. we have a 'secret sale' on Saturday.
I cannot advertise it, as Icom will not permit us to advertise in the national magazines and I cannot advertise this on our web page either.

However, all orders submitted on Saturday October 16th on-line will get this special Icom Discount, even though it is not displayed on our web page.

You CAN provide all the details for the order in advance, but I will run the order Saturday - just put in the comments field "Please apply Icom Day Discount" .. the order has to be run in our system on Saturday, so it would ship Monday the 18th in most cases.

The Icom Day Discount discount is

$10 on Icom handhelds [all Icom ham transceivers, and includes all Icom handheld receivers as well]
$20 on Icom mobiles [includes 706, 703 and PCR1000 series]
$50 on HF radios [not including 706/703] but includes the R75 and R8500 receivers
$100 off on the PW1 amp and IC7800

So, the bottom line is I can sell you this radio for $475 .. and you send in the $50 rebate from Icom bringing the final price price to you as $425

Feel free to send this message to anyone you know ..
"

Subject: Icom R-75

Hi gentleman

I'm looking to buy one of your products, the Icom R-75. Right now it's $525 with a $50 rebate bringing it to $475. I know it's cheap to some people but I'm going over my budget for a radio but have my heart set on this one!

My question and suggestion is this. Will you please run that special again where the end price was $450 like you once did? If you dropped the price to $500 I'd buy one right away. My suggestion is to run a Christmas/Holiday special in Oct for say one or two days. Yes really. It's only 2 months away actually. If you did, I'd plaster it all over the radio forums to let people know about this great deal and show my appreciation.

If you find it in your saleman's heart to run a little extra special "can't turn it down" deal for $500, let me know and I'll buy one right away.

Thank you guys
Glenn

Kevin, Tait is made right there in New Zealand. Why don't you try to give them a call and see if they might help. I have had nice contact with their tech support while they were here in the U.S. and they seemed quite helpful in amateur radio issues. Perhaps the company will assist you?

Go Riley! Take the idiot Baxter to court! Let's put that POS behind bars. Glenn Baxter is an a-hole and is destroying amateur radio with idiotic playing of his phone answering machine on the radio. His AARU is a joke and nothing more than a way for him to make money. What a scam - what abuse of the radio - confiscate his equipment, fine him big, put him in jail.

First Rush Limbaugh gets caught using drugs, and now Bill O'Reilly is caught watching porno and masturbating while on the phone with his female producer. Besides that, he wants to give her a dildo with a name. What a nice family-oriented Catholic, right? And the lady has O'Reilly on tape.

Another conservative who set himself up as a moralist is about to bite the dust, caught up in his own immorality.

Bye bye O'Reilly, you hypocrite low life. You are a typical Bush Republican.

I don't recall if it is in part 97 or an interpretation, but there is official word from the FCC that transmissions *specifficaly aimed at amateurs* is diffeernt from that aimed at *anyone* which *is* considered broadcastaing. So if it is to anyone, it is broadcasting. If it is to an individual or specific group of people, then it's not. I'm just explaining. I wrestled with this as well and it is certainly arguable...as is anything here... So, what about religious transmissions? If they hope to convert, then it's broadcasting. If they are only targeting religious people, then it's not, I guess. 73,

Only on the religion bands... :-)

I think the point is that the material in the bulletin/broadcast
needs to be that only interesting to hams or prospective hams.
But any subject in a true 2 way communication (QSO) is allowed
except for indecent and patently offensive material.

I wonder if I can get a US patent on something patently
offensive? ;-) I already have 14 "utility" patents
(those are the real patents, don't let some shister
lawyer sell you a "design" patent. A design patent is
really just a trademark of sorts, and is trivial to
circumvent).

Wow, did you think of that response all by yourself???

Your parents must be so proud of you, I mean, after the doctors slapped your mother for giving birth to you, and they had to tie sausages around your neck to get the dog to play with you, you've managed to master the task of hiding behind a keyboard, typing a message, and playing with yourself at the same time!!

Well done indeed!

I don't know about being a "natural" in conjunction with the "liberty net"
as I never listen to it..... What I AM, is PISSED OFF that 3000+ died
because of these cock roaches. NO ONE, AND I MEAN NO ONE - should forget
what happend on 9/11..... And to think they're plotting yet again..... !

L.

When the Border Patrol folks make 1,100 arrests per DAY in the Tucson area,
and when it is estimated that they catch one fifth to one tenth of the
illegals...well, you figure it out.

The REAL problem is that 99% of the ones who DO get caught are simply escorted
back over the border. Ready to try their luck again tomorrow. Some deterrant!

Hi DON,
I think your vanity call sign should be K9DUM instead of K9D*N.
I recently found this message you posted "anonymously".
Let me correct a few of your mistakes and/or errors.
I will NOT correct your several spelling and grammatical errors.
I have never lived in Bloomington, IN.
I don't now or have I ever lived in a shi++y part of the city in a shi++y house.
I live several miles from the nearest city limits of any city,
my mailing address is for a small city about 10 miles away from my residence.
I, and most people have filled out many forms at the BMV.
FYI, DON my name has never been Tracy. It was trACEy several years ago.
Feel free to report any damn thing to any agency that trips your trigger.
As for my education - It didn't "metriculate" from any place.
I have been matriculated into several colleges.
Anyone who wishes to know what my Doctorate is in can check www.QRZ.com or www.WH2T.com .
I encourage you to do "a comprehensive background check on" me and post all your findings here
in the group for all who talk to me to see.
P.S.
By the way DON , in your email address it should be Sailor NOT SailerDon@Yah**

"Background Check"? From where? The Dimwit Private Detective School Of
Misinformation?
Yeah. That credible source will REALLY hold water, won't it?

Before you sling the mud, be sure you are not stepping in your own manure
first. What goes around most often comes around, and it ain't pretty for the
slingee.

K1MAN EDITORIALS -- WD4AWO (Dumbo Bobbie) KB1EVE aka WA1BHV (Summers Eve) When will the 500 lb Michael Moore look alike ND8V (November Dumbass 8 Vomit) chime in???

EDITORIALS

It is evident that Glenn is a maniac and needs to be studied while he is safely housed in a rubber room. However, he is one of very few individuals who have the necessary steel balls to stand up to Riley. Unfortunately for Glenn's response that his station is in compliance is totally ridiculous. On Monday, October 11, 2004 Steve - W7CI and I made repeated requests on 14.275 for the control operator to confirm that the K1MAN station was indeed in compliance with the following FCC Part 97 Rules:
97.105 (a) - Control operator duties
97.109 - Station control
As expected we received no reply from a control operator for the K1MAN transmissions. Therefore, since the K1MAN station is NOT in compliance any and all legal transmissions by amateur radio stations should not be harrassed by K1MAN or his entourage with threats of legal action, specifically the filing of Felony Affidavit Complaints.

73,
Bob WD4AWO

MHR Comment: Keep in mind, WD4AWO can't even address an envelope. Don't believe me, here's his QRZ BIO.

VIA U.S. ADDRESS ONLY
I DO NOT RESPOND TO ANY BUREAUS/QSL SERVICES
U.S. STATIONS INCLUDE SASE
OTHERS - SAE & IRC OR SAE/80 CENTS US POSTAGE
SAE IS IMPORTANT TO AVOID ADDRESS ERRORS
IT IS SAFER FOR YOU TO ADDRESS THE ENVELOPE
DO NOT INCLUDE ANY CALLSIGNS ON ENVELOPE
73,
BOB
Bio last modified: 2004-08-12

Believe it or nuts: I agree with my good friend WD4AWO. but I would say they are brass balls, not steel. Glenn is totally nuts!! I tried calling the 800 number and it took me 4 times to just leave a message. Forget when he broadcasts on 75, he just ain't there, Also, Rich has a point: But the

ARRL has been along since ham radio's inception via W1AW. Glenn has the money and the balls to say "why not me" K1MAN's broadcasts are very technical and promote ham radio and make an (other) attempt to intice young people to get bit by the Radio Bug. K1MAN makes an attempt to promote ham radio. That's a good response by a lawyer in front of an ALJ. Isn't that Riley's prime objective? To improve ham radio, and get rid of the international embarrassment due to 14313? It was complaints about '313 that pulled the heat on us.
Peace
WA1BHV
me in 07
and Hillery in 08.

MHR Comment: Getting rid of Summers Eve from 20M was a major improvement.

K1MAN RESPONSE:

Bulletin stations do not have to respond to callers on the frequency while the bulletins are being transmitted. Try calling W1AW! This IS NOT rocket science.

AARA and IARN do not have to answer the phone. We will call you back is we want to. The control operator of K1MAN can be anywhere in the world at a given
moment. This is a little closer to rocket science.
Hellllllllloooooooooooo!

73 and GL

Glenn/K1MAN

K1MAN is as big a terd as John Kerry is.

They will both be gone soon.

1623. Ford unfriendly to Hams - help / advice needed.

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-17 19:08:41 UTC
From: Evan Platt <evan@TheObvious.espphotography.com>
Message-ID: <38g5n0ldc1miv81m8mgbc96g12akf8id53@4ax.com>
Source record: 56086

Well, I've gone over this story a dozen times to numerous auto groups, but the attitude there seems to be "F* off", so I'm hoping people here would be more friendly.

The full details are at
http://home.espphotography.com/peninsulaford.html

Short version:

I had a 2001 Ford Taurus, and the extended service plan (warranty). I volunteer for a Volunteer Fire Department, local OES, and a large Air Ambulance. I'm also a licensed ham (KG6ESP). I had a few two-way radios in my car along with my fire turnout gear. No biggie. With 3 or more people in the car, the car made a loud rattling noise at idle. After a local ford shop looking at it, they stated the car was overweight. I could only get the car weighed with one other person in it, but my car was still over 600 pounds UNDERWEIGHT, and the 2 other people I'd carry weighed nowhere near 600 pounds. After arguing back and forth with the local Ford, they said "Too bad, we won't help you." I sold the Ford, cancelled the warranty I had paid $900 into, and they refunded me less than $500. They prorate the mileage I drove while I had the car. I told them if they claim the warranty was void, they wrongfully took my money. They won't respond. Ford Corporate sent a letter only in my response to my Better Business Bureau complaint, and e-mails and voicemails to Budco Financial (the company I paid the monthly fee for the ESP to) go unanswered. I have Return Receipts as evidence that they are being read by VERY high level people.

I want the $420 they wrongfully took from me - if my warranty was void, why did they take it? The local ford dealership inspected my car prior to letting me purchase the ESP, they said nothing about the radios, but then when it came time to fix something, they refused to.

Anyone have any ideas? Any agency I can go to or even 'namedrop' to Budco? I'll be making a long list of calls Monday to Budco, and I'd like to have an agency I can reference that has some oversight over Budco to mention. Do you think the Attorney Generals office would have any interest? Would this be a Bureau of Automotive Repairs? And who do I go after? Budco Financial? Ford Corporate? I did sue Peninsula Ford (the ford dealership refusing to do the work) and they simply said "You're suing the wrong people. All your checks are made out to Budco", and the judge agreed.

I'm not a ARRL member, but if the ARRL would help out, I'd gladly join. This is $420 of MY MONEY I consider Ford and Budco have stolen. Needless to say, I will NEVER own another Ford in my lifetime.

Thanks.

Evan

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, W1CWU, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, W4OI, W4WX, N5FG, WX5L, K8DD, K8YSE, DL1EK & The DX News Letter, DL6UAA, F5CWU & La Gazette du DX, F5NQL & UFT, G3NKC, G4DYO, G0IAS, G0PSE, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, VA3RJ & ICPO, VA3YDX and YZ1SG for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th/October, through Sunday, 17th/October there were 219 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FK/C, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VP2M, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Mart, DL6UAA, expects to arrive here October 20th and will be active as 3B8MM. He plans to stay until November 16th (the day before his birtday - November 17th). However, he states that the day of his return back to DL-land is not confirmed right now (possibly 1 week later). Mart also states it seems that a 160m operation will not be possible because there is not enough space at the main-QTH and "/p"

activities are not allowed (at the moment).

5Z4, KENYA (IOTA Op). Miki, YT1CS, currently active as 5Z4YT1CS from Nairobi, has arranged a side trip to Lamu Island AF-040 (Coast Province North Group) from November 4-11th. He will be active on 80-10 meters SSB only, using 100W into an inverted "V" for 40/80 meters and verticals for the higher bands. The callsign to be used in this operation will be 5Z4YT1CS/M. Look for him on the usual IOTA frequencies. He will stay in Kenya until November 18th. QSL via YT1CS, by the bureau or direct.

7Q, MALAWI. Rumor has it that Les, 7Q7LA, will be back in Malawi, before the end of this month. More details are forthcoming.

9Y, TRINIDAD AND TOBAGO. Operators Stefan/DK1MM and Frank/DL2CC will be active as 9Y4ZC in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL via DK1MM. Outside of the contest, between October 27th and November 2nd, they will sign as 9Y4/DK1MM and 9Y4/DL2CC.

C6, BAHAMAS. Operators Mike/K1EU, Joe/K1JB, Steve/K1MV and Jesse/KB1GWT will be active as C6AVV during the CQ WW DX SSB Contest (October 30-31st) as Multi-Single entry. QSL via K1JB.

C6, BAHAMAS. Three members of SWODXA (Southwest Ohio DX Association) will be active as C6DX for the CQWW DX SSB Contest (October 30-31st). Members mentioned are Jim/K8FL, Wayne/K8LEE and Joe/W8GEX. They will be the Island of Eleuthera (NA-001) in the Bahamas. They are expected to be active there between October 26th and November 1st. The crew will be on all bands and modes PLUS 60 meters.

D4, CAPE VERDE. Alexander, 4L5A, will be active as D4B in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via K1BV. Visit the Web page: http://www.qsl.net/d44tt

FM, MARTINIQUE. Gil, FM5FJ, will be active in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (15m) entry. QSL via KU9C.

FR/G, GLORIOSO ISLAND. Another rare French DXpedition has been announced over the past week in the "La Gazette du DX" bulletin. The 2003 CDXC Europa DX team are planning a 15 day operation to Glorioso Island in May 2005. As with the Europa operation, the operators will be taken to the island by military personnel. The operators mentioned are: Didier/F5OGL, Dany/F5CW, Freddy/F5IRO, Pascal/F5PTM and possibly others. The team also plans to be an entry in the CQ WPX Contest while there. Now for the bad news. Due to international situations, this operation could be cancelled at any time. QSL via F5CQ.

GD4, ISLE OF MAN. Once again, the MD4K team plans another operation this year in the CQWW DX SSB Contest (October 30-31st). This year's operators include G1GEY, G3NKC, G0HSS, G4MJS, G4XUM, M0BEW, M0RHI and M5RIC. Their entry is still undecided; they may yet switch from Multi-2 to Multi-Multi this time. They welcome invites for QSYs in the contest. QSL via G3NKC, or requests through their Web page at: http://www.md4k.com

HK, COLOMBIA (Another Op Needed!). Tony, W4OI (ex-N7BG), reports that he has plans to do a Multi/2 operation this November from HK3CQ's Idyllic QTH in the mountains of Colombia, about an hour from Bogota. He is looking for another operator. They plan to only have 3 operators, Juan/HK3CQ, Tony/W4OI and one other which will allow for plenty of operating time. Anyone who is interested must be willing to bring a transceiver and/or amplifier and be willing to assist in putting up some wire antennas for 80/160m during the week before the contest. Tony states that they will commute to the station and stay in his apartment in Bogota, so living costs will be minimal. If interested, contact Tony via E-mail at: trogo@cfl.rr.com

IOTA NEWS.....
AS-076. Activity was expected this past weekend by JA5BEX/SO2005 to operate from the Megishima Island (Kagawa Pre). However, no QSNs were seen on the cluster newtworks. The special "SO2005" suffix is used to celebrate the 2005 World Special Olympics in the Nagano Winter Games. QSL via the bureau or direct to his home callsign.

EU-132. Operators Juergen/DL5CE and Dieter/DL7VAF will be active as SO1CE and SO1VAF, respectively, from Wolin Island, October 23-24th. Activity will be on 160-10 meters SSB, RTTY and PSK31. QSL via his home callsign, direct or by the bureau.

NA-091. Ken, G3OCA, expects to be active as VE7/G3OCA from Quadra Island (CISA BC-006) between October 20-25th. QSL via his home callsign, direct or by the bureau.

NA-142. Members of the OH KY in Amateur Radio Society will be active as K8SCH from Santa Rosa Island (USI FL-003S, Okaloosa County), Florida, from October 25-29th. Operators mentioned are John/ N8YC, Philip/KG8AP, Brian/K4BRI and possibly others. Look for activity on all bands. The dates are tentative, so if there are any changes, it will be plus or minus one or two weeks at the most. QSL via K8SCH (QRZ.com).

SA-NEW. Marco, CE6TBN, has plans to activate Rennell Island in the Ultima Esperanza Province South Group (dates are not set yet). He does have a yacht contacted to go to the island.

SA-031. Marco, CE6TBN, states that he has permission from the Chilean Navy to operate from Cape Horn (Wollanston Island) on any date during the year 2005.

J7, DOMINICA. Five members of the Florida DXPedition Group, Bill/W4WX (J75WX), Clarence/W9AAZ (J79AA), Larry/W1LR (J79LR), Cory/N1WON (J79CM) and Vance/N5VL (J79VL) will be here between October 26th and November 2nd. They will operate from the Picard Beach Resort Cottages. Look for them during the CQWW DX SSB Contest as J75J. They will be on all bands and modes prior to and after the contest. QSL J75J via their QSL Manager KR4DA and all others callsigns via the operators home callsign.

NEDXCC MEETING. Jim Tumelty, W1CWU, New England DX Century Club President, informs OPDX readers that if you are in the New England area (Beverly, Mass.) on October 25th, Eric Scace, K3NA, is scheduled to speak at their club's meeting. Eric, who recently participated in the 3B9C DXpedition in the spring, is scheduled to participate in the much anticipated 3Y0X - Peter One Island DXpedition in January. Everyone is invited to attend and bring along a friend. For further info, you can check the NEDXCC Web site at: http://www.nedxcc.org

QSL INFO AND NEWS.....
Tom, G0PSE, informs that the log for the GB0SM (IOTA EU-011) operation has been updated to include the recent October 2-8th activity and is available for viewing at: http://www.qsl.net/g0pse/dxpeds.htm
E-mail requests for a QSL via the Bureau can be sent to: thomas.taylor19@btinternet.com or g0pse@qsl.net

The log for the last IG9/IZ8CGS IOTA DXpedition to Lampedusa Island (AF-019) by Gianni, IZ8CGS, is online in the log section (name of the log IG9-IZ8CGS2004) at: http://www.mdxc.org/logsearch1.asp

IR1PL QSLS. Mauro, IW1RHG, (QSL Manager and IR1PL Team Member), reports that QSLs have been received from the printer (TopQSL), so during the next few days he will start to confirm all direct QSLs. The QSL is a double page QSL. The QSL can be viewed at: http://home.tele2.it/iw1rhg

The logs and a photo gallery of Christian's EC3ADC DXpeditions online are at: http://www.mdxc.org/ec3adc/
He was active as 3D2EA, 3D2EA/p, A35DX, T20DX and ZK3DX.

T2, TUVALU. Just a reminder that Ulli, DL2AH, will be active this week from Funafuti Island (OC-015) between October 20-24th. His T2 callsign has not been announced yet. This will be a holiday style operation, but Ulli will be active on 20-10 meters SSB, RTTY and PSK31 using his FT897 and a Delta-Loop antenna. QSL via DL2AH, direct or to the DL Bureau.

TO7, FRENCH GUYANA. Members of the F6KOP of Provins ARS will once again be going on a DXpedition. The team will be active as TO7C from Salut Islands (SA-020 and DIFO FY008) between March 10-17th. Activity will be on 160-6 meters including the WARC bands on modes CW/SSB/PSK. Operators mentioned are: Frank/F4AJQ (SSB), Bernd/F9IE (CW/SSB), Dany/F5CW (CW/SSB Low Bands), Serge/F6AML (CW/SSB Low Bands), Bruno/F5AGB (CW), John/F5VHQ/OE5TGL (SSB), Jean-Paul/F8BJI (Digimodes/SSB), Franck/F5TVG (CW/SSB/Digimodes) and Guenther/OE3GCU (Digimodes/SSB). QSL via F9IE. The TO7C Web page is avalible at: http:\\to7c.free.fr

TX9, CHESTERFIELD ISLANDS. The Germans became active early October 14th as TX9. Yes, TX9 is the complete callsign. Activity will be on 160-6 meters using CW/SSB/RTTY and last until October 22nd. Pilot station/TX9 Web Master Bernd, DF3CB, reports there will be NO online log search until after the operation. QSL all CW QSO via DL4XS. QSL all SSB and RTTY QSOs via DL5NAM. Addresses for both QSL Manager and updated news on the DXpedition can be found on the Web page at: http://www.df3cb.com/chesterfield

V4, ST. KITTS AND NEVIS. Andrei, EW1AR, will be active as V44/EW1AR and NC2N/V44 between October 25th and November 1st from the Island of Nevis (NA-104). Activity will be on all HF bands CW, SSB and especially RTTY. QSL via W3HNK. Also, look for him during the CQ WW SSB Contest. He will be using the callsign V49A (entry QRP(A) 160m). QSL via V44NK.

V4, ST. KITTS AND NEVIS. Boris, UU5SY, will be active as UU5SY/V44 between October 25th and November 1st. Activity will include the CQ WW SSB Contest as a Single-O/Single-Band (10m) entry. QSL via his home callsign KC2FVN.

V6, MICRONESIA. Look for Lanny, W5BOS, to be active as V6O from Pulap (Pollap) Island (IOTA OC-155), October 18-23rd. QSL via N6AWD.

VA4, CANADA. Rich, N0HJZ, will be operating as VA4MWA in the CQ WW DX Contest (October 30-31). Details of his entry in the contest were not provided. QSL via his home call.

VE3, CANADA (CISA Activity). Look for operators VA3YDX/p (Igor), VE3GKW (Boris) and VE3/ER1MF (Maxim) to activate several Canadian Islands for the CISA Trophy from October 22-25th. Here are the following Canadian Islands to be on the air:
1. Manitoulin Island CISA: ON001
2. Barrie Island CISA: ON015
3. Great Clotche Island CISA: ON016
4. Little Clotche Island CISA: new activation
5. Birch Island CISA: ON017
6. Parry Island CISA: ON029
7. Goat Island CISA: ON072

Their suggested (main) frequencies are: 3815, 7260, 14260 and 21260 kHz. Operations will be on the SSB, CW, RTTY and PSK modes. The team will also try to reach other islands for new activations if conditions permit. QSL via their home callsigns:
*VA3YDX : 105 La Rose Avenue, Apt.#803, Etobicoke, Ontario M9P 1A9
VE3GKW : 90 Cordova Avenue, Apt.#1009, Etobicoke, Ontario M9A 2H8
VE3/ER1MF: 45 Oakmount Rd., Apt.#1010, Toronto, Ontario M6P 2M4
* New address!

VK2, AUSTRALIA. Travis, W5GED, will head here on December 1st and expects to be active as VK2GED for 3 weeks and will operate from VK2UW's QTH. Look for him to show up on a Pacific Island net on 14315 kHz at 0900z.

VK9L, LORD HOWE ISLAND. The following was received from Bren, G4DYO, who was asked to forward the below message from Laurie Margolis, G3UML/VK9LA, to all bulletins, on Lord Howe Island: "We have noticed adverse comments on the cluster about some of our lowband operations, especially in the evenings EU time. We have sometimes joined nets like the I2ZGC or UR4DX operations around 7O45. The simple reason is that we are having huge problems being heard in the EU evening, and I would prefer to work 60 or 70 people on a net rather than shouting at the QRM for two hours each morning to no purpose. Sorry, but that's the way it is. We are hammering all the greyline times. 40 CW has been quite good. SSB much more difficult. Offensive Cluster comments are pointless. We have spent huge time, money

and effort getting out here, and want to maximise the QSO rate. I will try to spend more time working 80 metre EU long path in the EU morning, but the contact rate is very slow, and other bands are busy then. I can hear many G's perfectly around 3799 at 0700 GMT, but they can't hear me despite power and good long path antenna. Unfortunately high band condx -- 17-12-15-1O -- are truly dreadful, at the half way point of our operation. Still trying!" 73 LAURIE, G3UML
REMEMBER the VK9LA activity will end on October 23rd. QSL via Oceania Amateur Radio DX Group, Inc., P.O. Box 513, Nambour 4560, Australia.

VO2, CANADA (ZONE 2). Operators Stanely/AC8W/VA3ACW, Hank/K8DD/VE3RDD and Ian/K8MM will be active as VO2AAA from Labrador City, Labrador, during the CQ WW DX CW Contest (November 27-28th) as a Multi-Single, possibly a Multi-2 if they get another operator or two. QSLs for the contest callsign go to K8DD/VE3RDD.

VU4, ANDAMAN ISLANDS (Follow-Up/Update). Over the past week, it was learned that the two operators who requested everyone to write to the Indian Telecommunication Ministry to authorize an operation to Andaman Islands, are two separate efforts and that there is no competition between the two. However, there has been some letters written to Miku, VU2WAP, supporting Mrs. Bharathi, VU2RBI. These letters should be kept separate so as not to confuse the application with the minister of communications. Both are receiving plenty of support. For more details, please refer to last week's OPDX.680.

Talk about wasted bandwidth....you quoted and reposted the whole thing!
This bulletin is a useful tool. If you don't like it, don't read it.
I use it quite often, but when I don't need it I just don't bother to
open it and read it. It's just that simple. No complicated filters or
anything. Much simpler than bitching about it and further "wasting
bandwidth".

Nothing that would silence K1MAN the king of qrm'ers, would make me
angry. Just the opposite, I would be deliriously happy.

And who are you, the self-appointed Cry Baby for the DX Freaks?
Useful to who? Maybe the SPAM readers. OH and you are
right, you can bet I don't read it. I never read SPAM. See if
you can understand this simple thing, Shove your DX up your
ass sideways fruit! FUCK YOU!

K1MAN EDITORIALS -- WD4AWO (Dumbo Bobbie) KB1EVE aka WA1BHV (Summers Eve) When will the 500 lb Michael Moore look alike ND8V (November Dumbass 8 Vomit) chime in???

EDITORIALS

It is evident that Glenn is a maniac and needs to be studied while he is safely housed in a rubber room. However, he is one of very few individuals who have the necessary steel balls to stand up to Riley. Unfortunately for Glenn's response that his station is in compliance is totally ridiculous. On Monday, October 11, 2004 Steve - W7CI and I made repeated requests on 14.275 for the control operator to confirm that the K1MAN station was indeed in compliance with the following FCC Part 97 Rules:
97.105 (a) - Control operator duties
97.109 - Station control
As expected we received no reply from a control operator for the K1MAN transmissions. Therefore, since the K1MAN station is NOT in compliance any and all legal transmissions by amateur radio stations should not be harrassed by K1MAN or his entourage with threats of legal action, specifically the filing of Felony Affidavit Complaints.

73,
Bob WD4AWO

MHR Comment: Keep in mind, WD4AWO can't even address an envelope. Don't believe me, here's his QRZ BIO.

VIA U.S. ADDRESS ONLY
I DO NOT RESPOND TO ANY BUREAUS/QSL SERVICES
U.S. STATIONS INCLUDE SASE
OTHERS - SAE & IRC OR SAE/80 CENTS US POSTAGE
SAE IS IMPORTANT TO AVOID ADDRESS ERRORS
IT IS SAFER FOR YOU TO ADDRESS THE ENVELOPE
DO NOT INCLUDE ANY CALLSIGNS ON ENVELOPE
73,
BOB
Bio last modified: 2004-08-12

Believe it or nuts: I agree with my good friend WD4AWO. but I would say they are brass balls, not steel. Glenn is totally nuts!! I tried calling the 800 number and it took me 4 times to just leave a message. Forget when he broadcasts on 75, he just ain't there, Also, Rich has a point: But the

ARRL has been along since ham radio's inception via W1AW. Glenn has the money and the balls to say "why not me" K1MAN's broadcasts are very technical and promote ham radio and make an (other) attempt to intice young people to get bit by the Radio Bug. K1MAN makes an attempt to promote ham radio. That's a good response by a lawyer in front of an ALJ. Isn't that Riley's prime objective? To improve ham radio, and get rid of the international embarrassment due to 14313? It was complaints about '313 that pulled the heat on us.
Peace
WA1BHV
me in 07
and Hillery in 08.

MHR Comment: Getting rid of Summers Eve from 20M was a major improvement.

K1MAN RESPONSE:

Bulletin stations do not have to respond to callers on the frequency while the bulletins are being transmitted. Try calling W1AW! This IS NOT rocket science.

AARA and IARN do not have to answer the phone. We will call you back is we want to. The control operator of K1MAN can be anywhere in the world at a given
moment. This is a little closer to rocket science.
Hellllllllloooooooooooo!

73 and GL

Amateur Radio Newsline™ Report 1418 October 15, 2004

Amateur Radio Newsline report number 1418 with a release date of
Friday, October 15, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The FCC acts on B-P-L amd the IEEE readies a standard for Broadband
Over Powerline hardware. Find out the impact on ham radio on on
Amateur Radio Newsline report number 1418 coming your way right now.

(Billboard Cart Here)

**

THE BPL FIGHT: THE FCC RELEASES ITS BPL REPORT AND ORDER

The FCC has acted to make Broadband Over Powerline a part of the
telecommunications landscape. Amateur Radio Newsline's Paul
Courson, WA3VJB, in Washington and Mark Abramovich, NT3V, in Philadelphia take
an in depth look at the FCC decision and its impact on Amateur
Radio:

-

FCC Michael Powell: "Would all members in favor of the item
signify
by saying aye? All those opposed? The item is adopted, thank you
very much (sound of gavel banging down)"

--

(WA3VJB report) Although several took note of interference concerns,
none of the Commissioners voted against the proposal, and only one
Commissioner voted any dissent at all. His issue was thet utility
companies might improperly try to raise your light bill to help pay
for BPL. The measure passed, and BPL can now be built and marketed to
real customers nationwide.

The system thet's been in the prototype stage for a while now uses
the power lines as a way to transmit and receive telemetry with
computers such as those used in the home. In sending that data over
the wiring in a house or on the poles outside, small amounts of
signal radiate and can cause interference to users of the same
frequencies BPL uses on the power grid.

The ham radio community, led by the research of ARRL laboratory
manager Ed Hare W1RFI, documented the potential for electrical noise

during this prototype and testing phase. The League submitted what many consider alarming findings to the FCC as a protest and challenge to the BPL proposal on ham radio's behalf.

FCC Commissioner Michael Copp addressed that point before he voted to approve:

--

FCC Commissioner Michael Copp: "I remain concerned with the question of interference to amateur radio users. I take the concerns of this community very seriously, and I believe the FCC has an obligation to work hard to monitor, investigate and take quick action to resolve harmful interference. "

--

When Copp voted approval, his dissent focused only on whether there were safeguards to keep utilities from using electricity revenue to help pay for BPL.

The proposal from FCC technical staff calls for interference mitigation procedures, including an online public database to help identify by zip code where BPL might be a source of interference, The database also will name a contact person at the company running the system in that zip code, to negotiate and resolve complaints.

Commissioner Copp said he hopes the processs will be quick:

--

FCC Commissioner Michael Copp: "If an amateur radio user makes a complaint, and an agreement between the BPL provider and the amateur radio user cannot be reached, the FCC should step in and resolve the matter. These cases must not take years to resolve. I hope we'll have some really effective rapid-turnaround procedures here in place..."

--

FCC Chairman Michael Powell has been an early flag-waver for BPL, and spent time leading up to the vote praising its potential as a competitive force against existing high-speed data distribution systems. The noise made by those concerned about BPL noise must have reached the top desk, because Powell took time to acknowledge BPL's potential negative impact, although he never said the word interference in his remarks:

--

FCC Chairman Michael Powell: There are users of spectrum that are affected by this. We've taken that seriously from the very beginning. I want to particularly say to all those wonderful amateur radio operators out there. They're still an important resource to the

American communications landscape. They're ones that we continue to care about, continue to want to foster and prosper. And we have taken great care to ensure that the protections in this item are necessary to allow that service to continue. We will continue to be vigilant about it, and put the tools in place for that.

--

But then Powell returned to his celebration that BPL would soon provide another way to bring high-speed data to the masses, citing advantages for homeland security, the reliability of the nation's power grid, and the U.S place in the world.

--

FCC Chairman Michael Powell: "Let me underscore that the potential
for America, and the American economy is too great too enormous, too potentially groundbreaking to sit idly by and allow any claim, or any possible speculative fear keep us from continuing to drive this technology drive America into the broadband future."

--

For reaction to the FCC's approval of Broadband over Power Lines, we turn to Mark Abramowicz, NT3V:

--

(NT3V report) For the American Radio Relay League, the FCC's decision in the BPL proceeding wasn't a surprise.

The ARRL's leader says now, more than ever, amateur radio operators will have to be vigilant about any BPL interference that appears and be prepared to act with a complaint that could go all the way to the FCC.

ARRL president Jim Haynie W5JBP says there were some encouraging comments from commission members about the value of the Amateur Radio service. And, for the first time, an admission from the panel that BPL technology is far from perfect.

--

Jim Haynie, W5JBP: "You go back a year, a year and a half ago, there was all this talk about: What interference? There is no interference," Haynie recalled. "And fully half of the meeting was how to deal with the interference issue.

"So the commission now has finally realized that what we've been saying all along does exist and I'm sure the N-T-I-A had a lot to do with that, too."

--

Haynie says among the restrictions the FCC placed on the BPL providers is establishing a database of utility and system operators who will be accountable for neighborhood interference complaints.

He says it appears that provision may have come out of the ARRL's direct lobbying of commissioners.

--

Jim Haynie, W5JBP: "We've actually had personal meetings with a number of the commissioners," Haynie says. "And Commissioner (Michael) Copps is one of them. Kevin Martin was another. Ms. (Kathleen) Adelstein was another one.

"And these were all held in the past couple of months so it's fresh on their mind. They know where we're coming from. That's what the league has been doing on a direct basis rather than just file a written petition or comments, which we did."

--

Haynie also credited the direct lobbying efforts aimed at members of Congress - many of whom look favorably on the Amateur Radio service.

--

Jim Haynie, W2JBP: "They've made their feelings known to the commission and while they support inexpensive broadband for America, you know, on the other hand they understand the infrastructure that's involved with Amateur Radio and public safety," Haynie says.

--

Finally, while Haynie says he'll reserve additional comment until reading the full FCC document, he feels some sense of relief at what finally emerged.

--

Jim Haynie, W5JBP: "I know there's some detractors out there that for whatever reason think the league probably lost and sold them down the river. And that's not the case at all," Haynie says. "When we look at what happened at the commission meeting and actually read the details of the report and order, I think what the league has been doing for the last couple of three years will be quite evident.

"So I think we did a good job. Did we get what we want, no - not entirely. But we also knew going in that you can't just say: 'I don't want BPL at all.' It's going to be done in some form or fashion, now the only question is how much?"

--

Over at CQ Magazine, Editor Rich Moseson, W2VU, is feverishly studying what the FCC has done and what impact it will have on Amateur Radio.

He tells me the FCC's press release on the subject seems to contradict the commissioners' assurances that interference mitigation should be done in a timely fashion.

Moseson notes that in the same sentence such resolution of interference problems would be done without disruptions of service to BPL subscribers.

--

Rich Moseson, W2VU: "So, in other words, the users of this non-licensed service have priority over licensed users," Moseson says. "This is what we were afraid of to begin with."

--

Moseson says he's also concerned about the closing comments of FCC Chairman Michael Powell that were not included in the public statement released on the commission's website.

--

Rich Moseson, W2VU: "He starts out practically pandering to hams and then turns around and tells us not to stand in the way of progress," Moseson says.

--

While sounding pessimistic, Moseson says we'll have to wait and see what's in the actual FCC report and order.

With my colleague, Paul Courson in Washington, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

By the way, you'll find the audio comments made by some of the commissioners as a Web Extra feature. You can find them by pointing the browser on your computer to our website, www-dot-arnewsline-dot org. (ARNewsline (tm))

BREAK 1

From the United States of America, we are the Amateur Radio Newsline heard on bulletin stations around the world, including the W3BN repeater serving Reading, Pennsylvania.

(5 sec pause)

**

THE BPL FIGHT: IEEE READIES BPL STANDARD

The Institute of Electrical and Electronics and Engineers -- thats the IEEE -- it has begun to develop standard 1675 for Broadband Over

Powerline hardware.

According to immformation at the organizations website, the scope of this standard will be to provide Utilities and Manufacturers standards for the commonly used hardware for BPL installations. Also to provide standard installation, maintenance and operation methods to ensure the safety of both Utility and Non-utility personnel working on BPL equipment.

This project will not cover data transmission, protocols, or other aspects of BPL related to the internal workings of this technology. More information is on-line at http://grouper.ieee.org/groups/bop/ (IEEE)

**

THE BPL FIGHT: HAMS AND CB'ERS UNITE - DOWN UNDER

Still with Broadband Over Powerline issues, word that ACREM, the Australian Citizens Radio Emergency Monitors, have joined the fight against B-P-L. WIA Newsman Martin Howells, VK2UMJ, reports:

--

Following reports that the ACA may be considering the removal of interference protection for some HF radio users, ACREM New South Wales forwarded an official written protest to the ACA, the Minister for Communications, the Shadow Minister for Communications, and the leaders of both major political parties.

This was followed up with a further submission lodged by e-mail outlining the Japanese report that showed interference from BPL as high as 300 MHz. Although ACREM is primarily a CB emergency monitoring group, the interests of all radiocommunications users, including amateur operators, is also a concern especially given the potential safety-of-life issues of widespread interference to HF and VHF frequencies. ACREM New South Wales will continue to play an active role in the BPL fight, alongside the WIA and other groups.

This has been Martin Howells, VK2UMJ, for WIA National News.

--

Asn B-P-L looms in more and more places, users of many radio services are banding together to fight it. The joint efforts of hams and CB'ers in Australia is just one example of what's happening, worldwide. (WIA News)

**

ENFORCEMENT: $10,000 FINE AGAINST JACK GERRITSEN, Ex-KG6IRO, AFFIRMED

The FCC has affirmed its earlier tentative fine of $10,000 against unlicensed Los Angeles area radio operator Jack Gerritsen, the former KG6IRO. This for operating radio transmitting gear after the agency

set aside his license.

As previously reported, on June 15th of this year the Commission's Los Angeles Field Office issued a Notice of Apparent Liability for Forfeiture to Gerritsen in the amount of ten thousand dollars. This, for Gerritsen's apparent, willfull and repeated violating of Section
301 of the Communications Act by operating a radio station in the Amateur Radio Service without authorization from the Commission to do so.

Gerritsen sent in a response to the notice on July 13th. In his filing Gerritsen claimed that he has a valid amateur license that permits him to operate on all of the radio frequencies detailed in the Notice of Apparent Liability and that that the FCC's earlier action to set aside of his amateur license and KG6IRO call sign was unfounded. He also claimed the set aside did not prohibit him from transmitting on the amateur radio bands given his claim that his amateur license was valid. Also, that any possible suspension of his license is also pending a hearing before an Administrative Law Judge and that it makes the Notice of Apparent Liability moot until any suspension occurs.

Well that might be Gerritsens interpertation of the FCC's decision
but its not shared by the agency. In affirming its decision to require him to pay the ten thousand dollar fine the FCC says that Gerritsen has no license. Just a pending application. Therefore there is no license for the Commission to suspend that the correspondence sent to Gerritsen from the FCC informed him that his amateur license had been set aside. As such the FCC did not grant him an Amateur license nor any authorization to use the amateur frequencies.

In closing, it found that Gerritsen is fully liable for a monetary forfeiture of in the amount of ten thousand dollars. It gave him 30 days fropm the October 5th release of its decision to pay. If he fails to do this in thr alloted or the FCC says it may be referred to the Department of Justice for collection. The full story is on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-3183A1.doc (FCC)

**

ENFORCEMENT: TO MANY CALL SIGN CHANGES

The FCC wants to know why a California couple has been requesting and then cancelling call signs. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "NN6AA, Edward Beluso, of Redding, California, has
been
asked to provide information on about a dozen licenses that have been
granted and canceled since June of 1999. These filings raise
questions as to whether these are being filed in order to block
future assignments of the call signs and the legitimacy of those that
were issued for clubs.
At the same address, WA6JAN, Janet Beluso, has also been asked to
supply information regarding five call signs."
This is Daryl Duckworth, NN0W, reporting."

--

The FCC gave the Beluso's the usual amount of time to respond.
(FCC,
RAIN)

RESCUE RADIO: KKOB TOWER HIT BY HOT AOR BALLOON

KKOB-AM radio in Albuquerque, New Mexico, had to shut down its 50,000-
watt transmitter for several hours on Sunday, October 10th. This,
after a hot air balloon got tangeled at the top of the stations 700
foot high broadcast tower. Amateur Radio Newsline's Norm Seeley,
KI7UP, has more:

--

According to news reports, Bill Chapel was flying the hot-air balloon
when it blew into the tower near a park where the Albuquerque
International Balloon Fiesta was being held. The lines supporting
the airships canopy got wrapped around the triangular shaped tower.
This left the gondola resting up against the antenna structure with
the straps securing it to the balloon tangled in the antenna
structure.

Chapel, and passengers Aaron Whitacre, 10, and Troy Wells, 14,
successfully got out of the gondola and onto the tower. They then
began the long climb down the antenna structures ladder.

At the 100 foot level they were met by a group of trained rescue
worker. The rescue team secured the trip with safety gear, and
helped them into a utility truck bucket for the last of the trip back

to mother Earth. Tower maintenance crews then got to work removing the remainder of the balloon from the antenna structure.

Nobody was hurt in the incident and the station resumed normal operation once the remnants of the balloon were removed.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The Federal Aviation Administration and National Transportation Safety Board are reportedly investigating the incident. The Albuquerque International Balloon Fiesta has been flying since 1972. (Published news reports)

**

RESCUE RADIO: WAYS TO WARN

Scott Marks, KI4GGU, says via the WIA News that Israel has developed an emergency public notification system called Silent Radio. This is a regular FM station that remains silent until some kind of emergency situation takes place. Once it receives an alert, it takes to the air to issue any required information to the Israeli public which already knows where to tune in. Kind of the the old Emergency Broadcast System we had here in the U-S-A before the 1990's upgrade
to E-A-S that is supposed to warn a lot more people but is also requires special decoding equipment and is very complex. (WIA News)

**

RESCUE RADIO: WAY NOT TO WARN

Meantime, over in the U-K, Bob Sayers, G8IYK says the Emergency Planning community in the that nation has tried to have something like the Israeli alert system established for many years. Unfortunately, they always get the same response from government officials ewho say that it would be prohibitively expensive.

In fact not so long ago the nation-wide warning siren network, set up in World War 2 but retained and improved upon throughout the Cold War period, was scrapped. The reason was the same. No money to maintain it. (WIA News)

**

ON THE WEB: NO MORE FREE E-MAIL OFF-LINE CLIENT RIDE

If you are a user of Juno's no-charge e-mail service, part of your
free ride is coming to an end. This as the Internet service provider announces that as of December 1st free members will be required to use webmail to get and send e-mail. In other words you will need a

web accoumt someplace else to use Juno e-mail.

This change only affects Juno Free members who currently download e-mail to their computer using Juno software, Outlook Express or other "offline" e-mail clients. These changes to Juno e-mail will
not affect Juno SpeedBand, Platinum, or MegaMail members or Juno Free members who already read and write Juno e-mail exclusively on the Web.

According to a release from the company, to continue being able to use an off-line client with Juno e-mail current free members will need to upgrade to one of Juno's premium services. More information
is on line at www.juno.com/emaildiscount. E mail discount is spelled as one word. (Juno press release)

**

THE SOCIAL SCENE: PACIFICON IN OCTOBER

Turning to the ham radio social calander, Pacificon, the 13th annual ARRL Pacific Division Convention is happening as this newscast goes to air. The venue is The Mariott Hotel in San Ramon California. Those attending will probably get a first hand report on the FCC decision on B-P-L that took place on Thursday the 14th. (Worldradio)

**

THE SOCIAL SCENE: MICHIGAN IN NOVEMBER

And Michigan's Holland Area Amateur Radio Club is hosting the State
ARRL Convention again this year. The date is Saturday November 6th. Talk in will be on the K8DAA 147.060 Mhz repeater that requires CTCSS access tone of 94.8 Hz (E-mail)

RADIO HEALTH REDUX: IS THERE A CANCER CONNECTION TO HIGH POWER RADIO TRANSMISSIONS

A follow up to last weeks story on the risks associated to R-F exposure from living near a high power broadcast station. Bob Gonsett, W6VR, points a report in his C-G-C Communicator that discused the same subject. Amateur Radio Newslie's Bruce Tennant,
K6PZW, reports:

--

Two years ago an Italian study found death rates from leukemia increased dramatically for residents living within two miles of Vatican Radio's powerful array of transmitters in Rome. Now, as reported last week, Wired Magazine says that Korean researchers have looked at the death rates in 10 regions with AM radio transmitting towers broadcasting at more than 100 kilowatts. They compared them with control areas without transmitters, and claim to have found substantially higher cancer mortality rates among those who lived within two kilometers of the high power transmitters.

But says the CGC Communicator, the problem with the Vatican study is that it was relatively small in the size and lacked exposure data. Also, the new Korean study has not even been published. As a result, this is all speculative and based on some rather sketchy pre release information.

Clouding the picture is the statement of Epidemiologist Mary McBride of the British Columbia Cancer Agency also reported in Wired magazine. It quotes Mc Bride as saying that there have been many studies like these, and they just are not very convincing.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The bottom line to all this. Its going to take more than just scientific speculation to know foe certain if there is any affect at all from living close a a high power broadcast transmitter. (CGC)

**

RADIO ON THE NET: NEW 2 METER SIMPLEX REMAILER

Interested in 2 meter simplex operation? Well you might want to join a new remailer and discussion group in cyberspace. Located on the popular Yahoogroups hosting service the sponsores describe the new remailer as one for everyone who is a ham and who has a two meter rig of some sort laying around and a lot of time not being used much of the time.

Through the group you should be able to set up contact attempt schedules with other members. If your looking for a way to put that 2 meter fm rig of yours to good use go to http://groups.yahoo.com/group/2fmsimplex and sign up. (Repeater Reflector)

**

NAMES IN THE NEWS: AMSAT ELECTIONS RESULTS ANNOUNCED

Some new names and some old will be running AMSAT North America the next year. This, with word that Rick Hambly, W2GPS, has been elected President of the Amateur Radio space authority at the organizations October 7th Board of Directors meeting.

Hambly replaces Robin Haighton, VE3FRH, who has headed up AMSAT North Ameriuca the last seveal years. Also elected or re-elected are are Lee McLamb, KU4OS as Executive Vice President, Mike Kingery, KE4AZN as Vice President Operations, Stan Wood, WA4FNY taking the task of Vice President of Engineering, Barry Baines, WD4ASW as Vice President Marketing and User Services, and Frank Bauer, KA3HDO as Vice President Human Sapceflight. Gunther Meise, W8GSM, will be taking the Treasurers spot for the coming year as well.

Also at the meeting status reviews were presented of several undertakings. These including ongoing projects such as the Echo satellite and the launch of future hamsats including Eagle. The Board also had continuing discussions on regulatory matters, most importantly the impact of FCC Report and Order 04-130 which deals with the subject of Orbital Debris. (ANS)

**

RADIO IN SPACE: MESABA THE IRANIAN SATELLITE

SpaceDaily reports that Iran intends to launch its first satellite in April 2005. The bird named Mesbah is said to be a tewenty in square cube weighing in at 132 pounds.

Plans are to put it int a Low Earth Orbit at about about 560 miles. The satellite will be used to identify natural resources, control the nations electrical and energy network and can also be used by communications and crisis management teams the press reports said. (ANS)

**

WORLDBEAT: SA HAMS DID NOT LOOSE 2.4 OR 5.6 GHZ

South African Amateurs have not lost access to either the 2.4 and 5.6 GHz band. Its just a government typo. At least thats what South Africa Radio League president, Graham Hartlett, ZS6GJH, is saying ane he should know. Thats because he set out to investigate why both pieces of spectrum were not listed to that nations ham radio community.

Now Harlett says that he has in hand a communication from the nations radio regulatory body. It tells him that the 3.4 and 5.6 GHz allocations for amateurs had been accidentally omitted from the last publication of the band plan in the Government Gazette. Harlett was assured that this will be rectified in the next band plan

publication. (WIA News)

**

SPECIAL EVENTS: KØAIR/KØGRL TO CELEBRATE VETERANS DAY

To recognize Veterans Day and the birthday of the legandary General Curtis E. LeMay, the Strategic Air Command Memorial Amateur Radio Club will be operating K0AIR and K0GRL on Thursday, November 11th. The stations will be on the ait 1200 to 2400 hours UTC in the general phone bands on or near to the following frequencies ending in 47. Thhis 3.947, 7.247, 14.247, 21.347, and 28.347 Mhz depending on propagation and time of day. Six and two meters will also be activated 51.47 and 146.46 Mhz. For QSL information please visit www.sacmarc.org on the World-Wide-Web.

**

DX

In D-X, word that a group of seven German operators is active from the Chesterfield Islands for eight days beginning about the 16th of October depending on weather conditions in the area. The Chesterfield Islands are located between Australia and New Caledonia. Once on the air, activity will be on 160 to 6 metres using CW, SSB and RTTY. The callsign will not be announced before operations start. QSL as directed on the air. (OPDX)

And YT1CS is active portable 5Z4 from Kenya until 18th of November. He orks only SSB on 20 and 15 metres. Previously he was signing the rather convoluted call of 5Z4YT1CS until the Kenyan licensing authority re-inserted the 'stroke' mark in the callsign. (RSGB)

Lastly, seven operators from Germany and Poland are active as TJ3SP and TJ3FR through October 20th. They have four stations on all bands and modes, except 160 and 6 meters. These two bands are not licensed for use in Cameroon. (OPDX)

**

THAT FINAL ITEM: THE HISTORY OF JOTA

And finally this week, its the time of year for Jota -- the scouts annual ham radio Jamboree on the Air. Last week we told you about the event as it is today. Now we take a look back in time to the beginning of the Jamboree with John Williams, VK2BUI.

--

Jamboree On The Air is the largest annual international event in the Guides and Scouts event calendar, when thousands of Girl Guides and Scouts from all over the world gather for a weekend to contact each other by radio, share ideas, participate in many activities, make friends and learn new skills.

Like a lot of successful ventures, JOTA had a small beginning, and whilst Scouting utilised radio in its program in some areas for a number of years, it was not accepted as an official part of the Scout program until the 1957 Jubilee Jamboree at Sutton Park Coldfield, near Birmingham in the United Kingdom.

It was here that a very successful amateur radio station was set up, but amongst the sixty plus operators present, only two were in uniform, one of whom Mr Les Mitchell G3BHK.

As this was the only activity at the Jamboree not conducted with a full Scouting Staff he was rather disappointed, feeling that in the true spirit of such a wonderful international Scout activity all Scouters should have been involved in the manning and operation of this station.

His concern led him to call a meeting of overseas Scout radio Amateurs present at the Jamboree and during one of their meetings they decided to keep in touch with each other on air and ensure their availability, if possible, as station operators at future World Jamborees.

Initially one day a year was proposed, but thinking this over later Their nominated Organiser Les Mitchell suggested they consider inviting amateur radio operators throughout the world to join them instead in a special weekend each year for a Jamboree on the Air at which, hopefully, Scouts and leaders would be able to talk to each other throughout the world

How much do you guys want to bet that
someplace on the Toshiba TV are those
inevitable words of warning: --> "MADE IN CHINA".

(no doubt having a UL and a CSA and an
FCC Part 15 Certification also..??)

Want to have some real fun? Try this!! (below)

If you own a "whitebox" computer [..meaning one
of those cheap cobbled-together Chinese Component
computers you get at the monthly PC show from
Hoo-Fong Voo who just got off da boat from
Chunking or Saigon], set up a Spectrum Analyzer
about 10 feet away with a rubber duck antenna
on it in capture mode. Pull off the cover of the PC
and fire the sucker up and have a look at the S.A.

It will throw off more stray RF crap than a
GE Microwave Oven or Brother RG Stair on a
rainy day on the short-wave... How the heck do these
things make it into the USA consumer market and get
sold? (most of em have counterfeit FCC and UL
symbols silkscreened on the motherboards, ever
notice that? The switching power supplies in these
things are nothing short of a firetrap also)

K1MAN EDITORIALS -- WD4AWO (Dumbo Bobbie) KB1EVE aka WA1BHV (Summers Eve)
When will the 500 lb Michael Moore look alike ND8V (November Dumbass 8
Vomit) chime in???

It is evident that Glenn is a maniac and needs to be studied while he is
safely housed in a rubber room. However, he is one of very few individuals
who have the necessary steel balls to stand up to Riley. Unfortunately for
Glenn's response that his station is in compliance is totally ridiculous. On
Monday, October 11, 2004 Steve - W7CI and I made repeated requests on 14.275
for the control operator to confirm that the K1MAN station was indeed in
compliance with the following FCC Part 97 Rules:
97.105 (a) - Control operator duties
97.109 - Station control
As expected we received no reply from a control operator for the K1MAN
transmissions. Therefore, since the K1MAN station is NOT in compliance any
and all legal transmissions by amateur radio stations should not be
harrassed by K1MAN or his entourage with threats of legal action,
specifically the filing of Felony Affidavit Complaints.

73,
Bob WD4AWO

MHR Comment: Keep in mind, WD4AWO can't even address an envelope. Don't
believe me, here's his QRZ BIO.

VIA U.S. ADDRESS ONLY
I DO NOT RESPOND TO ANY BUREAUS/QSL SERVICES
U.S. STATIONS INCLUDE SASE
OTHERS - SAE & IRC OR SAE/80 CENTS US POSTAGE
SAE IS IMPORTANT TO AVOID ADDRESS ERRORS
IT IS SAFER FOR YOU TO ADDRESS THE ENVELOPE
DO NOT INCLUDE ANY CALLSIGNS ON ENVELOPE
73,
BOB
Bio last modified: 2004-08-12

Believe it or nuts: I agree with my good friend WD4AWO. but I would say they
are brass balls, not steel. Glenn is totally nuts!! I tried calling the 800
number and it took me 4 times to just leave a message. Forget when he
broadcasts on 75, he just ain't there, Also, Rich has a point: But the
ARRL has been along since ham radio's inception via W1AW. Glenn has the
money and the balls to say "why not me" K1MAN's broadcasts are very
technical and promote ham radio and make an (other) attempt to intice young
people to get bit by the Radio Bug. K1MAN makes an attempt to promote ham
radio. That's a good response by a lawyer in front of an ALJ. Isn't that

Riley's prime objective? To improve ham radio, and get rid of the international embarrassment due to 14313? It was complaints about '313 that pulled the heat on us.
Peace
WA1BHV
me in 07
and Hillery in 08.

MHR Comment: Getting rid of Summers Eve from 20M was a major improvement.

K1MAN RESPONSE:

Bulletin stations do not have to respond to callers on the frequency while the bulletins are being transmitted. Try calling W1AW! This IS NOT rocket science.

AARA and IARN do not have to answer the phone. We will call you back is we want to. The control operator of K1MAN can be anywhere in the world at a given
moment. This is a little closer to rocket science.
Hellllllllloooooooooooo!

1640. Kalamazoo Cuckoo' ND8V

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-19 02:15:17 UTC

THE LIFE OF RILEY

Or why Mikee 'Kalamazoo Cuckoo' ND8V was "in like Flynn" and continues to lead a charmed existence with Riley 'Rot' Hollingsworth K4ZDH

Once upon a time in America there came to be a giant of an organization called the American Radio Relay League (ARRL).

Much later, there appeared a shy and lonely radio amateur with the 'self-effacing' call sign K1MAN [HI, HI].

Sometime, somewhere, somehow yet later K1MAN came to the rather obvious conclusion that large organizations/associations, such as the ARRL or the Federal Communications Commission (FCC), in time lose touch with the constituents they are supposed to serve. This was not news, in that it has always been so.

Unlike others, who only 'bitched' about it, however, K1MAN decided to start a Bulletin service on 14.275 MHz a la the ARRL's W1AW in part to poke sticks into the respective eyes of both one-eyed Cyclops.

Surprise, surprise, the ARRL/FCC did not put K1MAN on their respective Christmas card lists.... Rather, they attempted to shut K1MAN down. Years and much effort later, they appear to have failed, at least to the extent that K1MAN remains on the air.

Concurrently and arguably partly as a result of K1MAN's so-called "bad example", a group of rogue Citizens Band (CB) operators with an amateur licence [and others without], decided to congregate on 14.313 MHz which frequency in time became a veritable 'zoo'. This was during the time when the amateur spectrum was supposedly 'self-governing/policing'....

Then, some four years ago the ARRL reportedly proposed and the FCC agreed to hire one Riley Hollingsworth K4ZDH as a 'radio cop', to clean up the 'amateur beat' generally. In reality, there were arguably only two items on Riley's immediate agenda: K1MAN on 14.275 MHz and the mess on 14.313 MHz but for the obvious and not so obvious reasons, very much in that order.

Unfortunately K1MAN had in the meantime contracted to teach full-time and as a consequence had to take a sabbatical from producing the time-consuming Bulletins. Then, at a series of 'hamventions', Riley the radio cop apparently loudly took credit for driving K1MAN off the air.... This played well at the FCC and among the 'great unwashed' and uninformed in the amateur community and earned Riley the moniker 'The Rotweiler'. Predictably, this had the same effect on K1MAN as a scarlet handkerchief has on a bull. K1MAN consequently let it widely be known that he would be back with a vengeance and as they say in show business, the stage was set....

In the meantime, Riley continued to ineffectively try to come to grips with the zoo on 14.313 MHz. ND8V a.k.a. 'Kalamazoo Cuckoo' to friends and detractors alike, was one of the chief rabble-rousers there. He had attacked Hispanic-speaking stations "for years" calling them cockroaches, interfered

with a maritime mobile net and threatened--on and off the air--any number of amateurs who stood up to his bullying. Throughout this, Riley did virtually nothing. Then, when even the US military reportedly had enough of ND8V's behaviour and caused a search to be made of his station, Riley 'The Rotweiler' was finally forced to act. He severely beat ND8V up--with a 'wet noodle'--by supposedly suspending his High Frequency (HF) privileges for a curiously 'pregnant' nine months! This again played well at the FCC and even in the amateur community, to whom 14.313 MHz in general and to some ND8V in particular, had become such an acute embarrassment.

Unfortunately, Riley had for some strange reason also made a 'Faustian bargain' with ND8V in part to the effect that if he behaved himself for the duration of the suspension, he would [surprise, surprise] be rewarded! All of his past sins were to be forgiven and forgotten--and what is most perverse--could not be used against him in subsequent disciplinary proceedings.... [Obviously, someone had turned their mind to the possibility--some say inevitability--of subsequent disciplinary problems. Who? Why?]

Interestingly, as part of this Faustian bargain, Riley apparently forbade ND8V to operate on 14.313 MHz--something he may not have had authority in law to do. But what is truly odd, when ND8V returned to HF--surprise, surprise ~a month before K1MAN's published intension to resume his Bulletins--he relocated to 14.275 MHz! With virtually the entire 20 m Band for ND8V to choose from, this was not entirely serendipitous....

ND8V returned to HF in September 2001 after 'serving' only eight of the nine month suspension [Riley can't count] and virtually immediately was [surprise, surprise] back in trouble again. Riley was again forced to use the wet noodle, i.e. to issue another Warning Letter that, for reasons still unclear, but likely related to the Faustian bargain, appears to have again 'gone away' without significant or indeed any consequences.

Immediately upon K1MAN's return, he was [surprise, surprise] subjected to organized and vicious interference (QRM) by ND8V and his toadies from the zoo on 14.313 MHz now increasingly congregating on 14.275 MHz. [Interestingly, most of these were/are from the 4th Call District.]

Riley/the FCC reportedly sat back and listened, but pointedly took no action. Curiously, however, between this relentless QRM'ing and otherwise bad mouthing of K1MAN and inconvenient/neighbouring others, ND8V could be heard loudly praising Riley--in nauseating fashion--the just completed suspension and by now extensive 'rap sheet' at the FCC and elsewhere notwithstanding.... Things were getting curiouser and curiouser....

Within yet another month or two, ND8V organized another attack, this time on a Polish-speaking amateur from New York City (the New Yorker), on the neighbouring frequency of 14.273 MHz for in effect usually speaking in a foreign language and being too close to "his" newly chosen frequency. Now, 14.273 MHz had for only some fifty years unofficially been known/used as the worldwide 'Polish Calling Frequency'. For the obvious reasons, many consider such informal arrangements a very effective and efficient use of the radio spectrum. But, this was shortly after "9/11" and ND8V's apologists say that he should be forgiven for this misguided sense of 'American patriotism'..

Surprise, surprise, this attack on the sometime Polish-speakers generally

and on the New Yorker in particular had a similar modus operandi (MO) to that used a year earlier on the Hispanics! ND8V also in quick succession organized his toadies from 14.275 MHz to write two transparently fictitious complaints to Riley against the New Yorker. Perversely, these involved allegations of 'perceived' overly-wide signals and interference no less, backed up by the 'thinnest' of malicious 'drivel' off the Internet. One concerned chiefly what were clearly fraudulent rebroadcasts of the New Yorker's CQs [they taped and retransmitted his signals on top of their own and then complained to Riley about it!]. To even casual observers, this was/is the well-known MO of CB'ers and together with voice imitations, was/is a recognized specialty of the zoo in general and ND8V in particular. As such, the complaints were an obviously 'put up job'.

Nevertheless, without checking the bona fides of the complaints or their chief instigator/organizer, or apparently doing any independent investigation whatsoever, Riley obligingly quickly issued two Warning Letters in succession to the New Yorker. These were then published on the ARRL website. This was/is Riley's standard operating procedure. Several knowledgeable and legally trained observers have aptly called this approach to enforcement "Trial By Press Release". [The ARRL's by-and-large noble institutional memory should be ashamed to be party to this.]

These Warning Letters emboldened ND8V who was then openly heard bragging to his toadies that he would drive the sometime Polish-speakers off the neighbouring frequency in general and the New Yorker off the air in particular.

Then, two of the sometime Polish-speakers on 14.273 MHz [one American and one Canadian] stepped into the breach and attempted to defend their fellow amateur..

Initially, first the American and then the Canadian helped the New Yorker draft and send three lengthy and increasingly detailed double-registered letters of reply to Riley--not one of which to-date has even been acknowledged!

The American then sent a double-registered letter covering an audiotape evidencing malicious QRM and a death threat to the New Yorker uttered by none other than--surprise, surprise--'Dumbo Bobbie' WD4AWO--one of the original complainants and ND8V's regular toady from the backwoods of Tennessee. For some curious reason, Riley has not to-date deigned to acknowledge this serious incident either..

Over the next several months the Canadian followed up with some 20 detailed e-mails, each one evidencing at least one instance of serious malicious QRM by ND8V. After several insistent prompts Riley finally laconically if inarticulately acknowledged some of these--not to be confused with answering them--but of course he did nothing substantive about them as usual..

Then, after about six months of this benign neglect--and worse--and the continuing vicious attacks by ND8V, Riley finally attempted to placate the increasingly irate Canadian by advising that he would hold a review of ND8V's licence status at his upcoming renewal time. Inexplicably, however, a couple of months later, Riley/the FCC renewed ND8V's licence without any review whatsoever! When confronted about this by the Canadian, Riley professed utter surprise and blamed the supposed error on some

administrative 'foul-up'. Others thought/think otherwise..
Then, after nearly a year of inaction and 'flip flops', the Canadian finally read Riley the 'riot act'..
Riley's reply to this 'dressing down' was apoplectic, but informative for a change. He wrote that the Canadian should not bother him with "blow-by-blow" details--each one carefully crafted as a possible exhibit to any number of affidavits! Riley also stated that he had "just noticed" that the writer was a Canadian amateur!! This, recall, after more than 20 e-mails, all except one of which [a forward from the American] were very clearly identified with a Canadian call sign!!! The logical conclusion to be drawn from this is that Riley is either grossly inattentive to detail and/or that he doesn't recognize a Canadian call sign when he sees one some 20 times in succession and/or that he is disingenuous [for those not familiar with the last word, look it up under "L" in the dictionary]. Irrespective, Riley thereby very arguably proved himself to be unfit for the important position that he holds..
In his reply, Riley also unilaterally changed 'the rules of engagement' in mid-stream and suggested that the Canadian send him audiotapes instead of the blow-by-blow e-mails. It is interesting to note in passing that the form of complaint to the FCC is nowhere specified. In fact, an FCC Commissioner had shortly before this delivered a 'rocket' to the Enforcement Bureau [of which Riley is Special Counsel, you might recall] on this very point. Also, there are serious and possibly insurmountable evidentiary problems with tapes made by 'various and sundry'.
Nevertheless, the Canadian subsequently sent Riley a detailed letter covering a tape recording of a typical example, among others, of ND8V's usual sociopathic QRM. This incident was even independently corroborated by a station from California--which was 2 kHz down and was contemporaneously also maliciously QRM'ed by ND8V--and luckily caught on the same tape! Despite this 'double whammy', from two independent sources that did not previously know each other, Riley never replied to the Californian [a retired Sergeant of police, incidentally] and only grudgingly acknowledged the 'pesky' Canadian. But, to-date, he has taken no substantive action on the incidents as usual..
All the while ND8V perversely continued to praise Riley on the air as if he were his 'long lost bud' and bragged about unprecedented access to and sometimes daily telephone contact with him [while practicing attorneys regularly could not get through].... To subjective and objective observers alike, things were not only getting curiouser and curiouser, but increasingly bizarre....
Then on 25 November 2002 Riley wrote ND8V an unprecedented strong Warning Letter noting that the FCC continues to receive complaints about him concerning the ".appropriation of certain frequencies." and ".interference to certain operators". Riley inter alia cautioned that: "Any future incidents.even a single incident, will result in a monetary forfeiture and revocation proceeding against your license" and requested that ND8V refrain from operation on the 20 m Band. This unprecedented '.last warning, to last warning, to last warning, etc....' was again based on multiple, independent and well-founded complaints from several amateurs operating tens of kHz

apart. At least two of these complaints were from mature, highly credible and wholly independent sources who did not then even know of the other's existence [but Riley obviously knew--and gave both the "mushroom treatment"]. Interestingly, both of these sources were also legally trained.. Moreover, one of the complaints was in addition reduced to/backed up by a very persuasive/extensive Statutory Declaration/Affidavit..
Surprise, surprise, distressingly similar historical fact patterns and well-founded/drafted independent complaints notwithstanding, ND8V was able to dispose of them via only one "private" telephone call to his 'bud' Riley! Therein, in true sociopath style [aided by his "calm voice characteristics" no doubt--ND8V later bragged about this on-air], he simply described the multiple independent and unconnected complaints to Riley as "all lies". Now Mikee is an accomplished practitioner of 'The Big Lie' approach. But, what is nevertheless so inexplicable and bizarre in the circumstances is that Riley obviously 'bought' this preposterously 'thin' excuse!
STOP PRESS!
SPECIAL COUNSEL RILEY 'ROT' HOLLINGSWORTH K4ZDH AGAIN SNOOKERED BY 'CALM VOICE CHARACTERISTICS' OF MIKEE 'KALAMAZOO CUCKOO' ND8V..
After receiving such 'unimpeachable evidence to the contrary' from ND8V--Riley then shamelessly rescinded the Warning Letter--before it was even published!!!
This again of course only emboldened ND8V who then sold his perfectly serviceable FT-1000D and bought an IC-756 PRO--so as to more effectively 'keep watch' on and 'splatter' the sometime Polish-speakers especially, in what he instructively called "War Mode". Subsequently, according to ND8V and his toadies, 14.275 MHz and vicinity was "always occupied", even when no one was using it! ND8V published a "schedule" to that effect on QRZ.com and anyone--but especially the sometime Polish-speakers--attempting to use any frequency between ~14.270 MHz and ~14.280 MHz would then immediately be 'stomped on' and/or [surprise, surprise] loudly and perversely be accused of interfering with him!
If a few of the sometime Polish-speakers [eventually there were only two!] could not thus be chased off and stood their ground, ND8V would then threaten them with being reported to his "friend and lawyer", Riley. For effect, he would even occasionally pass out Riley's direct/private telephone numbers! He also repeatedly threatened the Canadian with a report to Industry Canada (IC), the Canadian equivalent of the FCC [and equally ineffective]. All the while ND8V's regular toadies [chief among them 'Rambo Dan' W4NTI, 'Dumbo Bobbie' WD4AWO, 'Rude Rube' K4RUB and 'Miami Boob' W4ASX to partially name only a few of the more unbalanced and guilty], were ready and more than willing in the background to uncritically back him up in whatever he said or did.. Soon, no one--'rednecks' from the 4th Call District and/or ND8V's usual sycophants excepted--was safe in the middle of the 20 m Phone Band! All the while Riley/the FCC and even IC, despite being repeatedly advised, did nothing..
The American subsequently sent Riley another handful of double-registered letters covering some dozen tapes/instances of serious malicious QRM by ND8V. But of course Riley did not acknowledge this considerable effort and expense either..

Then in February 2003 ND8V together with his toadies organized a series of vicious on-air attacks on the two sometime Polish-speaking holdouts. That these attacks were also premeditated, organized and racially/ethnically driven is beyond question. Several amateurs and even a short-wave listener independently reported ND8V and his toadies 'laying in wait' and preparing for them as such. The attacks were on an unprecedented scale and of ferocious intensity. Many of them literally lasted for hours! Some again involved repeated threats of death and/or bodily harm..
Fortuitously, all of these attacks were taped--including the all-important beginnings--both by the American and the Canadian. This should have 'put paid' to 'who was on first, first and who second', who attacking and who defending, who calling whom racial/ethnic slurs, who threatening, etc. Riley/the FCC [and sometimes IC] were contemporaneously informed and on occasion provided the tapes and/or access thereto.
But again, nothing constructive materialized--actually, quite to the contrary..
Surprise, surprise, 'Kalamazoo Cuckoo' ND8V and 'Rambo Dan' W4NTI--those paragons of American radio amateur virtue--verbally reported the Canadian to IC and the American to the FCC! Because Mikee can't write, the manner in which they did this is again instructive. First, they repeatedly read out the respective and sometimes toll-free telephone numbers using a continuous loop feature and fraudulently exhorted anyone and everyone listening to call in a complaint. Then [surprise, surprise], they conveniently called the numbers themselves! This, perversely, after first viciously QRM'ing and threatening the American and Canadian--for more than three hours--using the usual full legal power +, a five element mono-bander [typically directed at the Canadian, because the American was too close], in splattering War Mode. All of which, including again as to who first properly occupied the frequency, etc., was/is unequivocally evidenced on tapes independently provided Riley by the American as well as the Canadian!!
Surprise, surprise, the ephemeral nature of verbal complaints and the supposed requirement for tapes/hard evidence, etc., notwithstanding, both of these 'august' organizations were then perversely apparently speedily preparing to act--against the two 'recalcitrant' sometime Polish-speaking holdouts--who so "unreasonably" refused to be driven off any frequency they first lawfully/properly and demonstrably occupied!!!
Almost in desperation, the American then put a $1,000 US 'bounty' for information leading to the arrest, prosecution and conviction of their tormentors/QRM'ers.. Not to be outdone, the Canadian subsequently raised the bounty to $2,000 CDN and for effect added "Dead or Alive", 'Texas/Dubya '-style..
In March 2003 the Canadian also drafted and whenever seriously QRM'ed read to his American colleague for comment, evolving versions of "The Life of Riley"--which ultimately called for Riley's removal from the FCC..
Surprise, surprise, within ~a week of the third weekly 'reading', Riley at long last decided to act--in a manner of speaking. He wrote a letter accusing ND8V of: causing deliberate interference, broadcasting and threatening [the life of the American, no less!]. All of this arising from just one relatively mild attack in the series--lasting only about an

hour--on 26 March 2003 as patently incompletely reported by some third party [the identity of which is still unknown].
Nevertheless, Riley again categorically threatened ND8V's licence with: either a suspension and revocation hearing, or a loss of voice privileges for the remainder of the licensing term [i.e. for the next ~nine years].
But, despite the unequivocal nature of the underlying evidence [eventually Riley received three tapes of the same event from three independent sources!] and the relatively strong if curiously obtuse language used, Riley did not call it a Warning Letter..
Moreover, being the petty bureaucrat that he is, Riley did not like having his feet put to the fire, especially in so public a fashion. Thus, even while appearing to take some action against ND8V, he also decided to get even--with [surprise, surprise] the American, being the only one over whom he had some power. Riley disingenuously accused him of conduct ".as bad as or worse than." ND8V. Now, that is a standard indeed!!! Shame on you, Riley!
Incidentally, this was the only substantive communication the American had ever had from Riley in his life--the ~dozen reports and costly double-registered tapes he had submitted on ND8V notwithstanding!
But, no one should be/is fooled. As previously admitted and long suspected in any event, Riley has obviously been sitting near his energized antennas for much too long! To knowledgeable amateurs, Riley's recent self-serving and semi-articulate musings in general and about ND8V and the American and the 'Polish Calling Frequency' in particular, in the circumstances do not even pass 'the giggle test'..
This latest wet noodle lashing and the requirement to reply "within 20 days" notwithstanding, as of the time of writing of this piece, or some six months--but in reality two years--later, Riley is yet to do anything substantive to ND8V who continues to terrorize 14.275 MHz and vicinity with manifest impunity..
How come 'Kalamazoo Cuckoo' ND8V is still licensed and leads such a "Life of Riley", many thinking amateurs ask???
There are some cynics who answer generally that the ties that bind--and blind--to this extent are to be found only within 'secret societies'--such as the Masons, the Ku Klux Klan and groups which meet for trysts in 'bath houses'.. But, being cynics, they probably over-generalize, if not over-state.
Others, who are less jaded, muse simply that Riley is ineffective because he is fundamentally incompetent. Some suggest that Riley's secretary is weak in basic fact investigation and reasoning ability and has too ready an access to his rubber-stamp signature.Those who are legally trained, laconically submit that Riley is simply 'wet' on the law. Still others suggest that Riley is legally, administratively and otherwise unethical. A few point out the obvious--that Riley is also from the 4th Call District--and as such is simply covering the 'butts' of his fellow southern rednecks [and/or Klan wannabes]. Some have even suggested that Riley is intellectually and otherwise dishonest. While K1MAN bluntly states--on-air and in writing--that Riley is a "cheap and corrupt politician".
Some of these characterizations might be true, in whole or at least in part. But, after only two years of close monitoring and observation, the

"relationship" between Riley and ND8V appears to be both much simpler and at the same time much more complex than that....
In a nutshell, 'Kalamazoo Cuckoo' ND8V arguably leads "The Life of Riley" because Riley continues to treat this 'useful ~400 lb. idiot' and his uncouth toadies on 14.275 MHz and vicinity as the radio equivalent of thugs and 'brown-shirts' in his battle to get K1MAN and his Bulletins off the air.
Riley was/is playing the dangerous game of 'the enemy of my enemy is my friend' and provides this crude racist bully 'deep cover', convenient 'escape clauses', lenient sentences and 'get out of jail free' cards virtually on request..
But, why has this gone on for so long? Arguably, because now 'Kalamazoo Cuckoo' ND8V also knows 'where Riley's bodies are buried'..
Whatever the short and/or long-term tactical merits of Riley's ad hoc, unprincipled and ultimately Machiavellian approach, because of the collateral damage it causes to non-combatants and innocent others, it constitutes highly irresponsible and unethical administrative behaviour and brings great discredit not only to amateur radio and the FCC, but also to the United States of America as a whole.
It is past time, therefore, not only for Mikee 'Kalamazoo Cuckoo' ND8V but also for Riley 'Rot' Hollingsworth K4ZDH to go....

K1MAN studios are on Baxter Point. We have the peninsula from the tip and back 1000 feet to the narrows. It is the peninsula marked at the top of the the photo.
BIOGRAPHY OF GLENN A. BAXTER, P.E., K1MAN

EXECUTIVE DIRECTOR OF THE AMERICAN AMATEUR RADIO ASSOCIATION (AARA)

NETWORK MANAGER OF THE INTERNATIONAL AMATEUR RADIO NETWORK (IARN)

PRESIDENT OF THE IARN AMATEUR RADIO PEACE CORPS FOUNDATION, INC.

Glenn Baxter, K1MAN, is probably one of the best known radio amateurs in the world today. He is Manager of IARN, the International Amateur Radio Network, founded in 1985. He is also Executive Director of AARA, the American Amateur Radio Association®, founded in 1992. Mr. Baxter was formally recognized by the State of Maine Legislature on March 13, 1991 for IARN's humanitarian work in world wide emergency communications and was named as a Vermont Academy Distinguished Alumnus on October 1, 1993 for his amateur radio contributions to society.

Glenn studied engineering at Northwestern for two years where he also played football for the Wildcats, and he received his B.S. in Industrial Engineering with honors from the University of Rhode Island in 1968. While at URI, he placed Fourth in the Boston University Annual Debating Contest and won First Prize at the American Institute of Industrial Engineers (A.I.I.E.) Northeast Regional Student Conference for written and oral presentation of a technical paper. This paper in Third nationally. He took Third Place at the same conference the previous year.

Glenn worked as an Industrial Engineer at Allied Chemical in Syracuse, New York; Worthington Controls in Norwood, Mass.; and Collins Radio in Cedar Rapids, Iowa. He was also a Management Consultant with Booz, Allen, and Hamilton in Chicago. He is a Registered Professional Engineer in both Maine and Illinois.

Glenn formed a Professional Engineering firm in 1977 and later organized Investors Financial Services, employing 20 NASD Registered Representatives in Maine and New Hampshire. He has also taught physics, chemistry, and math in high school.

Glenn got his FCC Novice class license in 1956 and his Extra and First Class Commercial tickets in 1964. His first stations were a Heath AT-1 and Hallicrafters S40-B; Heath DX-100, SB-10, Collins 75A-4 and later adding a Collins KWS-1 which he ran until 1980 when he upgraded to Collins S-Line gear and a KWM-380. His biggest linear is a home brew PL-172, and he also runs a Collins KW-1 on AM. Glenn can heard frequently on 20 meters from his

mobile running a Yaesu 757 into a Hustler antenna.

IARN started with a spectacular bang in 1985 during the Mexico City Earthquake, and the IARN Amateur Information Bulletin Service began its 365 days per year transmissions on 80 and 20 meters in 1987. See www.K1MAN.com for the latest transmitting schedule. The talk show call innumber is 1-800-262-9543.

The IARN Amateur Radio (call in) Talk Show format began in 1995. The show is 90 minutes per program on 14.272 and 3.977 MHz. single sideband at 5:30 A.M., 1 P.M., and 8 P.M. and also 3.890 MHz. amplitude modulation at 6:23 P.M. and 9:30 P.M. All times are Eastern local times.

Glenn's long term goals are to raise the standards in amateur radio, encourage a significant increase in mutual cooperation among rival factions, and expose and eliminate the petty jealousies and cliques that may end up self destructing our vital and very valuable service.

Futile to fight with that company. They Produce some of the most
un-dependable products in the world. It will cost you far more to win your
funds than what you will probably be willing to spend in legal fees. Best
thing is to never buy any of their products again and tell all of your
friends to do the same. Word of Mouth can be some of the best, most
effective advertising for any product be it an expensive item such as a car
or home or the brand of tissue you care to use.
Had the opportunity to have one self destruct in "92" with less than 18000
miles on it. they just wanted to repair the damages without supplying a
usable alternative for me to use during the service period. Seems the out of
country air conditioner compressor wanted to lock up in January. Blew a hole
in the side of the engine block, flew into the fan and radiator, ETC. What a
flippin joke. it has been said "Flippin Owner Really Dumb", as well as other
mottos.

Does anyone know if Tager was a ham radio nut?
Most of the hams I know are complete nuts and/or
very good "candidates" for the next person
to go pull off a future "post office employee" type apeshit
at their place of work.

APRS packet racket.
Sounds even better in USB than FM.

In order to stem the tide of ...individuals... trying to figure this one
out, this is an amateur radio packet-data frequency.

Sonic frequencies (440 hz = A4)

13.013 hz = G#-1 + 2 cents (approx) This might be the "shit your pants
frequency" or fabled "brown noise".

130.13 hz = C3 -9 cents

1301.3 hz = E6 -23 cents

13013 hz = G#9 - 36 cents - still way within the threshold for human
hearing.

This proves that "Bob" may make you shit yourself, but he still definitely
wants to be heard.

"Kilgore Trout once wrote a short story which was a dialogue between two
pieces of yeast. They were discussing the possible purposes of life as
they ate sugar and suffocated in their own excrement. But because of
their limited perspective, they never came close to guessing they were
making champagne."
-- Kurt Vonnegut

1682. K1MAN JAMS BOY SCOUTS

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-21 18:19:31 UTC
From: Anonymous Sender <anonymous@remailer.metacolo.com>
Message-ID: <0ec26cc2925fb3cfdaf2dd322da14f98@remailer.metacolo.com>
Source record: 55895

Mark Abramowicz, NT3V is the
trustee of KC3BSA, the club
station which K1MAN deliberately
interfered with last Saturday
(Oct. 16, 2004)
during the Scouts national
Jamboree On The Air event.

Mark is also a reporter for
AR Newsline. Hopefully
Bill Pasternak will choose
to run a story about
K1MAN jamming boy
scouts on 3.890.

It will be interesting to hear
K1MAN explain the story of his
own jamming on his bulletin.

Heres what happened:

A large group of Hams were
talking on 3.890 MHz. As they
chatted, two Boy Scout stations
happened by the frequency.

VE3WIB and KC3BSA, with a
total of nearly 80 Boy Scouts
joined the conversation on 3.890.
The scouts were having a
great time, and the hams involved
were excited to work these
enthusiastic youngsters.

At 9:34 PM, long before even one
quarter of the scouts had
a chance to speak, K1MAN
began the deliberate
interference which ended their
ham radio contacts.

In fact, WA1HOD, Chris Murdock,
called K1MAN no less than
3 times to inform him that
K1MAN was interfering with
an ongoing QSO of "12-14 hams

and some VEs" (Canadians).

"The righteous indignation is
simply overflowing." Chris said.

What was Baxters reply?

Laughter and
mockery of the situation.

Baxter: "Oh my goodness please
dont tell Riley... please dont
tell Riley."

And "(Laughing) Oh my
goodness, oh woe is me,
(laughing)
please dont throw me in that
briar patch, please dont
throw me in that briar patch."

Controversy is no stranger to
K1MAN. He has been accused
of supplying radio equipment
and aid to terrorists on the
island of Bougainville.

More recently Baxters show
invited a co-host to his bulletin,
namely alleged racist,
Richard Whiten, ex-WB2OTK,
who was accused of deliberate
interference and extreme racial
slurs before turning in his
own license for cancellation,
after first claiming the
license had been turned in
by computer hackers.

It is also well known in the
Ham community that the voice ID
used by K1MAN, done by
Walter Cronkite,is used
against the journalists
express wishes, as outlined in
a letter to K1MAN by his lawyer,
Ronald S. Konecky.

Hopefully, Baxters latest warning
letter from the FCC signals the end
of K1MANs days on Amateur Radio.

Ham radio guys,

I usually squawk about off topic postings, but this one *is* on-topic.

1) Ham operators, are you gun owners?

Vote Bush.

2) Ham operators, does Kerry even know who Hams are?

Vote Bush

3) Ham operators, do you have a single thing that you want the president
to honor? G'D'it, he works for you!!! Make him know it.

Vote Bush.

By the way, voting is not the only way to tell your boy what to do.
Send email or write a letter. 99 out of a hundred don't.

Your letter will have 100 X weight.

There is absolutely nothing wrong with top posting. Not only does
every tech support department do that in their email, it also makes a
lot more sense on Usenet. That way, you don't have to wade through a
bunch of crap to find the most recent comments.

People who think top posting is somehow uncool are living in the
ancient past of Usenet. Top posting is the choice of modern IT
departments, and it should be ours as well.

Maybe he's ND8V's neighbor!

Talk about a RADIO CRIMINAL!

If someone needs "chopped off at the knees", it's ND8V, and his idiot
friends!

Time after time, I hear ND8V using foul language, making references to
sexual encounters with other hams XYL's, and so on. How many times has
anyone heard K1MAN using such language? ND8V is the PROBLEM, not K1MAN.

How bout it Rube, you in there Rube?

Give me a fu**ing break.

reputation.

He represents those who DO NOT worship the ARRL. ARRL, "trusted", "eanrned",
yeah right, only by fools.

>
> K1MAN, on the otherhand, is a callous, self-appreciating thug.

Again, your opinion, not a fact.

Here's a FACT.
If ya don't like the bulletin service, spin the f**king dial! It's not like
the bands are jammed packed these days!

>

Maybe no one turned them in? I have no idea how or IF the FCC goes about "monitoring" the bands. I thought that was what the "elite" Official Observer (OO) club was for. You know, the bunch that the ARRL makes you test for and then says you're a qualified "turner inner"? Problem is, most of the stuff turned in, goes unnoticed or let's say not dealt with for a LONG time. WHY? Because you have to report it (IF AN OO) to the Head OO in your area, then IF he/she thinks it is good enough - providing they're doing their job, they send it on to the ARRL who then scrutinizes it and sends it (if they even bother to look at it or listen to it) on to the FCC. By that time the damage is done. People who may have wanted into ham - shuck the idea off, those who were, don't want bothered with it anymore. It ruins it for many. Used to be, I'd promote Ham. Once the crap started filtering in and you were afraid to turn the dial for fear of letting some kid you were trying to promote ham to, hearing the same BS as is very common on the CB band, then I quit doing so. I used to have parents ask me about how "nice" ham was and they'd like their child to get into it, as it was "clean". They didn't want CB. Well, now it isn't so anymore. That few percent is enough to start ruining it for many. You leave enough bad apples in a barrel long enough, eventually they all start to rot.

Enforcement issues are varied. Some may agree, some may not. For starters, IF daily fines (usually of $500 per day/offense) are listed in many of the FCC books, then why wait months? Rack them up with the number of days it takes and the cumulative fines of $7000 or more and have at it. Yank the license. Be done with it. Why screw around? I have to wonder if the FCC really DOES want to do anything about half the crap that goes on. Of course, if they're getting ready as they may already have done - selling Ham up the river with BPL or some other scheme to wipe out Ham as we know it, they won't have to bother enforcing anything anymore. Just make it illegal for ALL to be there. ONE CLEAN SWEEP. IF BPL or whatever produces as much interference as it is thought - then no one will be able to talk and well..... eventually, they will shut their systems down for lack of interest or an audience as the case may be.

Then there is the flip side of the coin. Enforcement takes time which relates to cash and hourly fees/wages. Though the fines COULD pay for the costs incurred, they have to be finalized through the legal system. That can take a while and well, some may be wiped out with a "not guilty" verdict. So, bottom line... Unless they have a hard core case, ham radio will go into the trash barrel because of all the crap allowed to go on.

I don't think it is "just" Riley, after all, he does have "bosses". What the collective ham community who wants to preserve it's good nature - needs to do, is start sending mass petitions to the "Chairmen" of the FCC to demand

action be swift and just on those who choose to violate the laws. Just like you go to council in your borough or City to demand a crack down by Police to quell hot spots in speeding or other activity. You've got to speak up to those in control. Talking to the "cops" gets you no where, they don't make the laws or have the authority to start spending time on any single issue. They too have bosses - those in local government. SO, you got to go over their heads if you want more action.

Personally, I give Ham about 5 - 10 more years and it will be DEAD. For many reasons. Technology being one, lack of oversight - another. Ham radio prices high as they are, are not enough to keep the bad bunch off. Code isn't enough either. It hasn't kept those from transgressing onto 10 meters! Has it? NO..... With used H.F. rigs available at Hamfests and so on, there is NO control. NOTHING will stop those from getting on illegally if they choose to do so. It's the beginning of the end for what "was" a nice hobby. This country is beginning to be more and more like the wild west. LAWLESS. Many have shucked - obeying the law of the land. With that attitude, it can't get any better.

Just me!

Amateur Radio Newsline™ Report 1419 October 22, 2004

Amateur Radio Newsline report number 1419 with a release date of
Friday, October 22, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham down-under finds a way to evaluate
the effect of B-P-L on your station while hams in California keep a
hospital in contact with the outside world. Find out the details on
Amateur Radio Newsline report number 1419 coming your way right now.

(Billboard Cart Here)

**

THE BPL FIGHT: AUSTRALIAN HAM DEVELOPS ON-LINE BPL IMPACT EVALUATION
TOOL

A new tool to help hams evaluate the impact of Broadband over
Powerline has just been made available on the Internet by an
Australian radio amateur. Its based on the work of a European
consortium that's trying to set a world standard for B-P-L
radiation
limits. Owen Duffy, VK1OD, is the ham who made it happen:

--

Current BPL technology works by conduction of signals in the radio
frequency spectrum up to about 100 MHz. Existing power lines
networks are not ideal RF transmission networks, they will radiate
radio frequency energy causing interference to radio communications
services, and they will be susceptible to interference from nearby
transmitters -- radio or otherwise.

The European Committee for Electrotechnical Standardization,
CENELEC, are developing a standard for "Electromagnetic emissions
from access powerline communications networks". Access powerline
communications networks are commonly termed Broadband over Power
Lines or B-P-L.

The proposed CENELEC standard does not automatically apply globally,
though countries like Australia draw heavily on international
standards, such as CENELEC's for their own jurisdiction.

This proposed standard would set limits for the conducted energy and
radiated energy of B-P-L systems. The radiation limit is specified
for example as a field strength in dBuA/m in a measurement bandwidth
at a specified distance on particular frequency, and its impact will
not be immediately apparent to most radio users.

Do you know what the impact of +4dBuA/m in 9KHz at 3m is on your receiver?

The B-P-L Interference Evaluation Tool allows evaluation of the impact of B-P-L interference under the proposed CENELEC standard given a set of location / application specific parameters.

Go to the BPL Interference Evaluation Tool at www.vk1od.net/bpl and enter the details for your site and discover the impact. The URL again is www.vk1od.net/bpl .

--

Again, the VK1OD B-P-L Interference Evaluation Tool is on the web at www.vk1od.net/bpl. (WIA News)

**

THE BPL FIGHT: FCC RULE CHANGES TO PROMOTE BROADBAND

Back here in the United States, very little attention appears to have been paid to two other FCC actions amid last weeks FCC decision on BPL. But both are designed to help promote different forms of broadband Internet access. This is important because they will be giving Broadband Over Powerline a run for the corporate dollar profit. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

In another vote taken at their October 14th meeting, the FCC loosened restrictions on fiber-optic networks built by local phone companies, encouraging them to make greater investments in so-called "fiber-to-the-curb" and "fiber-to-the-home" networks. According to the Commission, and as reported in a bulletin from C-Q, the ruling will encourage deployment of fiber optic broadband networks capable of delivering advanced data, video and voice service" by local telephone companies.

Prompted by the decision, several big telephone companies said they would move more rapidly to build fiber networks to homes. S-B-C says it now plans to provide 18 million households higher speed Internet services in two to three years, rather than five years as previously announced. . So far, Verizon Communications has been the most active in building residential fiber networks.

And there is more. The day after the BPL vote was taken, the FCC's Wireless Telecommunications Bureau announced a joint effort with the U.S. Department of Agriculture's Rural Utilities Service. This, to advance the deployment of broadband wireless telecommunications across rural America.

Its called the "Rural Wireless Community VISION Program. Its purpose is to bring experts from both agencies into rural communities selected as models to help provide technical, financial and other assistance in launching wireless broadband services in those areas.

All of this adds up to a lot of competition for B-P-L from the day it gets going.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

As we go to air, it is unclear whether either of these actions are efforts to promote multiple types of broadband, or, possibly a no confidence vote in the long-term potential of B-P-L.

More information on the program is available online at http://wireless.fcc.gov/outreach/ruralvision/index.html. (CQ)

RESTRUTURING: NEW UK INTERNET LINKING RULES

Across the Atlantic, some new procedures have been announced by United Kingdom radio regulator Ofcom. This, for the issuing Internet-linking Notices of Variation for U-K hams. Jeramy Boot, G4NJH, is in Nottingham with more.

--

Following a period of consultation, the following new procedures have been agreed between Ofcom and the RSGB. All current Internet linking NoVs will expire on 31st December 2004. Existing NoV-holders and new applicants will be able to apply for new NoVs from 1st October. The three-month period between 1st October and 31st December will allow for the continuity of the present
network to be maintained.

If you currently hold an Internet linking NoV and you wish to continue providing an Internet gateway beyond 31st December now is the time to apply for your new NoV. If you do not apply for a new NoV, the service you currently provide to the amateur radio community must cease on 31st December.

The method of application is totally web-based, and further details and a series of 'FAQs' can also be found on the RSGB website.

Jeramy Boot, G4NJH

--

Here in the U-S-A we take Voice over I P interconnects for granted. In most other nations hams are required to get special permission to connect their stations to the Internet. (GB2RS)

**

Break 1

Its time for you to identify four station. Linda Reader, N7HVF, if you please:

"From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world, including the W7FP repeater serving Salt Lake City, Utah."

RESCUE RADIO: HAMS SUB FOR PHONES IN SOCAL HOSPITAL OUTAGE

Its ham radio to the rescue once again. This, when a construction accident takes out telephones, faxes, Internet and all other outside wireline communications at a southern California hospital. Amateur Radio Newsline's Joe Moell K0OV has the details.

--

Imagine that you're a nurse in the Intensive Care Unit of a hospital. You need to contact a doctor at his home or office, but you can't get an outside line on the phone at your nurses' station. That's what happened on October 6 at Tustin Hospital Medical Center in southern California. At a construction site next to the hospital, earthmoving equipment dug up 50 feet of telephone trunk lines, severing a 400-pair cable and damaging a 200-pair cable.

Following its previously-drilled procedures, the hospital's Director of Safety contacted the Hospital Disaster Support Communications System -- HDSCS -- an ARES group dedicated to the support of medical facilities in Orange County. In 30 minutes, the first ham had gotten through rush-hour traffic and arrived at the hospital to set up a communications link to the outside.

As more hams arrived, they deployed to the emergency Command Post, switchboard, Medical/Surgical unit, Pediatric unit, Intensive Care Unit, and the new Emergency Department. Meanwhile, the group's leader, April Moell WA6OPS, and two other base station operators prepared to make and receive phone calls in behalf of the THMC. Message traffic began to flow immediately after the operators got on station, as hospital staff members re-established links with their patients' physicians on the outside.

--

WA6OPS: "Go ahead, W6KOS."

"Please advise ICU, I got the service, it was a message machine. I put a message on that machine to call the number that you gave. I also gave it my number. If there's any other way they want us to try to get hold of him, we'll do it. Please advise them that we have called."

W6KOS: "Will do, W6KOS."

--

When phone company workers stated that repairs would take at least six hours, HDSCS began calling more members to provide relief to the first responders. By 9:30 AM the next morning, when the last telephone pair was spliced and the outage was declared to be over, four shifts of HDSCS operators had worked within the facility. Twenty-four hams participated in all.

This was the 85th time that HDSCS has activated to provide support when telephones failed or overloaded at hospitals, for reasons ranging from equipment failure, to cut cables, to natural disasters such as earthquakes, floods, and wildfires. It was the fifth activation so far in 2004. Each of the 80 members has his or her own Go-Kit, ready to take to any of the 34 supported hospitals to establish communications.

For more information on HDSCS -- and how hams in your community can organize to provide rapid response like this to hospitals -- point your Web browser to www.hdscs.org. Those are the initials for Hospital Disaster Support Communications System, followed by dot-org. From southern California, this is Joe Moell K-zero-Oscar-Victor, for Amateur Radio Newsline.

--

Among the hams responding to this emergency were Newsline's 2003 Young Ham of the Year Jay Thompson W6JAY and his father Richard, WA6NOL. They, and all of the others who volunteered are another good example of Amateur Radio ready and able to step in when commercial lines of communications fail. (K0OV, ARNewsline™)

**

RESCUE RADIO: STUDY SAYS THAT CELL PHONES IN HOSPITALS MAY PRESENT RELATIVELY FEW RFI HAZARDS

Cellular telephones may not pose the big risk in hospitals that was once thought. At least according to Dr. John Halamka who is the chief medical information officer for the Harvard Medical School.

According to Dr. Halamka, three years ago the school held a conference on the subject of hospital versus cellular telephone RFI issue. Attending were some 100 engineers, the Food and Drug Administration, wireless providers and businesses.

At that meeting the group determined that cell phones only pose a threat if they are within three feet of medical equipment. So, says Dr. Halamka, the current widespread hospital restrictions on cell phone use are probably greatly overblown except at locations where phones may audibly disturb patients or staff.

So will this report ease restrictions against cellular phone use in hospitals? Probably not because no study can cover all eventualities and most hospital administrators feel it better to safe than sorry.

The full story is on-line at
http://www.usatoday.com/tech/wireless/phones/2004-09-27-hospital-phone-use_x.htm (CGC)

**

COORDINATION: SERA RESCINDS MANDATORY TONE POLICY

According to the Repeater Users Internet remailer, the South Eastern Repeater Association has rescinded a controversial mandatory tone access policy enacted last summer. One that would have required tone receive and transmit on all new FM voice repeaters now, and on existing repeaters by July of 2006. Postings to the remailer say that numerous complaints lead the SERA Board of Directors to repeal the policy at a meeting on October 4th. (Repeater Owners / Users Remaler)

**

ENFORCEMENT: FLAT SCREEN TV FOOLS RESCUE SATELLITE

An Oregon resident has been told he could face a $10,000 fine if he continues to use a new flat screen television set that is radiating a high power spur on the International Distress Channel of 121.5 MHz. This, after an October 2nd visit by a contingent of local police, civil air patrol and search and rescue personnel.

Chris van Rossmann of Corvallis owns the year old Toshiba flat screen T-V. Unknown to him, the set was radiating a signal that was strong enough to be heard by the orbiting Sarsat Cospas search and rescue
satellite. From there it was relayed the Air Force Rescue Center at Langley Air Base in Virginia which activated a search.

Van Rossmann found out about his broken television set when the search team knocked on his door. They were expecting to find a malfunctioning portable emergency transponder like those carried on boats and in light plans. Instead their T-hunting gear lead them to the college students T-V.

This is not the first time that an errant piece of ground based electronic gear has fooled the Sarsat Cospas rescue satellite. About 12 years ago the crystal oscillator in an inadequately shielded broadcast graphics machine brought a similar response to a production studio in New Jersey. In that case the Ampex Digital Optics unit was quickly retired from service.

Van Rossmann is faring a lot better. Toshiba has contacted him and offered to provide him with a replacement set, for free of charge. (Published reports)

**

ENFORCEMENT: SANTA CRUZ PIRATE SHUT DOWN BY FORCE

Government agents have shut down another unlicensed broadcaster. On September 29th agents of the U.S. Marshals Service served a warrant on a Santa Cruz, California pirate radio station.

The target was Free Radio Santa Cruz, an FM station running 35 to 40 watts of power while offering round-the-clock music, activism and other local programming.

The marshals, along with agents of the Federal Communications Commission, dismantled the station's equipment and carted it away in a pickup truck. The warrant bore no names, listing as defendant any and all radio station equipment used in connection with the transmissions.

Those running the station face the possibility of further punitive action in the form of hefty fines and even time in jail. The search warrant gave the station operators 20 days to respond in court. The value of the equipment seized is estimated at $5,000, including the antenna agents removed from the roof.

More on this raid is on-line at www.mercurynews.com/mld/mercurynews/news/9797653.htm?1c (CGC, Mercury News)

**

COMMUNICATIONS LAW: TELEMARKETERS LOOSE IN SUPREME COURT

The Supreme Court has turned away a challenge to the federal do-not-call registry. The ruling came on Monday, October 4th and upholds the lower court ruling that says the list does not in any way violate telemarketers rights to freedom of speech.

Under a federal law passed in 2003, telemarketers face fines of up to $11,000 if they call people who sign up for the registry unless they have recently done business with them. Charities, those conducting polls and callers on behalf of politicians are exempt. (Published reports)

**

ALERT: POSSIBLE E-MAIL SCAM TARGETING HAM RADIO

If you get an e-mail with a subject line saying Golden Trust telling you that you have won a lot of money, and its from hamemergency at some unknown dot com, toss it. It may well be another Internet scam targeted to Amateur radio.

Ray Shatzel, W2XC, says over the Internet that he received such a solicitation recently. It told him that he had won $1,500,000 in the Lottery Winners International program held on the July 7th of this year.

Curious, Ray checked it out on the fraud watch international dot com website. There he found out that it is nothing more than another of

the many e-mail scams aimed at getting people like you and me to part with personally identifiable information that could be used in an identity theft scheme. They will also ask for payment of taxes, legal fees or other charges before the winnings can be released. People who fall for it loose what they send in and maybe a lot more.

Our thanks to W2XC for posting this warning to the Internet . He's
one of the good guys who took the time to find out and to pass along the information so that nobody in the ham radio community gets stung. (via Internet)

**

ON THE AIR: HAM RADIO TO CELEBRATE DEDICATION OF CLINTON MUSEUM

Turning to the ham radio happenings, word that special event station W5C will take to the airwaves on November 13th and 14th from the Historic Arkansas Museum. This, to help celebrate the dedication of the William Jefferson Clinton Presidential Library. Operation will be on 40 through 15 meters using various modes including PSK 31. Those making contact will receive a special certificate in exchange for their Q-S-L card sent to Dennis Schaefer, W5RZ, 181 Schaefer Drive, Dover, Arkansas, 72837. (Via E-mail)

**

THE SOCIAL SCENE: GREAT LAKES SUPER SWAP IN MICHIGAN IN NOVEMBER

And the combined 2004 Great Lakes Super Swap and ARRL Michigan State Convention takes place November 5th and 6th at the Harbor Lights School in Holland, Michigan. This years special guest is League President Jim Haynie, W5JBP, who will speak both at the ARRL forum and at the Saturday night banquet. For more information on this fun event take your web browser over to www.hollandarc.org and click on the words swap info. (Via E-mail)

HAM RADIO HELP: ARRL JOINS HOLIDAY TOY DRIVE

The ARRL is joining with the United Way in a project to brighten the lives of kids who lost everything in the recent hurricanes that ravaged Florida.

--

Thats right Don. The ARRL is joing forces with a special United Way drive aimed at brightening the coming holidays for kids in central Florida who might not otherwise be able to enjoy the season. They are the youngest victims of the fall hurricanes that ravaged the area. Suddenly living out of a tent or car.

To help these kids, hams nationwide are being asked to purchase a new child's toy and send it to this special United Way campaign. Be sure to include a QSL card or 3x5 file card showing your name and callsign.

Send your donated toy before Thanksgiving to Ham Radio in care of the The United Way White Dove Project at 50 Kindred Street, Suite 207 in Stuart, Florida. The zipcode is 34994.

As we have often said, children are the future of the nation and the world. They, more than any others, really deserve your support.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

Again, between now and Thanksgiving, purchase a new child's toy. Send it with a QSL card or 3x5 showing your callsign to Ham Radio, in care of The United Way White Dove Project, 50 Kindred Street, Suite 207, Stuart, FL 34994. We will and we hope that you will too. (ARRL)

**

ON THE AIR: HZ1AB PERMANENTLY QRT

The Dhahran Amateur Radio Club has been permanently shut down. This, as the result of telecommunications regulatory changes in Saudi Arabia.

For close to sixty years the Dhahran Amateur Radio Club operated station HZ1AB. Club Secretary Thomas Carlsson, AB5CQ reported that due to revisions made in Amateur Service licensing requirements by the Saudi Arabia Communications and Information Technology Commission, operations were no longer possible.

The HZ1AB callsign has already been reissued to Bandar Salah AL-Harby. Carlsson says that the clubs QSL manager, Leo Fry, K8PYD still has all the logs and will process any outstanding QSL card requests. (WIA News)

**

CONTESTS: RCA QSO PARTY - NOVEMBER 6TH

From the contest calendar, word that Saturday, November 6th is the date for this years Radio Club of America 20 and 75 meter QSO Party. The event will start at 4 p.m. Eastern Standard Time on 14 point 280 MHz upper sideband and at 8 p.m. E-S-T move to 3 point 910 lower sideband. Both frequencies are plus or minus any Q-R-M. During the party, W2RCA which is the club station of the Radio Club of America will also be activated. Logs and suggestions for this contest go to W2ZE by e-mail to mrraide@cbs.com (W2ZM)

**

CONTESTS: FISTS COAST TO COAST ON NOVEMBER 24

The 4th annual Fists Coast to Coast contest takes place October 24th from 0000 U-T-C to 2400 UTC. This is a CW only event with the object being to contact as many Fist affiliated clubs on as many bands as you can. The contest is sponsored by Northwest Fists club K7FFF. Full rules and certificate information may be found at //www.tomochka.com/k7fff/fnw_c2c04.html (FISTS)

**

DX

In D-X, OH2BH and OH2PM will be in Albania from October 26th to the 31 finalizing Project Goodwill Albania and related activities with the hope of bringing a number of new students on the air. Both operators will be on the air from Albania during the C-Q World Wide SSB contest on October 30th and 31st signing portable Zed A. During this trip the two will be accompanied by representatives of the I-A-R-U folks assisting Albanian Telecom in variety of regulatory issues. QSL cards for contacts made go to the operators home call address. (N4GN)

Also on for the CQ Word Wide SSB contest will be eight operators from the North-East calling themselves Team Antigua. will again activate as V-26-B from Antigua and Barbuda on October 30th and 31st and plan to enter the multi-operator two-transmitter category. Operation will be on all bands with a possibility of some satellite contacts on AO-7 and AO-51 More information is on line at http://n3oc.dyndns.org/v26b/ (KA2AEV)

**

WITH THE YOUNG: THE NORTH AMERICAN YOUTH NET

The North American Youth Net meets every Friday at 23: 00 UTC on 14.329 MHz. According to Steve Anness, KD5OWO, the purpose of this on the air gathering is to get young hams together for technical discussions or just a chance to meet and get to know one another. If you are interested in becoming a Net Control for this gathering e-mail Steve at kd5owo@arrl.net. You can also visit the groups website at http://groups.yahoo.com/group/nayn (KD5OWO)

**

THAT FINAL ITEM: HAMVENTION 2004 THROUGH TEENAGE EYES

And finally this week, its the Dayton Hamvention as you have never seen it before. This is because its through the eyes of the young. And while we can't show you the pictures here, we can bring you some
of the sound:

--

Sara K3OOO: "So you are probably thinking, OK I'm into this, but how
do I get my license? Well, there lots of stuff. There's study guides. Real cheap. Real easy. You go home. You study for a while and do take your test and you pass and you get your license. No Internet. No wires required."

--

That's 15 year old Sara Saeger, K3OOO, who, along with 18 year old
Trevor Conroy, W7TDC, are hosts of a new video about Hamvention 2004 produced for Icom America by of John Webb, W7NWH. But this show is not a commercial for Icom brand ham radio gear. In fact, its as if John borrowed a bit from Cole Porter's grand old Broadway musical.
The one whose title is "Anything Goes":

--

Trevor W7TDC: "Right over here we have DX Engineering, a manufacturer of components that actually allows you to build your own antenna. Antennas can be big. Antennas can be small. But theres one thing thats true about all of them. They all get your signal in the air."

--

Thats the other half of the anchor team and if Trevor sounds excited about building antennas it's because he knows just how much fun it
can be. And while Sara and Trevor are our guides, they are not only young people in the new Icom show. Meet Rebekah Dorff, WG4Y, of Alabaster, Alabama:

--

Rebekah W4GY: "Ive been a ham since I was 8. I got my Tech when I
was 8, my Extra when I was 9 and then I got my DXCC when I was 10 and then I got appointed as the Assistant Section Manager this year."

--

The bottom line. This is a new world of Amateur Radio and a lot of young people are getting excited about it once they find out just how much fun it can be. Thats because it gets you away from a computer screen and gives you new friends all over the world:

--

Unidentified youngster: "Hopefully I will get my license today and I
will finally be able to talk to Russia."

--

If you are one of those who really care about the future of ham radio and want to see what it looks like through Sara and Trevor eyes, then go to www.icomamerica.com/amateur/video and have a look for yourself. Better yet, have your kids -- or your friends kids watch the show with you. Once you do, we guarantee that none of you will ever view ham radio the same way -- ever again.

Our thanks to Ray Novak, N9JA, and the fine folks at Icom America for funding this important new ham radio video and making it available on-line. Again that URL is www.icomamerica.com/amateur/video on the World Wide Web. (ARNewsline™)

**

NEWSCAST CLOSE

My question is:

Why hasn't Riley and the FCC spent the time, effort, and funds, on ending ND8V's reign of terror on the bands, as they have on ending K1MAN's bulletin service? ND8V and his group are a major embarrassment to your service. ND8V is nothing but a radio terrorist. Plain and simple. If you disagree, you obviously have not heard him on 14.272 lately.

Do you anti-K1MAN folks not see a problem here???????

I can see K1MAN's point. If the ARRL can have a bulletin service, so can he.

The ARRL also has stuff For Sale on their web site too, so that argument holds no merit with me.

Kirk - SWL

They could be twins.
Both have triple chins.
Both have 50 inch waists.
Neither one has seen his pecker in 20 years.
Both are full of sh*t.
Both are unshaven, ugly, obese 300 pound plus slobs.
Both lie and run off at the mouth with foul language.
Women won't have anything to do with them.

Care to add to this list?

Well, you are making more sense but that's just because you copied my
words. Still posting at the top though clueless one.

Your signature should be clueless@wherever.whenever.

I remember one guy in Kentucky got pissed at hearing K4OKA and WB2OTK and the assholes down on that end of 75 meters and became an OO and actually is the one responsible for WB2OTK and Big AL the asshole getting into hot water...the guy put a couple hundred hours in with the FCC and ARRL doing what it took to get these pricks in hot water.....Hell they both read his name and call on the air out loud on several occasions because they had gotten so many OO cards from him....Thus verifying that they were the ones causing the interference and doing crap they werent supposed to be doing.

If they had never mentioned his name or call on the air ....

Nothing would have ever happened! They could have denied it all!....what a bunch of morons!

Anyway the ARRL pissed this guy off and he quit while working on getting LARDASS ND8V off the air....The ARRL needs to kiss his ass and try to get the guy back.....he was the only OO that ever got anything done. He was pretty much the sole evidence collector for the FCC at that time because the rest of the OO's in the US had their heads up their asses and pretended nothing was going on. Like they do now LOL!

ND8V is nothing but a piece of dog crap.

I take that back. I didn't mean to degrade dogs.

I'm surprise he has enough intelligence to find the power switch on his rig.

Isn't ND8V the foul mouthed ham from Michigan?

His audio sounds like he has a well used tampon in his mouth, while talking.

Regardless of what stupid game you two homos are playing, what is it that makes you think that Kerry (or Bush) would stop BPL?

The Bush administration sold us down the river. Not GW himself, but his appointees did. Was it for the "greater good"? BS. It was for the almighty dollar.

Would Kerry do better? Probably not. In fact, almost certainly not. He is motivated by $$$, and provably even more so for his ambulance chaser-mate.

What will *you* do, to keep ham radio alive?

Do you vote for a third party? Bzzzzzzzzt.. No. Thanks for playing.

Do you explain how vital ham radio is to national security? Bzzzzzzt. All they have to do is to listen to the a**holes on 75 meters with their turf wars, or (more likely) go to the internet, that is, *here*, and see what infantile cretins you are being. After reading a few page fulls of your crap, why would anyone want to give you spectrum?

I'm not talking about the majority of posters here; I'm talking about the few loud-mouthed idiots who probably never even get on the air -- or even get out of their mother's house and into the sun. But you jerks are the ones that the press is going to quote (because it is easy for them to cut and paste, instead of actually listening to a hurricane net for 36 hours). The press is lazy, just like you. Get on the air.

You delinquents are ruining our chances of keeping spectrum, and it's only because you never get on the air. How ironic. Get a radio and get on the air! You will see that ham radio is a lot more fun, and is a better public service, than anything you can do while hiding behind your

anonymous postings.

Yes, there are a**holes on the air, but that is true in real life as well.

Perhaps you, personally, could get on the air (that is, transmit) and
show people what a reasonable person would do? Are you a reasonable person?

> > There is absolutely nothing wrong with top posting.

Yes, there is. The proper way to post on Usenet is as I'm doing here. It allows readers to keep up with the flow of threads, amongst other things.

> > Not only does
> > every tech support department do that in their email,

Which has nothing at all to do with Usenet, or how Usenet threads evolve.

> > it also makes a
> > lot more sense on Usenet. That way, you don't have to wade through a
> > bunch of crap to find the most recent comments.

There goes my irony meter.

Lack of netiquette in not snipping is causing the very problem that Lloyd thinks top posting will cure. IOW snipping (and marking those snips) alleviates the problem that he thinks is being created by not top posting. In reality, if you actually followed proper posting methods the problem of extraneous crap would be eliminated. Make snips, note them as such, and place your comments in the appropriate places within the text. No one reads the crap, and the conversation will flow. That's what it's all about.

Here's a useful link:

http://linux.sgms-centre.com/misc/netiquette.php

Here's another:

From http://ursine.dyndns.org/wiki/index.php?title=Top_Posting

"While we hope you aren't one of them, some people failed writing in school; others just forgot that most written languages (English included) are read from top down instead of random order. Another problem is that top-posters often word their replies on the basis that you have already read all previous messages. This is a poor assumption to make; the reader may never have received the message to which you're responding. For example (but by no means the only example), some people choose to killfile messages from certain users in a newsgroup. In any case, there's a realistic probability

that the message you are responding to was not read by the same audience your message will reach "

I for one couldn't begin to guess how often I receive messages out of their proper sequence. The original post isn't always the first one to show up, and likewise, replies are made to replies that I've never seen. That's just one reason.

This link http://www.dickalba.demon.co.uk/usenet/guide/faq_topp.html clearly shows the proper way to make a Usenet post especially regarding top posting. I recommend it. Here's a snippet:

"The correct manner of replying to a post is simply common sense, placing response after original (quotes marked >)

>This is comment 1

And this is my reply to comment 1

>And comment 2

And my reply to comment 2

>And comment 3

And reply to comment 3

If you're still having difficulty in understanding why this interlacing of comment and reply is the sensible way of doing it, let me give you an example to ponder."

I suggest you go there, and see the given example for yourself.

Here's yet another article you ought to find of interest:

http://mailformat.dan.info/quoting/bottom-posting.html

Not only that, but here's a link to an article explaining how top posting makes it difficult for the blind (yes, the blind) to follow newsgroup threads:

http://www.blakjak.demon.co.uk/gey_chr0.htm

> > People who think top posting is somehow uncool are living in the
> > ancient past of Usenet. Top posting is the choice of modern IT
> > departments, and it should be ours as well.

I'm still waiting to hear a good reason for it. Top posting just can't compare with interleaved posting, which is what I've done in this post. My post is easy to follow; I wonder what the top posting reply will look like.

Not only that, and this isn't directed at Lloyd, it's been my experience that in arguments on Usenet, of which I've gleefully been involved in more than my share, that it's the people who can't argue their position that insist on top posting. If you don't address the issues point by point, you can ignore the ones that make you uncomfortable. Top posting is the easiest

way to accomplish this. In Usenet warfare, it's the coward's way out. As for the non-argumentative posts, well...that's all been addressed in the URL's that I provided.

The weird thing is that I've been reading Lloyd's post for some time now, and just to be sure my memory was accurate I googled to be sure...and he's never been a top poster. Strange.

A: Maybe because some people are too annoyed by top-posting.
Q: Why do I not get an answer to my question(s)?
A: Because it messes up the order in which people normally read text.
Q: Why is top-posting such a bad thing?

I see. And you all use the same lloyd@no.spammmmm email address? I'll let the "The only thing you're a master of" joke go by. It's too easy for a man of my talents.

> I usually post with an X-No-Archive header,
> which means that Google doesn't archive most of my posts.

You won't let google archive your posts? What exactly are you afraid of, Lloyd? It's been my experience that the only people that don't allow archiving are people that regularly get their teeth bent when they try to debate their betters. What's your excuse?

> I will now return to top posting, because it is the new way of doing
> things.

That's a good reason? Because it's new? Not because it's better, or more efficient, or easier, but because it's "new"? It's not "new". It's been being done by lazy, inconsiderate posters for years. And they've been getting the same treatment for years, because your style of posting is clearly inferior. No changes to Usenet have changed that one simple fact, nor can they.

> Those ancient old texts may have been appropriate prior to
> 1995, before commerical interests took over the Internet, but now they
> are your Daddy's FAQs; not ours. NSF Net is no more, and now the
> general public (users of AOL and UUNet for example) decides what is or
> is not acceptable on the net.

You're correct that the netizens decide what's acceptable and what's not, and naturally some things will change. I don't believe that top posting will

be one of those things. You're still very much in the minority. I also sense that you're a newbie. Welcome to Usenet.

Try to get along. ;)

> The largest Usenet servers are owned by large corporations now, and
> acceptable Usenet behavior is quite naturally determined by those
> corporate players;

Gee...I thought you just said that the general public decides? It doesn't matter one bit who owns the servers; it's the people that decide. Earthlink doesn't tell me how to post; common courtesy, common sense and my fellow netizens do.

> not the old time players who have been swept away
> but somehow don't know it yet.

Since we're all still here, and since even a perfunctory search of the web shows that you're very much in the minority, well...I just don't know what to tell you, Lloyd.

> The major players are us, and we will
> top post when appropriate.

Oh, so now it's "when appropriate". I see. When -I- pedal backwards, it usually activate the brakes. ;)

And who is "us"? Before you answer, bear in mind that you don't know anything about me...I might be one of you, depending on your criteria. ;)

Of course, you could have learned -some- things about me by searching google. I'm not afraid to have my posts archived.

> We will also post in more modern formats
> such as the utf-8 character set, html, and rich text format, because
> we aren't locked into the past.

Like I said, change is to be expected. Not too many people that I know are paying for bandwidth like they used to, so posting in html or posting binaries to non-ninary groups isn't -quite- as frowned on as it used to be. But top posting is still wrong for all of the reasons which I previously cited and referenced. You know...the ones that you ignored, just as I predicted you would? You STILL haven't given a good reason for doing it, whereas I layed out my argument, which of course you snipped without addressing. If you've got no game, why are you trying to play? Do yourself a favor, and stay off of your high school debating team. You'll only bring shame down upon yourself and your school, Lloyd. ;)

> It's called progress. Join us if you dare.

In your case, it's called being willfully stubborn in the face of lucid arguments and flawless reasoning that disagree with your unsupported and unsupportable position on the issue. Progress has to do with improvements, not following trends. I'm still waiting to see an explanation of the former

from you.

Mopeydopey, keykween, federal criminal, has chip implanted to make him
post on command. Stalker: goes to peoples' houses he doesn't like and
takes pictures and then posts them on the internet. Sissy ass who
cried to get his way whith his mommy and daddy when he wanted toys and
candy. Cries same way now when someone tells him he is an illegal
keyclown. Soon to come: Webpage showing that mopeydopey's ip addy is
the same one that signs people up for pornographic web sites. Another
webpage soon to come that shows the pic of mopey's little 2 gerbil on
a treadmill car and his license plate, along with scanned Ohio Bureau
of Motor Vehicles report on owner of the vehicle in question. I am
reliably told that one is going all over the internet.

Google HIM for the weird asshole value.

It's the norm because people don't adhere to a well accepted standard. If
people did, then we wouldn't be having this discussion. Hint, hint.

> If you can't make your points in a top post, you probably haven't
> developed the language skills necessary to make your points anyway.
> Bottom posting is way overrated and is really a crutch. It should be
> avoided.

I certainly didn't advocate bottom posting, and anybody who's been on Usenet
for a week can see just how messy posts can get when people don't snip
properly. That's a different subject entirely, even though you're trying to

claim that top posting will alleviate the problem. Surely that isn't your reason for top posting? (I'm still waiting for that, by the way.) I also don't agree with that bit about making your points in a top post. Sure, it's do-able. That doesn't make it the best way. Interpersing comments is just the best way to go for all of the reasons I've cited, against all of the reasons that you haven't. You mileage obviously varies. But as I said before, you're very much in the minority.

> On Sun, 24 Oct 2004 00:07:57 GMT, Honus wrote a 104 line post

> >
> > Try to get along. ;)

And don't think I didn't notice how many of my points you ignored by snipping. ;) You know...like why don't you allow your posts to be archived. By the way...my posting history goes way back to dejanews as well. That can be verified, as my posts are archived.

Hi Leland, that is pretty crazy stuff. I still don't think ND8V is as
big of a Ham Radio Embarrassment than N8WWM is. I didn't see anything
about ND having a felony record or making the Rain Report for jamming
repeaters..N8WWM is one very sick individual who has a court ordered
shrink, and can't hold onto an ISP.

N8WWM DOUGLAS
ADAIR present in court. Indigency Hearing held. MARY S.
SWANSON appointed as counsel.
Matter called for Probation Violation Hearing. Pursuant to
the request of Defendant, matter rescheduled for Probation
Violation Hearing on Friday, December 1, 2000 at 8:30 a.m.
Bond is reset at Supervised Own Recognizance.
JUDGE JAMES D. JENSEN
PARTY : D1 - ADAIR DOUGLAS W
11/22/2000 1 Title : ORD:ATTORNEY APPOINTED
Sue Swanson

11/29/2000 1 Title : MIS:REC'D PSI/PV/CCV REPORT
PARTY : D1 - ADAIR DOUGLAS W
12/1/2000 1 Title : ORD: PV/PROBATION CONTINUED
671-01526 issued by JTS (PROBATION VIOL - PROBATION CONTINUE
Dated December 1, 2000. Court Reporter SANDRA CORPE
ordered. State of Ohio: ANNE KIRKHOPE. MARY S. SWANSON
present on behalf of the defendant. Defendant, DOUGLAS
ADAIR present in court.
Defendant having admitted to a probation violation, and
having waived oral hearing, defendant is found in violation
of probation.
Defendant having been convicted of the offense of Nonsupport
of Dependents, in violation of Revised Code Section
2919.21(A)(2), a felony of the 4TH degree.

Probation as ordered by this Court on April 11, 1997 is
ordered continued with the following added conditions: 1)
Seek and maintain gainful employment; 2) Defendant to seek
mental health counseling; 3) Execute wage withholding
agreement.
Defendant ordered to pay the costs of prosecution including
any fees associated with the appointment of counsel. It is
further ordered that the defendant pay any supervision fees
associated with being granted probation. Payment of
financial obligations shall be prioritized as restitution,
supervision fees, court costs, fines, and assigned counsel
fees.

PARTY : D1 - ADAIR DOUGLAS W
3/15/2002 1 Title : COMMUNITY CONTROL TERMINATED
terminated unsuccesfully
PARTY : D1 - ADAIR DOUGLAS W

- ---

Or what about his abuse of the repeater system for which he was
spanked by the rain report?

N8WWM guilty of FCC violations. According to the FCC, N8WWM, Dog
Adair committed several violations over the air at the expense of the
Toledo Amateur Radio Club by utilizing their repeater to break the
law. The amateur club received a warning letter from the FCC
concerning Adair's violations and were told to take steps to make
certain the violations by Adair will not be repeated. Adair not only
hurt the entire image of amateur radio with his inexcusable behavior,
but damaged the reputation of yet another entity trying to further
the good of amateur radio. It's a shame when bad apples like these
make it so clubs can't even trust their own users to abide by the
rules they were sworn to uphold. Adair is also an infamous presence
on the internet. A google search of "N8WWM" reveals a peek into the
world of the individual identified as Adair. In addition to FCC
violations, Adair has, in the past, been accused of being a prolific
spammer, breaking several internet laws and violating several terms
of service agreements with internet providers.

Lardass pulled all the stops out on this one, he claims he took her to
"Denny's" then went to the cheapie afternoon matinee.. yeah Lardass is
a real big spender, he can't pay the rent on his HUD public assistance
housing apartment on time, but he can throw away his minimum wage take
home pizza boy pay on that and bud lite. Lardass got dumped by this
fat bitch and got on the message board, drunk and spammed for hours at
a time. Lardass also has come out of the closet:

What could that word possibly mean? Let me sound it out:
ASS-US-EL-TED? Nope, that can't be it. AS-SUSSEL-TED? Nope, that
doesn't sound right either.

It does sound dirty, though. Do you enjoy it, Woger? Does it involve
a goat?

.....

Tell who what? What the heck is "assuslted", Wiseman?
You fucking dolt. You are blithering again.

"assuslted" Rog just makes em' up as he goes along.

"experieince" Oh, DUH!

"abouve" Is this a French word?

"Cosast" Some place by a body of water?

"mebership", Just a typo, right?

"retqards" Regards or Retards? Who can tell?

"coordinbator" Huh?

"Realy" Really?

"Nitoiced" Keyboard error or stupidity?

Becasue

Licence

Convienince

Myabe

"occurance" Say what?

"srtuggling"

"definatrely"

"delapidated" What a dufus.

"picutre"

"permenatly" Ebonics again?

"Arest" You need a rest, Wogie.

"Sentenceing" No comment.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, K2KW, N3SIG, NG3K, W3HNK, W3UR & The Daily DX, K4WLS, N4AA & QRZ DX, N4GN, W4DTA, N5AU, W6SJ, K8YSE, CE6TBN, DJ2MX, DL1EK & The DX News Letter, DL6KAC, F5CWU & La Gazette du DX, F5NQL & UFT, F6FVY, G0IAS, HA0HW, I1JQJ/IK1ADH & 425 DX News, IZ8BRI, JI3ERV/NH2C, JI6KVR & JA-IOTA Islands News, MM0DFV, OH2BH, ON4UN, OZ5AAH, PA7FM, PF5X, UA0SR, VA3RJ & ICPO, VE3DZ and XE1L for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th/October, through Sunday, 24th/October there were 227 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FK/C, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J7, JA, JD/o, JT, JW, K, KG4, KH0, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FUJI. Team Vertical will be operational from Taveuni Island (OC-016), Fiji from November 20-30th. Operations will be on 160-10 meters, mainly on CW. The group will have 6 low-power stations and ocean-front vertical

arrays on all bands. The team will focus on working Europeans on all bands. A special emphasis will be given to 80 and 160 meters operations. The 160m frequency will be 1825.5 kHz, "up 2" for EU/USA, and "down 2" for JA. The group will also operate in the CQ WW CW Contest as 3D2XA in the Multi-Multi category. Operators include: 3D2EE/AG9A, 3D2KW/K2KW, 3D2OK/WA6O, 3D2SS/W2VJN, 3D2TS/N6BT and 3D2XA/KE7X. More information is available at: http://www.k2kw.com/3d2/
QSL all Team Vertical 3D2 stations via WA4WTG.

5B/C4, CYPRUS. Marios, 5B4WN, will be active as C4W in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. The QSL route is via LoTW.

5B, CYPRUS (QRP Contest Effort). The contest team of RADIOTECHNIKA Magazine will operate from Limasol, Cyprus, during the 2004 HA-QRP Contest between November 2-9th. The contest station will work on 80 meters as 5B/HA5RT/QRP with 10 watts. The operators are: HA6NL/Laci, HA6PS/Zsolt, HA6ZV/Tibor and HA7JJS/Al They will work on other bands, too, with 5B/homecall. QSL info: 5B4/HA5RT/QRP via HA6NL, and all other cards should go via operator's home callsign, or via the HA QSL Bureau. For details on the HA-QRP Contest, please visit the Web page: http://www.radiovilag.hu/haqrp.htm

5Z4, KENYA. Miki, YT1CS, continues to be active from here as 5Z4YT1CS from Nairobi. He was heard this past weekend on 10 meters SSB (yes, the band has been open) on 28467 kHz at 1100z. Look for Miki to participate in CQ WW SSB Contest as 5Z4YT1CS. Remember, the day after the contest he will leave to go to Lamu Island (AF-040 - Coast Province North Group), where he will stay until November 11th. The callsign will be 5Z4YT1CS/M. QSL via YT1CS, by the bureau or direct.

6W, SENEGAL. Dany, F5CW, will be here November 18-30th and operate from the ham shack/QTH in "Le Calao", 6W7RV. His activity will include the CQWW DX CW Contest as a Single-Op/Low-Power/Single-Band (band to be choosen later) entry. "Le Calao" ham shack can be viewed on the Web page at: http://www.le-calao.com

7Q, MALAWI (Update). Allan, G0IAS, updates OPDX that Les, 7Q7LA, will once again be on the air. He is hand carrying some (ham) stuff for Ron, 7Q7RM, to make sure that it arrives safe and sound and doesn't get lost, broken, or what mostly happens, stolen, on its way there.!! Les will leave the UK, on the 28th of this month and is expected to arrive at the Lakeshore on the 30th. Harry, 7Q7HB, should be at Lillongwe International to meet him there where he will either fly him to the Lakeshore or be driven up there to Club Makokola. Les will stay here with his XYL Faye until the early part of January 2005. However, Harry, 7Q7HB, will leave for the UK on November 10th. The two 7Q stations will try their best to put something up for 80 and 160 meters. OPDX was told these two bands are very hard to operate on due to the noise level. More details about their 160/80 operations are forthcoming. QSL Route for 7Q7LA remains via DIRECT ONLY to G0IAS (not allowed to use the RSGB and there is NO BUREAU in 7Q).

8P, BARBADOS. Tom, W2SC, will be active as 8P1A in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via NN1N.

9L, SIERRA LEONE. Ivo, 9A3A, is now active as 9L1ADA from Freetown until November 1st. Activity will be on 160-10 meters using only 100 watts into a long wire antenna. He has been heard over the past week on 160, 40, 30, 20, 17 and 12 meters CW at various times. QSL info is available on QRZ.com (search for 9L1ADA, send direct to his address in Italy). Do not send cards to 5B4ADA. Ivo moved to Italy two years ago.

9V, SINGAPORE. Enno, PF5X, informs OPDX that on October 21st, he received his license from the local authorities, and his station was inspected and approved for active usage. His callsign is 9V1CW, and Enno will be in Singapore for about 3 years. He is using a FT1000MP and a broadband vertical (GPM-1500 by WiMo). If the vertical does not work out satisfactorly, he will try to hang out a G5RVjr (10-40m version). Due to a heavy travel schedule, Enno cannot be active very often. Look for him on 80-10 meters (30, 17m in particular), 99.9% CW as indicated by his callsign. All QSLs via PA0KHS (Bureau is OK). The QSL cards are already printed (high quality glossy cards, design based upon the Singapore flag and printed by ON5UR). If you like to get a QSL direct, please send SAE + sufficient return postage (for airmail return to non-EU destinations, please enclose 2USD/Euro, otherwise 1 USD/Euro).

A5, BHUTAN. This is just a reminder. By the time you read this, members of the Clipperton DX Club, composed namely of Gerard/F2VX, Jean-Louis/F9DK, Vincent/G0LMX and Alain/F5LMJ, will be active as A52CDX. The team will be active from two different locations (divided into two time periods) during their stay there. From October 24-31st, the team will be active from the Ham Center in Thimphu. An entry the CQWW SSB Contest is scheduled as part of the activity. They expect to have 2 or 3 stations active at the same time on 80-10 meters on CW, SSB and Digital modes (PA 1 kW, Yagi, verticals and wires antennas). From November 2-11th, the team will be setting up a new amateur radio club station at Jakar High School (Central Bhutan). A 100 watt transmitter and wire antennas will put them on the air. The members of the expedition will once again be active as A52CDX. For both operations, QSL via F9DX, either direct or via the French REF Bureau. For more info, visit the Web page at:
http://www.cdxc.org/dxp/2004-Bhoutan/a5-en.htm

AH2, GUAM. Aki, JI3ERV/NH2C, Chairperson of Guam Contest Club, informs OPDX that the Guam Contest Club will be on the air as AH2R during CQ WW DX SSB Contest at the end of this month (October 30-31st). This time they set a target as the Oceanic leader in the Multi-OP 2-TX category and World Top 5. Also, they are trying to build an Oceanic record in this category. They will operate 40m on 7075-7100 kHz because of the band plan limitation. Please listen carefully to these frequencies. Operators mentioned are: Aki/JI3ERV/NH2C, Toshi/JR7OMD/WI3O, Kaz/JG3RPL/N1BJ and Nozomu/JE8KKX/AH2K. QSL via JH7QXJ, direct (see QRZ.com) or by the JA Bureau ("NOT" KH2 bureau). The Sunrise/Sunset are: 2014/0755z.

ANTARCTICA RECORD TRIP (Attention Stamp Collectors!). On September 14th, 2004, the famous yacht "Apostol Andrey" started a new circumnavigation trip. The yacht will travel around the shores of the Antarctica without going further to the North beyond the 60th parallel which is the border of the Antarctic region in accordance with the International Agreement. The crew will try to establish a record of penetrating sailing yachts to the south - to cross the 70th parallel of the south latitude. The skipper, Nikolay Andrey, has the callsign of R3AL/MM and has the QSL cards already printed for this expedition. He will transmit from the Antarctica starting December 2004 until March 2005. The ship also has an official Russian postmark onboard and a special postal stationary envelope for this expedition. Thanks to the friends who are helping the WAP Staff, they are trying to set up a regular schedule (with Nikolay), and as soon as available, they will let all of the Antarctic chasers know what it is. For details on the World-Wide Antarctic Program (WAP) and the "Apostol Andrey" expedition, please visit the following Web pages:
http://www.ddxc.net/wap
http://www.shparo.com/yacht_2004_2005/yacht_2004-2005_main.htm

BV0, TAIWAN. Members of the Taiwanese Amateur Radio and Japanese Amateur Radio Clubs will do a friendship BV-JA joint operation in the CQWW DX SSB Contest (October 30-31st) as BV0J. Operators mentioned will be BV3BW, BW0IR, BW2/JR1FWR, BW2/JH0KHR and BW3/JD1BKQ. They will enter the contest as a Multi/2-TX entry. Activity will be on 80/40/20/15/10 meters. QSL route for BV0J is via BW0IR, direct or by the Bureau.

C6, THE BAHAMAS. Randy, W6SJ, will be active as C6AWS from November 26th through December 2nd. Activity will include a Single-Op/All-Band/Low-Power entry in the CQ WW DX CW Contest. During non-contest periods, he will concentrate on the WARC bands. QSL to his home call.

EA6, BALEARIC ISLANDS. Tomas, LY1DF, will be active as EA6/LY1DF in the CQ WW DX SSB Contest (October 30-31st) possibly as a Single-Op/All-Band or Single-Band entry. QSL via LY1DF. Look for activity before and after the contest on CW on all bands.

EA8, CANARY ISLANDS. The OH2U Contest Team (along with a few other operators) will be active as EA8ZS in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Multi entry. Operators mentioned are OH1MA, OH1JT, OH1RY, OH2HE, OH2IW, OH2JA, OH2MM, OH2UA, OH4JFN, OH6EI, OH7JR, OH7RR, OH0XX and EA8ZS. QSL "ONLY THIS OPERATION" to OH1JT.

FM5/TO7, MARTINIQUE. Laurent, F5MUX, will be active as FM5BH during the CQ WW DX SSB Contest as Single-Op/All-Band/High-Power or Single-Op/All-Band/Assisted category. All stations which contact him on a minimum of 4 bands will receive a QSL DIRECT automatically. All others will be confirmed via the bureau. He also mentions that he will be active as TO7X before and after his contest activity.

FY, FRENCH GUIANA. Operators FY1FL, F1HAR, F5HRY, F5MZN, F6EPY, F6FGZ and F6FVY will be active as FY5KE in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL direct or via the bureau.

GM2, SCOTLAND. Look for Jurij, MM0DFV, to be active as GM2Z from Hardgate (Clydebank) in West Dunbartonshire during the CQ WW DX SSB Contest as a Single-Op/All-Band/High-Power entry. QSL cards for contacts with GM2Z should be sent via RSGB QSL Bureau or direct to MM0DFV: Jurij Phunkner, P.O. Box 7469, Glasgow, G42 0YD, Scotland, U.K.

HB0, LIECHTENSTEIN. Christian, DL6KAC, will be active starting October 25th until October 29th as HB0/DL6KAC. Later he will join the contest team (DJ2YE and friends) as a Multi-Multi entry signing HB0/HB9AON. Expect activity on all bands (160-10 meters, no WARC) before and during the contest. As they have to build up the antennas, activity before the contest will not be "fulltime", but expect at least some hours per day. Antennas will be monobanders for 40-10 meters (2/4/4/5 elements) and dipoles for 160/80m + the usual hi-power setup for the contest.

HC8, GALAPAGOS ISLANDS. Operators Lawrence/K5OT, John/AB6BH, Barbara/K6BL, Tony/K6MC, Rich/N6AA, Earl/N6TW, Philip/N6ZZ, David/W6NL and Art/W6XD will be active as HC8L in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Multi entry. QSL via W5UE.

HI8, DOMINICAN REPUBLIC. Hiro, JA6WFM/HI8, and a group of Dominican operators plan to be active as HI3CCP in the CQ World Wide SSB DX Contest as a Multi-Multi entry. The team plans to set up two stations per band. QSL via AD4Z (Please do not send it to HI bureau).

IOTA NEWS.....
AS-008. JO1DPQ will activate Miyake Island (JIIA AS-008-006) from now through November 5th. QSL via his home callsign.

SA-NEW. (Update) Marco, CE6TBN, informs OPDX that Mike/K9AJ, Mario/ CE6NE, Lucas/LU1FAM and himself plan to activate Rennell Island in the Ultima Esperanza Province South Group, February 11-15th. Activity will be on all bands. He does have a yacht contacted to go to the island.

J7, DOMINICA. Denis, K7GK, will be active as J79A in the CQ WW DX CW Contest (November 27-28th) as a Single-Op/*?*/Low-Power entry. QSL via K7GK.

KC4, ANTARCTICA. Chris, N3SIG, informs OPDX that he has been redeployed to the Antarctica to McMurdo Station some time in the 1st week of November. He is expected to be there until March 5th. However, Chris adds that the ham shack's antennas there were destroyed, and they also suffered damage to the main HF rig. He plans to hand carry a HF rig from home in PA to Antarctica. When Chris gets there, he will construct a dipole and will be on the air as KC4/N3SIG mainly on 14243 kHz (The unofficial Antarctica ham freq). He may also be on 40 meters, too. ADDED NOTE: Chris has created an Antarctic Ham Radio mailing list group under Yahoo Groups. Here he will post his operating schedules and other Antarctic topics. He invites everyone to join. To subscribe, send an e-mail to: AntarcticHamRadio-subscribe@yahoogroups.com

LY, LITHUANIA. Ben, OZ5AAH, will be active as LY/OZ5IPA from here between November 3-8th. He will also take part in this year's International Police

Association (IPA) Contest November 6-7th. Contest info is available at:
http://ipa-rc.de
His activity will be on CW and SSB. QSL via OZ5AAH. Skeds can be arranged.
Please, visit the following Web page for details at: http://iparc.dk

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the CQ WW DX
SSB Contest (October 30-31st) as a Single-Op/Single-Band (20m) entry.
QSL via F5SHQ.

OD, LEBANON. Operators DF7TH, DJ5CL, DJ5IW, DL2DVE, DL4RDJ and DL4YAO
are expected to be active during the CQ WW DX CW Contest (November 27-28th)
possibly as a Multi-Single or a Multi-2 entry. Callsign has not yet been
confirmed at the moment. QSL via DJ5CL.

PJ4, NETHERLANDS ANTILLES. Dany, T93M, will be active from Bonaire Island
(SA-006) between October 27th and November 2nd. He will be active in the
CQWW DX SSB Contest as PJ4J. Activity outside of the contest he will be
active as PJ4/T93M. QSL via DJ2MX.

QSL INFO AND NEWS.....................
Egidio, IZ8BRI, one of the WAP Staff informs: QSLs for IA0PS, IK7JGQ/KC4
and IK7JGQ/MM are now ready by request via Luigi, IK8OZZ. The WAP Staff
also states that Michele, IK7JGQ has been active from the Antarctica,
Terra Nova Bay, which counts for the WADA Awards as ITA-01.

UA4WHX PACIFIC TOUR QSL CARDS. Larry, K4WLS, reports that Vlad, UA4WHX,
states all received QSL cards (including the ones sent to the TN address)
have been processed. The return cards are all ready to be mailed as
soon as he returns from an out of town work assignment. He will sign
all the cards, and then mail them out. He did not say that he had a
signature stamp, so this could take some time. Larry states, "He must
have a warehouse full of cards. If you have not sent Vlad a donation
to help with the cost of the QSL cards, he sure would appreciate it.
If he gave you a new one, please strongly consider it. His address is
OK in the current RAC. He told me months ago to tell all the guys to
be patient and their cards would show up when they least expect it."

Serge, UA0SR, informs OPDX that his QSL Manager from now on is Joe,
W3HNK. Joe has the logs from UA0SR from January 1, 2000, and he can
confirm QSOs for this period. Serge states, "Please, all QSLs for
UA0SR from October 2004 only via W3HNK." This information does not
apply to Russian stations. QSL via: Serge T. Sobolev, P.O.Box 323,
Irkutsk 664050, RUSSIA.

SOLAR MINIMUM IS COMING! Something strange happened on the sun last week.
"All the sunspots vanished." This is a sign, say forecasters, that solar
minimum is coming sooner than expected. There is some interesting reading
(or if you perfer, audio file) on Science @ NASA Web page at:
http://science.nasa.gov/headlines/y2004/18oct_solarminimum.htm?friend

TX9, CHESTERFIELD ISLANDS. The German team had to QRT earlier than
expected. They went QRT on Wednesday, October 20th, "due to the schedule
of the skipper." QSL all CW QSOs via DL4XS. QSL all SSB and RTTY QSOs

via DL5NAM.
DL4XS - Maike Voss, Friedrichsthal 21, 51688 Wipperfuerth, Germany.
DL5NAM - Chris Sauvageot, Guttenburg 19, 91322 Graefenberg, Germany.
Online logs are expected to be available on their Web page after the operation. Updated news on the DXpedition can be found on the Web page at: http://www.df3cb.com/chesterfield

TY5M NOW QRT. QSL Manager Dennis, PA7FM, informs OPDX that after a 2 month trip through Africa, (active as 5U7DX, TZ6M and TY5M) Michael, TY5M (homecall PA5M) went QRT from Benin on the 17th of October. This is 4 days earlier than originally planned as work was finished early. Michael is off of work for a few weeks at his home in The Netherlands and is preparing himself for the 3Y0X operation. There is a chance he will go somewhere in the world for the WFP of the UN in December, but it is not known yet where that will be. All QSLs for one of these operations should go to: Dennis Robbemond, Loggerhof 11, 3181NS Rozenburg, The Netherlands. ADDED NOTES FROM PA7FM: "So far all TZ6M cards have been answered. 5U7DX cards have not yet arrived from the printer (although it was published a few weeks ago), while TY5M cards are waiting to get printed. Please keep in mind that 1 USD does not cover postage costs outside Europe anymore. Those cards, with unsufficient return postage will be answered throught the bureau." All logs for Michael's operations (the following logs: YI/PA5M, 9U5M, ST2DX, 5U7DX, TZ6M and TY5M) are online at: http://www.pa7fm.nl

UA0, ASIATIC RUSSIA. Pavel, UA0YAY, will be active during the upcoming CQWW DX SSB Contest (October 30-31st) from CQ ZONE 23. QSL via IK2QPR.

UP5, KAZAKHSTAN. Operators UN9GC, UN7GM, UN6G, UN9LW, UN7LEZ, UN7FK, UN7FZ, UA9MA, RN6BY and RZ3TZ will be active as UP5G in the CQ WW DX SSB Contest (October 30-31st) as a Multi-Multi entry. QSL route was not provided.

V2, ANTIGUA. Ratko, YU1NR, will be active as V29NR in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via YU1NR.

V3, BELIZE. Operators Art/N3DXX and Steve/KN5H will be active as V31RM in the CQ WW DX CW Contest (November 27-28th) as a Multi-2 entry. QSL via KN5H.

V6, MICRONESIA. Look for Shoji, JA7HMZ (V63DX), from Pohnpei, to be active as V6A in the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. Before and after the contest, he will try to look for EU on 80 meters CW. Look for him as V6A on October 29th and November 1-3rd between 1830-1930z on 1828 kHz (+/- QRM).

VE2, CANADA (Zone 2/Update). Operator Yuri/VE3DZ, Ed/VE3FWA, Sergei/VE2QIP and possibly Yves/VE2XAA will take part in the CQ WW DX SSB Contest as VE2IM (Multi-Single entry). Activity prior to and right after the Contest, operators are expected to be on the air signing homecall/2.

VK9X, CHRISTMAS ISLAND. Look for David, VK2CZ, to be active as VK9XD from October 25th to November 4th. His activity will include participation in

the CQ WW SSB DX Contest as a Single-Op/All-Band entry.

VP2E, ANGUILLA. Operators KC5EA, N5AU, N5TJ, K5MR, VE3EJ, K1DG and N2NT will be active a VP2E in the CQ WW SSB Contest as a Multi-2 entry. QSL via N5AU direct. Look for some activity on the WARC bands prior to the contest.

VP9, BERMUDA. Steve, W4DTA (YV5DTA), informs OPDX that he will be active from VP9-land starting October 27th, and is part of the group that will be on during the CQ WW SSB Contest as W4OV/VP9 (See OPDX.680). He will be active during his spare time as W4DTA/VP9 during the dates prior to the contest. QSL via his homecall.

XU, CAMBODIA. Peter, NO2R, is once again heading back to Sihanoukville and will be active as XU7ACY from January 9-20th. Activity will be on 40, 80 and 160 meters CW/SSB. QSL via K2NJ.

XX9, MACAO. Operators from China, Hong Kong and Macao will participate in the 2004 CQWW DX SSB Contest 2004 as a special joint team effort from October 30-31st, in Macao SAR, China. The team will sign-on with the special callsign, XX9C in the Multi-Multi category. They plan to have 5 stations active at the same time on 160-10 meters. All 5 stations will be set up on Taipa Island (AS-075). Team members include:
Macao - XX9BB, XX9HX, XX9JD, XX9JX, XX9KC and XX9XO
Hong Kong - VR2DS, VR2KW, VR2MK, VR2MY, VR2PX, VR2UNG, VR2XZK, VR2YDC, VR2YTK and VR2ZST
Guangdong - BA7IA, BA7IB, BA7JA, BA7JG, BA7NI, BA7NQ, BD7OH, BG7IEE, BA7IX, BG7IYA, BG7IXG, BG7IBU, BG7IXE, BG7KSF and BD7IAG
Nanjing - BA4RF, BA4RD and BA4RZ

QSL via XX9BB: Kam Po (Savio) Leong, P.O. Box 6018 Macau (Macao), SAR, China. Their Web page is at: http://www.arm.org.mo/xx9c/

ZA, ALBANIA. Martti/OH2BH and Pertti/OH2PM will be in Albania, October 26-31st, finalizing Project Goodwill Albania related activities with the hopes to bring a number of new students on the air. They will be accompanied by the IARU folks assisting the Albanian Telecom in variety of regulatory issues. You will hear ZA/OH2BH and ZA/OH2PM active during the CQWW, most likely in two single-band categories. QSL to their home calls. The "Project Goodwill Albania" Web page is at: http://www.za1a.com

ZK1, SOUTH COOK ISLANDS. Look for Ronnie, SM7DKF, to be active as ZK1DKF from the Island of Rarotonga (OC-013) from October 28th to November 1st. Then from November 2-13th, he will move to the Island of Aitutaki (OC-083). Activity will be limited because he is on a holiday, but look for him on 30-10 meters SSB/PSK. QSL ONLY direct to SM7DKF: Ronnie Nilsson, Vaestra Haeggviksvaegen 12, SE-236 32 Hoellviken, Sweden. For more information on equipment and frequencies, visit his Web page at: http://www.sm7dkf.se/index-info.htm

The greatest danger of WHITE culture; is their
belief in the necessity of roguery, deception, thieving,
and extreme violence as a means of human uplift.

Yep, that's surely the reason all that genocide and inter-tribal violence takes place in Africa.

Or Pol Pot having millions of his countrymen killed. Now there was a real white boy.

It's just gotta be those white folk.

New evidence emerging in "BUSH WIRED" story - see the wire....

During the second Presidential debate on Friday, October 8th President Bush adjusted his tie; a gesture which exposed a black object contrasting a white shirt.

Look:

http://puppetstring.blogspot.com

Is it a wire?

Yeah, but it doesn't change the fact that you are a clueless moron and a
stinking top poster.

What I made was a request, which was not honored but a stupid moron such
as yourself could not make that distinction.

I worked a guy in West Virginia who tole me he got a
Masters Degree in engineering by taking correspondence
courses from DeVry. I dont see how that is possible.
Then I ask the same guy some questions about RMS
voltage and negative SWR and he didnt know a thing about
either. What he did tell me about negative SWR and RMS
voltage was all wrong. I wonder if I should take DeVry
correspondence courses? This guy in West Virginia sounds
like a nut. Every time I ask him a question, he would
reply with a stream of filthy curse words. It sounded like he
needs some lithium, maybe he ran out.

1772. K1MAN Hates Boy Scouts?

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-25 18:29:48 UTC
From: Anonymous <mix@itys.net>
Message-ID: <8462c7cb929883aab7897f0852d57ca7@itys.net>
Source record: 55984

On Baxters latest qrmcast, K1MAN
blames the boy scouts for being
on his frequency prior to his
bulletin and he says theyre
all guilty of committing felonies.

Lets imagine 60-80 Boy Scouts
appearing at K1MANs upcoming renewal
hearing to testify about Baxters interference
to their JOTA activity.

Boy Scout: "You see your honor,"
one youngster sobbed, "We
got permission to stay up late
to talk on the radio
and then this man interfered
with us."

Judge: "Which man?"

Boy Scout: "Right there your honor...
the ugly fat one."

Judge: "Do you mean to tell me
Mr. Baxter -
you repugnant piece of human trash - that you
DELIBERATELY INTERFERED
with these fine young children?"

Baxter: "No your honor, these little bastards are guilty of
interfering with me! They knew
my bulletin was about to come on!
They violated
the Gold Bond act. Theyre all
guilty, not me!"

Judge: "By your reasoning,
you fat slob,
any child crossing the street
when a bus is due to
happen by, would be
guilty of causing
a traffic accident. Any idiot knows the duty of the driver is
to avoid pedestrians,
regardless of his stupid schedule!"

Baxter: "But... your honor!"

Judge: "But nothing you pompous scum bag! How dare you But me
in my court room?"

Baxter: "But Judge, its that sniveling Punk Riley Hollingsworth
and his band of cronies
who are to blame here!"

Judge: "Ill tell you whos to
blame you stuttering faggot!
You pompous gas bag.
You ignorant masturbating bicycle seat sniffer. YOU are to blame Mr. Baxter
and no one else."

Baxter: "But, but, but, but..."

Judge: "Stop telling us about your
sexual preferences you simpering
idiot, Im about to
pass judgement here!"

Baxter: "Gulp (soiling his pants)
yes your honor."

Judge: "First, for jamming these fine
young scouts, you ought to be
horsewhipped and rolled in manure.
However, since thats not a valid penalty, Im going to uphold the $100,000 NAL imposed by
the FCC.
Next Im going to
deny your renewal, and prohibit
you from ever transmitting on
the ham bands again.
Third, If I ever see you again,
Ill have you brought up on
charges for impersonating a
human being! Now get the hell
out of my court room
you worthless shank of rancid hog bowel!"

Folks, thats just the short version
of what is about to happen to K1MAN.

Tune in next time
when we talk about
Walter Cronkite, who says Baxter
is a cause of serious damage to his
name and reputation!

K1MAN... finally tossed off
the air for his most repulsive act yet.

As the headline accurately reported:

K1MAN JAMS BOY SCOUTS

That shouldn't be all that shocking. If it was a "wire" it could have been for almost anything. Remember he is a "Sitting President" with all of the crazy security that goes with the job. It could have been something to do with that. You didn't see any overt signs of security while watching the debates on TV, but I'll bet you there was plenty you didn't see.

You know ex-ACTLY what I'm talking about because you're one of THEM. For years the mighty Liberty Net on 3950 has been the only thing that has kept us from being overrun by Jewish Bankers taking our jobs at Wal-Mart, Trilateralists forcing kids to have abortions EVEN IF THEY'RE NOT PREGNANT, and other One-Worlders. And you can't stand that, can you?

Sure you - I mean "they" - call themselves One-Worlders, but do they ever say WHICH WORLD? I'm not going to be SOULED to the Space Bankers, my friend. Give me liberty or give me Slack. Or Kill Me(TM). Pick up on it before it's too late.

Not to mention the UN-hired Heliopters(TM) in infrasonic Whisper Mode seeding the skies with "Chem Trail Helper," the Clintons, the coverup behind the FACT that the FCC's Riley Hollingsworth CASTS NO SHADOW and HAS NO PULSE, and so many more TRUTHZ that you want to suppress.

What in the name of the blood-'n'-pus-soaked sock of Kurt Schilling are trying to do? Ruin America? (show all work)

This is outrageous!

I am resigning my ARRL membership today.

The ARRL announced it is endorsing John Kerry for
president. I always knew the league was a leftist
organization, and now they have proved it by endorsing
Kerry. I predict a flurry of resignations. The ARRL really
stepped in it this time!

Bill Fane

William Tager blamed CBS & NBC stations in New York.
The frequencies would be the broadcast and news media
frequencies listed in Parts 73 & 74 of the FCC Rules.

Related Nonbroadcast Facilities: ULS Search:
http://svartifoss2.fcc.gov/reports/par_child.cfm

Type in the FCC Facility ID Number for the search value,
choose FAC ID Search for the search type.

Use the FAC ID "9610" for WCBS and "47535" for WNBC.

>> Mixed
>>
>> Mixed delusions are those characterized by two or more of persecutory,
>> grandiose, jealousy, erotomanic, or somatic themes.
>>
>> Causes & symptoms
>>
>> Some studies have indicated that delusions may be generated by
>> abnormalities in the limbic system, the portion of the brain on the inner
>> edge of the cerebral cortex that is believed to regulate emotions. The
>> exact source of delusions has not been conclusively found, but potential
>> causes include genetics, neurological abnormalities, and changes in brain
>> chemistry. Delusions are also a known possible side effect of drug use
>> and
>> abuse (e.g., amphetamines, cocaine, PCP).
>>
>> Diagnosis
>>
>> Patients with delusional symptoms should undergo a thorough physical
>> examination and patient history to rule out possible organic causes (such
>> as dementia). If a psychological cause is suspected, a mental health
>> professional will typically conduct an interview with the patient and
>> administer one of several clinical inventories, or tests, to evaluate
>> mental status.
>>
>> Treatment
>>
>> Delusions that are symptomatic of delusional disorder should be treated
>> by
>> a psychologist and/or psychiatrist. Though antipsychotic drugs are often

>> not effective, antipsychotic medication such as thioridazine (Mellaril),
>> haloperidol (Haldol), chlorpromazine (Thorazine), clozapine (Clozaril),
>> or
>> risperidone (Risperdal) may be prescribed, and cognitive therapy or
>> psychotherapy may be attempted.
>> If an underlying condition such as schizophrenia, depression, or drug
>> abuse is found to be triggering the delusions, an appropriate course of
>> medication and/or psychosocial therapy is employed to treat the primary
>> disorder. The medication, typically, will include an antipsychotic agent.
>>
>> Prognosis
>>
>> Delusional disorder is typically a chronic condition, but with
>> appropriate
>> treatment, a remission of delusional symptoms occurs in up to 50% of
>> patients. However, because of their strong belief in the reality of their
>> delusions and a lack of insight into their condition, individuals with
>> this disorder may never seek treatment, or may be resistant to exploring
>> their condition in psychotherapy.
>>
>>
>>
>> So Doug, IF you get proper help, there is hope you can rejoin the planet.
>>

> that is why he will never stop, and you guys will always be keyclowns,
> a title you deserve for your stupidity. OK now post some tiny url you
> spent hours googling for LOL

You are the ONLY one here whom spends hours Googling. I don't give a shit. But please, be my guest and explain how, in your infinite wisdom, I have made Doug Adair, N8WWM the nutcase/psycho/demented/delusional nutjob that he is. This should really be interesting. I'm not a keyclown, any more than you are, but Doug is truly a nutjob, and that fact cannot be denied. If you have doubts, please reread the post above. It is a very clear and concise medical definition. It fits Mr. Adair to a "t". It does not take a rocket scientist to realize your "friend" is truly fucked up, and the keyclowns will probably disown me for this, but I suspect you have realized the same. (remember the kudos you erroneously gave me?)

Actually, the point is that you are engaging in rank speculation with
no proof, and assuming that it is so because you want it to be so.
That's not a very smart thing to do is it?

No. Instead I'll listen to a bunch of bs spewed by people on a NG that keep changing their identity. Without a doubt THEY are much more credible.

Now run off and join the rest of the flock.

Don

Thank you for your modification of what my signature says.

You still have to ask yourself though what is the race of the vast majority of the Enron executives, World Com executives who bankrupted ATT for over 4 billion, and the other super criminals in the business world.

Ask yourself what is the race of over 90% of the people in congress?

What is the race of the commanders in chiefs who have given the orders to attack so so so many tiny, innocent countries around the world?

Perhaps black people would do the same thing IF... they were in power in Amerikkka and had total control as Bush does. Since they are not, and probably never will be, we can't put them into the equation with how most whites think.

Hence my signature

The greatest danger of WHITE culture; is their
belief in the necessity of roguery, deception, thieving,
and extreme violence as a means of human uplift.

See: http://www.zmag.org/zmag/articles/feb98herman.htm

My problem is that I have an Icom 706 MK-II, that won't power up.
When I push the power button I can hear a relay click in the radio,
and a thump in the speaker but that is it. I've checked the fuses
internal and external all are ok. Does anyone have any suggestions
as to a fix this problem?

Thanks in advance and 73's
CN8JV Chafik

Check the bottom left rear screw. It's probably loose.

These days these newsgroups have pretty much gone to spam and OT subjects.
I read them for the laugh value, and get my serious information from the
various sigs and Yahoo groups. Amateur radio newsgroups are going the way
of packet radio.

randy now read this slowly so you can understand it. it doesnt matter
who Doug is or what hes done or you think hes done. you and the other
keyclowns are obsessed with him, you talk about him when hes not
posting, you cant even forget him for one day. You guys are busy
forging posts from him, leg humping and sock puppeting. Now honest

randy dont you see anything unusual about all this activity you and the NG is devoting to Doug??instead of talking about cb or amps you are concetrating on N8. could it be he wants it that way?ROTFLMAO

1827. The RSCB - An organisations of Sick Perverts?

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-27 18:32:50 UTC
From: "Airy R. Bean" <me@privacy.net>
Message-ID: <2ua83lF26jjcbU1@uni-berlin.de>
Source record: 55839
Cross-posted to: alt.ham-radio,rec.radio.amateur.misc

In their latest edition of, "BadCon", the RSCB publish
two letters bemoaning the lowering of standards that has allowed
grown men to groom younger ladies over the air.

The reply from Peter Kirby, the RSCB's general manager says
that he is thankful that very few people have observed that.

Sorry, run that one past me again? He is thankful that the number
of people who have observed this foul behaviour are in the
minority?!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Why, can it be that he supports such foul behaviour - he doesn't
go on to condemn it at all, but justifies the presence of such
perverts as are complained of because it halted a decline in the
number of Radio Hams. Since when? In which year has there
been a decline in the number of Radio Hams?

Mr.Kirby seems to justify the grooming of young girls because there
have been 9000 "Newcomers" - at least he doesn't claim that they
are Radio Hams - (they're not - they're CBers), and, in fact, have done
nothing to halt the decline in Radio Hams that he posits, if there ever was
such a decline.

Justify? Certainly - he is replying to two letters whose main thrust was
a criticism of such grooming AND HE IS DEFENDING THE STATE OF
AFFAIRS THAT GAVE RISE TO SUCH GROOMING.

Mr.Kirby then says that, "over the past four decades most radio amateurs
were
ex-military trained engineers and operators;" Sorry, but that is absolute
bollocks. It's one thing to have a dubious case, but quite another
to adopt the Tony B. Liar approach to downright lying!

Mr.Kirby finishes by saying, "It seems to me that less
criticism and more encouragement should be the order
of the day". In response to what was criticism of the grooming
of young girls by older men, it makes Peter Kirby in particular
and the RSCB in general to seem very, very sick indeed.

-----ooooo-----

On the subject of sick perverts, how is it that Brian Reay G8OSN
continues to hold such a prominent position in the RSCB's hierarchy?
The record of the uk.radio.amateur shows Mr.Reay to be obsessed
by the subject of sheep shagging, a topic that he gratuitously
raised time and time again. Such an oft-published obsession surely is

sufficient
grounds to disbar Mr.Reay from any activity that involves
contact with children?

-----ooooo-----

IS THE RSCB COMPLETELY RIDDLED BY SEXUAL PERVERTS?

1828. WWVB reception indicator needed

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-27 18:58:27 UTC
From: Chuck Olson <chuckolson01@REMOVETHIScomcast.net>
Message-ID: <mdSfd.535150$8_6.469079@attbi_s04>
Source record: 55840

I recently bought a couple of La Crosse Technology digital clocks that are designed to start listening for the WWVB signal at 60 KHz at midnight, and every hour until 6AM. I have a ham transceiver IC-765 that receives down to 30
KHz (too bad they don't mention this fact in the specifications of the equipment) and I've been able to pick up the signal with a loopstick coil and resonant capacitor using a source follower interface to the receiver input, with some success, but I would like to qualify other locations in the house besides the immediate vicinity of the ham station - - hopefully more quickly than mounting the clock and waiting to see if it updates its setting.

Ideally, I would like to take apart a small WWVB sync-able clock and tap into its wiring with an LED driver so that I could see the LED flash in time with the 1 BPS carrier modulation. Has anyone tried anything like this, and is there a website that might show details of the conversion? I'm open to other ways to do it as well and welcome suggestions.

Thanks,

Chuck

Sure it does. Most religions don't recognize the Christian concept of
sin.

If one isn't Christian, and one does something Christianity
disapproves of, so what?

Just look at the records of the black leaders of African countries (or
tribes) for the past few hundred years.

Change "white" to "human" and you've got something. (Or maybe change
it to "anthropoid" to be more correct.)

So can't you just buy one of the clocks that has an indicated showing
that it is receiving the signal, and make sure it has a button to press
to get it to sync up on demand?

I got a Radio Shack clock back in February, regularly $30 here in Canada
but on sale at twenty. It has both. I got home about 5:30pm, put
in the batteries, pressed the button, and after a few minutes it did
indeed set to the proper time. I've moved it around, and there are locations
where it can't receive the signal, and the little marker on the LCD readout
is turned off.

Given that this was my first WWVB clock, I would expect every such clock
to have these features, or else they'd be inferior.

is it a modified rig ?
The specs for the IC765 indicate it will receive down to .1mhz (100khz) -
not 30khz
the "30" is the upper range (in mhz - not khz)
The website with the specs is here:
http://www.icomamerica.com/support/archive/amateur/ic-765.asp

Lots of rigs will receive below the spec bottom end but not very well.

1842. Re: WWVB reception indicator needed

Newsgroup: rec.radio.amateur.misc
Date: 2004-10-28 06:33:20 UTC
From: Chuck Olson <chuckolson01@REMOVETHIScomcast.net>
Message-ID: <Qo0gd.324687$3l3.307256@attbi_s03>
Source record: 55854

I don't think it was modified, but I didn't buy it new so it could have been. As I tune down past 100 KHz, it just keeps going, and when I hit 30 KHz it suddenly jumps to 30 MHz. I'm not complaining, of course - - just thought Icom could have been a little more realistic in their specification. I have the original product description folder as well as the operating manual, and neither mentions a 30 KHz to 30 MHz frequency jump. As far as how well it receives at that frequency, I can't measure it but it sounds fine - - with this resonant loopstick and source follower, I get WWVB at about S8 on the meter, but as expected, that changes with the propagation.

Michael, the feature of the RS clock you described doesn't show up in the clocks I've seen - - no button to press to start a sync-up sequence. But they do start a sync-up if the time setting is changed. A little switch button may be the modification that I wind up putting into one of these clocks if I can figure out how.

Thanks for all your comments.

I'm not sure I understand why HS is picking on Powell! The FCC was on
Stern's ass LONG before Powell got his job. It's probably a miracle that
Stern is still allowed on the air.

To believe the movie made of his life, he's come close many times to being
unemployed due to the FCC's pressure on the Stations.

Source record: 55862
Cross-posted to: aus.radio.amateur.misc,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi All,

I am after some information on the Tait T-377/PA/03 module.
This is fed by the Tait T-377/EX/02, via RF sense, and the main connections coming in the back are 2 sets of power connectors, as well as a single white wire.

The problem is I can not find any reference on what the white wire does, there is no extra connection to the exciter. First thinking was the wire was a RF sense to the exciter if there was a problem. Does not appear to be this.
The only thing I can think it is, is a power control switch????

Does anyone have any information on this module, and this wire??

I am currently waiting for the manual to arrive, from Tait, but would like to get most it working. It is very much like the other Tait equipment I have, so I can get 90% of it working without the manual.

Regards

Kevin.

You can catch the -real-Pot Belly Radio Police and the Redneck Roundup
any week night on ham radio 3.860 LSB at 8:00 PM Eastern Time.
They call themselves the Eastern Patriot Net. A friend of mine e-mailed
me and said to have a listen. Sho enuf there they were! All paranoid and
goofy as the crazy old John Bircher Lady who sees commies under
her bed or your 85 yo Auntie who uncle John keeps in the granny
cottage attached to the house under medication. Last evening's topic was
alleged 1000 Russian troops somewhere in North Carolina on an
military airbase. (...no doubt the resident male NC redneck militia is
worried
about this because those cute young 19-23 yo Russians don't have
beer-bellies
and chain smoke like their current 'merkin boyfriends do and will likely
end up
marrying their girlfriends in the long run when they move here, get a
college
degree and leave them with 10 times more income than any militialoon
trailer
trash bozo ever will be able to do!) The other topic-of-the-evening was a
rambling *15 minute long rant* by their resident cukoo-bird from Michigan
who went on to say how Kerry and Bush report to the Queen of England and
the Rothschilds (..or was it the Pope? I forget which) turning the USA into
some kind of a Plantation with the Jews running things. (sounded as 3
sheets to the
wind as usual, so it's sometimes hard logic to follow you see) Also said
how the
Virgin Mary appears to somebody and tells him all the nasty things the NWO
has
in store for us like microchips in our buttocks, and in flu shots, and cans
of green
beans on the Dollar Store shelf, and in Gillette razors that activate a
tracking
RFID code when you walk by the cable TV box etc...etc...Oyvey Mama
Macree..!
So be sure to toon in. (they also mentioned 7.275 as a daytime freq) You
won't
be dissapointed, it's *more chock full* of rusty nuts and bolts than is
Auntie Filomena's
1987 Ford Crown Vic sitting in her driveway down the street that her
deceased
hubby got for oh-such-a-deal at the Municipal Equipment Auction 10 years
ago...

(Batteries not included - Some assy required - Made in China) BELCH!!!!!

Why do you and Steven have to call people names?
I did answer your question. I said you didn't ask ME anything!
All I did was make a statement that you crossposted while bitching about
crossposting!
So I see You are the moron and Steven is the tard.
If you idiots would go back and read my first reply, all I said to you
was is it necessary to crosspost? are you saying it's ok for you to make
the rules but you don't need to follow them?

Amateur Radio Newsline(tm) Report 1420 - October 29, 2004

Amateur Radio Newsline report number 1419 with a release date of Friday, October 29, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL Executive Committee meets to discus the future of ham radio in the U-S-A and the next Solar Minimum may be a lot closer than you think. Find out more on Amateur Radio Newsline report number 1420 coming your way right now.

RESTRUCTURING: ARRL EC MEETS TO DISCUSS BANDWIDTH AND BPL

A draft of a petition to the FCC dealing with bandwidth regulation and the latest on the B-P-L front dominated a recent meeting of the ARRL Executive Committee held October 16 in Dallas, Texas. Amateur Radio Newsline's Bruce Tennant, K6PZW, takes an in-depth look at what was discussed:

--

At the Texas gathering, ARRL Executive Committee -- better known as the E C -- devoted much of its fall session to a discussion of comments received on the League's draft FCC petition seeking regulation of subbands by bandwidth rather than by emission mode. The E C also authorized the filing of a Petition for Reconsideration in response to the Broadband over Powerline Report and Order in ET Docket 04-37, which the FCC adopted October 14. But the E C acknowledges that the drafting and filing the petition must await release of the actual Report and Order, which should happen in a few weeks. It did however authorize ARRL General Counsel Chris Imlay, W3KD, to prepare to pursue other available remedies regarding procedural and substantive defects in the B-P-L proceeding.

Responding to a synopsis of the bandwidth petition and proposed rule changes posted on the ARRL Web site, several hundred League members and others in the ham radio community offered comments and suggestions. The good news says ARRL Chief Executive Officer David Sumner, K1ZZ, is that the

Executive Committee found considerable support for the concept of the petition. It also was happy to see some constructive suggestions to reduce both the impact of the changes on current amateur operations, as well as possible unintended consequences.

By way of background, earlier this year, the Executive Committee decided to make a synopsis and explanation of the petition available before filing it with the FCC. At the Dallas meeting, the E C agreed to submit several recommended amendments to the proposed rules changes to the ARRL Board of Directors for its consideration when they meet in January. These include such items as retention of rules permitting automatically controlled digital stations including packet and other digital modes in narrow H F subbands. The draft petition had proposed dropping these provisions.

Also in the digital domain the E C addressed a rule prohibiting so-called semi-automatic digital operation on frequencies below 28 MHz where phone is permitted. This addressed a concern that ''robot'' digital stations might take over the phone bands. And a segment for 3 kHz bandwidth with no phone emissions at 10.135 to 10.150 MHz to accommodate existing and planned digital operations was included.

Another item adopted was the deletion of the word "continuous" from the description of test transmissions authorized on most frequencies above 51 MHz. Lastly is simplification of proposed changes to Part 97.309 of the Commission rules. This, to clarify that FCC-licensed amateur stations may use any published digital code as long as other rules are observed.

The Leagues Dave Sumner emphasized that the recommendations address major issues raised to date but are not necessarily the last word on the draft petition.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The ARRL's bandwidth proposals take into account the League's prior ''Novice refarming'' petition to expand some High Frequency phone bands--included in the ''omnibus'' FCC Notice of Proposed Rule Making in WT Docket 04-140. (ARRL)

**

RESTRUCTURING: UK HAMS GET EXPANDED 40 METER PRIVILEGES

Hams in the U-K have been granted expanded privileges on the 40 meter band. Jeremy Boot, G4NJH, is in Nottingham, England, with more:

--

Ofcom and the Radio Society of Great Britain are pleased to announce that all necessary procedures required for early access to the 7.1 to 7.2MHz spectrum for all UK radio amateurs have been finalized and that access is allowed from 01.00 UTC on Sunday 31st October 2004. Early access is granted on a Secondary (non-interference) basis using a maximum of 26dBW (400 watts) PEP.

Notices of Variation for the U.K. Foundation, Intermediate and Full licenses have been published on the Ofcom website at http://tinyurl.com/4tuud. It is recommended that for the time being only voice and Morse code modes are used between 7.1 and 7.2MHz. Band planning issues on MHz will be kept under regular review and will be dependent on the number of administrations granting early access to this band prior to full Primary access on 29th March 2009.

Jeremy Boot, G4NJH.

--

Thanks Jeremy. (GB2RS)

**

RESTRUCTURING: AUSTRALIA LOOKS AR VOIP RULES

The Australian Communications Authority -- the A-C-A -- says that it is reviewing telecommunications regulations to cover fast-emerging voice over Internet protocol services. In a discussion paper released about a week and a half ago, the A-C-A says that it aims to identify any regulatory challenges resulting from the increased availability of VoIP services and recommend to the government how those challenges might be met. What affect any changes might have to ham radio VoIP interconnects in Australia is to early to assess at this time. (WIA News)

**

THE FUTURE: SCIENTISTS PREDICT EARLY SOLAR MINIMUM

And some possible god news for hams tired of the rather poor High Frequency band conditions these days. It comes from the GB2RS News Service which says that American physicist David Hathaway believes that the next solar minimum could arrive sooner than previously predicted.

GB2RS News quotes on an article on the 'Science at NASA' website. It predicts that the next solar minimum could occur in late 2006. That's about a year earlier than previously thought

Dr. Hathaway bases his prediction on data from the last eight solar cycles, which show that solar minimum follows the first sunspot-free day on the sun by 34 months. In this solar cycle, the first spotless day was on 28th January this year and more recently, on 11th and 12th October, there were two more spotless days.

Hathaway goes on to state that the next solar maximum might also come early. He is quoted as saying that solar activity intensifies rapidly after solar minimum. That in recent cycles, the Solar Max has followed Solar Minimum by just four years. If that is the case, the next solar maximum could be not all that far away in 2010 and a Solar Max is good news for D-Xing. (GB2RS)

ENFORCEMENT: CB AMP SALE BRINGS $7000 FINE

A North Jackson, Ohio equipment retailer has been dinged with a heavy fine. This for allegedly selling those illegal 11 meter amplifiers that the C-B crowd calls footwarmers.

The noted violations involve Paladen Communications sale of external Citizens Band radio frequency power amplifiers. In it's October 21st Forfeiture Order the FCC alleges that Paladen, which does business as the CB Shop, did willfully and repeatedly violate Section 302(b) of the Communications Act of 1934 and Sections 2.815(b) and 2.815(c) of the Commission's Rules by making these units available to the general public.

Paladen was issued the $7,000 fine back on May 27th. The FCC says the company never responded to the notice. Its now been given 30 days to pay or face collection proceedings. (FCC)

**

ENFORCEMENT: CB OPERATOR FINED $10,000 FOR UNLICENSED OPERATION

And using an illegal C-B amplifier will cost a Washington state operator some really big bucks. This as the FCC fines Robert A. Spiry of Tacoma 10,000 for what the FCC say was operating a radio station without Commission authorization. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

In its letter to Robert A. Spiry, the FCC claims that it found the amplifier as part of a follow-up investigation. This, after receiving numerous complaints from Spiry's neighbors.

On March 13th, April 2nd, October 29th and November 5th of 2002, agents from the Commission's Seattle, Washington Field Office concluded that the interference resulted from 11 meter transmissions originating from Spiry's residence and from his mobile station in his vehicle. During station inspections conducted on April 2nd and November 5th, 2002, the Seattle Office agents determined that Spiry was operating transmitters that were not FCC certified and that he was operating with a linear amplifier attached to his CB radio transmitter.

Spiry was advised that his use of unauthorized and non-certified equipment voided his blanket authority to operate his CB station. Nevertheless, the FCC says that he continued to operate the unauthorized equipment at the expense of his blanket authorization to operate his CB radio station.

On December 30th, 2002, the Seattle Office issued a Notice of Apparent Liability for Monetary Forfeiture in the amount of $10,000 to Spiry. In other words, a $10,000 fine.

In his January 15, 2003 response Spiry did not dispute the facts that lead to the fine. Instead he stated that he had ceased CB radio transmissions and had obtained an amateur radio license. The FCC database lists him as holding a Technician class license with the call sign KD7TRB. He also claimed to have removed his CB radio antenna and asserted that he was unaware that the amount of the forfeiture could be so high. He told the FCC that he was unable to pay that amount.

But in affirming the fine the FCC refers Spiry to Section 301 of the Communications Act. It says that no person shall use or operate any apparatus for the transmission of energy or communications or signals by radio within the United States without a proper license. The FCC says that Spiry's

2002 operation of his CB radio station with transmitters that were not FCC certified and use of a linear amplifier constitutes repeated violations. It also notes that his taking down the C-B antenna and getting a ham radio ticket are not sufficient actions to negate the punishment for the original offenses.

The FCC says that Robert Spiry has not provided it with adequate financial information from which to determine his ability to pay the forfeiture. Based on this lack of information cancellation or reduction of the $10,000 fine is not warranted and that it stands as is.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, Scottsdale, Arizona.

--

Spiry was given the usual 30 days to pay. If he fails to do so the FCC says that the matter may be turned over to the Department of Justice for further action. (FCC)

**

ENFORCEMENT: BROADCASTER FINED

The FCC has also issued an $8000 monetary forfeiture to Crown Communication, Inc. Cowner is the owner of an antenna structure in Hobbs, New Mexico. The FCC says that the fine is for willful and repeated violation of Section 17.50 of the Commission's Rules involving Crown's failure to maintain good visibility of the tower. The situation dates back to August 13, 2002, when an agent from the Denver Office inspected antenna structure and observed that unpainted cables attached to it precluded good visibility . (FCC)

**

ENFORCEMENT: NO LICENSE - STAY OFF THE AIR

The FCC has warned an unlicensed operator to stay off the air or face some heavy consequences. This, in a September 30th letter to Travis Lee Dameron of Stuarts Draft, Virginia.

In its warning to Dameron the FCC says that it has information indicating that he has been operating radio equipment without a license on the Two Meter Amateur Radio Band. It tells him that transmitting without a license is a violation of Section 301 of the Communications Act and will subject him to fine or imprisonment, as well as seizure of any non-certified radio transmitting equipment he may have in his possession.

Dameron was also requested to call the FCC's Riley Hollingsworth to discuss the matter. If Dameron fails to stay off the air, the fine he could face would range from $7,500 to $10,000. (FCC)

**

RADIO RULES: FRAUDULENT STATION APPLICATIONS FILED WITH FCC

Bob Gonsett's CGC Communicator reports that a number of fraudulent Form 301 applications have been filed with the FCC this month. CGC says that the agency has even accepted for filing a number of these fake applications, and has assigned them file numbers.

One application in question was for a conventional, non-grandfathered Class B FM station. The petitioner was asking for a transmitter power level of 105 kilowatts E-R-P. This, in a Class B zone where only 50 kilowatts is allowed without a waiver request. And says CGC, there was no waiver request.

CGC adds that it appears as if the Commission is not screening these incoming Form 301 applications. This, even when there are blatant defects in some. (CGC)

**

NAMES IN THE NEWS: MOLLY SCHREIBER DEPARTS AES

Some names in the news. First is Molly Schreiber of Amateur Electronic Supply graphic design and marketing department who has announced her departure after 7 years with the company. The reason. Molly says she is moving to what she calls the lovely west coast adding that she will miss everyone she has dealt with during her tenure at A-E-S. October 29th was her last day with the company. (Via E-Mail)

**

NAMES IN THE NEWS: W1BKR INDUCTED INTO BROADCASTING AD CABLE HALL OF FAME

And congratulations to Bill Baker, W1BKR, on his election into the Broadcasting & Cable Hall of Fame. Bill is the chief executive of New York Public Television, which includes WNET Thirteen which is New York's flagship public television station.

Bill Baker has been head of New York Public Television since 1987. During his tenure WNET has grown and prospered, creating new program standards such as Charlie Rose, Wide Angle, Religion and Ethics NewsWeekly, and the children's math mystery series Cyberchase. Baker also established the

station's Educational Resources Center, which has become America's most prolific teacher trainer in multi-media techniques, and developed its first cable channel known as MetroArts Thirteen.

Ham radio wise, W1BKR was a co-producer of the ARRL video Amateur Radio Today and his article titled Amateur Radio is Part of New Media Task Force appeared in the May issue of QST. The induction ceremony honoring W1BKR will take place on Monday, November 8th at the Waldorf Astoria Hotel in New York City. (Adapted from Shoptalk)

**

NAMES IN THE NEWS: N4MC "VANITY HQ" WEBSITE GOING AWAY

Also, Michael Carroll, N4MC, has announced that as of Thursday, October 21st he is no longer supporting the Vanity H Q website. Vanity H Q was, and for the moment still is, a point in cyberspace where you can go to research availability of United States vanity call availability or simply find out the latest issued.

According to a posting at the site, at some point in the near future the www.vanityhq.com domain will itself become inactive. N4MC says that this is not an action based upon lack of funding. Rather, its because of a shift in his personal priorities. (K2GW)

**

HAM RADIO INDUSTRY NEWS: NEW QRZ CD-ROM AVAILABLE

The 24th edition of the Q-R-Zed C-D ROM Ham Radio Callsign Database is about ready to start shipping. The disk contains the same 1.2 million callsigns found on the QRZ.com on-line database and you have the option of reading them from the DC ROM or installing them on your hard disk for lightning fast access. For ordering and shipping information simply point your web browser to www.qrz.com and click on the photo icon that says "New Q-R-Zed CD ROM" (QRZ)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America and here in Auckland, New Zealand, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE ARNEWSLINE SUPPORT FUND REPORT

Now with some good news here's Amateur Radio Newsline's Support Fund Administrator, Andy Jarema, N6TCQ.

--

In the month of August we heard from monthly contributor Joseph Bartzi, Jr, KC8DKF of Columbus, OH; From Indiana, the Huntington County Amateur Radio Society, K9HC: The Southwest Michigan Amateur Radio Team in Portage, K8KZO: Dean Carothers from the W4HPL repeater in Cookville, TN; Johnny Wallace, K5POP of San Antonio, TX; Albert Toering, N6TEZ of Anza, CA; Monthly contributor William Walters, WA2IBM, of San Jose; Monthly contributor Scott Hensley of the Area Communications Team, also in San Jose; Harold Hackman, W6HVH of Riverside, Brad Berryhill, WA6JJB of Anaheim Hills, The Westside ARC of Marina Del Rey and the Catalina Amateur Repeater Association, AA6DP.

A big thank you to everyone. Through your help we've been able to take care of all of the Young Ham of the Year award expenses, but of course, the newscasts go on. A reminder that Newsline is a 501c 3 California non-profit corporation. Information on how to support us is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. (ARNewsline(tm) Support Fund)

**

ON THE NET: JUNO FOLLOW-UP

An update now to our recent story on Internet provider Juno cutting out most of its free services using off-line mail handling software. And it comes thanks to some really intensive digging by one of our listeners who happens to be a Juno subscriber.

After hearing our story, John Vander Stel, WH6LY, of Grand Rapids, Michigan, took it upon himself to find out more. He says that contrary to our original story free account users will not have to go through another ISP to access their Juno E-mail after December 1st. He says that this was only made clear to him by digging into the F-A-Q about this change and then calling back to talk to another Juno phone rep. He

says that the even the first one he spoke with was not well versed in this change and provided improper information.

But all of John's work paid off for those of you who use Juno. The good news is that Juno access software will still allow the free account user to access the Internet and go to the Juno Webmail site to access their E-mail on-line. However, the time using that connection will be counted against their 10 free hours of connect time.

We have often said that you are all an important part of the Amateur Radio Newsline team. Our sincere thanks to John Vander Stel, WH6LY, who proves this once again. (WH6LY)

**

EMERGING TECHNOLOGY: WORLDS LARGEST NANOTUBES

The University of California at Irvine announced what it calls a breakthrough engineering discovery that is expected to have supercomputer and health care applications. This, as researchers at the Henry Samueli School of Engineering said they have synthesized the world's longest electrically conducting nanotubes. Nanotubes that are ten times longer than those previously created.

For those not aware, a nanotube is a memory unit made from carbon and consists of a graphite sheet seamlessly wrapped into a cylinder only a few nanometers wide. A nanometer is one billionth of a meter or about the size of 10 atoms strung together. The scientists who made them say that this discovery may lead to the development of extremely strong, lightweight materials and ultra dense nano-memory arrays for extremely powerful computers, ultra low-loss power transmission lines, and nano-biosensors for use in health care applications. (Science OnLine)

**

HAM RADIO IN SPACE: ISS HAM STATION TEMPORARILY QRT

Ken Ransom, N5HVO confirms that the ham radio station on board the International Space Station is back on thr air in packet mode. It had been off for several days without explanation but on Wednesday, October 19th, Astronaut Leroy Chow, KE5BRW, was able to check on the radio first thing today and resolved a minor setting discrepancy. Information on its operation is on-line at www.ariss.net and www.issfanclub.com. (M5HVO)

**

WORLDBEAT: FIRST STORE AND FORWARD IN UK

Turning to he internatioal desk, word from the United Kingdom that its first unattended 'store and forward' single frequency voice relay has become operationl. It as switched on at 13.30 UTC on Saturday October 16th on 70.4375 MHz in he Europen 4 meter band. Its call sign is M-B-7-F-M and it has a maximum 'store' time of 120 seconds. The installation is located in the Chiltern Hills with 10dBW Effective Radiated Power from a dipole antenna 32 meters above ground. (GB2RS)

**

WORLDBEAT: HAM RADIO SAILING THE ANTARCTIC

Call this one ham radio across the Antarctic. It started back on September 14th, when the famed yacht "Apostol Andrey" started out to circumnavigate the area while carrying an operational ham radio station.

During the trip the yacht will travel around the shores of the Antarctica without going further to the North beyond the 60th parallel which is the border of the Antarctic region in accordance with the International Agreement. The crew will try to establish a record for penetrating sailing yachts crossing the 70th parallel of the south latitude.

And for ham radio here's the best part. The skipper of the "Apostol Andrey" is Nikolay Andrey, R3AL. He plans to be on the air from the Antarctic area starting this December and continuing through March of 2005. Andrey has the QSL cards already printed for this expedition and the ship also has an official Russian postmark onboard and a special postal stationary envelope for this expedition.

For details on the World-Wide Antarctic Program and the expedition, go to the World-Wide-Web. The spot is in cyberspace at www.ddxc.net/wap (Via E-mail)

**

DX

In D-X, word that VA6JWT is now in Somaliland. He says that he expects to be there for at least six months and plans to operate as 6O0JT. (RSGB)

And F5PSA is in Cameroon until February of 2006. He is operating as TJ3SL in his spare time. (OPDX)

Lastly, G4JAG, is now active from Thailand as HS0ZFP. Chris can be found on 20 meters most evenings and says the best time for contacts back home to the U-K is around 18.00 UTC. For all of these stations, QSL as directed on the air. (RSGB)

**

THAT FINAL ITEM: HAM RADIO HISTORY - A ZL MILESTONE QSO

And finally this week, a bit of history from right here, down-under. Its the story of the first ever two-way radio communication between New Zealand and England made on the 18th of October 1924 by Frank Bell of Shag Valley Station, Otago.

Back then, Frank held the callsign Z4AA and on that date, using some rather primitive home-brew ham radio equipment, he made contact with Cecil Goyder, G2SZ at the Mill Hill school in London. The CW QSO lasted for about 1 hour and dealt mainly with issues of signal quality. It was also the start of the first scheduled contact -- or sked -- between hams in the two nations. For several nights after the historic contact the two radio amateurs kept in touch.

Further details of the activities leading to the historic QSO can be found on pages 40-41 of the NZART publication Ham Shacks, Brass Pounders & Rag chewers, A History of amateur Radio in New Zealand. Detailed information on the actual QSO, complete with a transcript, can be found on the web pages of the Otago, Branch 30 of NZART. To read them, just point your browser to www.qsl.net/zl4aa/ and follow the index for more. (NZART News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, in Auckland, New Zealand saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 23rd/October, through Friday, 29th/October there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5A, 5B, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VK9X, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V8, TUNISIA (IOTA Op). Andy, DJ7IK, will be on holiday on the Kerkennah Islands (AF-073). His activity will take place during the CQ WW DX CW Contest (November 27-28th). He will sign 3V8SF/p and be active in the contest as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via DJ7IK (QRZ.com address).

40 METERS NEWS. Effective at 0100z, October 31st, the 40 meter band for UK amateurs in the British Isles will effectively double in size when radio amateurs there gain access to 7100 to 7200 kHz.

5U, NIGER. Bull, 5U7JB, is expected to be active during the CQ WW DX SSB Contest (October 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via ON5NT.

5U, NIGER. The VooDoo Contest Group will again be active as 5U5Z in the CQ World-Wide DX CW Contest on November 27-28th. They will operate from Niamey, the capital of Niger, in the Multi-Multi category with seven stations. Operators will be: G0MTN, G3PJT, G3SXW, G4BWP, G4PIQ, K5VT, KC7V and N7NG. QSL via G3SXW; E-mail requests for bureau go to: G3SXW@compuserve.com
Immediately before the contest there may be some activity (including maybe WARC bands and six meters) with operators personal callsigns. There is also the possibility of some activity from XT2 while in transit.

6O, SOMALIA. Silvano, I2YSB, informs OPDX that operators Andrea/IK1PMR, Marcello/IK2DIA, Adriano/IK2GNW, Giuseppe/IK2WXV, Riccardo/IZ5BRW and himself will be active from Galkacyo in the autonomous area Puntland between February 3-17th, 2005. The callsigns to be used are: 6O0G for SSB (QSL Manager IK2GNW) and 6O0CW for CW/RTTY (QSL Manager I2YSB). The Bureau Manager is M5AAV. They will have 2 stations active on all the frequencies. Silvano states, "One of the main aims of this DXpedition is to bring ham equipment to the Somali radio amateurs, fostering in a concrete way the development of amateur radio in the country. To this end, we shall donate yagi antennas, verticals, dipoles, HF and VHF/UHF tranceivers, power supplies, a laptop, coax and accessories for the operation of one or two stations at the local radio club. We are investing all our efforts to make such a difficult and exotic country regularly active on the bands, so as to provide all hams worldwide a better possibility to get a rare new one." Donations towards the expenses of the DXpedition and helping in the procurement of the equipment to be donated are highly welcome. If interested in helping, please send donations to: Silvano Borsa, P.O.Box 45, 27036 Mortara, Italy. You can also contact Silvano via E-mail at: i2ysb@i2ysb.com
For other information, please visit the Web page at: http://www.i2ysb.com

7Q, MALAWI (Update). Allan, G0IAS, provided OPDX with another update on Les, 7Q7LA. By the time you read this, Les should be in Malawi and is expected to be there for at least 3 months. His first job when he gets there is to get together with Harry, 7Q7HB, and load up the Tower at Club Mak. Les says there will be plenty of activity on the low bands. "IF" there is "Propagation"... and that the Seasonal Rains don't make things too noisy. Operating schedule is forthcoming. REMEMBER, QSL DIRECT ONLY to G0IAS.

A5, BHUTAN (Update/QSL Correction). The members of the Clipperton DX Club, composed namely of Gerard/F2VX, Jean-Louis/F9DK, Vincent/G0LMX and Alain/F5LMJ, are now active as A52CDX. Look for the team to be active during the CQWW SSB Contest. The team will be there until November 11th. For more details, please refer to OPDX.682. QSL CORRECTION: In last week's bulletin, there was a typo for the QSL Manager. The correct QSL Manager is F9DK (not F9DX). QSL via F9DK, either direct or via the French REF Bureau. For more info, visit the Web page at: http://www.cdxc.org/dxp/2004-Bhoutan/a5-en.htm

CO8, CUBA. Juan, CO8TW, will be in the next CQWW DX SSB Contest as a Single-Op/Single-Band (20m)/Low-Power entry. QSL is via IZ8CCW and the log will be online after the contest at: http://www.qsl.net/co8tw/ Also, active in the contest will be Eduardo, CO8LY, as Single-Op/Single-Band (15m)/Low-Power. QSL via EA7ADH.

EA8, CANARY ISLANDS. Tomas, LY1DF, will be active as EA8/LY1DF during the CQ WW DX CW Contest (November 27-28th) possibly as a Single-Op/All-Band or Single-Band entry. QSL via LY1DF. He will concentrate on the low bands and will also be active on CW a few days before and after the contest.

EY, TAJIKISTAN. By the time you read this, Jacques/F5LYF and Jean Louis/F5NHJ are expected to be active as EY/F5NHJ until March 2005. Activity will be on HF and 6 meters, mainly CW. QSL via F5NHJ.

HI3, DOMINICAN REPUBLIC. Mike, GW3UOF, will be active from here as GW3UOF/HI3 between November 28th and December 12th. He states that he has already received his licence. Activity will be mainly CW on all bands 160-10 meters, but some SSB and all digital modes will be used. QSL direct to his home callsign, GW3UOF, or via the RSGB bureau.

INDEXA ELECTION RESULTS. A press release from the International DX Association (INDEXA) announces their election results for 2004-2005:
President: Judy Roush, AA7UC
Vice President: Ron Wright, ZL1AMO
Secretary-Treasurer: Bill Jennings, W4UNP

Directors:
Richard Grant, W9RG, Chairman
Ron Wright, ZL1AMO
Franz Langner, DJ9ZB
Nellie Saltiel de Lazard, XE1CI

Executive Committee:
Judy Roush, AA7UC
Bill Jennings, W4UNP
Ron Wright, ZL1AMO

For more details on the International DX Association (INDEXA), write to P.O. Box 607, Rock Hill, SC 29731 USA or visit the Web page at: http://www.indexa.org

IOTA NEWS.....
AS-074. Ian, 9M2/G3TMA, will be operating from Pulau Ketam from November 13-15th. QSL via Ian Buffham, Bekay Court, Lorong Enau (off Jalan Ampang), 55000 Kuala Lumpur, Malaysia.

NA-183. Porfirio, XE1HPT (Leader of the DXpedition) and a group of XE ham operators will be operating from Ixtapa Island. They will be on the air with the special callsign 6F1IHF from February 6-13th. Activity is planned for all HF bands CW/SSB. QSL via Porfirio Lomeli, P.O. BOX 7177, Morelia, Mich 58262, Mexico.

SA-024. Look for PY2ZX/PY2 and PU2OCZ/PY2 to be active from Comprida Island (DIB: 021), southern State of Sao Paulo, Brazil (Grid Locator: GG64BX), from November 13-15th. Activity will mainly be on 50, 144 and 440 MHz (CW/SSB/FM). For scheds, send E-mail to: py2zx@terra.com.br
QSL PY2ZX via direct. QSL PU2OCZ via bureau or direct.

J7, DOMONICA (Update to OPDX.682). Denis, K7GK, who will be active as J79A in the CQ WW DX CW Contest (November 27-28th), informs OPDX that he will be in Dominica from November 25-29th. He plans to be active on all HF bands (160-10m) with low power concentrating on the CQWW CW Contest with limited time, operating CW and SSB before and after the contest. All antennas are field-day style - 3-bander for 10/15/20 and wires for lower bands. QSL via K7GK.

JT, MONGOLIA. Khos, JT1CD, reports that the JTDXA team will be active as JU1DX during the CQ WW DX SSB Contest. Operators are: JT1BV, JT1BJ, JT1BL, JT1BZ, JT1CJ, JT1CZ, JT1DR and Davka. QSL via JT1BV.

JW, SVALBARD. Erik, LA2VOA, will be active as JW2VOA now through November 25th, from Bear Island (IOTA EU-027). Activity will be on 80-10 meters, including the WARC bands, mainly SSB. QSL via LA2VOA (QRZ.com).

LX, LUXEMBOURG. Les, G3VQO, will be active as LX/G3VQO in the next CQ WW CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. Look for him to be active before the contest, November 26th, on the WARC bands CW. QSL via his home callsign, direct or via the RSGB bureau.

P4, ARUBA. Look for John/W6LD, Rich/N6XI and possibly two other operators to be active as P40L during the CQ WW DX CW Contest (November 27-28th) as a Multi-Single. QSL via K5WW.

PACIFIC DXPEDITION. Michel/F6COW, Dominique/F6EPY and Radi/F6GNZ will be on a DX vacation from the following locations:
* Rarotonga, South Cook (ZK1/S, IOTA OC-013, Zone 32) from November 24th to December 9th, 2004, as ZK1COW, ZK1EPY and ZK1GNZ.

* Hiva Hoa, Marquesas Islands, French Polynesia (FO/M, IOTA OC-027, Zone 31) from December 11th to December 23rd, 2004, as FO/F6COW, FO/F6EPY and FO/F6GNZ
Operation will be mostly on CW and SSB with some digital modes (PSK31, RTTY, SSTV) on demand. A priority will be given to the low bands (3.5 Mhz,

7 Mhz, some 1.8 Mhz if conditions are acceptable). Suggested operating frequencies will be:
CW - 3515, 7015, 10118, 14015, 18095, 21015, 24905 and 28015
SSB - 3780, 7075, 14215, 18135, 21215, 24985 and 28465
Digital- 7035, 10145, 14085, 21085 and 28085

Their equipment will be:
Antennas: Butternut HF9VX with elevated resonant radials + Butternut HF2V with elevated resonant radials

Station 1: ICOM 756 PRO II (Main) + ICOM 706 Mk IIG (Spare)
Ampli 1: ACOM 1000
Station 2: ICOM 706 Mk IIG (Main) + ICOM 706 (Spare)

QSL via their home callsign. For more information, please visit their Web site at: http://perso.wanadoo.fr/dominique.auprince/

QSL INFO AND NEWS.....
Fred, G4BWP, announced on the "GoList Mailing List" that the following logs are now on the LoTW: G4BWP, GQ4BWP, G4MBC, GX4MBC, M6Z, M7Z, M8Z, MB2HFC, 9G5FH, 5U7WP and XT2WP. He adds that all the logs were uploaded over the past weekend, except MB2HFC (waiting for files) and his own (G4BWP) log for the past month of October (uploaded at month's end).

Jorge Riga, LU3XQO, from Tierra del Fuego in Argentina, informs OPDX that Patrick, WD9EWK, is now his QSL Manager. WD9EWK can receive cards directly or through the QSL Bureau and has updated information at: http://qsl.wd9ewk.net/

Cesar, PY2YP, announced on the "GoList Mailing List" that the following logs are now on the LoTW: PY9UC, ZZ2Z and PY2YP. Last upload was September 29, 2004.

NOT THE MANAGER. The QSL Manager for the French special event callsign TM8POR is F8ADJ (and not F6KWP).

Mike, KQ0B, states that the ZY0K cards for the Fernando de Noronha operation October 12-14th, 2004, will be ready for mailing when he gets back to his home in the USA on November 5th. He says, "I am aware I have cards waiting at home QTH. Please allow for a few days after my return to organize and begin mailing." QSL route for ZY0K via KQ0B is good in QRZ or callbooks: Michael W. Elliott, 6701 Blossom view Drive, Florissant, Missouri 63033 USA. QSL via the Bureau or direct is no problem (If you QSL direct kindly SASE).

SPECIAL EVENT. To celebrate the 150th anniversary of the famous French poet Arthur Raimbaud's birth, the Charleville-Mezieres area hams will be active as TM8RIM until November 3rd. Activity will be on CW and SSB. QSL via F0EHB.

SPECIAL EVENT. The Ballarat Amateur Radio Group (BARG) will be operating a special event station VI3BML from November 27th through December 5th. Activity will be on all bands and modes. Station VI3BML is on the air

to celebrate the 150th anniversary of the rebellion at the Eureka Stockade, famous in Australian history. QSL via the bureau or VK3BML. Further information can be found at: http://www.barg.org.au

SZ1, GREECE. Kostas, SV1DPI, reports that the Radio Amateur Association of West Greece (RAAWG) will participate in the CQWW DX SSB Contest as a Multi-Single/High-Power effort with the club's callsign SZ1A. QSL via the bureau is "OK" or via RAAWG, PO Box 84, 30100 Agrinio, Greece. Also, LoTW is "OK" too.

VK3, AUSTRALIA. Tony, VK3TZ, will be operating in the CQWW DX SSB Contest as a Single-Op/Multi-Band/High Power entry. His activity this weekend will be from a scout station with monbanders for 10, 15 and 20 meters at 80 ft. He will have two loop antennas on 40 meters at 80 ft. and an 80m at 80 ft. He will also have some rippletech slopers and sloper arrays on 80m and 160m. He hopes to have a good signal from Zone 30 on all bands for a new "Multi" for most of you. Tony states, "Don't forget the LP from VK on 20m at around 2100z to USA and Caribbean."

VK9A, COCOS-KEELING ISLAND. The VK Contest Club (VKCC), VK2IA, will be active as VK9AA in the CQWW DX CW Contest (November 27-28th) as a Single-Op /All-Band entry. QSL via DL8YR.

VP2, MONTSERRAT. Trond, LA9VDA, will be active as VP2MLA from Montserrat Island (NA-103), November 19-30th. Activity will be on all bands 160-10 meters; please look for him on the usual DX frequencies. Modes will be CW/SSB/RTTY. Trond will also be active in the CQWW DX CW Contest. QSL via his home call. More info is available on the Web page at: http://home.online.no/~andreask/la9vda/

ZX0, ANTARCTICA. OPDX was informed that Roberto, PT2GTI, is in southern Brazil and will be leaving for the Antarctica on October 30th or 31st. He is expected to be on the air between November 11/12th to November 17/18th possibly as ZX0GTI or ZX0ECF. QSL via PT2GTI.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 30-31st, 2004)

Thanks to Bill, NG3K, for providing OPDX readers the following consolidated listing of the participants in the 2004 CQWW SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/cqs2004.html

One thing to remember, whether it's BPL or anything else: for whatever Bush has failed us, at least he is a known quantity, and he has a track record. Kerry has never had the job, so be sure to judge him on his history, not on what he *might* do.

Editorially speaking, as someone from this part of the world (I live in NH and work in Mass), Kerry will say anything that is convenient. I'm worried about my radios and my guns. I use both for pleasure and for protecting my family and country. You can go to howstuffworks.com to see how each of these guys has voted about those issues, as well as any other subjects you might be interested in.

I sent George Bush an email about a ham radio subject last year. I got an answer, although not the position that I wanted to hear.

I sent John Kerry an email about the same subject. I got no response other than the knee-jerk one that said "we have received your email..."

We need to keep ham radio alive. It could be eliminated with the stroke of a pen -- it has been shut down in the past. If BPL comes to life, we could be the "hobby that used to be".

These guys don't know what ham radio is, or how valuable it is to the USA and the whole world (how soon they forget after the hurricanes this past summer!).

Guys, use your energy and tech abilities to let the candidates, and elected ones, to know that we are here, we volunteer, and we vote. Not just the 35% of eligible voters; I'm talking about 100% of hams going to the polling place (and 100% of gun owners, of which there is a very large overlap).
